PREFACE.

IT is the fate of those who toil at the lower employments of life, to be rather driven by the fear of evil, than attracted by the prospect of good; to be exposed to censure, without hope of praise; to be disgraced by miscarriage, or punished for neglect, where success would have been without applause, and diligence without reward.

Among these unhappy mortals is the writer of dictionaries; whom mankind have considered, not as the pupil, but the slave of science, the pioneer of literature, doomed only to remove rubbish and clear obstructions from the paths through which Learning and Genius press forward to conquest and glory, without bestowing a smile on the humble drudge that facilitates their progress. Every other author may aspire to praise; the lexicographer can only hope to escape reproach, and even this negative recompense has been yet granted to very few.

I have, notwithstanding this discouragement, attempted a Dictionary of the *English* language, which, while it was employed in the cultivation of every species of literature, has itself been hitherto neglected; suffered to spread, under the direction of chance, into wild exuberance; resigned to the tyranny of time and fashion; and exposed to the corruptions of ignorance, and caprices of innovation.

When I took the first survey of my undertaking, I found our speech copious without order, and energetick without rules: wherever I turned my view, there was perplexity to be disentangled, and confusion to be regulated; choice was to be made out of boundless variety, without any established principle of selection; adulterations were to be detected, without a settled test of purity; and modes of expression to be rejected or received, without the suffrages of any writers of classical reputation or acknowledged authority.

Having therefore no assistance but from general grammar, I applied myself to the perusal of our writers; and noting whatever might be of use to ascertain or illustrate any word or phrase, accumulated in time the materials of a dictionary, which, by degrees, I reduced to method, establishing to myself, in the progress of the work, such rules as experience and analogy suggested to me; experience, which practice and observation were continually increasing; and analogy, which, though in some words obscure, was evident in others.

In adjusting the ORTHOGRAPHY, which has been to this time unsettled and fortuitous, I found it necessary to distinguish those irregularities that are inherent in our tongue, and perhaps coeval with it, from others which the ignorance or negligence of later writers has produced. Every language has its anomalies, which, though inconvenient, and in themselves once unnecessary, must be tolerated among the imperfections of human things, and which require only to be registered, that they may not be increased, and ascertained, that they may not be confounded: but every language has likewise its improprieties and absurdities, which it is the duty of the lexicographer to correct or proscribe.

As language was at its beginning merely oral, all words of necessary or common use were spoken before they were written; and while they were unfixed by any visible signs, must have been spoken with great diversity, as we now observe those who cannot read to catch sounds imperfectly, and utter them negligently. When this wild and barbarous jargon was first reduced to an alphabet, every penman endeavoured to express, as he could, the sounds which he was accustomed to pronounce or to receive, and

vitiated in writing such words as were already vitiated in speech. The powers of the letters, when they were applied to a new language, must have been vague and unsettled, and therefore different hands would exhibit the same sound by different combinations.

From this uncertain pronunciation arise in a great part the various dialects of the same country, which will always be observed to grow fewer, and less different, as books are multiplied; and from this arbitrary representation of sounds by letters, proceeds that diversity of spelling observable in the *Saxon* remains, and I suppose in the first books of every nation, which perplexes or destroys analogy, and produces anomalous formations, that, being once incorporated, can never be afterwards dismissed or reformed.

Of this kind are the derivatives *length* from *long*, *strength* from *strong*, *darling* from *dear*, *breadth* from *broad*, from *dry*, *drought*, and from *high*, *height*, which *Milton*, in zeal for analogy, writes *highth; Quid te exempta juvat spinis de pluribus una?* to change all would be too much, and to change one is nothing.

This uncertainty is most frequent in the vowels, which are so capriciously pronounced, and so differently modified, by accident or affectation, not only in every province, but in every mouth, that to them, as is well known to etymologists, little regard is to be shown in the deduction of one language from another.

Such defects are not errours in orthography, but spots of barbarity impressed so deep in the *English* language, that criticism can never wash them away: these, therefore, must be permitted to remain untouched; but many words have likewise been altered by accident, or depraved by ignorance, as the pronunciation of the vulgar has been weakly followed; and some still continue to be variously written, as authors differ in their care or skill: of these it was proper to inquire the true orthography, which I have always considered as depending on their derivation, and have therefore referred them to their original languages: thus I write *enchant, enchantment, enchanter*, after the *French*, and *incantation* after the *Latin;* thus *entire* is chosen rather than *intire*, because it passed to us not from the *Latin integer*, but from the *French entier.*

Of many words it is difficult to say whether they were immediately received from the *Latin* or the *French*, since at the time when we had dominions in *France*, we had *Latin* service in our churches. It is, however, my opinion, that the *French* generally supplied us; for we have few *Latin* words, among the terms of domestick use, which are not *French;* but many *French*, which are very remote from *Latin.*

Even in words of which the derivation is apparent, I have been often obliged to sacrifice uniformity to custom; thus I write, in compliance with a numberless majority, *convey* and *inveigh, deceit* and *receipt, fancy* and *phantom;* sometimes the derivative varies from the primitive, as *explain* and *explanation, repeat* and *repetition.*

Some combinations of letters having the same power, are used indifferently without any discoverable reason of choice, as in *choak, choke; soap, sope; fewel, fuel*, and many others; which I have sometimes inserted twice, that those who search for them under either form, may not search in vain.

In examining the orthography of any doubtful word, the mode of spelling by which it is inserted in the series of the dictionary, is to be considered as that to which I give, perhaps not often rashly, the preference. I have left, in the examples, to every author his own practice unmolested, that the reader may balance suffrages, and judge between us: but this question is not always to be determined by reputed or by real learning; some men, intent upon greater things, have thought little on sounds and derivations; some, knowing in the ancient tongues, have neglected those in which our words are commonly to be sought. Thus *Hammond* writes *fecibleness* for *feasibleness*, because I suppose he imagined it derived immediately from the *Latin;* and some words, such as *dependant, dependent; dependance, dependence*, vary their final syllable, as one or another language is present to the writer.

In this part of the work, where caprice has long wantoned without control, and vanity sought praise by petty reformation, I have endeavoured to proceed with a scholar's reverence for antiquity, and a grammarian's regard to the genius of our tongue. I have attempted few alterations, and among those few, perhaps the greater part is from the modern to the ancient practice; and I hope I may be allowed to recommend

to those, whose thoughts have been perhaps employed too anxiously on verbal singularities, not to disturb, upon narrow views, or for minute propriety, the orthography of their fathers. It has been asserted, that for the law to be *known*, is of more importance than to be *right*. Change, says *Hooker*, is not made without inconvenience, even from worse to better. There is in constancy and stability a general and lasting advantage, which will always overbalance the slow improvements of gradual correction. Much less ought our written language to comply with the corruptions of oral utterance, or copy that which every variation of time or place makes different from itself, and imitate those changes, which will again be changed, while imitation is employed in observing them.

This recommendation of steadiness and uniformity does not proceed from an opinion, that particular combinations of letters have much influence on human happiness; or that truth may not be successfully taught by modes of spelling fanciful and erroneous: I am not yet so lost in lexicography, as to forget that *words are the daughters of earth, and that things are the sons of heaven.* Language is only the instrument of science, and words are but the signs of ideas: I wish, however, that the instrument might be less apt to decay, and that signs might be permanent, like the things which they denote.

In settling the orthography, I have not wholly neglected the pronunciation, which I have directed, by printing an accent upon the acute or elevated syllable. It will sometimes be found, that the accent is placed by the author quoted, on a different syllable from that marked in the alphabetical series; it is then to be understood, that custom has varied, or that the author has, in my opinion, pronounced wrong. Short directions are sometimes given where the sound of letters is irregular; and if they are sometimes omitted, defect in such minute observations will be more easily excused, than superfluity.

In the investigation both of the orthography and signification of words, their ETYMOLOGY was necessarily to be considered, and they were therefore to be divided into primitives and derivatives. A primitive word, is that which can be traced no further to any *English* root; thus *circumspect, circumvent, circumstance, delude, concave,* and *complicate,* though compounds in the Latin, are to us primitives. Derivatives, are all those that can be referred to any word in *English* of greater simplicity.

The derivatives I have referred to their primitives, with an accuracy sometimes needless; for who does not see that *remoteness* comes from *remote, lovely* from *love, concavity* from *concave,* and *demonstrative* from *demonstrate?* but this grammatical exuberance the scheme of my work did not allow me to repress. It is of great importance, in examining the general fabric of a language, to trace one word from another, by noting the usual modes of derivation and inflection; and uniformity must be preserved in systematical works, though sometimes at the expense of particular propriety.

Among other derivatives I have been careful to insert and elucidate the anomalous plurals of nouns and preterites of verbs, which in the *Teutonick* dialects are very frequent, and, though familiar to those who have always used them, interrupt and embarrass the learners of our language.

The two languages from which our primitives have been derived are the *Roman* and *Teutonick:* under the *Roman* I comprehend the *French* and provincial tongues; and under the *Teutonick* range the *Saxon, German,* and all their kindred dialects. Most of our polysyllables are *Roman,* and our words of one syllable are very often *Teutonick.*

In assigning the *Roman* original, it has perhaps sometimes happened that I have mentioned only the *Latin,* when the word was borrowed from the *French;* and considering myself as employed only in the illustration of my own language, I have not been very careful to observe whether the *Latin* word be pure or barbarous, or the *French* elegant or obsolete.

For the *Teutonick* etymologies I am commonly indebted to *Junius* and *Skinner,* the only names which I have forborn to quote when I copied their books; not that I might appropriate their labours or usurp their honours, but that I might spare a general repetition by one general acknowledgment. Of these, whom I ought not to mention but with the reverence due to instructors and benefactors, *Junius* appears to

have excelled in extent of learning, and *Skinner* in rectitude of understanding. *Junius* was accurately skilled in all the northern languages, *Skinner* probably examined the ancient and remoter dialects only by occasional inspection into dictionaries; but the learning of *Junius* is often of no other use than to show him a tract by which he may deviate from his purpose, to which *Skinner*, always presses forward by the shortest way. *Skinner* is often ignorant, but never ridiculous: *Junius* is always full of knowedge; but his variety distracts his judgment, and his learning is very frequently disgraced by his absurdities.

The votaries of the northern muses will not perhaps easily restrain their indignation, when they find the name of *Junius* thus degraded by a disadvantageous comparison; but whatever reverence is due to his diligence, or his attainments, it can be no criminal degree of censoriousness to charge that etymologist with want of judgment, who can seriously derive *dream* from *drama*, because *life is a drama, and a drama is a dream;* and who declares with a tone of defiance, that no man can fail to derive *moan* from μόνος, *monos*, *single* or *solitary*, who considers that grief naturally loves to be *alone*.*

Our knowledge of the northern literature is so scanty, that of words undoubtedly *Teutonick*, the original is not always to be found in any ancient language; and I have therefore inserted *Dutch* or *German* substitutes, which I consider not as radical, but parallel, not as the parents, but sisters of the *English*.

The words which are represented as thus related by descent or cognation, do not always agree in sense; for it is incident to words, as to their authors, to degenerate from their ancestors, and to change their manners when they change their country. It is sufficient, in etymological inquiries, if the senses of kindred words be found such as may easily pass into each other, or such as may both be referred to one general idea.

The etymology, so far as it is yet known, was easily found in the volumes where it is particularly and professedly delivered; and, by proper attention to the rules of derivation, the orthography was soon adjusted. But to COLLECT the WORDS of our language was a task of greater difficulty: the deficiency of dictionaries was immediately apparent; and when they were exhausted, what was yet wanting, must be sought by fortuitous and unguided excursions into books, and gleaned as industry should find, or chance should offer it, in the boundless chaos of a living speech. My search, however, has been either skilful or lucky; for I have much augmented the vocabulary.

As my design was a dictionary, common or appellative, I have omittted all words which have relation to proper names; such as *Arian, Socinian, Calvinist, Benedictine, Mahometan;* but have retained those of a more general nature, as *Heathen, Pagan*.

Of the terms of art I have received such as could be found either in books of science or technical dictionaries; and have often inserted, from philosophical writers, words which are supported perhaps only by a single authority, and which being not admitted into general use, stand yet as candidates or probationers, and must depend for their adoption on the suffrage of futurity.

* That I may not appear to have spoken too i rreverently of *Junius*, I have here subjoined a few specimens of his etymological extravagance.

BANISH, *religare, ex banno vel territorio exigere*, in *exilium agere*. G. *bannir*. It *bandire, bandeggiare*. H. *bandir*. B. bannen. Ævi medii scriptores bannire dicebant. V. Quoniam verò regionum urbiumq; limites arduis plerumq; montibus, altis fluminibus, longis deniq; flexuosisq: angustissimarum viarum amfractibus includebantur, fieri potest id genus limites *ban* dici ab eo quod Βανάται et Βάνναται Tarentinis olim, sicuti tradit Hesychius, vocabantur αἱ λοξοὶ καὶ μὴ ἰθυτενεῖς ὁδοι, "obliquæ ac minimè in rectum tendentes viæ." Ac fortasse quoque huc facit, quod Βανὸυς, eodem Hesychio teste, dicebant ὄρη σταγγύλη, montes arduos.

STAMMERER, Balbus, blæsus. Goth. STAMMS, A. S. ꝑtamep, ꝑtamuꝑ. D. stam. B. stameler. Su. stamma. Ist. stamr. Sunt a ϛωμυλεῖν vel ϛωμύλλειν, nimiâ loquacitate alios offendere; quod impeditè loquentes libentissimè garrire soleant; vel quòd aliis nimii semper videantur, etiam parcissimè loquentes.

The words which our authors have introduced by their knowledge of foreign languages, or ignorance of their own, by vanity or wantonness, by compliance with fashion or lust of innovation, I have registered as they occurred, though commonly only to censure them, and warn others against the folly of naturalizing useless foreigners to the injury of the natives.

I have not rejected any by design, merely because they were unnecessary or exuberant; but have received those which by different writers have been differently formed, as *viscid*, and *viscidity*, *viscous*, and *viscosity*.

Compounded or double words I have seldom noted, except when they obtain a signification different from that which the components have in their simple state. Thus *highwayman*, *woodman*, and *horsecourse*, require an explanation; but of *thieflike* or *coachdriver* no notice was needed, because the primitives contain the meaning of the compounds.

Words arbitrarily formed by a constant and settled analogy, like diminutive adjectives in *ish*, as *greenish*, *bluish;* adverbs in *ly*, as *dully*, *openly;* substantives in *ness*, as *vileness*, *faultiness*, were less diligently sought, and sometimes have been omitted, when I had no authority that invited me to insert them; not that they are not genuine and regular offsprings of *English* roots, but because their relation to the primitive being always the same, their signification cannot be mistaken.

The verbal nouns in *ing*, such as the *keeping* of the *castle*, the *leading* of the *army*, are always neglected, or placed only to illustrate the sense of the verb, except when they signify things as well as actions, and have therefore a plural number, as *dwelling*, *living;* or have an absolute and abstract signification, as *colouring*, *painting*, *learning*.

The participles are likewise omitted, unless, by signifying rather habit or quality than action, they take the nature of adjectives; as a *thinking* man, a man of prudence; a *pacing* horse, a horse that can pace: these I have ventured to call *participial adjectives*. But neither are these always inserted, because they are commonly to be understood, without any danger of mistake, by consulting the verb.

Obsolete words are admitted, when they are found in authors not obsolete, or when they have any force or beauty that may deserve revival.

As composition is one of the chief characteristicks of a language, I have endeavoured to make some reparation for the universal negligence of my predecessors, by inserting great numbers of compounded words, as may be found under *after*, *fore*, *new*, *night*, *fair*, and many more. These, numerous as they are, might be multiplied, but that use and curiosity are here satisfied, and the frame of our language and modes of our combination amply discovered.

Of some forms of composition, such as that by which *re* is prefixed to note *repetition*, and *un* to signify *contrariety* or *privation*, all the examples cannot be accumulated, because the use of these particles, if not wholly arbitrary, is so little limited, that they are hourly affixed to new words as occasion requires, or is imagined to require them.

There is another kind of composition more frequent n our language than perhaps in any other, from which arises to foreigners the greatest difficulty. We modify the signification of many words by a particle subjoined; as to *come off*, to escape by a fetch; to *fall on*, to attack; to *fall off*, to apostatize; to *break off*, to stop abruptly; to *bear out*, to justify; to *fall in*, to comply; to *give over*, to cease; to *set off*, to embellish; to *set in*, to begin a continual tenour; to *set out*, to begin a course or journey; to *take off*, to copy; with innumerable expressions of the same kind, of which some appear widely irregular, being so far distant from the sense of the simple words, that no sagacity will be able to trace the steps by which they arrived at the present use. These I have noted with great care; and though I cannot flatter myself that the collection is complete, I believe I have so far assisted the students of our language, that this kind of phraseology will be no longer insuperable; and the combinations of verbs and particles, by chance omitted, will be easily explained by comparison with those that may be found.

Many words yet stand supported only by the name of *Bailey*, *Ainsworth*, *Philips*, or the contracted *Dict.* for *Dictionaries* subjoined; of these I am not always certain that they are read in any book but the works of lexicographers. Of such I have omitted many, because I had never read them; and many I have inserted, because they may perhaps exist, though they have escaped my notice: they are, however, to be yet considered as resting only upon the credit of former dictionaries. Others, which I considered as useful, or know to be proper, though I could not at present support them by authorities, I have suffered to stand upon my own attestation, claiming the same privilege with my predecessors, of being sometimes credited without proof.

The words, thus selected and disposed, are grammatically considered; they are referred to the different parts of speech; traced, when they are irregularly inflected, through their various terminations; and illustrated by observations, not indeed of great or striking importance, separately considered, but necessary to the elucidation of our language, and hitherto neglected or forgotten by *English* grammarians.

That part of my work on which I expect malignity most frequently to fasten, is the *Explanation;* in which I cannot hope to satisfy those, who are perhaps not inclined to be pleased, since I have not always been able to satisfy myself. To interpret a language by itself is very difficult; many words cannot be explained by synonimes, because the idea signified by them has not more than one appellation; nor by paraphrase, because simple ideas cannot be described. When the nature of things is unknown, or the notion unsettled and indefinite, and various in various minds, the words by which such notions are conveyed, or such things denoted, will be ambiguous and perplexed. And such is the fate of hapless lexicography, that not only darkness, but light, impedes and distresses it; things may be not only too little, but too much known, to be happily illustrated. To explain, requires the use of terms less abstruse than that which is to be explained, and such terms cannot always be found; for as nothing can be proved but by supposing something intuitively known, and evident without proof, so nothing can be defined but by the use of words too plain to admit a definition.

Other words there are, of which the sense is too subtle and evanescent to be fixed in a paraphrase; such are all those which are by the grammarians termed *expletives*, and, in dead languages, are suffered to pass for empty sounds, of no other use than to fill a verse, or to modulate a period, but which are easily perceived in living tongues to have power and emphasis, though it be sometimes such as no other form of expression can convey.

My labour has likewise been much increased by a class of verbs too frequent in the *English* language, of which the signification is so loose and general, the use so vague and indeterminate, and the senses detorted so widely from the first idea, that it is hard to trace them through the maze of variation, to catch them on the brink of utter inanity, to circumscribe them by any limitations, or interpret them by any words of distinct and settled meaning; such are *bear, break, come, cast, full, get, give, do, put, set, go, run, make, take, turn, throw.* If of these the whole power is not accurately delivered, it must be remembered, that while our language is yet living, and variable by the caprice of every one that speaks it, these words are hourly shifting their relations, and can no more be ascertained in a dictionary, than a grove, in the agitation of a storm, can be accurately delineated from its picture in the water.

The particles are among all nations applied with so great latitude, that they are not easily reducible under any regular scheme of explication: this difficulty is not less, nor perhaps greater, in *English*, than in other languages. I have laboured them with diligence, I hope with success; such at least as can be expected in a task, which no man, however learned or sagacious, has yet been able to perform.

Some words there are which I cannot explain, because I do not understand them; these might have been omitted very often with little inconvenience, but I would not so far indulge my vanity as to decline this confession: for when *Tully* owns himself ignorant whether *lessus*, in the twelve tables, means a *funeral*

song, or *mourning garment;* and *Aristotle* doubts whether ουρεύς, in the Iliad, signifies a *mule*, or *muleteer*, I may surely, without shame, leave some obscurities to happier industry, or future information.

The rigour of interpretative lexicography requires that *the explanation, and the word explained, should be always reciprocal;* this I have always endeavoured, but could not always attain. Words are seldom exactly synonimous; a new term was not introduced, but because the former was thought inadequate: names, therefore, have often many ideas; but few ideas have many names. It was then necessary to use the proximate word, for the deficiency of single terms can very seldom be supplied by circumlocution; nor is the inconvenience great of such mutilated interpretations, because the sense may easily be collected entire from the examples.

In every word of extensive use, it was requisite to mark the progress of its meaning, and show by what gradations of intermediate sense it has passed from its primitive to its remote and accidental signification; so that every foregoing explanation should tend to that which follows, and the series be regularly concatenated from the first notion to the last.

This is specious, but not always practicable; kindred senses may be so interwoven, that the perplexity cannot be disentangled, nor any reason be assigned why one should be ranged before the other. When the radical idea branches out into parallel ramifications, how can a consecutive series be formed of senses in their nature collateral? The shades of meaning sometimes pass imperceptibly into each other; so that though on one side they apparently differ, yet it is impossible to mark the point of contact. Ideas of the same race, though not exactly alike, are sometimes so little different, that no words can express the dissimilitude, though the mind easily perceives it, when they are exhibited together; and sometimes there is such a confusion of acceptations, that discernment is wearied, and distinction puzzled, and perseverance herself hurries to an end, by crowding together what she cannot separate.

These complaints of difficulty will, by those that have never considered words beyond their popular use, be thought only the jargon of a man willing to magnify his labours, and procure veneration to his studies by involution and obscurity. But every art is obscure to those that have not learned it: this uncertainty of terms, and commixture of ideas, is well known to those who have joined philosophy with grammar; and if I have not expressed them very clearly, it must be remembered that I am speaking of that which words are insufficient to explain.

The original sense of words is often driven out of use by their metaphorical acceptations, yet must be inserted for the sake of a regular origination. Thus I know not whether *ardour* is used for *material heat*, or whether *flagrant*, in *English*, ever signifies the same with *burning;* yet such are the primitive ideas of these words, which are therefore set first, though without examples, that the figurative senses may be commodiously deduced.

Such is the exuberance of signification which many words have obtained, that it was scarcely possible to collect all their senses; sometimes the meaning of derivatives must be sought in the mother term, and sometimes deficient explanations of the primitives may be supplied in the train of derivation. In any case of doubt or difficulty, it will be always proper to examine all the words of the same race; for some words are slightly passed over to avoid repetition, some admitted easier and clearer explanation than others, and all will be better understood, as they are considered in greater variety of structures and relations.

All the interpretations of words are not written with the same skill, or the same happiness: things equally easy in themselves, are not all equally easy to any single mind. Every writer of a long work commits errours, where there appears neither ambiguity to mislead, nor obscurity to confound him; and in a search like this, many felicities of expression will be casually overlooked, many convenient parallels will be forgotten, and many particulars will admit improvement from a mind utterly unequal to the whole performance.

But many seeming faults are to be imputed rather to the nature of the undertaking, than the negligence of the performer Thus some explanations are unavoidably reciprocal or circular, as *hind, the female of*

the stag; stag, the male of the hind: sometimes easier words are changed into harder, as *burial* into *sepulture* or *interment, drier* into *desiccative, dryness* into *siccity* or *aridity, fit* into *paroxysm;* for the easies word, whatever it be, can never be translated into one more easy. But easiness and difficulty are merely relative, and if the present prevalence of our language should invite foreigners to this dictionary, many will be assisted by those words which now seem only to increase or produce obscurity. For this reason I have endeavoured frequently to join a *Teutonick* and *Roman* interpretation, as to CHEER, to *gladden,* or *exhilarate,* that every learner of *English* may be assisted by his own tongue.

The solution of all difficulties, and the supply of all defects, must be sought in the examples, subjoined to the various senses of each word, and ranged according to the time of their authors.

When I first collected these authorities, I was desirous that every quotation should be useful to some other end than the illustration of a word; I therefore extracted from philosophers principles of science; from historians remarkable facts; from chymists complete processes; from divines striking exhortations; and from poets beautiful descriptions. Such is design, while it is yet at a distance from execution. When the time called upon me to range this accumulation of elegance and wisdom into an alphabetical series, I soon discovered that the bulk of my volumes would fright away the student, and was forced to depart from my scheme of including all that was pleasing or useful in *English* literature, and reduce my transcripts very often to clusters of words, in which scarcely any meaning is retained; thus to the weariness of copying, I was condemned to add the vexation of expunging. Some passages I have yet spared, which may relieve the labour of verbal searches, and intersperse with verdure and flowers the dusty deserts of barren philology.

The examples, thus mutilated, are no longer to be considered as conveying the sentiments or doctrine of their authors; the word for the sake of which they are inserted, with all its appendant clauses, has been carefully preserved; but it may sometimes happen, by hasty detruncation, that the general tendency of the sentence may be changed: the divine may desert his tenets, or the philosopher his system.

Some of the examples have been taken from writers who were never mentioned as masters of elegance or models of style; but words must be sought where they are used; and in what pages, eminent for purity, can terms of manufacture or agriculture be found? Many quotations serve no other purpose, than that of proving the bare existence of words, and are therefore selected with less scrupulousness than those which are to teach their structures and relations.

My purpose was to admit no testimony of living authors, that I might not be misled by partiality, and that none of my cotemporaries might have reason to complain; nor have I departed from this resolution, but when some performance of uncommon excellence excited my veneration, when my memory supplied me, from late books, with an example that was wanting, or when my heart, in the tenderness of friendship, solicited admission for a favourite name.

So far have I been from any care to grace my pages with modern decorations, that I have studiously endeavoured to collect examples and authorities from the writers before the restoration, whose works I regard as *the wells of English undefiled,* as the pure sources of genuine diction. Our language, for almost a century, has, by the concurrence of many causes, been gradually departing from its original *Teutonick* character, and deviating towards a *Gallick* structure and phraseology, from which it ought to be our endeavour to recal it, by making our ancient volumes the ground-work of style, admitting among the additions of later times, only such as may supply real deficiencies, such as are readily adopted by the genius of our tongue, and incorporate easily with our native idioms.

But as every language has a time of rudeness antecedent to perfection, as well as of false refinement and declension, I have been cautious lest my zeal for antiquity might drive me into times too remote, and crowd my book with words now no longer understood. I have fixed *Sidney's* work for the boundary, beyond which I make few excursions. From the authors which rose in the time of *Elizabeth,* a

speech might be formed adequate to all the purposes of use and elegance. If the language of theology were extracted from *Hooker* and the translation of the Bible; the terms of natural knowledge from *Bacon;* the phrases of policy, war, and navigation from *Raleigh;* the dialect of poetry and fiction from *Spenser* and *Sidney;* and the diction of common life from *Shakspeare,* few ideas would be lost to mankind, for want of *English* words, in which they might be expressed.

It is not sufficient that a word is found, unless it be so combined as that its meaning is apparently determined by the tract and tenour of the sentence; such passages I have therefore chosen, and when it happened that any author gave a definition of a term, or such an explanation as is equivalent to a definition, I have placed his authority as a supplement to my own, without regard to the chronological order, that is otherwise observed.

Some words, indeed, stand unsupported by any authority, but they are commonly derivative nouns, or adverbs, formed from their primitives by regular and constant analogy, or names of things seldom occurring in books, or words of which I have reason to doubt the existence.

There is more danger of censure from the multiplicity than paucity of examples; authorities will sometimes seem to have been accumulated without necessity or use, and perhaps some will be found, which might, without loss, have been omitted. But a work of this kind is not hastily to be charged with superfluities: those quotations, which to careless or unskilful perusers appear only to repeat the same sense, will often exhibit, to a more accurate examiner, diversities of signification, or, at least, afford different shades of the same meaning: one will show the word applied to persons, another to things; one will express an ill, another a good, and a third a neutral sense; one will prove the expression genuine from an ancient author; another will show it elegant from a modern: a doubtful authority is corroborated by another of more credit; an ambiguous sentence is ascertained by a passage clear and determinate; the word, how often soever repeated, appears with new associates and in different combinations, and every quotation contributes something to the stability or enlargement of the language.

When words are used equivocally, I receive them in either sense; when they are metaphorical, I adopt them in their primitive acceptation.

I have sometimes, though rarely, yielded to the temptation of exhibiting a genealogy of sentiments, by showing how one author copied the thoughts and diction of another: such quotations are indeed little more than repetitions, which might justly be censured, did they not gratify the mind, by affording a kind of intellectual history.

The various syntactical structures occurring in the examples have been carefully noted; the license or negligence with which many words have been hitherto used, has made our style capricious and indeterminate; when the different combinations of the same word are exhibited together, the preference is readily given to propriety, and I have often endeavoured to direct the choice.

Thus have I laboured by settling the orthography, displaying the analogy, regulating the structures, and ascertaining the signification of *English* words, to perform all the parts of a faithful lexicographer: but I have not always executed my own scheme, or satisfied my own expectations. The work, whatever proofs of diligence and attention it may exhibit, is yet capable of many improvements: the orthography which I recommend is still controvertible, the etymology which I adopt is uncertain, and perhaps frequently erroneous; the explanations are sometimes too much contracted, and sometimes too much diffused, the significations are distinguised rather with subtilty than skill, and the attention is harassed with unnecessary minuteness.

The examples are too often injudiciously truncated, and perhaps sometimes, I hope very rarely, alleged in a mistaken sense; for in making this collection I trusted more to memory, than, in a state of disquiet and embarrassment, memory can contain, and purposed to supply at the review what was left incomplete in the first transcription.

Many terms appropriated to particular occupations, though necessary and significant, are undoubtedly omitted; and of the words most studiously considered and exemplified, many senses have escaped observation.

Yet these failures, however frequent, may admit extenuation and apology. To have attempted much is always laudable, even when the enterprise is above the strength that undertakes it: To rest below his own aim is incident to every one whose fancy is active, and whose views are comprehensive; nor is any man satisfied with himself because he has done much, but because he can conceive little. When first I engaged in this work, I resolved to leave neither words nor things unexamined, and pleased myself with the prospect of the hours which I should revel away in feasts of literature, with the obscure recesses of northern learning which I should enter and ransack; the treasures with which I expected every search into those neglected mines to reward my labour, and the triumph with which I should display my acquisitions to mankind. When I had thus inquired into the original of words, I resolved to show likewise my attention to things; to pierce deep into every science, to inquire the nature of every substance of which I inserted the name, to limit every idea by a definition strictly logical, and exhibit every production of art or nature in an accurate description, that my book might be in place of all other dictionaries whether appellative or technical. But these were the dreams of a poet doomed at last to wake a lexicographer. I soon found that it is too late to look for instruments, when the work calls for execution, and that whatever abilities I had brought to my task, with those I must finally perform it. To deliberate whenever I doubted, to inquire whenever I was ignorant, would have protracted the undertaking without end, and, perhaps, without much improvement; for I did not find by my first experiments, that what I had not of my own was easily to be obtained: I saw that one inquiry only gave occasion to another, that book referred to book, that to search was not always to find, and to find was not always to be informed; and that thus to pursue perfection, was, like the first inhabitants of Arcadia, to chase the sun, which, when they had reached the hill where he seemed to rest, was still beheld at the same distance from them.

I then contracted my design, determining to confide in myself, and no longer to solicit auxiliaries, which produced more incumbrance than assistance: by this I obtained at least one advantage, that I set limits to my work, which would in time be ended, though not completed.

Despondency has never so far prevailed as to depress me to negligence; some faults will at last appear to be the effects of anxious diligence and persevering activity. The nice and subtle ramifications of meaning were not easily avoided by a mind intent upon accuracy, and convinced of the necessity of disentangling combinations, and separating similitudes. Many of the distinctions, which to common readers appear useless and idle, will be found real and important by men versed in the school philosophy, without which no dictionary can ever be accurately compiled, or skilfully examined.

Some senses however there are, which, though not the same, are yet so nearly allied, that they are often confounded. Most men think indistinctly, and therefore cannot speak with exactness; and consequently some examples might be indifferently put to either signification: this uncertainty is not to be imputed to me, who do not form, but register the language; who do not teach men how they should think, but relate how they have hitherto expressed their thoughts.

The imperfect sense of some examples I lamented, but could not remedy, and hope they will be compensated by innumerable passages selected with propriety, and preserved with exactness; some shining with sparks of imagination, and some replete with treasures of wisdom.

The orthography and etymology, though imperfect, are not imperfect for want of care, but because care will not always be successful, and recollection or information come too late for use.

That many terms of art and manufacture are omitted, must be frankly acknowledged; but for this defect I may boldly allege that it was unavoidable: I could not visit caverns to learn the miner's language, nor take a voyage to perfect my skill in the dialect of navigation, nor visit the warehouses of merchants, and shops of artificers, to gain the names of wares, tools and operations, of which no mention is found in books;

what favourable accident, or easy inquiry brought within my reach, has not been neglected; but it had been a hopeless labour to glean up words, by courting living information, and contesting with the sullenness of one, and the roughness of another.

To furnish the academicians *della Crusca* with words of this kind, a series of comedies called *la Fiera*, or *the Fair*, was professedly written by *Buonaroti;* but I had no such assistant, and therefore was content to want what they must have wanted likewise, had they not luckily been so supplied.

Nor are all words which are not found in the vocabulary to be lamented as omissions. Of the laborious and mercantile part of the people, the diction is in a great measure casual and mutable; many of their terms are formed for some temporary or local convenience, and though current at certain times and places, are in others utterly unknown. This fugitive cant, which is always in a state of increase or decay, cannot be regarded as any part of the durable materials of a language, and therefore must be suffered to perish with other things unworthy of preservation.

Care will sometimes betray to the appearance of negligence. He that is catching opportunities which seldom occur, will suffer those to pass by unregarded, which he expects hourly to return; he that is searching for rare and remote things, will neglect those that are obvious and familiar: thus many of the most common and cursory words have been inserted with little illustration, because in gathering the authorities, I forbore to copy those which I thought likely to occur whenever they were wanted. It is remarkable that, in reviewing my collection, I found the word Sea unexemplified.

Thus it happens, that in things difficult there is danger from ignorance, and in things easy from confidence; the mind, afraid of greatness, and disdainful of littleness, hastily withdraws herself from painful searches, and passes with scornful rapidity over tasks not adequate to her powers, sometimes too secure for caution, and again too anxious for vigorous effort; sometimes idle in a plain path, and sometimes distracted in labyrinths, and dissipated by different intentions.

A large work is difficult because it is large, even though all its parts might singly be performed with facility; where there are many things to be done, each must be allowed its share of time and labour, in the proportion only which it bears to the whole; nor can it be expected, that the stones which form the dome of a temple, should be squared and polished like the diamond of a ring.

Of the event of this work, for which, having laboured it with so much application, I cannot but have some degree of parental fondness, it is natural to form conjectures. Those who have been persuaded to think well of my design, will require that it should fix our language, and put a stop to those alterations which time and chance have hitherto been suffered to make in it without opposition. With this consequence I will confess that I flattered myself for a while; but now begin to fear that I have indulged expectation which neither reason nor experience can justify. When we see men grow old and die at a certain time one after another, from century to century, we laugh at the elixir that promises to prolong life to a thousand years; and with equal justice may the lexicographer be derided, who being able to produce no example of a nation that has preserved their words and phrases from mutability, shall imagine that his dictionary can embalm his language, and secure it from corruption and decay, that it is in his power to change sublunary nature, and clear the world at once from folly, vanity and affectation.

With this hope, however, academies have been instituted, to guard the avenues of their languages, to retain fugitives, and repulse intruders; but their vigilance and activity have hitherto been vain; sounds are too volatile and subtle for legal restraints; to enchain syllables, and to lash the wind, are equally the undertakings of pride, unwilling to measure its desires by its strength. The *French* language has visibly changed under the inspection of the academy; the style of *Amelot's* translation of father *Paul* is observed by *Le Courayer* to be *un peu passe;* and no *Italian* will maintain, that the diction of any modern writer is not perceptibly different from that of *Boccace, Machiavel,* or *Caro.*

Total and sudden transformations of a language seldom happen; conquests and migrations are now very rare: but there are other causes of change, which, though slow in their operation, and invisible in their progress, are perhaps as much superiour to human resistance, as the revolutions of the sky, or intumescence of the tide. Commerce, however necessary, however lucrative, as it depraves the manners, corrupts the language; they that have frequent intercourse with strangers, to whom they endeavour to accommodate themselves, must in time learn a mingled dialect, like the jargon which serves the traffickers on the *Mediterranean* and *Indian* coasts. This will not always be confined to the exchange, the warehouse, or the port, but will be communicated by degrees to other ranks of the people, and be at last incorporated with the current speech.

There are likewise internal causes equally forcible. The language most likely to continue long without alteration, would be that of a nation raised a little, and but a little, above barbarity, secluded from strangers, and totally employed in procuring the conveniencies of life; either without books, or, like some of the *Mahometan* countries, with very few: men thus busied and unlearned, having only such words as common use requires, would perhaps long continue to express the same notions by the same signs. But no such constancy can be expected in a people polished by arts, and classed by subordination, where one part of the community is sustained and accommodated by the labour of the other. Those who have much leisure to think, will always be enlarging the stock of ideas; and every increase of knowledge, whether real or fancied, will produce new words, or combinations of words. When the mind is unchained from necessity, it will range after convenience; when it is left at large in the fields of speculation, it will shift opinions; as any custom is disused, the words that expressed it must perish with it; as any opinion grows popular, it will innovate speech in the same proportion as it alters practice.

As by the cultivation of various sciences a language is amplified, it will be more furnished with words deflected from their original sense; the geometrician will talk of a courtier's zenith, or the eccentrick virtue of a wild hero, and the physician of sanguine expectations and phlegmatick delays. Copiousness of speech will give opportunities to capricious choice, by which some words will be preferred, and others degraded; vicissitudes of fashion will enforce the use of new, or extend the signification of known terms. The tropes of poetry will make hourly encroachments, and the metaphorical will become the current sense: pronunciation will be varied by levity or ignorance, and the pen must at length comply with the tongue; illiterate writers will, at one time or other, by public infatuation, rise into renown, who, not knowing the original import of words, will use them with colloquial licentiousness, confound distinction, and forget propriety. As politeness increases, some expressions will be considered as too gross and vulgar for the delicate, others as too formal and ceremonious for the gay and airy; new phrases are therefore adopted, which must, for the same reasons, be in time dismissed. *Swift*, in his petty treatise on the *English* language, allows that new words must sometimes be introduced, but proposes that none should be suffered to become obsolete. But what makes a word obsolete, more than general agreement to forbear it? and how shall it be continued, when it conveys an offensive idea, or recalled again into the mouths of mankind, when it has once become unfamiliar by disuse, and unpleasing by unfamiliarity?

There is another cause of alteration more prevalent than any other, which yet in the present state of the world cannot be obviated. A mixture of two languages will produce a third distinct from both, and they will always be mixed, where the chief part of education, and the most conspicuous accomplishment, is skill in ancient or in foreign tongues. He that has long cultivated another language, will find its words and combinations crowd upon his memory; and haste and negligence, refinement and affectation, will obtrude borrowed terms and exotick expressions.

The great pest of speech is frequency of translation. No book was ever turned from one language into another, without imparting something of its native idiom; this is the most mischievous and comprehensive innovation; single words may enter by thousands, and the fabrick of the tongue continue the same; but

new phraseology changes much at once; it alters not the single stones of the building, but the order of the columns. If an academy should be established for the cultivation of our style, which I, who can never wish to see dependance multiplied, hope the spirit of *English* liberty will hinder or destroy, let them, instead of compiling grammars and dictionaries, endeavour, with all their influence, to stop the license of translators, whose idleness and ignorance, if it be suffered to proceed, will reduce us to babble a dialect of *France*.

If the changes that we fear be thus irresistible, what remains but to acquiesce with silence, as in the other insurmountable distresses of humanity? It remains that we retard what we cannot repel, that we palliate what we cannot cure. Life may be lengthened by care, though death cannot be ultimately defeated: tongues, like governments, have a natural tendency to degeneration; we have long preserved our constitution, let us make some struggles for our language.

In hope of giving longevity to that which its own nature forbids to be immortal, I have devoted this book, the labour of years, to the honour of my country, that we may no longer yield the palm of philology, without a contest, to the nations of the continent. The chief glory of every people arises from its authors: whether I shall add any thing by my own writings to the reputation of *English* literature, must be left to time: much of my life has been lost under the pressures of disease; much has been trifled away; and much has always been spent in provision for the day that was passing over me; but I shall not think my employment useless or ignoble, if by my assistance foreign nations, and distant ages, gain access to the propagators of knowledge, and understand the teachers of truth; if my labours afford light to the repositories of science, and add celebrity to *Bacon*, to *Hooker*, to *Milton*, and to *Boyle*.

When I am animated by this wish, I look with pleasure on my book, however defective, and deliver it to the world with the spirit of a man that has endeavoured well. That it will immediately become popular I have not promised to myself: a few wild blunders, and risible absurdities, from which no work of such multiplicity was ever free, may for a time furnish folly with laughter, and harden ignorance in contempt; but useful diligence will at last prevail, and there never can be wanting some who distinguish desert; who will consider that no dictionary of a living tongue ever can be perfect, since while it is hastening to publication, some words are budding, and some falling away; that a whole life cannot be spent upon syntax and etymology, and that even a whole life would not be sufficient; that he, whose design includes whatever language can express, must often speak of what he does not understand; that a writer will sometimes be hurried by eagerness to the end, and sometimes faint with weariness, under a task, which *Scaliger* compares to the labours of the anvil and the mine; that what is obvious is not always known, and what is known is not always present; that sudden fits of inadvertency will surprise vigilance, slight avocations will seduce attention, and casual eclipses of the mind will darken learning; and that the writer shall often in vain trace his memory at the moment of need, for that which yesterday he knew with intuitive readiness, and which will come uncalled into his thoughts tomorrow.

In this work, when it shall be found that much is omitted, let it not be forgotten that much likewise is performed; and though no book was ever spared out of tenderness to the author, and the world is little solicitous to know whence proceeded the faults of that which it condemns; yet it may gratify curiosity to inform it, that the *English Dictionary* was written with little assistance of the learned, and without any patronage of the great; not in the soft obscurities of retirement, or under the shelter of academick bowers, but amidst inconvenience and distraction, in sickness and in sorrow. It may repress the triumph of malignant criticism to observe, that if our language is not here fully displayed, I have only failed in an attempt which no human powers have hitherto completed. If the lexicons of ancient tongues, now immutably fixed, and comprised in a few volumes, be yet, after the toil of successive ages, inadequate and delusive; if the aggregated knowledge, and co-operating diligence of the *Italian* academicians, did not secure them from the censure of *Beni;* if the embodied criticks of *France*, when fifty years had been spent upon their

work, were obliged to change its economy, and give their second edition another form, I may surely be contented without the praise of perfection, which, if I could obtain, in this gloom of solitude, what would it avail me? I have protracted my work till most of those whom I wished to please have sunk into the grave, and success and miscarriage are empty sounds: I therefore dismiss it with frigid tranquillity having little to fear or hope from censure or from praise.

THE FOURTH EDITION.

MANY are the works of human industry, which to begin and finish are hardly granted to the same man. He that undertakes to compile a Dictionary, undertakes that, which, if it comprehends the full extent of his design, he knows himself unable to perform. Yet his labours, though deficient, may be useful, and with the hope of this inferiour praise, he must incite his activity, and solace his weariness.

Perfection is unattainable, but nearer and nearer approaches may be made; and finding my Dictionary about to be reprinted, I have endeavoured, by a revisal, to make it less reprehensible. I will not deny that I found many parts requiring emendation, and many more capable of improvement. Many faults I have corrected, some superfluities I have taken away, and some deficiencies I have supplied. I have methodized some parts that were disordered, and illuminated some that were obscure. Yet the changes or additions bear a very small proportion to the whole. The critick will now have less to object, but the student who has bought any of the former copies, needs not repent; he will not, without nice collation, perceive how they differ; and usefulness seldom depends upon little thiugs.

For negligence, or deficience, I have perhaps not need of more apology than the nature of the work will furnish: I have left that inaccurate which never was made exact, and that imperfect which never was completed.

THE HISTORY

OF

THE ENGLISH LANGUAGE.

THOUGH the *Britains* or *Welsh* were the first possessors of this island, whose names are recorded, and are therefore in civil history always considered as the predecessors of the present inhabitants; yet the deduction of the *English* language, from the earliest times of which we have any knowledge to its present state, requires no mention of them: for we have so few words which can, with any probability, be referred to *British* roots, that we justly regard the *Saxons* and *Welsh* as nations totally distinct. It has been conjectured, that when the *Saxons* seized this country, they suffered the *Britains* to live among them in a state of vassalage, employed in the culture of the ground, and other laborious and ignoble services. But it is scarcely possible, that a nation, however depressed, should have been mixed with another in considerable numbers, without some communication of their tongue, and therefore, it may, with great reason, be imagined, that those, who were not sheltered in the mountains, perished by the sword.

The whole fabrick and scheme of the *English* language is *Gothick* or *Teutonick:* it is a dialect of that tongue, which prevails all over the northern countries of *Europe*, except those where the *Sclavonian* is spoken. Of these languages Dr. *Hickes* has thus exhibited the genealogy.

GOTHICK.

ANGLO-SAXON,	FRANCICK,	CIMBRICK,
Dutch, Frisick, English,	German.	Islandick, Norwegian, Swedish, Danish.

Of the *Gothick*, the only monument remaining is a copy of the gospels somewhat mutilated, which, from the silver with which the characters are adorned, is called the *silver-book*. It is now preserved at *Upsal*, and having been twice published before, has been lately reprinted at *Oxford*, under the inspection of Mr. *Lye*, the editor of *Junius*. Whether the diction of this venerable manuscript be purely *Gothick*, has been doubted; it seems however to exhibit the most ancient dialect now to be found of the *Teutonick* race; and the *Saxon*, which is the original of the present *English*, was either derived from it, or both have descended from some common parent.

What was the form of the *Saxon* language, when, about the year 450, they first entered *Britain*, cannot now be known. They seem to have been a people without learning, and very probably without an alphabet; their speech, therefore, having been always cursory and extemporaneous, must have been artless and unconnected, without any modes of transition or involution of clauses; which abruptness and inconnexion may be observed even in their later writings. This barbarity may be supposed to have continued during their wars with the *Britains*, which for a time left them no leisure for softer studies; nor is there any reason for supposing it abated, till the year 570, when *Augustine* came from *Rome* to convert them to Christianity. The Christian religion always implies or produces a certain degree of civility and learning; they then became by degrees acquainted with the *Roman* language, and so gained, from time to time, some knowledge and elegance, till in three centuries they had formed a language capable of expressing all the sentiments of a civilized people, as appears by king *Alfred's* paraphrase or imitation of *Boethius*, and his short preface, which I have selected as the first specimen of ancient *English*.

This may perhaps be considered as a specimen of the *Saxon* in its highest state of purity, for here are scarcely any words borrowed from the *Roman* dialects.

Of the following version of the gospels the age is not certainly known, but it was probably written between the time of *Alfred* and that of the *Norman* conquest, and therefore may properly be inserted here.

Translations seldom afford just specimens of a language, and least of all those in which a scrupulous and verbal interpretation is endeavoured, because they retain the phraseology and structure of the original tongue; yet they have often this convenience, that the same book, being translated in different ages, affords opportunity of marking the gradations of change, and bringing one age into comparison with another. For this purpose I have placed the *Saxon* version and that of *Wickliffe*, written about the year 1380, in opposite columns; because the convenience of easy collation seems greater than that of regular chronology.

22 But in the sixte monethe the aungel Gabriel was sent from God: into a cytee of Galilee whos name was Nazareth.

24 And the aungel entride to hir, and sayde, heil ful of grace the Lord be with thee: blessid be thou among wymmen.

Of the *Saxon* poetry some specimen is necessary, though our ignorance of the laws of their metre and the quantities of their syllables, which it would be very difficult, perhaps impossible, to recover, excludes us from that pleasure which the old bards undoubtedly gave to their contemporaries.

The first poetry of the *Saxons* was without rhyme, and consequently must have depended upon the quantity of their syllables; but they began in time to imitate their neighbours, and close their verses with correspondent sounds.

The two passages, which I have selected, contain apparently the rudiments of our present lyrick measures, and the writers may be justly considered as the genuine ancestors of the *English* poets.

About the year 1150, the *Saxon* began to take a form in which the beginning of the present *English* may be plainly discovered; this change seems not to have been the effect of the *Norman* conquest, for very few *French* words are found to have been introduced in the first hundred years after it; the language must therefore have been altered by causes like those which, notwithstanding the care of writers and societies instituted to obviate them, are even now daily making innovations in every living language. I have exhibited a specimen of the language of this age from the year 1135 to 1140 of the *Saxon* chronicle, of which the latter part was apparently written near the time to which it relates.

Nearly about this time, the following pieces of poetry seem to have been written, of which I have inserted only short fragments; the first is a rude attempt at the present measure of eight syllables, and the second is a natural introduction to *Robert of Gloucester*, being composed in the same measure, which, however rude and barbarous it may seem, taught the way to the *Alexandrines* of the *French* poetry.

In these fragments, the adulteration of the *Saxon* tongue, by a mixture of the *Norman*, becomes apparent; yet it is not so much changed by the admixture of new words which might be imputed to commerce with the continent, as by changes of its own form and terminations; for which no reason can be given.

Hitherto the language used in this island, however different in successive time, may be called *Saxon;* nor can it be expected, from the nature of things gradually changing, that any time can be assigned, when the *Saxon* may be said to cease, and the *English* to commence. *Rooert of Glouces-ter*, however, who is placed by the criticks in the thirteenth century, seems to have used a kind of intermediate diction, neither *Saxon* nor *English;* in his work therefore we see the transition exhibited, and, as he is the first of our writers in rhyme, of whom any large work remains, a more extensive quotation is extracted. He writes apparently in the same measure with the foregoing author of St. *Margarite*, which, polished into greater exactness, appeared to our ancestors so suitable to the genius of the *English* language, that it was continued in use almost to the middle of the seventeenth century.

Sir *John Mandeville* wrote, as he himself informs us, in the fourteenth century, and his work, which comprising a relation of many different particulars, consequently required the use of many words and phrases, may be properly specified in this place. Of the following quotations, I have chosen the first, because it shows, in some measure, the state of *European* science as well as of the *English* tongue; and the second, because it is valuable for the force of thought and beauty of expression.

IN that lond, ne in many othere bezonde that, no man may see the sterre transmontane, that is clept the sterre of the see, that is unmevable, and that is toward the Northe, that we clepen the lode sterre. But men seen another sterre, the contrarie to him, that is toward the Southe, that is clept Antartyk. And right as the schip men taken here avys here, and governe hem be the lode sterre, right so don schip men bezonde the parties, be the sterre of the Southe, the which sterre appereth not to us. And this sterre that is toward the Northe, that wee clepen the lode sterre, ne apperethe not to hem. For whiche cause, men may wel perceyve, that the lond and the see ben of rownde schapp and forme. For the partie of the firmament schewethe in o contree, that schewethe not in another contree. And men may well preven be experience and sotyle compassement of wytt, that zif a man fond passages be schippes, hat wolde go to serchen the world, men myghte go be schippe all aboute the world, and aboven and benethen. The whiche thing I prove thus, aftre that I have seyn. For I have been toward the parties of Braban, and beholden the Astrolabre, that the sterre that is clept the transmontayne, is 53 degrees highe. And more forthere in Almayne and Bewme, it hathe 58 degrees. And more forthe toward the parties septemtrioneles, it is 62 degrees of heghte, and certyn mynutes. For I my self have mesured it by the Astrolabre. Now schulle ze knowe, that azen the Transmontayne, is the tother sterre, that is clept Antartyk; as I have seyd before. And tho 2 sterres ne meeven nevere. And be hem turnethe alle the firmament, righte as dothe a wheel, that turnethe be his axille tree; so that tho sterres beren the firmament in 2 egalle parties; so that it hathe als mochel aboven, as it hath benethen. Aftre this, I hav gon toward the parties meridionales, that is toward the Southe: And I have founden that in Lybye, men seen first the sterre Antartyk. And so fer I have gone more in tho contrees, that I have founde that sterre more high; so that toward the highe Lybye, it is 18 degrees of heghte, and certeyn minutes (of the which, 60 minutes maken a degree) after goynge be see and be londe, toward this contree, of that I have spoke, and to other yles and londes bezonde that contree, I have founden the sterre Antartyk of 33 degrees of heghte, and mo mynutes. And zif I hadde had companye and schippynge, for to go more bezonde, I trowe wel in certyn, that wee scholde have seen alle the roundnesse of the firmament alle aboute. For as I have seyd zou be forn, the half of the firmament is betwene tho 2 sterres: the whiche halfondelle I have seyn. And of the other halfondelle, I have seyn toward the Northe, undre the Transmontane 62 degrees and 10 mynutes, and toward the partie meridionalle, I have seen undre the Antartyk 33 degrees and 16 mynuts: and thanne the halfondelle of the firmament in alle, ne holdethe not but 180 degrees. And of tho 180, I have seen 62 on that o part, and 33 on that other part, that ben 95 degrees, and nyghe the halfondelle of a degree; and so there ne faylethe but that I have seen alle the firmament, saf 84 degrees and the halfondelle of a degree; and that is not the fourthe part of the firmament. For the 4 partie of the roundnesse of the firmament holt 90 degrees: so there faylethe but 5 degrees and an half of the fourthe partie. And also I have seen the 3 parties of alle the roundnesse of the firmament, and more zit 5 degrees and an half. Be the whiche I seye zou certeynly, that men may envirowne alle the erthe of alle the world, as wel undre as aboven, and turnen azen to his contree, that hadde companye and schippynge and conduyt: and alle weyes he scholde fynde men, londes, and yles, als wel as in this contree. For zee wyten welle, that thei that ben toward the Antartyk, thei ben streghte, feet azen feet of hem, that dwellen undre the transmontane; als wel as wee and thei that dwellyn undre us, been feet azenst feet. For alle the parties of see and of lond han here appositees, habitables or trepassables, and thei of this half and bezond half. And wytethe wel, that aftre that, that I may parceyve and comprehende, the londes of Prestre John, emperour of Ynde ben undre us. For in goynge from Scotland or from Englond toward Jerusalem, men gon upward alweys. For oure lond is in the lowe partie of the erthe, toward the West: and the lond of Prestre John is the low partie of the erthe, toward the Est: and thei han there the day, whan wee have the nyghte, and also highe to the contrarie, thei han the nyghte, whan wee han the day. For the erthe and the see ben of round forme and schapp; as I have seyd beforn. And than that men gon upward to o cost, men gon dounward to another cost. Also zee have herd me seye, that Jerusalem is in the myddes of the world; and that may men preven and schewen there, be a spere, that is pighte in to the erthe, upon the hour of mydday, whan it is equenoxium, that schewethe no schadwe on no syde. And that it scholde ben in the myddes of the world, David wytnessethe it in the Psautre, where he seythe, Deus operatus est salutē in medio terre. Thanne thei that parten fro the parties of the West for to go toward Jerusalem, als many iorneyes as thei gon upward for to go thidre, in als many iorneyes may thei gon fro Jerusalem, unto other confynyes of the superficialtie of the erthe bezonde. And whan men gon bezonde tho iourneys, towarde Ynde and to the foreyn yles, alle is envyronynge the roundnesse of the erthe and of the see, undre oure contrees on this half. And therefore hathe it befallen many tymes of o thing, that I have herd cownted, whan I was zong; how a worthi man departed sometyme from our countrees, for to go serche the worlde. And so he passed Ynde, and the yles bezonde Ynde, where ben mo than 5000 yles: and so longe he wente be see and lond, and so enviround the world be many seysons, that he found an yle, where he herde speke his own language, callynge on oxen in the plowghe, suche wordes as men speken to bestes in his owne contree: whereof he hadde gret mervayle: for he knewe not how it myghte be. But I seye, that he had gon so longe, be londe and be see, that he had envyround alle the erthe, that he was comen azen envirounynge, that is to seye, goynge aboute, unto his owne marches, zif, he wolde have passed forthe, til he had founden his contree and his owne knouleche. But he turned azen fro thens, from whens he was come fro; and so he loste moche peynefulle labour, as him self seyde, a gret while aftre, that he was comen hom. For it befelle aftre, that he wente in to Norweye; and there tempest of the see toke him; and he arryved in an yle; and whan he was in that yle, he knew wel, that it was the yle where he had herd speke his owne langage before, and the callynge of the oxen at the plowghe: and that was possible thinge. But how it seemethe to symple men unlerned, that menne mowe not go undre the erthe, and also that men scholde falle toward the hevene, from undre! But that may not be, upon lesse, than wee mowe falle toward hevene, fro the erthe, where wee ben. For fro what partie of the erthe that men duelle, outher aboven or benethen, it semethe alweyes to hem that duellen, that thei gon more righte than ony other folk. And righte as it semethe to us, that thei ben undre us, righte so it semethe hem, that wee ben undre hem. For zif a man myghte falle fro the erthe unto the firmament; be grettere resoun, the erthe and the see, that ben so grete and so hevy, scholde fallen to the fir-

mament: but that may not be: and therefore seithe oure Lord God, Non timeas me, qui suspendi terrā ex nichilo? And alle be it, that it be possible thing, that men may so envyronne alle the world, natheles of a 1000 persones, on ne myghte not happen to returnen in to his contree. For, for the gretnesse of the erthe and of the see, men may go be a 1000 and a 1000 other weyes, that no man cowde reyde him perfitely toward the parties that he cam fro, but zif it were be aventure and happ, or be the grace of God. For the erthe is fulle large and fulle gret, and holt in roundnesse and aboute envyroun, be aboven and be benethen 20425 myles, aftre the opynyoun of the old wise astronomeres. And here seyenges I repreve noughte. But aftre my lytylle wyt, it semethe me, savynge here reverence, that it is more. And for to have bettere understondynge, I seye thus, be ther ymagyned a figure, that hathe a gret compas; and aboute the poynt of the gret compas, that is clept the centre, be made another litille compas: than aftre, be the gret compas devised be lines in manye parties; and that alle the lynes meeten at the centre; so that in as manye parties, as the grete compas schal be departed, in als manye, schalle be departed the littile, that is aboute the centre, alle be it, that the spaces ben lesse. Now thanne, be the gret compas represented for the firmament, and the litille compas represented for the erthe. Now thanne the firmament is devysed, be astronomers, in 12 signes; and every signe is devysed in 30 degrees, that is 360 degrees, that the firmament hathe aboven. Also, be the erthe devysed in als manye parties, as the firmament; and let every partye answere to a degree of the firmament: and wytethe it wel, that aftre the auctoures of astronomye, 700 furlonges of erthe answeren to a degree of the firmament: and tho ben 87 miles and 4 furlonges. Now be that here multiplyed be 360 sifthes; and than thei ben 31500 myles, every of 8 furlonges, aftre myles of oure contree. So moche hath the erthe in roundnesse, and of heghte enviroun, aftre myn opynyoun and myn undirstondynge. And zee schulle undirstonde, that aftre the opynyoun of olde wise philosophres and astronomeres, our contree ne Irelond ne Wales ne Scotland ne Norweye ne the other yles costynge to hem, ne ben not in the superficyalte cownted aboven the erthe; as it schewethe be alle the bokes of astronomye. For the superficialtee of the erthe is departed in 7 parties, for the 7 planetes: and tho parties been clept clymates. And oure parties be not of the 7 clymates: for thei ben descendynge toward the West. And also these yles of Ynde, which beth evene azenst us, beth noght reckned in the clymates: for thei ben azenst us, that ben in the lowe contree. And the 7 clymates strecchen hem envyrounynge the world.

II. And I John Maundeville knyghte aboveseyd, (alle thoughe I be unworthi) that departed from our contrees and passed the see, the zeer of grace 1322. that have passed manye londes and many yles and contrees, and cerched manye fulle straunge places, and have ben in manye a fulle gode honourable companye, and at manye a faire dede of armes, (alle be it that I dide none myself, for myn unable insuffisance) now I am comen hom (mawgree myself) to reste; for gowtes, artetykes, that me distreymen, tho diffynen the ende of my labour, azenst my will (God knowethe.) And thus takynge solace in my wretched reste, recordynge the tyme passed, I have fulfilled theise thinges and putte hem wryten in this boke, as it wolde come in to my mynde, the zeer of grace 1356 in the 34 zeer that I departede from our contrees. Wherefore I preye to alle the rederes and hereres of this boke, zif it plese hem, that thei wolde preyen to God for me: and I schalle preye for hem. And alle tho that seyn for me a Pater noster, with an Ave Maria, that God forzeve me my synnes, I make hem partneres and graunte em part of alle the gode pilgrymages and of alle the gode dedes, that I hav don, zif ony be to his plesance: and noghte only of tho, but of alle that evere I schalle do unto my lyfes ende. And I beseche Almyghty God, fro whom alle godenesse and grace comethe fro, that he vouchesaf, of his excellent mercy and habundant grace, to fulle fylle hire soules with inspiracioun of the Holy Gost, in makynge defence of alle hire gostly enemyes here in erthe, to hire salvacioun, both of body and soule; to worschipe and thankynge of him, that is three and on, withouten begynnynge and withouten endynge; that is withouten qualitee, good, and without quantytee, gret; that, inalle places is present; and alle thinges contenynynge; the whiche that no goodnesse may amende, ne non evelle empeyre; that in perfeyte trynytee lyvethe and regnethe God, be alle worldes and be alle tymes. Amen, Amen, Amen.

The first of our authours, who can be properly said to have written *Bnglish*, was Sir *John Gower*, who, in his *Confession of a Lover*, calls *Chaucer* his disciple, and may therefore be considered as the father of our poetry.

NOWE for to speke of the commune,
It is to drede of that fortune,
Which hath befalle in sondrye londes:
But ofte for defaute of bondes
All sodeinly, er it be wist,
A tunne, when his lie arist
Tobreketh, and renneth all aboute,
Whiche els shudde nought gone out.
And eke full ofte a littell skare
Vpon a banke, er men be ware,
Let in the streme, whiche with gret peine,
If any man it shall restreine.
Where lawe failleth, errour groweth,
He is not wise, who that ne troweth.
For it hath proued oft er this.
And thus the common clamour is
In euerye londe, where people dwelleth:
And eche in his complainte telleth,
How that the worlde is miswent,
And thervpon his argument
Yeueth euery man in sondrie wise:
But what man wolde him selfe auise
His conscience, and nought misuse,
He maie well at the first excuse
His God, whiche euer stant in one,
In him there is defaute none
So must it stand vpon vs selue,
Nought only vpon ten ne twelue,
But plenarly vpon vs all.
For man is cause of that shall fall.

The history of our language is now brought to the point at which the history of our poetry is generally supposed to commence, the time of the illustrious *Geoffry Chaucer*, who may, perhaps, with great justice, be styled the first of our versifiers who wrote poetically. He does not, however, appear to have deserved all the praise which he has received, or all the censure that he has suffered. *Dryden*, who, mistaking genius for learning, in confidence of his abilities, ventured to write of what he had not examined, ascribes to *Chaucer* the first refinement of our numbers, the first production of easy and natural rhymes, and the improvement of our language, by words borrowed from the more polished languages of the continent. *Skinner* contrarily blames him in harsh terms for having vitiated his native speech by *whole cartloads of foreign words*. But he that reads the works of *Gower* will find smooth numbers and easy rhymes, of which *Chaucer* is supposed to have been the inventor, and the *French* words, whether good or bad, of which *Chaucer* is charged as the importer. Some innovations he might probably make, like

others, in the infancy of our poetry, which the paucity of books does allow us to discover with particular exactness; but the works of *Gower* and *Lydgate* sufficiently evince, that his diction was in general like that of his contemporaries; and some improvements he undoubtedly made by the various dispositions of his rhymes, and by the mixture of different numbers, in which he seems to have been happy and judicious. I have selected several specimens both of his prose and verse: and among them, part of his translation of *Boetius*, to which another version, made in the time of queen *Mary*, is opposed. It would be improper to quote very sparingly an author of so much reputation, or to make very large extracts from a book so generally known.

CHAUCER.

ALAS! I wepyng am constrained to begin verse of sorrowfull matter, that whilom in florishying studie made delitable ditess. For lo! rendyng muses of a Poetes enditen to me thinges to be writen, and drerie teres. At laste no drede ne might overcame tho muses, that thei ne weren fellowes, and foloweden my waie, that is to saie, when I was exiled, thei that weren of my youth whilom welfull and grene, comforten now sorowfull wierdes of me olde man: for elde is comen unwarely upon me, hasted by the harmes that I have, and sorowe hath commaunded his age to be in me. Heres hore aren shad overtimeliche upon my hed: and the slacke skinne tremblethe of mine empted bodie. Thilke deth of men is welefull, that he ne cometh not in yeres that be swete, but cometh to wretches often icleped! Alas! alas! with how defe an ere deth cruell turneth awaie fro wretches, and naieth for to close wepyng eyen. While fortune unfaithfull favoured me with light godes; that sorowfull houre, that is to saie, the deth, had almoste drent myn hedde: but now for fortune cloudie hath chaunged her decevable chere to mewarde, myne unpitous life draweth along ungreable dwellynges. O ye my frendes, what, or whereto avaunted ye me to ben welfull? For he that hath fallin, stode in no stedfast degre.

IN the mene while, that I still record these thynges with my self, and marked my wepelie complainte with office of poinctell: I saugh stondyng aboven the hight of myn hed a woman of full grete reverence, by semblaunt. Her eyen brennyng, and clere, seyng over the common might of menne with a lively colour, and withe soche vigour and strength that it ne might not be nempned, all were it so, that she were full of so grete age, that menne woulden not trowen in no manere, that she were of our elde.

The stature of her was of doutous Judgemente, for sometyme she constrained and shronke her selven, like to the common mesure of menne: And sometyme it semed, that she touched the heven with the hight of her hedde. And when she hove her hedde higher, she perced the self heven, so that the sight of menne lokyng was in ydell: her clothes wer maked of right delie thredes, and subtel craft of perdurable matter. The whiche clothes she had woven with her owne handes, as I knewe well after by her self declaryng, and shewyng to me the beautie; The whiche clothes a darknesse of a forleten and dispised elde had dusked and darked, as it wonte to darke by smoked Images.

In the netherest hemme and border of these clothes menne redde iwoven therein a Grekishe A. that signifieth the life

COLVILLE.

I That in tyme of prosperite, and floryshing studye, made plesaunte and delectable dities, or verses: alas now beyng heauy and sad ouerthrowed in aduersitie, am compelled to fele and tast heuines and greif. Beholde the muses Poeticall, that is to saye: the pleasure that is in poetes verses, do appoynt me, and compel me to writ these verses in meter, and the sorowfull verses do wet my wretched face with very waterye teares, yssuinge out of my eyes for sorowe. Whiche muses no feare without doute could ouercome, but that they wold folow me in my iourney of exile or banishment. Sometime the ioye of happy and lusty delectable youth dyd comfort me, and nowe the course of sorowfull olde age causeth me to reioyse. For hasty old age vnloked for is come vpon me with al her incommodities and euyls, and sorowe hath commaunded and broughte me into the same old age, that is to say: that sorowe causeth me to be olde, before my time come of old age. The hoer heares do growe vntimely vpon my heade, and my reuiled skynne trembleth my flesh, cleane consumed and wasted with sorowe. Mannes death is happy, that cometh not in youth, when a man is lustye, and in pleasure or welth: but in time of aduersitie, when it is often desyred. Alas Alas howe dull and deffe be the eares of cruel death vnto men in misery that would fayne dye: and yet refusythe to come and shutte vp theyr carefull wepying eyes. Whiles that false fortune fauoryd me with her transitorye goodes, then the howre of death had almost ouercom me. That is to say deathe was redy to oppresse me when I was in prosperitie. Nowe for by cause that fortune beynge turned, from prosperitie into aduersitie (as the clere day is darkyd with cloudes) and hath chaungyd her deceyuable countenaunce; my wretched life is yet prolonged, and doth continue in dolour. O my friendes, why haue you so often bosted me, sayinge that I was happy when I had honor possessions riches, and authoritie whych be transitory thynges. He that hath fallen was in no stedefast degre.

WHYLES that I considerydde pryuylye with myselfe the thynges before sayd, and descrybed my wofull complaynte after the maner and offyce of a wrytter, me thought I sawe a woman stand ouer my head of a reurend countenaunce, hauyng quycke and glysteryng clere eyes, aboue the common sorte of men in lyuely and delectable coloure, and ful of strength, although she semed so olde that by no meanes she is thought to be one of this oure tyme, her stature is of douteful knowledge, for nowe she shewethe herselfe at the commen length or statur of men, and other whiles she semeth so high, as though she touched heuen with the crown of her hed. And when she wold stretch fourth her hed hygher, it also perced through heauen, so that mens syghte coulde not attaine to behold her. Her vestures or cloths were perfyt of the finyste thredes, and subtyll workemanshyp, and of substaunce permanent, whych vesturs she had wouen with her own hands as I perceyued after by her owne saiynge. The kynde or beawtye of the whyche vestures, a certayne darkenes or rather ignoraunce of oldenes forgotten hadde obscuryd and darkened, as the smoke is wont to darken Images that stand nyghe the smoke. In the lower parte of the said vestures was read the Greke letter P. wouen whych signifyeth practise or actyffe, and in the higher parte of the vestures the

active, and above that letter, in the hiest bordure, a Grekishe C. that signifieth the life contemplatise. And betwene these two letters there were seen degrees nobly wrought, in maner of ladders, by whiche degrees menne might climben from the netherest letter to the upperest; nathelesse handes of some men hadden kerve that clothe, by violence or by strength, and everiche manne of 'hem had borne awaie soche peces, as he might getten. And forsothe this foresaid woman bare smale bokes in her righte hande, and in her left hand she bare a scepter. And when she sawe these Poeticall muses approchyng about my bed, and endityng wordes to my wepynges, she was a litle amoved, and glowed with cruell eyen. Who (q'ð she) hath suffered approchen to this sike manne these commen strompettes, of which is the place that menne callen Theatre, the whiche onely ne asswagen not his sorowes with remedies, but thei would feden and norishe hym with swete venime? Forsothe, that ben tho that with thornes, and prickynges of talentes of affeccions, whiche that ben nothyng fructuous nor profitable, distroien the Corne, plentuous of fruictes of reson. For the holden hertes of men in usage, but thei ne deliver no folke fro maladie. But if ye muses had withdrawen fro me with your flatteries any unconnyng and unprofitable manne, as ben wont to finde commenly emong the peple, I would well suffre the lasse grevously. For why, in soche an unprofitable man myne ententes were nothyng endamaged. But ye withdrowen from me this man, that hath ben nourished in my studies or scoles of Eleaticis, and of Academicis in Grece. But goeth now rather awaie ye Mermaidens, whiche that ben swete, till it be at the last, and suffreth this man to be cured and healed by my muses, that is to say, by my notefull sciences. And thus this companie of muses iblamed casten wrothly the chere dounward to the yerth, and shewing by rednesse their shame, thei passeden sorowfully the thresholde. And I of whom the sight plounged in teres was darked, so that I ne might not know what that woman was, of so Imperial aucthoritie, I woxe all abashed and stonied, and cast my sight doune to the yerth, and began still for to abide what she would doen afterward. Then came she nere, and set her doune upon the utterest corner of my bed, and she beholdyng my chere, that was cast to the yerth, hevie and grevous of wepyng, complained with these wordes (that I shall saine) the perturbacion of my thought.

Greke letter T. whych estandeth for theorica, that signifieth speculacion or contemplation. And betwene both the sayd letters were sene certayne degrees, wrought after the maner of ladders, wherein was as it were a passage or waye in steppes or degrees from the lower part where the letter P. was which is vnderstand from practys or actyf, unto the hygher parte wher the letter T. was whych is vnderstand speculacion or contemplacion. Neuthertheles the handes of some vyolente persones had cut the sayde vestures and had taken awaye certayne pecis thereof, such as euery one coulde catch. And she her selfe dyd bare in her right hand litel bokes, and in her lefte hande a sceptre, which foresayd phylosophy (when she saw the muses poetical present at my bed, spekyng sorowfull wordes to my wepynges) beyng angry sayd (with terrible or frownynge countenance) who suffred these crafty harlottes to com to thys sycke man? whych can help him by no means of hys griefe by any kind of medicines, but rather increase the same with swete poyson. These be they that doo dystroye the fertile and plentious commodytyes of reason and the fruytes thereof with their pryckynge thornes, or barren affectes, and accustome or subdue mens myndes with sickeness, and heuynes, and do not delyuer or heale them of the same. But yf your flatterye had conueyed or wythdrawen from me, any vnlernyd man as the comen sorte of people are wonte to be, I could haue ben better contentyd, for in that my worke should not be hurt or hynderyd. But you haue taken and conueyed from me thys man that hath ben broughte vp in the studyes of Aristotel and of Plato. But yet get you hence maremaids (that seme swete untyll you haue brought a man to deathe) and suffer me to heale thys my man with my muses or scyences that be holsome and good. And after that philosophy had spoken these wordes the said companye of the musys poeticall beynge rebukyd and sad, caste downe their countenaunce to the grounde, and by blussyng confessed their shamefastnes, and went out of the dores. But I (that had my syght dull and blynd wyth wepyng, so that I knew not what woman this was hauyng soo great aucthoritie) was amasyd or astonyed, and lokyng downeward, towarde the ground, I began pryvyle to look what thyng she would saye ferther, then she had said. Then she approaching and drawynge nere vnto me, sat downe vpon the vttermost part of my bed, and lokyng vpon my face sad with weping, and declynyd toward the earth for sorow, bewayled the trouble of my minde wyth these sayinges folowynge.

The Conclusions of the Astrolabie.

This book (written to his son in the year of our Lord 1391, and in the 14 of King Richard II.) standeth so good at this day, especially for the horizon of Oxford, as in the opinion of the learned it cannot be amended, says an Edit. of Chaucer.

LYTEL Lowys my sonne, I perceve well by certaine evidences thyne abylyte to lerne scyences, touching nombres and proporcions, and also well consydre I thy besye prayer in especyal to lerne the tretyse of the astrolabye. Than for as moche as a philosopher saithe, he wrapeth hym in his frende, that condiscendeth to the ryghtfull prayers of his frende: therefore I have given the a sufficient astrolabye for oure orizont, compowned after the latitude of Oxenforde: upon the whiche by mediacion of this lytell tretise, I purpose to teche the a certaine nombre of conclusions, pertaynge to this same instrument. I say a certain nombre of conclusions for thre causes, the first cause is this. Truste wel that al the conclusions that have be founden, or ells posiblye might be founde in so noble an instrument as in the astrolabye; ben unknowen perfitely to anye mortal man in this region, as I suppose. Another cause is this, that sothely in any cartes of the astrolabye that I have ysene, ther ben some conclusions, that wol not in al thinges perfourme ther behestes: and some of 'hem ben to harde to thy tender age of ten yere to conceve. This tretise divided in five partes, wil I shewe the wondir light rules and naked wordes in Englishe, for Latine ne canst thou nat yet but smale, my litel sonne. But neverthelesse suffiseth to the these trewe conclusyons in Englishe, as wel as suffiseth to these noble clerkes Grekes these same conclusyons in Greke, and to the Arabines in Arabike, and to the Jewes in Hebrewe, and to the Latin folke in Latyn: whiche Latyn folke had 'hem firste out of other divers langages, and write 'hem in ther owne tonge, that is to saine in Latine.

And God wote that in all these langages and in manye mo, have these conclusyons ben sufficientlye lerned and taught, and yet by divers rules, right as divers pathes leden divers folke the right waye to Rome.

Now wol I pray mekely every person discrete, that redeth or hereth this lityl tretise to have my rude ententing excused, and my superfluite of wordes, for two causes. The first cause is, for that curious endityng and harde sentences is ful hevy at ones, for soch a childe to lerne. And the seconde

cause is this, that sothely me semeth better to writen unto a childe twise a gode sentence, that he foriete it ones. And, Lowis, if it be so that I shewe the in my lith Englishe, as trew conclusions touching this matter, and not only as trewe but as many and subtil conclusions as ben yshewed in Latin, in any comon tretise of the astrolabye; conne me the more thanke, and praye God save the kinge, that is lorde of this langage, and all that him faith bereth, and obeieth everiche in his degree, the more and the lasse. But consydreth well, that I ne usurpe not to have founden this werke of my labour or of myne engin. I n'ame but a leude compilatour of the laboure of olde astrologiens, and have it translated in myn Englishe onely for thy doctrine: and with this swerde shal I slene envy.

The first party.

The first partye of this tretise shall reherce the figures, and the membres of thyne astrolaby, bycause that thou shalte have the greter knowinge of thine owne instrument.

The seconde party.

The seconde partye shal teche the to werken the very practike of the foresaid conclusions, as ferforthe and also narowe as may be shewed in so smale an instrument portatife aboute. For wel wote every astrologien, that smallest fractions ne wol not be shewed in so smal an instrument, as in subtil tables calculed for a cause.

The Prologue of the Testament of LOVE.

MANY men ther ben, that with eres openly sprad so moche swalowen the deliciousnesse of jestes and of ryme, by queint knittinge coloures, that of the godenesse or of the badnesse of the sentence take they litel hede or els none.

Sothelye dulle witte and a thoughtfulle soule so sore have mined and graffed in my spirites, that soche craft of enditinge woll nat ben of mine acquaintaunce. And for rude wordes and boistous percen the herte of the herer to the inrest point, and planten there the sentence of thinges, so that with litel helpe it is able to spring, this boke, that nothynge hath of the grete flode of wytte, ne of semelyche colours, is dolven with rude wordes and boistous, and so drawe togiðer to maken the catchers therof ben the more redy to hent sentence.

Some men there ben, that painten with colours riche and some with wers, as with red inke, and some with coles and chalke: and yet is there gode matter to the leude peple of thylke chalkye purtreyture, as 'hem thinketh for the time, and afterward the syght of the better colours yeven to 'hem more joye for the first leudenesse. So sothly this leude clowdy occupacyon is not to prayse, but by the leude, for comenly leude leudenesse commendeth. Eke it shal yeve sight that other precyous thynges shall be the more in reverence. In Latin and French hath many soveraine wittes had grete delyte to endite, and have many noble thinges fulfilde, but certes there ben some that speken ther poise mater in Frenche, of whiche speche the Frenche men have as gode a fantasye as we have in heryng of Frenche mens Englishe. And many termes ther ben in Englishe, whiche unneth we Englishe men connen declare the knowleginge: howe should than a Frenche man borne soche terms connejumpere in his matter, but as the jay chattereth Englishe? Right so truely the understandyn of Englishmen woll not stretche to the privie termes in Frenche, what so ever we bosten of straunge langage. Let than clerkes enditen in Latin, for they have the propertie of science, and the knowinge in that facultie: and lette Frenche men in ther Frenche also enditen ther queint termes, for it is kyndely to ther mouthes: and let us shewe our fantasies in such wordes as we lerneden of our dame's tonge. And although this boke be lytel thank worthy for the leudenesse in travail, yet such writing exiten men to thilke thinges that ben necessarie: for every man therby may as by a perpetual myrrour sene the vices or vertues of other; in whyche thynge lightly may be conceved to eschue perils, and necessaries to catch, after as aventures have fallen to other peple or persons.

Certes the soverainst thinge of desire and most creture resonable, have or els shuld have full appetite to ther perseccyon: unresonable bestes mowen not, sithe reson hath in 'hem no workinge: than resonable that wol not, is comparisoned to unresonable, and made lyke 'hem. Forsothe the most soveraine and final perfeccion of man is in knowynge of a sothe, withouten any entent decevable, and in love of one very God, that is inchaungeable, that is to knowe, and love his creatour.

Nowe principally the mene to brynge in knowleging and lovynge his creatour, is the consideracyon of thinges made by the creatour, wher through by thylke thinges that ben made, understandynge here to our wyttes, arne the unsene pryvities of God made to us syghtfull and knowynge, in our contemplacion and understondinge. These thinges than forsothe moche bringen as to the ful knowleginge sothe, and to the parfyte love of the maker of heavenly thynges. Lo! David saith: thou haste delighted me in makinge, as who saith, to have delite in the tune how God hat lent me in consideracion of thy makinge. Whereof Aristotle in the boke de Animalibus, saith to naturell philosophers: it is a grete likynge in love of knowinge ther cretoure: and also in knowinge of causes in kindelye thynges, considrid forsothe the formes of kindelye thynges and the shap, a gret kindelye love we shulde have to the werkman that 'hem made. The craft of a werkman is shewed in the werk. Herefore trulie the philosophers with a lyvely studie manie noble thinges, righte precious, and worthy to memorye, writen, and by a gret swet and travaile to us lefte of causes the properties in natures of thinges, to whiche therefore philosophers it was more joy, more lykinge, more herty lust in kindely vertues and matters of reson the perfeccion by busy study to knowe, than to have had all the tresour, al the richesse, all the vaine glory, that the passed emperours princes, or kinges hadden. Therefore the names of 'hem in the boke of perpetuall memorie in vertue and pece arne writen; and in the contrarie, that is to saine, in Styxe the foule pitte of helle arne thilke pressed that soch godeness hated. And bicause this boke shall be of love and the prime causes of stering in that doinge with passions and diseses for wantinge of desire, I wil that this boke be cleped the testament of love.

But nowe thou reder, who is thilke that will not in scorne laughe to here a dwarfe or els halfe a man, say he will rende out the swerde of Hercules handes, and also he shulde set Hercules Gades a mile yet ferther, and over that he had power of strength to pull up the spere, that Alisander the noble myght never wagge, and that passinge al thinge to ben mayster of Fraunce by might, there as the noble gracious Edwarde the thirde for al his grete prowesse in victories ne might al yet conquere?

Certes I wote well, ther shall be made more scorne and jape of me, that I so unworthely clothed altogither in the cloudie cloude of unconning, wil putten me in prees to speke of love, or els of the causes in that matter, sithen al the gretest clerkes han had ynough to don, and as who saith gathered up clene toforne 'hem, and with their sharp sithes of conning al mowen and made therof grete rekes and noble, ful of al plenties to fede me and many an other. Envye forsothe commendeth noughte his reson, that he hath in hain, be it never so trusty. And although these noble repers, as gode work-

men and worthy ther hier, han al draw and bounde up in the sheves, and made many shockes, yet have I ensample to gaðer the smale crommes, and fullin ma walet of tho that falled from the bourde among the small houndes, notwithstanding the travaile of the almoigner, that hath draw up in the cloth al the remissailes, as trenchours, and the relefe to bere to the almesse. Yet also heve I leve of the noble husbande Boece, although I be a straunger of conninge to come after his doctrine, and these grete workmen, and glene my handfuls of the shedynge after ther handes, and yf me faile ought of my ful, to encrese my porcion with that I shal drawe by privyties out of shockes; a slye servaunte in his owne helpe is often moche commended; knowynge of trouthe in causes of thynges, was more hardier in the firste sechers, and so sayth Aristotle, and lighter in us that han folowed after. For ther passing study han freshed our wittes, and oure understandynge han excited in consideracion of trouth by sharpenes of ther resons. Utterly these thinges be no dremes ne japes, to throwe to hogges, it is lyfelych mete for children of trouth, and as they me betiden whan I pilgramed out of my kith in wintere, whan the wether out of mesure was boistous, and the wyld wynd Boreas, as his kind asketh, with dryinge coldes maked the wawes of the ocean se so to arise unkindely over the commune bankes that it was in point to spill all the erthe.

The Prologues of the Canterbury Tales of CHAUCER, from the MSS.

WHEN that Aprilis with his shouris sote,
The drought of March had percid to the rote,
And bathid every veyn in such licour,
Of which vertue engendrid is the flour.
When Zephyrus eke, with his swetè breth
Enspirid hath, in every holt and heth
The tender croppis; and that the young Sunn
Hath in the Ramm his halvè cours yrunn:
And smalè foulis makin melodye,
That slepin allè night with opin eye,
(So prickith them nature in ther corage)
Then longin folk to go on pilgrimage:
And palmers for to sekin strangè strondes,
To servin hallowes couth in sondry londes:
And specially fro every shir'is end
Of England, to Canterbury they wend,
The holy blisfull martyr for to seke,
That them hath holpin, whan that they were seke.
Befell that in that seson on a day
In Southwerk at the Tabberd as I lay,
Redy to wendin on my pilgrimage
To Canterbury, with devote corage,
At night wer come into that hostery
Wele nine and twenty in a cumpany
Of sundrie folk, by aventure yfall
In felaship; and pilgrimes wer they all;
That toward Canterbury wouldin ride.
The chambers and the stablis werin wide,
And well we werin esid at the best:
And shortly whan the sunnè was to rest,
So had I spokin with them everych one,
That I was of ther felaship anone;
And madè forward erli for to rise,
To take our weye, ther as I did devise.
But nathless while that I have time and space,
Er' that I farther in this talè pace,
Methinkith it accordaunt to reson,
To tell you allè the condition
Of ech of them, so as it semid me,
And which they werin, and of what degree,
And eke in what array that they wer in:
And at a knight then woll I first begin.

The Knight.

A knight ther was, and that a worthy man,
That fro the timè that he first began
To ridin out, he lovid Chevalrie;
Trouth and honour, fredome and curtesy.
Full worthy was he in his lordis werre,
And thereto had he ridden nane more ferre
As well in Christendom, as in Hethness;
And evyr honoured for his worthiness.
At Alessandre he was whan it was won;
Full oft timis he had the bord begon
Abovin allè naciouns in Pruce;
In Lettow had he riddin, and in Luce,
No Christen-man so oft of his degree
In Granada; in the sege had he be
Of Algezir, and ridd in Belmary;
At Leyis was he, and at Sataly,
Whan that they wer won; and in the grete see
At many'a noble army had he be:
At mortal battails had he ben fiftene,
And foughtin for our feith at Tramesene,
In listis thrys, and alwey slein his fo.
This ilke worthy knight hath been also
Sometimis with the lord of Palathy,
Ayens anothir hethin in Turky;
And evirmore he had a sov'rane prize;
And though that he was worthy, he was wise;
And of his port as meke as is a maid,
He nevir yet no villany ne said
In all his life unto no manner wight:
He was a very parfit gentil knight.
But for to tellin you of his array,
His hors wer good; but he was nothing gay,
Of fustian he werid a gipon,
Allè besmottrid with his haburgeon.
For he was late ycome from his viage,
And wenté for to do his pilgrimage.

The House of FAME.

The First Boke.

NOW herkin, as I have you saied,
What that I mette or I abraied,
Of December the tenith daie,
When it was night, to slepe I laie,
Right as I was wonte for to doen,
And fill aslepè wondir sone,
As he that was werie forgo
On pilgrimagè milis two
To the corps of sainct Leonarde,
To mankin lithe that erst was harde.
But as slept me mette I was
Within a temple' imade of glas,
In whiche there werin mo images
Of golde, standyng in sondrie stages,
Sette in mo riche tabirnacles,
And with perrè no pinnacles,
And mo curious portraituris,
And queint manir of figuris
Of golde worke, then I sawe evir.
But certainly I n'ist nevir
Where that it was, but well wist I
It was of Venus redily
This temple, for in purtreiture
I sawe anone right her figure,
Nakid yfletyng in a se,
And also on her hedde parde
Her rosy garland white and redde,
And her combe for to kembe her hedde
Her dovis, and Dan Cupido
Her blindè sonne, and Vulcano,
That in his face ywas full broune.
But as I romid up and doune,
I founde that on the wall there was
Thus writtin on a table' of bras.
I woll now syng, if that I can,
The armis, and also the man,

That first came through his destine
Fugitife fro Troye the countre
Into Itaile, with full moche pine,
Unto the strondis of Lavine,
And tho began the storie' anone,
As I shall tellin you echone.
First sawe I the distruccion
Of Troie, through the Greke Sinon,
With his false untrue forswerynges,
And with his chere and his lesynges,
That made a horse, brought into Troye,
By whiche Trojans loste all their joye.
And aftir this was graved, alas!
How Ilions castill assailed was,
And won, and kyng Priamus slain,
And Polites his sonne certain,
Dispitously of Dan Pyrrhus.
And next that sawe I howe Venus,
When that she sawe the castill brende,
Doune from hevin she gan discende,
And bade her sonne Æneas fle,
And how he fled, and how that he
Escapid was from all the pres,
And toke his fathre', old Anchises,
And bare hym on his backe awaie,
Crying alas and welawaie!
The whiche Anchises in his hande,
Bare tho the goddis of the lande
I mene thilke that unbrennid were.
Then sawe I next that all in fere
How Creusa, Dan Æneas wife,
Whom that he lovid all his life,
And her yong sonne clepid Julo,
And eke Ascanius also,
Fleddin eke, with full drerie chere,
That it was pite for to here,
And in a forest as thei went
How at a tournyng of a went
Creüsa was iloste, alas!
That rede not I, how that it was
How he her sought, and how her ghoste
Bad hym to flie the Grekis hoste,
And saied he must into Itaile,
As was his destinie, sauns faile,
That it was pitie for to here,
When that her spirite gan appere,
The wordis that she to hym saied,
And for to kepe her sonne hym praied.
There sawe I gravin eke how he
His fathir eke, and his meinè,
With his shippis began to saile
Toward the countrey of Itaile,
As streight as ere thei mightin go.
There sawe I eke the, cruill Juno,
That art Dan Jupiter his wife,
That hast ihated all thy life
Merciless all the Trojan blode,
Rennin and crie as thou were wode
On Æolus, the god of windes,
To blowin out of allè kindes
So loudè, that he should ydrenche
Lorde, and ladie, and grome, and wenche
Of all the Trojanis nacion,
Without any' of ther salvacion.
There sawe I soche tempest arise,
That evèry herte might agrise,
To se it paintid on the wall.
There sawe I eke gravin withall,
Venus, how ye, my ladie dere,
Ywepyng with full wofull chere
Ypraid Jupiter on hie,
To save and kepin that navie
Of that dere Trojan Æneas,
Sithins that he your sonne ywas.

Gode Counsaile of Chaucer.

FLIE fro the prese and dwell with sothfastnesse,
Suffise unto thy gode though it be small,
For horde hath hate, and climbyng tikilnesse,
Prece hath envie, and wele it brent oer all,
Savour no more than the behovin shall,
Rede well thy self, that othir folke canst rede,
And trouthe the shall delivir it 'is no drede,
Painè the not eche crokid to redresse,
In trust of her that tournith as a balle,
Grete rest standith in litil businesse,
Beware also to spurne against a nalle,
Strive not as doith a crocke with a walle,
Demith thyself that demist othir's dede,
And trouthe the shall deliver it 'is no drede.
That the is sent receve in buxomenesse;
The wrastlyng of this worlde askith a fall;
Here is no home, here is but wildirnesse,
Forthe pilgrim, forthe o best out of thy stall,
Loke up on high, and thanke thy God of all,
Weivith thy luste and let thy ghost the lede,
And trouthe the shall delivir, it 'is no drede.

Balade of the village without paintyng.

THIS wretchid world'is transmutacion
As wele and wo, nowe pore, and now honour,
Without ordir or due discrecion
Govirnid is by fortun'is errour,
But nathèlesse the lacke of her favour
Ne maie not doe me syng though that I die,
J'ay tout perdu, mon temps & mon labeur,
For finally fortune I doe defie,
Yet is me left the sight of my resoun
To knowin frende fro foe in thy mirrour,
So moche hath yet thy tournyng up and doun,
I taughtin me to knowin in an hour,
But truily no force of thy reddour
To hym that ovir hymself hath maistrie,
My suffisaunce yshal be my succour,
For finally fortune I do defie.
O Socrates, thou stedfast champion;
She ne might nevir be thy turmentour,
Thou nevir dreddist her oppression,
Ne in her chere foundin thou no favour,
Thou knewe wele the disceipt of her colour,
And that her moste worship is for to lie,
I knowe her eke a false dissimulour,
For finally fortune I doe defie.

The answere of Fortune.

No man is wretchid but himself it wene,
He that yhath hymself hath suffisaunce,
Why saiest thou then I am to the so kene,
That hast thy self out of my govirnaunce?
Saie thus grant mercie of thin habundaunce,
That thou hast lent or this, thou shalt not strive,
What wost thou yet how I the woll avaunce?
And eke thou hast thy bestè frende alive.
I have the taught division betwene
Frende of effecte, and frende of countinaunce,
The nedith not the gallè of an hine,
That curith eyin derke for ther penaunce,
Now seest thou clere that wer in ignoraunce,
Yet holt thine anker, and thou maiest arive
There bountie bereth the key of my substaunce,
And eke thou hast thy bestè frende alive.
How many have I refused to sustene
Sith I have the fostrid in thy plesaunce?
Wolt thou then make a statute on thy quene,
That I shall be aie at thine ordinaunce?
Thou born art in my reign of variaunce,
About the whele with othir must thou drive
My lore is bet, then wicke is thy grevaunce,
And eke thou hast thy bestè frende alive.

The answere to Fortune.

Thy lore I dampne, it is adversitie,
My frend maist thou not revin blind goddesse,
That I thy frendis knowe I thanke it the,
Take 'hem again, let 'hem go lie a presse,

The nigardis in kepyng ther richesse
Pronostike is thou wolt ther toure assaile,
Wicke appetite cometh aie before sicknesse;
In generall this rule ne maie not faile.

Fortune.

Thou pinchist at my mutabilitie,
For I the lent a droppe of my richesse.
And now me likith to withdrawin me,
Why shouldist thou my roialtie oppresse?
The se mai ebbe and flowin more and lesse,
The welkin hath might to shine, rain, and haile,
Right so must I kithin my brotilnesse,
In generall this rule ne maie not faile.

The Plaintiffe.

Lo, the' execucion of the majestie,
That all purveighith of his rightwisenesse,
That samè thyng fortune yclepin ye,
Ye blindè bestis full of leudènesse!
The heven hath propirtie of sikirness,
This worldè hath evir restlesse travaile,
The last daie is the ende of myne entresse,
In generall this rule ne maie not faile.

Th' envoye of Fortune.

Princes I praie you of your gentilnesse,
Let not this man and me thus crie and plain,
And I shall quitin you this businesse,
And if ye liste releve hym of his pain,
Praie ye his best frende of his noblenesse
That to some bettir state he maie attain.

Lydgate was a monk of *Bury*, who wrote about the same time with *Chaucer*. Out of his prologue to his third book of the *Fall of Princes* a few stanzas are selected, which, being compared with the style of his two contemporaries, will show that our language was then not written by caprice, but was in a settled state.

LIKE a pilgrime which that goeth on foote,
And hath none horse to releue his trauayle,
Whote, drye and wery, and may find no bote
Of wel cold whan thrust doth hym assayle,
Wine nor licour, that may to hym auayle,
Tight so fare I which in my businesse,
No succour fynde my rudenes to redresse.
I meane as thus, I haue no fresh licour
Out of the conduites of Calliope,
Nor through Clio in rhethorike no floure,
In my labour for to refresh me;
Nor of the susters in noumber thrise three,
Which with Cithera on Parnaso dwell,
They neuer me gaue drinke once of their wel.
Nor of theyr springes clere and christaline.
That sprange by touchyng of the Pegase,
Their fauour lacketh my making ten lumine
I fynde theyr bawme of so great scarcitie,
To tame their tunnes with some drop of plentie
For Poliphemus throw his great blindnes,
Hath in me derked of Argos the brightnes.
Our life here short of wit the great dulnes
The heuy soule troubled with trauayle,
And of memorye the glasyng brotelnes,
Drede and vncunning haue made a strong batail
With werines my spirite to assayle,
And with their subtil creping in most queint
Hath made my spirit in makyng for to feint.
And ouermore, the ferefull frowardnes
Of my stepmother called obliuion,
Hath a bastyll of foryetfulnes,
To stoppe the passage, and shadow my reason
That I might haue no clere direccion,
In translating of new to quicke me,
Stories to write of old antiquite.
Thus was I set and stode in double werre
At the metyng of fearful wayes tweyne,
The one was this, who euer list to lere,
Whereas good wyll gan me constrayne,
Bochas taccomplish for to doe my payne,
Came ignoraunce, with a menace of drede,
My penne to rest I durst not procede.

Fortescue was chief justice of the Common-Pleas, in the reign of king *Henry* VI. He retired in 1471, after the battle of Tewkesbury, and probably wrote most of his works in his privacy. The following passage is selected from his book of the *Difference between an absolute and limited Monarchy*.

HYT may peraventure be marvelid by some men, why one Realme is a Lordshyp only *Royall*, and the Prynce thereof rulyth yt by his Law, callid *Jus Regale;* and another Kyngdome is a Lordschip, *Royal and Politike*, and the Prince thereof rulyth by a Lawe, callyd *Jus Politieum et Regale;* sythen thes two Princes beth of egall Astate.

To this dowte it may be answeryd in this manner; The first Institution of thes twoo Realmys, upon the Incorporation of them, is the Cause of this diversyte.

When Nembroth by Might, for his own Glorye, made and incorporate the first Realme, and subduyd it to hymself by Tyrannye, he would not have it governyd by any other Rule or Lawe, but by his own Will; by which and for th' accomplishment thereof he made it. And therfor, though he had thus made a Realme, holy Scripture denyd to cal hym a Kyng, *Quia Rex dicitur a Regendo;* Whych thyng he did not, but oppressyd the People by Myght, and therfor he was a Tyrant, and called *Primus Tyrannorum.* But holy Writ callith hym *Robustus Venator coram Deo.* For as the Hunter takyth the wyld beste for to scle and eate hym; so Nembroth subduyd to him the People with Might, to have their service and their goods, using upon them the Lordschip that is callid *Dominium Regale tantum.* After hym Belus that was callid first a Kyng, and after hym his Sone Nynus, and after hym other Panyms; They, by Example of Nembroth, made them Realmys, would not have them rulyd by other Lawys than by their own Wills. Which Lawys ben right good under good Princes; and their Kyngdoms a then most resemblyd to the Kyngdome of God, which reyneth upon Man, rulyng him by hys own Will. Wherfor many Crystyn Princes usen the same Lawe; and therfor it is, that the Lawys sayen, *Quod Principi placuit Legis habet vigorem.* And thus I suppose first beganne in Realmys, *Dominium tantum Regale.* But afterward, when mankynd was more mansuete, and better disposyd to Vertue, Grete Communalties, as was the Feliship, that came into this Lond with Brute, wyllyng to be unyed and made a Body Politike called a Realme, havyng an Heed to governe it; as after the Saying of the Philosopher, every Communaltie unyed of many parts must needs have an Heed; than they chose the same Brute to be their Heed and Kyng. And they and he upon this Incorporation and Institution, and onyng of themself into a Realme, ordeynyd the same Realme so to be rulyd and justyfyd by such Laws, as they al would assent unto; which Law therfor is callid *Politicum;* and bycause it is mynystrid by a Kyng, it is callid *Regale. Dominium Politicum dicitur quasi Regi-*

men, plurium Scientia, sive Consilio ministratum. The Kyng of Scotts reynith upon his People by his Lawe, *videlicet, Regimine Politico et Regali.* And as Diodorus Syculus saith, in his Boke *de priscis Historiis*, The Realme of Egypte is rulid by the same Lawe, and therfor the Kyng therof chaungith not his Lawes, without the Assent of his People. And in like forme as he saith is ruled the Kyngdome of Saba, in Felici Arabia, and the Lond of *Libie;* And also the more parte of al the Realmys in *Afrike.* Which manner of Rule and Lordship, the sayd Diodorus in that Boke, praysith gretely. For it is not only good for the Prince, that may thereby the more sewerly do Justice, than by his owne Arbitriment; but it is also good for his People that receyve therby, such justice as they desyer themself. Now as me seymth, it ys shewyd opinly ynough, why one Kyng rulyth and reynith on his People *Dominio tantum Regali*, and that other reynith *Dominio Politico et Regali:* For that one Kyngdome beganne, of and by, the Might of the Prince, and that other beganne, by the Desier and Institution of the People of the same Prince.

Of the works of Sir *Thomas More* it was necessary to give a larger specimen, both because our language was then in a great degree formed and settled, and because it appears from *Ben Jonson*, that his works were considered as models of pure and elegant style. The tale, which is placed first, because earliest written, will show what an attentive reader will, in perusing our old writers, often remark, that the familiar and colloquial part of our language, being diffused among those classes who had no ambition of refinement, or affectation of novelty has suffered very little change. There is another reason why the extracts from this author are more copious: his works are carefully and correctly printed, and may therefore be better trusted than any other edition of the *English* books of that or the preceding ages.

A merry iest how a sergeant would learne to playe the frere. Written by maister Thomas More in hys youth.

WYSE men alway,
Affyrme and say,
That best is for a man:
Diligently,
For to apply,
The busines that he can,
And in no wyse,
To enterpryse,
An other faculte,
For he that wyll,
And can no skyll,
Is neuer lyke to the.
He that hath lafte,
The hosiers crafte,
And falleth to making shone,
The smythe that shall,
To paynting fall,
His thrift is well nigh done.
A blacke draper,
With whyte paper,
To goe to writyng scole,
An olde Butler,
Becum a cutler,
I wene shall proue a fole.
And an olde trot,
That can I wot,
Nothyng but kysse the cup,
With her phisick,
Wil kepe one sicke,
Tyll she haue soused hym vp.
A man of lawe,
That neuer sawe.
The wayes to buye and sell,
Wenying to ryse,
By marchaundise,
I wish to spede hym well.
A marchaunt eke,
That wyll goo seke,
By all the meanes he may,
To fall in sute,
Tyll he dispute,
His money cleane away,
Pletyng the lawe,
For euery strawe,
Shall proue a thrifty man,
With bate and strife,
But by my life,
I cannot tell you whan.
Whan an hatter
Wyll go smatter
In philosophy,
Or a pedlar,
Ware a medlar,
In theology,
All that ensue,
Suche craftes new,
They driue so farre a cast,
That euermore,
They do therfore,
Beshrewe themselfe at last.
This thing was tryed
And verefyed,
Here by a sergeaunt late,
That thriftly was,
Or he coulde pas,
Rapped about the pate,
Whyle that he would,
See how he could,
A little play the frere:
Now yf you wyll,
Knowe how it fyll,
Take hede and ye shall here.
It happed so,
No long ago,
A thrifty man there dyed,
An hundred pounde,
Of nobles rounde,
That had he layd a side:
His sonne he wolde,
Should haue this golde,
For to beginne with all:
But to suffise
His chylde, well thrise,
That money was to smal.
Yet or this day,
I have hard say,
That many a man certesse,
Hath with good cast,
Be ryche at last,
That hath begonne with lesse.
But this yonge manne,
Se well beganne,
His money to imploy,
That certainly,
His policy,
To see it was a joy,
For lest sum blast,
Myght ouer cast,
His ship, or by mischaunce,
Men with sum wile,
Myght hym begyle,
And minish his substaunce,
For to put out,
Al maner dout,
He made a good puruay,
For euery whyt,
By his owne wyt,
And toke an other way:
First fayre and wele,
Thereof much dele,
He dygged it in a pot,
But then him thought,
That way was nought,
And there he left it not.
So was he faine,
From thence agayne,
To put it in a cup,
And by and by,
Couetously,
He supped it fayre vp,
In his owne brest,
He thought it best,
His money to enclose,
Then wist he well,
What euer fell,
He coulde it neuer lose.
He borrowed then,
Of other men,
Money and marchaundise:
Neuer payd it,
Up he laid it,
In lyke maner wyse,
Yet on the gere,
That he would were,
He reight not what he spent,
So it were nyce,
As for the price,
Could him not miscontent.
With lusty sporte,
And with resort,
Of ioly company,
In mirth and play,
Full many a day,
He liued merely.
And men had sworne,
Some man is borne,

To haue a lucky howre,
And so was he,
For such degre,
He gat and suche honour,
That without dout,
Whan he went out,
A sergeaunt well and fayre,
Was redy strayte,
On him to wayte,
As sone as on the mayre.
But he doubtlesse,
Of his mekenesse,
Hated such pompe and pride,
And would not go
Companied so,
But drewe himself a side,
To saint Katharine,
Streight as a line,
He gate him at a tyde,
For deuocion,
Or promocion,
There would he nedes abyde.
There spent he fast,
Till all were past,
And to him came there meny,
To aske theyr det,
But none could get,
The valour of a peny.
With visage stout,
He bare it out,
Euen vnto the harde hedge,
A month or twaine,
Tyll he was fayne,
To laye his gowne to pledge.
Than was he there,
In greater feare,
Than ere that he came thither,
And would as fayne,
Depart againe,
But that he whist not whither,
Than after this,
To a frende of his,
He went and there abode,
Where as he lay,
So sick alway,
He myght not come abrode.
It happed than,
A marchant man,
That he ought money to,
Of an officere,
Than gan enquere,
What him was best to do.
And he answerde,
Be not aferde,
Take an accion therfore,
I you beheste,
I shall him reste,
And then care for no more.
I feare quod he,
It wyll not be,
For he wyll not come out.
The sergeaunt said,
Be not afrayd,
It shall be brought about.
In many a game,
Lyke to the same,
Haue I bene well in vre,
And for your sake,
Let me be bake,
But yf I do this cure.
Thus part they both,
And foorth then goth,
A pace this officere,
And for a day,
All his array,
He chaunged with a frere.
So was he dight,
That no man might,
Hym for a frere deny,
He dooped and dooked,
He spake and looked,
So religiously.
Yet in a glasse,
Or he would passe,
He toted and he peered,
His harte for pryde,
Lepte in his syde,
To see how well he freered.
Than forth a pace,
Unto the place,
He goeth withouten shame
To do this dede,
But now take hede,
For here begynneth the game.
He drew him ny,
And softely,
Streyght at the dore he knocked:
And a damsell,
That hard hym well,
There came and it vnlocked.
The frere sayd,
Good spede fayre mayd,
Here lodgeth such a man,
It is told me:
Well syr quod she,
And if he do what than.
Quod he maystresse,
No harme doutlesse:
It longeth for our order,
To hurt no man,
But as we can,
Euery wight to forder.
With hym truly,
Fayne speake would I.
Sir quod she by my fay,
He is so sike
Ye be not lyke,
To speake with him to day.
Quod he fayre may,
Yet I you pray,
This much at my desire,
Vouchesafe to do,
As go hym to,
And say an austen frere
Would with hym speke,
And matters breake,
For his auayle certayn.
Quod she I wyll,
Stonde ye here styll,
Tyll I come downe agayn.
Vp is she go,
And told hym so,
As she was bode to say,
He mistrustyng,
No maner thyng,
Sayd mayden go thy way,
And fetch him hyder,
That we togyder,
May talk. A downe she gothe,
Vp she hym brought,
No harme she thought,
But it made some folke wrothe.
This officere,
This fayned frere,
Whan he was come aloft,
He dopped than,
And grete this man,
Religiously and oft.
And he agayn,
Right glad and fayn,
Toke hym there by the hande,
The frere then sayd,
Ye be dismayd,
With trouble I understande.
In dede quod he,
It hath with me,
Bene better than it is.
Syr quod the frere,
Be of good chere,
Yet shall it after this.
But I would now,
Comen with you,
In counsayle yf you please,
Or ellys nat
Of matters that,
Shall set your heart at ease.
Downe went the mayd,
The marchaunt sayd,
Now say on gentle frere,
Of thys tydyng,
That ye me bryng,
I long full sore to here.
Whan there was none,
But they alone,
The frere with euyll grace,
Sayd, I rest the,
Come on with me,
And out he toke his mace:
Thou shalt obay,
Come on thy way,
I have the in my clouche,
Thou goest not hence,
For all the pense,
The mayre hath in his pouche.
This marchaunt there,
For wrath and fere,
He waxyng welnygh wood,
Sayd horson thefe,
With a mischefe,
Who hath taught the thy good.
And with his fist,
Vpon the lyst,
He gaue him such a blow,
That backward downe,
Almost in sowne,
The frere is ouerthrow.
Yet was this man,
Well fearder than,
Lest he the frere had slayne,
Till he with good rappes,
And heuy clappes,
He dawde hym vp agayn.
The frere toke harte,
And vp he starte,
And well he layde about,
And so there goth,
Betwene them both,

Many a lusty clout.
They rent and tere,
Lche others here,
And clawe togyder fast.
Tyll with luggyng,
And with tuggyng,
They fell downe bothe at last.
Than on the grounde,
Togyder rounde,
With many a sadde stroke.
They roll and rumble,
They turn and tumble,
As pygges do in a poke.
So long aboue,
They heue and shoue,
Togider that at last,
The mayd and wyfe,
To breake the strife,
Hyed them vpward fast
And whan they spye,
The captaynes lye,
Both waltring on the place.
The freres hood,
They pulled a good,
Adowne about his face.

Whyle he was blynde,
The wenche behynde,
Lent him leyd on the flore.
Many a ioule,
About the noule,
With a great batyldore.
The wyfe came yet,
And with her fete,
She holpe to kepe him downe,
And with her rocke,
Many a knocke,
She gaue him on the crowne.
They layd his mace,
About his face,
That he was wood for payne:
The fryre frappe,
Gate many a swappe,
Tyll he was full nygh slayne.
Vp they hym lift,
And with yll thrift,
Hedlyng a long the stayre,
Downe they hym threwe,
And sayde adewe,
Commende us to the mayre.

The frere arose,
But I suppose,
Amased was his hed,
He shoke his eares,
And from grete feares,
He thought hym well yfled.
Quod he now lost,
Is all this cost,
We be neuer the nere.
Ill mote he be,
That caused me,
To make my self a frere
Now masters all,
Here now I shall,
Ende there as I began,
In any wyse,
I would auyse,
And counsayle euery man,
His own craft vse
All newe refuse,
And lyghtly let them gone:
Play not the frere,
Now make good chere,
And welcome euerych one.

A ruful lamentacion (written by master Thomas More in his youth) of the deth of quene Elisabeth mother to king Henry the eight, wife to king Henry the seuenth, and eldest doughter to king Edward the fourth, which quene Elisabeth dyed in childbed in February in the yere of our Lord 1503, and in the 18 yere of the raigne of king Henry the seuenth.

O YE that put your trust and confidence,
In worldly ioy and frayle prosperite,
That so lyue here as ye should neuer hence,
Remember death and loke here vppon me.
Ensaumple I thynke there may no better be.
Your selfe wotte well that in this realme was I,
Your quene but late, and lo now here I lye.
Was I not borne of olde worthy linage?
Was not my mother queene, my father kyng?
Was I not a kinges fere in marriage?
Had I not plenty of euery pleasaunt thyng?
Mercifull god this is a straunge reckenyng:
Rychesse, honour, welth, and auncestry,
Hath me forsaken and lo now here I ly.
If worship myght haue kept me, I had not gone.
If wyt myght haue me saued, I neded not fere.
If money myght have holpe, I lacked none.
But O good God what vayleth all this gere,
When deth is come thy mighty messangere,
Obey we must there is no remedy,
Me hath he summoned, and lo now here I ly.
Yet was I late promised otherwyse,
This yere to liue in welth and delice.
Lo where to commeth thy blandishyng promyse,
O false astrolagy and deuynatrice,
Of goddes secretes makyng thy selfe so wyse.
How true is for this yere thy prophecy.
The yere yet lasteth, and lo nowe here I ly.
O bryttill welth, as full of bitternesse,
Thy single pleasure doubled is with payne.
Account my sorow first and my distresse,
In sondry wyse, and recken there agayne,
The ioy that I haue had, and I dare sayne,
For all my honour, endured yet haue I,
More wo then welth, and lo now here I ly.

Where are our castels, now where are our towers,
Goodly Rychmonde sone art thou gone from me,
At Westminster that costly worke of yours,
Myne owne dere lorde now shall I neuer see.
Almighty god vouchesafe to graunt that ye,
For you and your children well may edefy.
My palyce bylded is, and lo now here I ly.
Adew myne owne dere spouse my worthy lorde,
The faithfull loue, that dyd vs both combyne,
In mariage and peasable concorde,
Into your handes here I cleane resyne,
To be bestowed vppon your children and myne.
Erst wer you father, and now must ye supply,
The mothers part also, for lo now here I ly.
Farewell my doughter lady Margerete.
God wotte full oft it greued hath my mynde,
That ye should go where we should seldome mete.
Now am I gone, and haue left you behynde.
O mortall folke that we be very blynde.
That we least feare, full oft it is most nye,
From you depart I fyrst, and lo now here I lye.
Farewell Madame my loides worthy mother,
Comfort your sonne, and be ye of good chere.
Take all a worth, for it will be no nother.
Farewell my doughter Katherine late the fere,
To prince Arthur myne owne chyld so dere,
It booteth not for me to wepe or cry,
Pray for my soule, for lo now here I ly.
Adew lord Henry my louing sonne adew,
Our lorde encrease your honour and estate.
Adew my doughter Mary bright of hew,
God make you virtuous wise and fortunate.
Adew swete hart my little doughter Kate,
Thou shalt swete babe such is thy desteny,
Thy mother neuer know, for lo now here I ly
Lady Cicyly Anne and Katheryne,
Farewell my welbeloved sisters three;
O lady Briget other sister myne,
Lo here the ende of worldly vanitee.
Now well are ye that earthly foly flee,
And heuenly thynges loue and magnify,
Farewell and pray for me, for lo now here I ly.
Adew my lordes, adew my ladies all,

Adew my faithful seruauntes euerych one,
Adew my commons whom I neuer shall
See in this world, wherfore to the alone,
Immortall god verely three in one,
I me commende. Thy infinite mercy,
Shew to thy seruant, for lo now here I ly.

Certain meters in English written by master Thomas More in hys youth for the boke of fortune, and caused them to be printed in the begynnyng of that boke.

The wordes of Fortune to the people.

MINE high estate power and auctoritie,
If ye ne know, enserche and ye shall spye,
That richesse, worship, welth, and dignitie,
Joy, rest, and peace, and all thing fynally,
That any pleasure or profit may come by,
To mannes comfort, ayde, and sustinaunce,
Is all at my deuyse and ordinaunce.
Without my fauour there is nothyng wonne.
Many a matter haue I brought at last,
To good conclusion, that fondly was begonne.
And many a purpose, bounden sure and fast,
With wise prouision, I haue ouercast.
Without good happe there may no wit suffise,
Better is to be fortunate than wyse.
And therefore hath there some men bene or this,
My deadly foes and written many a boke,
To my disprayse. And other cause there nys,
But for me list not frendly on them loke.
Thus lyke the fox they fare that once forsoke,
The pleasaunt grapes, and gan for to defy them,
Because he lept and yet could not come by them.
But let them write theyr labour is in vayne.
For well ye wote, myrth, honour, and richesse,
Much better is than penury and payne.
The nedy wretch that lingereth in distresse,
Without myne helpe is euer comfortlesse,
A wery burden odious and loth,
To all the world, and eke to him selfe both.
But he that by my fauour may ascende,
To mighty power and excellent degree,
A common wele to gouerne and defende,
O in how blist condicion standeth he:
Him self in honour and felicite,
And ouer that, may forther and increase,
A region hole in ioyfull rest and peace.
Now in this poynt there is no more to say,
Eche man hath of him self the gouernaunce.
Let euery wight than folowe his owne way,
And he that out of pouertee and mischaunce,
List for to liue, and wyll him selfe enhaunce,
In wealth and richesse, come forth and wayte on me.
And he that wyll be a beggar, let hym be.

Thomas More to them that trust in Fortune.

THOU that art prowde of honour, shape or kynne,
That hepest vp this wretched worldes treasure,
Thy fingers shrined with gold, thy tawny skynne,
With fresh apparyle garnished out of measure,
And wenest to haue fortune at thy pleasure,
Cast vp thyne eye, and loke how slipper chaunce,
Illudeth her men with chaunge and varyaunce.
Sometyme she loketh as louely, fayre and bright,
As goodly Uenus mother of Cupyde.
She becketh and she smileth on euery wight.
But this chere fayned, may not long abide.
There cometh a cloude, and farewell all our pryde.
Like any serpent she beginneth to swell,
And looketh as fierce as any fury of hell.
Yet for all that we brotle men are fayne,
(So wretched is our nature and so blynde)
As soone as Fortune list to laugh agayne,
With fayre countenaunce and disceitfull mynde,
To crouche and knele and gape after the wynde,
Not one or twayne but thousandes in a rout,
Lyke swarmyng bees come flickeryng her aboute.
Then as a bayte she bryngeth forth her ware,
Siluer, gold, riche perle, and precious stone:
On whiche the mased people gase and stare,
And gape therefore, as dogges doe for the bone.
Fortune at them laugheth, and in her trone
Amyd her treasure and her wauerying rychesse,
Prowdly she houeth as lady and empresse.
Fast by her syde doth wery labour stand,
Pale fere also, and sorow all bewept,
Disdayn and hatred on that other hand,
Eke restles watche fro slepe with trauayle kept,
His eyes drowsy and lokyng as he slept.
Before her standeth daunger and enuy,
Flattery, dysceyt, mischiefe and tiranny.
About her commeth all the world to begge.
He asketh lande, and he to pas would bryng
This toye and that, and all not worth an egge:
He would in loue prosper aboue all thyng:
He kneleth downe and would be made a kyng:
He forceth not so he may money haue,
Though all the worlde accompte hym for a knaue.
Lo thus ye see diuers heddes, diuers wittes.
Fortune alone as diuers as they all,
Vnstable here and there among them flittes:
And at auenture downe her giftes fall,
Catch who so may she throweth great and small
Not to all men, as commeth sonne or dewe,
But for the most part, all among a fewe.
And yet her brotell giftes long may not last.
He that she gaue them, loketh prowde and hye.
She whirlth about and pluckth away as fast,
And geueth them to an other by and by.
And thus from man to man continually,
She vseth to geue and take, and slily tosse,
One man to wynnyng of an others losse.
And when she robbeth one, down goth his pryde.
He wepeth and wayleth and curseth her full sore.
But he that receueth it, on that other syde,
Is glad, and blesth her often tymes therefore.
But in a whyle when she loueth him no more,
She glydeth from hym, and her giftes to,
And he her curseth, as other fooles do.
Alas the folysh people can not cease,
Ne voyd her trayne, tyll they the harme do fele,
About her alway, besely they preace.
But lord how he doth thynk hym self full wele,
That may set once his hande vppon her whele.
He holdeth fast: but vpward as he flieth,
She whippeth her whele about, and there he lyeth.
Thus fell Julius from his mighty power.
Thus fell Darius the worthy kyng of Perse.
Thus fell Alexander the great conquerour.
Thus many mo than I may well reherse.
Thus double fortune, when she lyst reuerse
Her slipper fauour fro them that in her trust,
She fleeth her wey and leyeth them in the dust.
She sodeinly enhaunceth them aloft.
And sodeynly mischeueth all the flocke.
The head that late lay easily and full soft,

In stede of pylows lyeth after on the blocke.
And yet alas the most cruell proude mocke:
The deyrey mowth that ladyes kissed haue,
She brymgeth in the case to kysse a knaue.
In chaungyng of her course, the chaunge shewth this,
Vp stirtth a knaue, and downe there falth a knight,
The beggar ryche, and the ryche man pore is.
Herod is turned to loue, loue to despyght.
This is her sport, thus proueth she her myght.
Great boste she maketh yt one be by her power,
Welthy and wretched both within an howre.
Pouertee that of her gyftes will nothing take,
Wyth mery chere, looketh vppon the prece,
And seeth how fortunes houshold goeth to wrake.
Fast by her standeth the wyse Socrates,
Arristippus, Pythagoras, and many a lese
Of olde philosophers. And eke against the sonne
Bekyth him poore Diogenes in his tonne.
With her is Byas, whose countrey lackt defence,
And whylom of their foes stode so in dout,
That eche man hastely gan to cary thence
And asked hym why he nought caryed out.
I bere quod he all myne with me about:
Wisedom he ment, not fortunes brotle fees.
For nought he counted his that he might leese.
Heraclitus eke, lyst fellowship to kepe
With glad pouertee, Democritus also:
Of which the fyrst can neuer cease but wepe,
To see how thick the blynded people go,
With labour greate to purchase care and wo.
That other laugheth to see the foolysh apes,
Howe earnestly they walk about theyr capes.
Of this poore sect, it is comen vsage,
Onely to take that nature may sustayne,
Banishing cleane all other surplusage,
They be content, and of nothyng complayne.
No nygarde eke is of his good so sayne.
But they more pleasure haue a thousande folde,
The secrete draughtes of nature to beholde.
Set fortunes servauntes by them and ye wull,
That one is free, that other euer thrall,
That one content, that other neuer full,
That one in suretye, that other lyke to fall.
Who lyst to aduise them bothe, parceyue he shall,
As great difference between them as we see,
Betwixte wretchednes and felicite.
Nowe haue I shewed you bothe: these whiche ye lyst,
Stately fortune, or humble pouertee:
That is to say, nowe lyeth it in your fyst,
To take here bondage, or free libertee.
But in thys poynte and ye do after me,
Draw you to fortune, and labour her to please,
If that ye thynke your selfe to well at ease.
And fyrst vppon the louely shall she smile,
And frendly on the cast her wandering eyes,
Embrace the in her armes, and for a whyle,
Put the and kepe the in a fooles paradise:
And foorth with all what so thou lyst deuise,
She wyll the graunt it liberally parhappes:
But for all that beware of after clappes.
Reckon you neuer of her fauoure sure:
Ye may in clowds as easily trace an hare,
Or in drye lande cause fishes to endure,
And make the burnyng fyre his heate to spare,
And all thys worlde in compace to forfare,
As her to make by crafte or engine stable,
That of her nature is euer variable.
Serue her day and night as reuerently,
Vppon thy knees as any seruaunt may,
And in conclusion, that thou shalt winne thereby
Shall not be worth thy servyce I dare say.
And looke what yet she geueth the to day,
With labour wonne she shall happly to morow
Plucke it agayne out of thyne hand with sorow.
Wherefore yf thou in suretye lyst to stande,
Take pouerties parte and let prowde fortune go,
Receyue nothyng that commeth from her hande.
Loue maner and vertu: they be onely tho
Whiche double fortune may not take the fro.
Then mayst thou boldly defye her turnyng chaunce:
She can the neyther hynder nor auaunce.
But and thou wylt nedes medle with her treasure,
Trust not therein, and spende it liberally,
Beare the not proude, nor take not out of measure.
Bylde not thyne house on heyth vp in the skye,
None falleth farre, but he that climbeth hye.
Remember nature sent the hyther bare,
The gyftes of fortune count them borowed ware.

Thomas More to them that seke Fortune.

WHO so delyteth to prouen and assay,
Of wavering fortune the vncertayne lot,
If that the aunswere please you not alway,
Blame ye not me: for I commaunde you not
Fortune to trust, and eke full well ye wot,
I haue of her no brydle in my fist,
She renneth loose, and turneth where she lyst.
The rollyng dyse in whome your lucke doth stande,
With whose vnhappy chance ye be so wroth,
Ye knowe your selfe came neuer in myne hande.
Lo in this ponde be fyshe and frogges both.
Cast in your nette: but be you liefe or lothe,
Hold you content as fortune lyst assyne:
For it is your own fyshyng and not myne.
And though in one chaunce fortune you offend,
Grudge not there at, but beare a mery face.
In many an other she shall it amende.
There is no manne so farre out of her grace,
But he sometyme hath comfort and solace:
Ne none agayne so farre foorth in her fauour,
That is full satisfyed with her behauiour.
Fortune is stately, solemne, prowde, and hye:
And rychesse geueth, to haue seruyce therefore.
The nedy begger catcheth an halfpeny:
Some manne a thousande pounde, some lesse some more.
But for all that she kepeth euer in store,
From euery manne some parcell of his wyll,
That he may pray therfore and serue her styll.
Some manne hath good, but chyldren hath he none.
Some manne hath both, but he can get none health.
Some hath al thre, but vp to honours trone,
Can he not crepe, by no maner of stelth.
To some she sendeth children, ryches, welthe,
Honour, woorshyp, and reuerence all hys lyfe:
But yet she pyncheth hym with a shrewde wife.
Then for asmuch as it is fortunes guyse,
To graunt no manne all thyng that he wyll axe,
But as her selfe lyst order and deuyse,
Doth euery manne his parte diuide and tax,
I counsayle you eche one trusse vp your packes,
And take no thyng at all, or be content,
With suche rewarde as fortune hath you sent.
All thynges in this boke that ye shall rede,
Doe as ye lyst, there shall no manne you bynde,
Them to beleue, as surely as your crede.
But notwithstandyng certes in my mynde,
I durst well swere, as true ye shall them fynde,
In euery poynt eche answere by and by,
As are the iudgementes of astronomye.

The Descripcion of Richard the thirde.

RICHARDE the third sonne, of whom we nowe entreate, was in witte and courage egall with either of them, in bodye and prowesse farre vnder them bothe, little of stature, ill fetured of limmes, croke backed, his left shoulder much higher than his right, hard fauoured of visage, and such as is in states called warlye, in other menne otherwise, he was malicious, wrathfull, enuious, and from afore his birth, euer frowarde. It is for trouth reported, that the duches his mother had so much a doe in her trauaile, that shee coulde not bee deliuered of hym vncutte: and that he came into the world with the feete forwarde, as menne bee borne outwarde, and, (as the fame runneth) also not vntothed, whither menne of hatred reporte aboue the trouthe, or elles that nature chaunged her course in hys beginninge, whiche in the course of hys lyfe many thinges vnnaturallye committed. None euill captaine was hee in the warre, as to which his disposicion was more metely then for peace. Sundrye victories hadde hee, and sommetime ouerthrowes, but neuer in defaulte as for his owne parsone, either of hardinesse or polytike order, free was hee called of dyspence, and sommewhat aboue hys power liberall, with large giftes hee get him vnstedfaste frendeshippe, for whiche hee was fain to pil and spoyle in other places, and get him stedfast hatred. Hee was close and secrete, a deepe dissimuler, lowlye of counteynaunce, arrogant of heart, outwardly coumpinable where he inwardely hated, not letting to kisse whome hee thoughte to kyll: dispitious and cruell, not for euill will alway, but after for ambicion, and either for the suretie and encrease of his estate. Frende and foo was muche what indifferent, where his aduauntage grew, he spared no mans deathe, whose life withstoode his purpose. He slewe with his owne handes king Henry the sixt, being prisoner in the Tower, as menne constantly saye, and that without commaundement or knoweledge of the king, whiche wovlde vndoubtedly yf he had entended that thinge, haue appointed that boocherly office, to some other than his owne borne brother.

Somme wise menne also weene, that his drift couertly conuayde, lacked not in helping furth his brother of Clarence to his death: whiche hee resisted openly howbeit somwhat (as menne deme) more faintly then he that wer hartely minded to his welth. And they that thus deme, think that he long time in king Edwardes life, forethought to be king in that case the king his brother, (whose life hee looked that euill dyete shoulde shorten) shoulde happen to decease (as in dede he did) while his children wer yonge. And thei deme, that for thys intente he was gladde of his brothers death the duke of Clarence, whose life must nedes haue hindered him so entendynge, whither the same duke of Clarence hadde kepte him true to his nephew the yonge king, or enterprised to be kyng hymselfe. But of al this pointe, is there no certaintie, and whoso diuineth vppon coniectures, maye as wel shote to farre as to short. Howbeit this haue I by credible informacion learned, that the self nighte in whiche kynge Edwarde died, one Mystlebrooke long ere mornynge, came in greate haste to the house of one Pottyer dwelling in Reddecrosse strete without Crepulgate: and when he was with hastye rappyng quickly letten in, hee shewed vnto Pottyer that kynge Edwarde was departed. By my trouthe manne quod Pottyer then wyll my mayster the duke of Gloucester bee kynge. What cause he hadde soo to thynke harde it is to saye, whyther hee being toward him, anye thynge knewe that hee suche thynge purposed, or otherwyse had anye inkelynge therof: for hee was not likelye to speake it of noughte.

But nowe to returne to the course of this hystorye, were it that the duke of Gloucester hadde of old foreminded this conclusion, or was nowe at erste thereunto moued, and putte in hope by the occasion of the tender age of the younge princes, his nephues (as opportunitye and lykelyhoode of spede, putteth a manne in courage of that hee never entended) certayn is it that hee contriued theyr destruccion, with the vsurpacion of the regal dignitye vppon hymselfe. And for as muche as hee well wiste and holpe to mayntayn, a long continued grudge and hearte brennynge betwene the quenes kinred and the kinges blood eyther partye enuying others authoritye, he nowe thought that their deuision shoulde bee (as it was in dede) a fortherlye begynnynge to the pursuite of his intente, and a sure ground for the foundacion of al his building yf he might first vnder the pretext or reuengynge of old displeasure, abuse the anger and ygnoraunce of the tone partie, to the destruccion of the tother: and then wynne to this purpose as manye as he coulde: and those that coulde not be wonne, myght be loste ere they looked therefore. For of one thynge was hee certayne, that if his entente were perceiued, he shold soone haue made peace beetwene the bothe parties, with his owne bloude.

Kyng Edwarde in his life, albeit that this discencion betwene hys frendes sommewhat yrked hym: yet in his good health he sommewhat the lesse regarded it, because hee thought whatsoeuer busines shoulde falle betwene them, hymselfe should alwaye bee hable to rule bothe the parties.

But in his last sicknesse, when he receiued his naturall strengthe soo sore enfebled, that hee dyspayred all recouerye, then hee consyderynge the youthe of his chyldren, albeit hee nothynge lesse mistrusted then that that happened, yet well forseynge that manye harmes myghte growe by theyr debate, whyle the youth of hys chyldren shoulde lacke discrecion of themself, and good counsayle of their frendes, of whiche either party should counsayle for their owne commodity and rather by pleasaunte aduyse too wynne themselfe fauour, then by profitable aduertisemente to do the children good, he called some of them before him that were at variaunce, and in especyall the lorde marques Dorsette the quenes sonne by her fyrste housebande, and Richarde the lorde Hastynges, a noble man; than lorde chaumberlayne agayne whome the quene specially grudged, for the great fauoure the king bare him, and also for that shee thoughte hym secretelye familyer with the kynge in wanton coumpanye. Her kynred also bare hym sore, as well for that the kynge hadde made hym captayne of Calyce (whiche office the lorde Ryuers, brother to the quene, claimed of the kinges former promyse) as for diuerse other great giftes whiche hee receyued, that they loked for. When these lordes with diuerse other of bothe the parties were comme in presence, the kynge liftinge vppe himselfe and vndersette with pillowes, as it is reported on this wyse sayd vnto them, My lordes, my dere kinsmenne and alies, in what plighte I lye you see, and I feele. By whiche the lesse whyle I looke to lyue with you, the more depelye am I moued to care in what case I leaue you, for such as I leaue you, suche bee my children lyke to fynde you. Whiche if they shoulde (that Godde forbydde) fynde you at varyaunce, might happe to fall themselfe at warre ere their discrecion would serue to sette you at peace. Ye se their youthe, of whiche I recken the onely suretie to reste in youre concord. For it suffiseth not al you loue them, yf eche of you hate other. If they wer menne, your faithfulnesse happelye woulde suffise. But childehood must be maintained by mens authoritye, and slipper youth vnderdropped with elder counsayle, which neither they can haue, but ye geue it, nor ye geue it, yf ye gree not. For wher eche laboureth to breake that the other maketh, and for hatred of eche of others parson, impugneth eche others counsayle, there must it nedes bee long ere anye good conclusion goe forwarde. And also while either partye laboureth to be chiefe, flattery shall haue more place then plaine and faithfull aduyse, of whyche muste needes ensue the euyll bringing vppe of the prynce, whose mynd in tender youth

infect, shall redily fal to mischief and riot, and drawe down with this noble realme to ruine: but if grace turn him to wisdom, which if God send, then thei that by euill menes before pleased him best, shal after fall farthest out of fauour, so that euer at length euill driftes dreue to nought, and good plain wayes prosper. Great variaunce hath ther long bene betwene you, not alway for great causes. Sometime a thing right wel intended, our misconstruccion turneth vnto worse or a smal displeasure done vs, eyther our owne affeccion or euil tongues agreueth. But this wote I well ye neuer had so great a cause of hatred, as ye have of loue. That we be al men, that we be christen men, this shall I leaue for prechers to tel you (and yet I wote nere whither any preachers wordes ought more to moue you, then his that is by and by gooying to the place that thei all preache of.) But this shal I desire you to remember, that the one parte of you is of my bloode, the other of myne alies, and eche of yow with other, eyther of kindred or affinitie whiche spirytual kynred of affynyty, if the sacramentes of Christes churche, beare that weyghte with vs that woulde Godde thei did, shoulde no lesse moue vs to charitye, then the respecte of fleshlye consanguinitye. Oure Lorde forbydde, that you loue together the worse, for the selfe cause that you ought to love the better. And yet that happeneth. And no where fynde wee so deadlye debate, as amonge them, whyche by nature and lawe, moste oughte to agree together. Suche a pestilente serpente is ambicion and desyre of vaine glorye and soueraintye, whiche amonge states where he once entreth crepeth foorth so farre, tyll with deuision and variaunce hee turneth all to mischiefe. Firste longing to be nexte the best, afterwarde egall with the beste, and at laste chiefe and aboue the beste. Of which immoderate appetite of woorship, and thereby of debate and dissencion what losse, what sorowe, what trouble hathe within these fewe yeares growen in this realme, I praye Godde as wel forgeate as wee wel remember.

Whiche thinges yf I coulde as well haue foresene, as I haue with my more payne then pleasure proued, by Goddes blessed Ladie (that was euer his othe) I would neuer haue won the courtesye of mennes knees, with the losse of soo many heades. But sithen thynges passed cannot be gaine called, muche oughte wee the more beware, by what occasion we haue taken soo greate hurte afore, that we eftesoones fall not in that occasion agayne. Nowe be those griefes passed, and all is (Godde be thanked) quiete, and likelie righte wel to prosper in wealthfull peace vnder youre coseyns my children, if Godde sende them life and you loue. Of which twoo thinges, the lesse losse wer they by whome thoughe Godde dydde hys pleasure, yet shoulde the realme alway finde kinges and peraduenture as good kinges. But yf you among youre selfe in a childes reygne fall at debate, many a good man shall perish and happely he to, and ye to, ere thys land finde peace again. Wherfore in these laste wordes that euer I looke to speake with you: I exhort you and require you al, for the loue that you haue euer borne to me, for the loue that I haue euer borne to you, for the loue that our Lord beareth to vs all, from this time forwarde, all grieues forgotten, eche of you loue other. Whiche I verelye truste you will, if ye any thing earthly regard, either Godde or your king, affinitie or kinred, this realme, your owne countrey, or your owne surety. And therewithal the king no longer enduring to sitte vp, laide him down on his right side, his face towarde them: and none was there present that coulde refrain from weping. But the lordes recomforting him with as good wordes as they could, and answering for the time as thei thought to stand with his pleasure, there in his presence (as by their wordes appered) eche forgaue other, and ioyned their hands together, when (as it after appeared by their dedes) their hearts wer far a sonder. As sone as the king was departed, the noble prince his sonne drew toward London, which at the time of his decease, kept his houshold at Ludlow in Wales. Which countrey being far of from the law and recourse to iustice, was begon to be farre out of good wyll and waxen wild, robbers and riuers walking at libertie vncorrected. And for this encheason the prince was in the life of his father sente thyther, to the ende that the authoritie of his presence should refraine euill disposed parsons fro the boldnes of their former outerages, to the gouernáunce and ordering of this yong prince at his sendyng thyther, was there appointed Sir Anthony Woduile lord Riuers and brother vnto the quene, a right honourable man, as valiaunte of hande as politike in counsayle. Adioyned wer there vnto him other of the same partie, and in effect euery one as he was nerest of kin vnto the quene, so was planted next about the prince. That drifte by the quene not vnwisely deuised, whereby her bloode mighte of youth be rooted in the princes fauour, the duke of Gloucester turned unto their destruccion, and vpon that grounde set the foundacion of all his vnhappy building. For whom soeuer he perceived, either at variance with them, or bearing himself their fauor, hee brake vnto them, som by mouth, som by writing or secret messengers, that it neyther was reason nor in any wise to be suffered, that the yong king their master and kinsmanne, shoold bee in the handes and custodye of his mothers kinred, sequestred in maner from theyr compani and attendance, of which eueri one ought him as faithful seruice as they, and manye of them far more honorable part of kin then his mothers side: whose blood (quod he) sauing the kinges pleasure, was ful vnmetely to be matched with his: whiche nowe to be as who say remoued from the kyng, and the lesse noble to be left aboute him, is (quod he) neither honorable to hys magestie, nor vnto vs, and also to his grace no surety to haue the mightiest of his frendes from him, and vnto vs no little ieopardy, to suffer our welproued euil willers, to grow in ouergret authoritie with the prince in youth, namely which is lighte of beliefe and sone perswaded. Ye remember I trow king Edward himself, albeit he was a manne of age and of discrecion, yet was he in manye thynges ruled by the bende, more than stode either with his honour, or our profite, or with the commoditie of any manne els, except onely the immoderate aduauncement of them selfe. Whiche whither they sorer thirsted after their own weale, or our woe, it wer harde I wene to gesse. And if some folkes friendship had not holden better place with the king, then any respect of kinred, thei might peraduenture easily haue be trapped and brought to confusion somme of vs ere this. Why not as easily as they haue done some other alreadye, as neere of his royal bloode as we. But our Lord hath wrought his wil, and thanke be to his grace that peril is paste. Howe be it as great is growing, yf wee suffer this yonge kyng in oure enemyes hande, whiche without his wyttyng, might abuse the name of his commaundement, to ani of our vndoing, which thyng God and good prouision forbyd. Of which good prouision none of vs hath any thing the lesse nede, for the late made attonemente, in whiche the kinges pleasure hadde more place then the parties willes. Nor none of vs I beleue is so vnwyse, ouersone to truste a newe frende made of an olde foe, or to think that an houerly kindnes, sodainely contract in one houre continued, yet scant a fortnight, shoold be deeper setled in their stomackes: then a long accustomed malice many yeres rooted.

With these wordes and writynges and suche other, the duke of Gloucester sone set a fyre, them that were of themself ethe to kindle, and in especiall twayne, Edwarde duke of Buckingham, and Richarde lorde Hastinges and chaumberlayn, both men of honour and of great power. The tone by longe succession from his ancestrie, the tother by his office and the kinges fauor. These two not bearing eche to other so muche loue, as hatred bothe vnto the quenes parte: in this

poynte accorded together wyth the duke of Gloucester, that they wolde vtterlye amoue fro the kinges companye, all his mothers frendes, vnder the name of their enemyes. Vpon this concluded, the duke of Gloucester vnderstandyng, that the lordes whiche at that tyme were aboute the kyng, entenned to bryng him vppe to his coronacion, accompan'ed with suche power of theyr frendes, that it shoulde bee harde for hym to brynge his purpose to passe, without the gathering and great assemble of people and in maner of open warre, whereof the ende he wiste was doubtuous, and in which the kyng being on their side, his part should haue the face and name of a rebellion: he secretly therefore by diuers meanes caused the quene to be perswaded and brought in the mynd, that it neither wer nede, and also shold be ieopardous, the king to come vp strong. For where as nowe euery lorde loued other, and none other thing studyed vppon, but aboute the coronacion and honoure of the king: if the lordes of her kinred shold assemble in the kinges name muche people, thei should geue the lordes atwixte whome and them hadde bene sommetyme debate, to feare and suspecte, leste they shoulde gather thys people, not for the kynges sauegarde whome no manne empugned, but for theyr destruccion, hauying more regarde to their old variaunce, then their newe atonement. For whiche cause thei shoulde assemble on the other partie much people agayne for their defence, whose power she wyste wel farre stretched. And thus should al the realme fall on a rore. And of al the hurte that therof should ensue, which was likely not to be litle, and the most harme there like to fal wher she lest would, al the worlde woulde put her and her kinred in the wyght, and say that thei had vnwyselye and vntrewlye also, broken the amitie and peace that the kyng her husband so prudentelye made, betwene hys kinne and hers in his death bed, and whiche the other party faithfully obserued.

The quene being in this wise perswaded, suche woorde sente vnto her sonne, and vnto her brother being aboute the kynge, and ouer that the duke of Gloucester hymselfe and other lordes the chiefe of hys bende, wrote vnto the kynge soo reuerentlye, and to the queenes frendes there soo louyngelye, that they nothyng earthely mystrustynge, broughte the kynge vppe in greate haste, not in good spede with a sober coumpanye. Now was the king in his waye to London gone, from Northampton, when these dukes of Gloucester and Buckyngham came thither. Where remained behynd, the lorde Ryuers the kinges vncle, attending on the morowe to folow the kynge, and bee with him at Stonye Stratford.

miles thence, earely or hee departed. So was there made that nyghte muche frendely chere betwene these dukes and the lorde Riuers a great while. But incontinente after that they were oppenlye with greate courtesye departed, and the lorde Riuers lodged, the dukes secretelye with a fewe of their moste priuye frendes, sette them downe in counsayle, wherin they spent a great parte of the nyght. And at their risinge in the dawnyng of the day, thei sent about priuily to their seruantes in the innes and lodgynges about, geuinge them commaundemente to make them selfe shortely readye, for their lordes wer to horsebackward. Vppon whiche messages, manye of their folke were attendaunt, when manye of the lorde Riuers seruantes were vnreadye. Nowe hadde these dukes taken also into their custodye the kayes of the inne, that none shoulde passe foorth without their licence.

And ouer this in the hyghe way towarde Stonye Stratforde where the kynge laye, they hadde beestowed certayne of theyr folke, that shoulde sende backe agayne, and compell to retourne, anye manne that were gotten oute of Northampton toward Stonye Stratforde, tyll they should geue other lycence. For as muche as the dukes themselfe entended for the shewe of theire dylygence, to bee the fyrste that shoulde that daye attende vppon the kynges highnesse oute of that towne: thus bare they folke in hande. But when the lorde Ryuers vnderstode the gates closed, and the wayes on euerye side besette, neyther hys seruauntes nor hymself suffered to go oute, parceiuyng well so greate a thyng without his knowledge not begun for noughte, comparyng this maner present with this last nightes chere, in so few houres so gret a chaunge marueylouslye misliked. How be it sithe hee coulde not geat awaye, and keepe himselfe close, hee woulde not, leste he shoulde seeme to hyde himselfe for some secret feare of hys owne faulte, whereof he saw no such cause in hym self: he determined vppon the suretie of his own conscience, to go boldelye to them, and inquire what thys matter myghte meane. Whome as soone as they saw, they beganne to quarrell with hym, and saye, that hee intended to sette distaunce betweene the kynge and them, and to brynge them to confusion, but it shoulde not lye in hys power. And when hee beganne (as he was a very well spoken manne) in goodly wise to excuse himself, they taryed not the ende of his aunswere, but shortely tooke him and putte him in warde, and that done, foorthwyth wente to horsebacke, and tooke the waye to Stonye Stratforde. Where they founde the kinge with his companie readye to leape on horsebacke, and departe forwarde, to leaue that lodging for them, because it was to streighte for bothe coumpanies. And as sone as they came in his presence, they lighte adowne with all their companie aboute them. To whome the duke of Buckingham saide, goe afore gentlemenne and yeomen, kepe youre rowmes. And thus in goodly arraye, thei came to the kinge, and on theire knees in very humble wise, salued his grace, whiche receuyed them in a very ioyous and amiable maner, nothinge earthyle knowing nor mistrustinge as yet. But euen by and by in his presence, they piked a quarrell to the lorde Richarde Graye, the kynges other brother by his mother, sayinge that hee with the lord marques his brother and the lorde Riuers his vncle, had coumpassed to rule the kinge and the realme, and to sette variaunce among the states, and to subdewe and destroye the noble blood of the realm. Toward the accoumplishinge whereof, they sayde that the lorde Marques hadde entered into the Tower of London, and thence taken out the kinges treasor, and sent menne to the sea. All whiche thinge these dukes wiste well were done for good purposes and necessari by the whole counsaile at London, sauing that sommewhat thei must sai. Vnto whiche woordes, the king aunswered, what my brother Marques hath done I cannot saie. But in good faith I dare well aunswere for myne vncle Riuers and my brother here, that thei be innocent of any such matters. Ye my liege, quod the duke of Buckingham, thei haue kepte theire dealing in these matters farre fro the knowledge of your good grace. And foorthwith thei arrested the lord Richarde and Sir Thomas Waughan knighte, in the kinges presence, and broughte the king and all backe vnto Northampton, where they tooke againe further counsaile. And there they sent awaie from the kinge whom it pleased them, and sette newe seruantes about him, suche as lyked better them than him. At whiche dealinge he wepte and was nothing contente, but it booted not. And at dyner the duke of Gloucester sente a dishe from his own table to the lord Riuers, prayinge him to be of good chere, all should be well inough. And he thanked the duke, and prayed the messenger to beare it to his nephewe the lorde Richard with the same message for his comfort, who he thought had more nede of comfort, as one to whom such aduersitie was straunge. But himselfe had been al his dayes in vre therewith, and therfore coulde beare it the better. But for al this coumfortable courtesye of the duke of Gloucester he sent the lorde Riuers and the lorde Richarde with Sir Thomas Vaughan into the Northe countrey into diuers places to prison, and afterward al to Pomfrait, where they were in conclusion beheaded.

A letter written with a cole by Sir THOMAS MORE to hys doughter maistres MARGARET ROPER, within a whyle after he was prisoner in the Towre.

MYNE own good doughter, our Lorde be thanked I am in good helthe of boeye, and in good quiet of minde: and of worldly thynges I no more desyer then I haue. I beseche hym make you all mery in the hope of heauen. And such thynges as I somewhat longed to talke with you all, concerning the worlde to come, our Lorde put theim into your myndes, as I truste he doth and better to by hys holy spirite: who blesse you and preserue you all. Written wyth a cole by your tender louing father, who in hys pore prayers forgetteth none of you all, nor your babes, nor your nurses, nor your good husbandes, nor your good husbandes shrewde wyues, nor your fathers shrewde wyfe neither, nor our other frendes. And thus fare ye hartely well for lacke of paper.

THOMAS MORE, knight.

Two short Ballettes which Sir TOMAS MORE made for hys pastime while he was prisoner in the Tower of London.

LEWYS the lost louer.

EY flatering fortune, loke thou neuer so fayre,
Or neuer so plesantly begin to smile,
As though thou wouldst my ruine all repayre,
During my life thou shalt not me begile.
Trust shall I God, to entre in a while:
Hys hauen or heauen sure and vniforme.
Euer after thy calme, loke I for a storme.

DAUY the dycer.

LONG was I lady Lucke your seruing man,
And now haue lost agayne all that I gat,
Wherfore whan I thinke on you nowe and than,
And in my mynde remember this and that,
Ye may not blame me though I beshrew your cat,
But in fayth I blesse you agayne a thousand times,
For lending me some laysure to make rymes.

At the same time with Sir *Thomas More* lived *Skelton*, the poet laureate of *Henry* VIII. from whose works it seems proper to insert a few stanzas, though he cannot be said to have attained great elegance of language.

The Prologue to the Bouge of Courte.

IN Autumpne when the sonne in vyrgyne
By radyante hete enryped hath our corne,
Whan Luna full of mutabylyte
As Emperes the dyademe hath worne
Of our pole artyke, smylynge halfe in a scorne
At our foly, and our vnstedfastnesse
The time whan Mars to warre hym dyd dres,
I callynge to mynde the greate auctoryte
Of poetes olde, whiche full craftely
Under as couerte termes as coulde be
Can touche a trouth, and cloke subtylly
With freshe vtteraunce full sentencyously
Dyuerse in style some spared not vyce to wryte
Some of mortalitie nobly dyd endyte
Whereby I rede, theyr renome and theyr fame
May neuer dye, but euermore endure
I was sore moued to a forse the same
But ignoraunce full soone dyde me dyscure
And shewed that in this arte I was not sure
For to illumine she sayd I was to dulle
Aduysynge me my penne awaye to pulle
And not to write, for he so wyll atteyne
Excedyng ferther than his connynge is
His heed maye be harde, but feeble is brayne
Yet haue I knowen suche er this
But of reproche surely he maye not mys
That clymmeth hyer than he may fotinge haue
What and he slyde downe, who shall him saue?
Thus vp and downe my mynde was drawen and cast
That I nerwyste what to do was beste
So sore enwered that I was at the laste
Enforsed to slepe, and for to take some reste
And to lye downe as soone as I my dreste
At Harwyche porte slumbrynge as I laye
In myne hostes house called powers keye.

Of the wits that flourished in the reign of *Henry* VIII. none has been more frequently celebrated than the earl of *Surry;* and this history would therefore have been imperfect without some specimens of his works, which yet it is not easy to distinguish from those of Sir *Thomas Wyat* and others, with which they are confounded in the edition that has fallen into my hands. The three first are, I believe *Surry's;* the rest, being of the same age, are selected, some as examples of different measures, and one as the oldest composition which I have found in blank verse.

Description of Spring, wherein eche thing renewes, save only the lover.

THE soote season that bud, and bloom fourth bringes,
With grene hath cladde the hyll, and eke the vale,
The Nightingall with fethers new she singes;
The turtle to her mate hath told the tale:
Somer is come, for every spray now springes,
The hart hath hunge hys olde head on the pale,
The bucke in brake his winter coat he flynges;
The fishes flete with newe repayred scale:
The adder all her slough away she flynges,
The swift swallow pursueth the flyes smalle,
The busy bee her honey how she mynges;
Winter is worne that was the floures bale.
And thus I see among these pleasant thynges
Eche care decayes, and yet my sorrow sprynges.

Descripcion of the restless estate of a lover.

WHEN youth had led me half the race,
That Cupides scourge had made me runne;
I looked back to meet the place,
From whence my weary course begunne:
And then I saw howe my desyre
Misguiding me had led the waye,
Myne eyne to greedy of theyre hyre,
Had made me lose a better prey.
For when in sighes I spent the day,
And could not cloake my grief with game;
The boyling smoke dyd still bewray,
The present heat of secret flame:
And when salt teares do bayne my breast,
Where love his pleasent traynes hath sown,
Her beauty hath the fruytes opprest,
Ere that the buddes were spronge and blowne.
And when myne eyen dyd still pursue,
The flying chase of theyre request;
Theyre greedy looks dyd oft renew,
The hydden wounde within my breste.

When every loke these cheekes might stayne,
From dedly pale to glowing red;
By outward signes appeared playne,
To her for helpe my hart was fled.
But all to late Love learneth me,
To paynt all kynd of Colours new;
To blynd theyre eyes that else should see
My speckled chekes with Cupids hew.
And now the covert brest I clame,
That worshipt Cupide secretely;
And nourished hys sacred flame,
From whence no blairing sparks do flye.

Descripcion of the fickle Affections, Pangs, and Sleightes of Love.

SUCH wayward wayes hath Love, that most part in discord,
Our willes do stand, whereby our hartes but seldom do accord:
Decyte is hys delighte, and to begyle and mocke,
The simple hartes which he doth strike with froward divers stroke.
He causeth th' one to rage with golden burning darte,
And doth alay with Leaden cold, again the others harte.
Whose gleames of burning fyre and easy sparkes of flame,
In balance of unequal weyght he pondereth by ame
From easye ford where I myghte wade and pass full well,
He me withdrawes and doth me drive, into a depe dark hell:
And me witholdes where I am calde and offred place,
And willes me that my mortal foe I do beseke of Grace;
He lettes me to pursue a conquest welnere wonne
To follow where my paynes were lost, ere that my sute begunne.
So by this means I know how soon a hart may turne
From warre to peace, from truce to stryfe, and so agayne returne.
I know how to content my self in others lust,
Of little stuffe unto my self to weave a webbe of trust:
And how to hyde my harmes with sole dyssembling chere,
Whan in my face the painted thoughtes would outwardly appeare.
I know how that the bloud forsakes the face for dred,
And how by shame it staynes agayne the Chekes with flamyng red:
I know under the Grene, the Serpent how he lurkes:
The hammer of the restless forge I wote eke how it workes.
I know and con by roate the tale that I woulde tell
But ofte the woordes come fourth awrye of him that loveth well.
I know in heate and colde the Lover how he shakes,
In synging how he doth complayne, in sleeping how he wakes
To languish without ache, sickelesse for to consume,
A thousand thynges for to devyse, resolvynge of his fume;
And though he lyste to see his Ladyes Grace full sore
Such pleasures as delyght his Eye, do not his helthe restore.
I know to seke the tracte of my desyred foe,
And fere to fynde that I do seek, but chiefly this I know,
That Lovers must transfourme into the thynge beloved,
And live (alas! who would believe?) with sprite from Lyfe removed.
I knowe in harty sighs and laughters of the spleene,
At once to chaunge my state, my will, and eke my colour clene.
I knowe how to deceyve my self wythe others helpe,
And how the Lyon chastised is, by beatynge of the whelpe.
In standynge nere the fyre, I know how that I frease;
Farre of I burne, in bothe I waste, and so my Lyfe I leese.
I know how Love doth rage upon a yeylding mynd,
How smalle a nete may take and mase a harte of gentle kynde:
Or else with seldom swete to season hepes of gall,
Revived with a glympse of Grace old sorrowes to let fall.
The hidden traynes I know, and secret snares of Love,
How soone a loke will prynte a thoughte that never may remove.
The slypper state I know, the sodein turnes from welthe,
The doubtfull hope, the certaine wooe, and sure despaired helthe.

A praise of his ladie.

GEVE place you ladies and be gone,
Boast not your selves at all,
For here at hande approcheth one,
Whose face will stayne you all.
The vertue of her lively lookes
Excels the precious stone,
I wishe to have none other bookes
To reade or look upon.
In eche of her two christall eyes,
Smyleth a naked boy;
It would you all in heart suffise
To see that lampe of joye.
I think nature hath lost the moulde,
Where she her shape did take;
Or else I doubte if nature coulde
So fayre a creature make.
She may be well comparde
Unto the Phenix kinde,
Whose like was never seene nor heard,
That any man can fynde.
In lyfe she is Diana chast
In trouth Penelopey,
In woord and eke in dede stedfast;
What will you more we say:
If all the world were soughte so farre,
Who could finde suche a wight,
Her beauty twinkleth lyke a starre
Within the frosty night.

The Lover refused of his love, embraceth vertue.

MY youthfull yeres are past,
My joyfull dayes are gone,
My lyfe it may not last,
My grave and I am one.
My myrth and joyes are fled,
And I a Man in wo,
Desirous to be ded,
My misciefe to forgo.
I burne and am a colde,
I freese amyddes the fyer,
I see she doth witholde
That is my honest desyre.
I see my helpe at hande,
I see my lyfe also,
I see where she doth stande
That is my deadly fo.
I see how she doth see,
And yet she wil be blynd,
I see in helpyng me,
She sekes and will not fynde.
I see how she doth wrye,
When I begynne to mone,
I see when I come nye,
He fayne she would be gone.
I see what wil ye more,
She will me gladly kill,
And you shall see therfore
That she shall have her will.

I cannot live with stones.
It is too hard a foode,
I wil be dead at ones
To do my Lady good.

The Death of ZOROAS, an Egiptian astronomer, in the first fight that Alexander had with the Persians.

Now clattring armes, now raging broyls of warre,
Gan passe the noys of dredfull trumpetts clang,
Shrowded with shafts, the heaven with cloude of dartes,
Covered the ayre. Against full fatted bulles,
As forceth kyndled yre the lyons keene,
Whose greedy gutts the gnawing hunger prickes;
So Macedons against the Persians fare,
Now corpses hyde the purpurde soyle with blood;
Large slaughter on eche side, but Perses more,
Moyst fieldes bebled, theyr heartes and numbers bate,
Fainted while they gave backe, and fall to flighte.
The litening Macedon by swordes, by gleaves,
By bandes and troupes of footemen, with his garde,
Speedes to Dary, but hym his merest kyn,
Oxate preserves with horsemen on a plumpe
Before his carr, that none his charge should give.
Here grunts, here groans, eche where strong youth is spent:
Shaking her bloudy hands, Bellone among
The Perses soweth all kind of cruel death:
With throte yrent he roares, he lyeth along
His entrailes with a launce through gryded quyte,
Him smytes the club, hym woundes farre stryking bowe,
And hym the sling, and him the shining sword;
He dyeth, he is all dead, he pantes, he restes.
Right over stoode in snowwhite armour brave,
The Memphite Zoroas, a cunnyng clarke,
To whom the heaven lay open as his booke;
And in celestiall bodies he could tell
The moving meeting light, aspect, eclips,
And influence, and constellations all;
What earthly chaunces would betyde, what yere,
Of plenty storde, what signe forewarned death,
How winter gendreth snow, what temperature,
In the prime tyde doth season well the soyle,
Why summer burnes, why autumne hath ripe grapes,
Whither the circle quadrate may become,
Whether our tunes heavens harmony can yelde
Of four begyns among themselves how great
Proportion is; what sway the erryng lightes
Doth send in course gayne that fyrst movyng heaven;
What grees one from another distance be,
What starr doth lett the hurtfull fyre to rage,
Or him more mylde what opposition makes,
What fyre doth qualifye Mavorses fyre,
What house eche one doth seeke, what plannett raignes
Within this heaven sphere, nor that small thynges
I speake, whole heaven he closeth in his brest.
This sage then in the starres hath spyed the fates
Threatned him death without delay, and, sith,
He saw he could not fatall order chaunge,
Foreward he prest in battayle, that he might
Mete with the ruler of the Macedons,
Of his right hand desirous to be slain,
The bouldest borne, and worthiest in the feilde;
And as a wight, now wery of his lyfe,
And seking death, in fyrst front of his rage,
Comes desperately to Alexanders face,
At him with dartes one after other throwes,
With reckiesse wordes and clamour him provokes,
And sayth, Nectanaks bastard shamefull stayn
Of mothers bed, why losest thou thy strokes,
Cowardes among, Turn thee to me, in case
Manhood there be so much left in thy heart,
Come fight with me, that on my helmet weare
Apollo's laurell both for learninges laude,
And eke for martiall praise, that in my shielde
The seven fold Sophie of Minerve contein,
A match more mete, Syr King, then any here,
The noble prince amoved takes ruth upon
The wilfull wight, and with soft wordes ayen,
O monstrous man (quoth he) what so thou art,
I pray thee live, ne do not with thy death
This lodge of Lore, the Muses mansion marre;
That treasure house this hand shall never spoyle,
My sword shall never bruise that skilfull brayne,
Long gather'd heapes of science sone to spill;
O how fayre fruites may you to mortall men
From Wisdoms garden give; how many may
By you the wiser and the better prove:
What error, what mad moode, what frenzy thee
Perswades to be downe, sent to depe Averne,
Where no artes flourish, nor no knowledge vailes
For all these sawes. When thus the sovereign said,
Alighted Zoroas with sword unsheathed,
The careless king there smoate above the greve,
At th' opening of his quishes wounded him,
So that the blood down trailed on the ground:
The Macedon perceiving hurt, gan gnashe,
But yet his mynde he bent in any wise
Hym to forebeare, sett spurrs unto his stede,
And turnde away, lest anger of his smarte
Should cause revenger hand deale balefull blowes,
But of the Macedonian chieftaines knights,
One Meleager could not bear this sight,
But ran upon the said Egyptian rude,
And cutt him in both knees: he fell to ground,
Wherewith a whole rout came of sou diours sterne,
And all in pieces hewed the sely seg,
But happely the soul fled to the starres,
Where, under him, he hath full sight of all,
Whereat he gazed here with reaching looke.
The Persians waild such sapience to forgoe,
The very sone the Macedonians wisht
He would have lived, king Alexander selfe
Demde him a man unmete to dye at all;
Who wonne like praise for conquest of his Yre,
As for stoute men in field that day subdued,
Who princes taught how to discerne a man,
That in his head so rare a jewel beares,
But over all those same Camenes, those same
Divine Camenes, whose honour he procurde,
As tender parent doth his daughters weale,
Lamented, and for thankes, all that they can,
Do cherish hym deceast, and sett him free,
From dark oblivion of devouring death.

Barclay wrote about 1550; his chief work is the *Ship of Fooles*, of which the following extract will shew his style.

Of Mockers and Scorners, and false Accusers.

O Heartless fooles, haste here to our doctrine,
Leave off the wayes of your enormitie,
Enforce you to my preceptes to encline,
For here shall I shewe you good and veritie:
Encline, and ye finde shall great prosperitie,
Ensuing the doctrine of our fathers olde,
And godly lawes in valour worth great golde.
Who that will followe the graces manyfolde
Which are in vertue, shall finde auauncement:

Wherefore ye fooles that in your sinne are bolde,
Ensue ye wisdome, and leaue your lewde intent,
Wisdome is the way of men most excellent:
Therefore haue done, and shortly spede your pace,
To quaynt your self and company with grace.
Learne what is vertue, therin is great solace,
Learne what is truth, sadnes and prudence,
Let grutche be gone, and grauitie purchase,
Forsake your folly and inconuenience,
Cease to be fooles, and ay to sue offence,
Followe ye vertue, chiefe roote of godlynes,
For it and wisedome is ground of clenlynes.
Wisedome and vertue two thinges are doubtles,
Whiche man endueth with honour speciall,
But suche heartes as slepe in foolishnes
Knoweth nothing, and will nought know at all:
But in this little barge in principall
All foolish mockers I purpose to repreue,
Clawe he his backe that feeleth itch or greue.
Mockers and scorners that are harde of beleue,
With a rough comb here will I clawe and grate,
To proue if they will from their vice remeue,
And leaue their folly, which causeth great debate:
Suche caytiues spare neyther poore man nor estate,
And where their selfe are moste worthy derision,
Other men to scorne is all their most condition.
Yet are mo fooles of this abusion,
Whiche of wise men despiseth the doctrine,
With mowes, mockes, scorne, and collusion,
Rewarding rebukes for their good discipline:
Shewe to suche wisdome, yet shall they not encline
Unto the same, but set nothing therby
But mocke thy doctrine, still or openly.
So in the worlde it appeareth commonly,
That who that will a foole rebuke or blame,
A mock or mowe shall he haue by and by:
Thus in derision haue fooles their speciall game.
Correct a wise man that woulde eschue ill name,
And fayne woulde learne, and his lewde life amende,
And to thy wordes he gladly shall intende.
If by misfortune a rightwise man offende,
He gladly suffereth a iuste correction,
And him that him teacheth taketh for his frende,
Him selfe putting mekely unto subiection,
Folowing his preceptes and good direction:
But yf that one a foole rebuke or blame,
He shall his teacher hate, slaunder and diffame.
Howbeit his wordes oft turne to his own shame,
And his own dartes retourne to him agayne,
And so is he sore wounded with the same,
And in wo endeth, great misery and payne.
Is also proued full often is certayne,
That they that on mockers alway their mindes cast,
Shall of all other be mocked at the last.
He that goeth right, stedfast, sure, and fast,
May him well mocke that goeth halting and lame,
And he that is white may well his scornes cast,
Agaynst a man of Inde: but no man ought to blame
Anothers vice, while he vseth the same.
But who that of sinne is cleane in deede and thought,
May him well scorne whose liuing is starke nought.
The scornes of Naball full dere should haue been bought,
If Abigayl his wife discrete and sage,
Had not by kindnes right crafty meanes sought,
The wrath of Dauid to temper and asswage.
Hath not two beares in their fury and rage
Two and fortie children rent and torne,
For they the prophete Helyseus did scorne.
So might they curse the time that they were borne,
For their mocking of this prophet diuine:
So many other of this sort often mourne
For their lewde mockes, and fall into ruine.
Thus it is foly for wise men to encline,
To this lewde flocke of fooles, for see thou shall
Them moste scorning that are most bad of all.

The Lenuoy of Barclay to the fooles.

Ye mocking fooles that in scorne set your ioy,
Proudly despising Gods punition:
Take ye example by Cham the sonne of Noy,
Which laughed his father vnto derision,
Which him after cursed for his transgression,
And made him seruaunt to all his lyne and stocke.
So shall ye caytifs at the conclusion,
Since ye are nought and other scorne and mocke.

About the year 1553 wrote Dr. *Wilson*, a man celebrated for the politeness of his style, and the extent of his knowledge: what was the state of our language in his time, the following may be of use to show.

PRonunciation is an apte orderinge bothe of the voyce, countenaunce, and all the whole bodye, accordynge to the worthines of such woordes and mater as by speache are declared. The vse hereof is suche for anye one that liketh to haue prayse for tellynge his tale in open assemblie, that hauing a good tongue, and a comelye countenaunce, he shal be thought to passe all other that haue the like vtteraunce: thoughe they haue muche better learning. The tongue geueth a certayne grace to euerye matter, and beautifieth the cause in like maner, as a swete soundynge lute muche setteth forthe a meane deuised ballade. Or as the sounde of a good instrumente styrreth the hearers, and moueth muche delite, so a cleare soundyng voice comforteth muche our deintie eares, with muche swete melodie, and causeth us to allowe the matter rather for the reporters sake, then the reporter for the matters sake. Demosthenes therfore, that famouse oratour, beyng asked what was the chiefest point in al oratorie, gaue the chiefe and onely praise to Pronunciation; being demaunded, what was the seconde, and the thirde, he stil made answere, Pronunciation, and would make none other aunswere, till they lefte askyng, declaryng hereby that arte without vtteraunce can dooe nothyng, vtterance without arte can dooe right muche. And no doubte that man is in outwarde apparaunce halfe a good clarke, that hath a cleane tongue, and a comely gesture of his body. Æschines lykewyse being bannished his countrie through Demosthenes, when he had redde to the Rhodians his own oration, and Demosthenes aunswere thereunto, by force whereof he was banished, and all they marueiled muche at the excellencie of the same: then (q d Æschines) you would haue marueiled muche more if you had heard hymselfe speak it. Thus beyng cast in miserie and banished for euer, he could not but geue such greate reporte of his deadly and mortal enemy.

Thus have I deduced the *English* language from the age of *Alfred* to that of *Elizabeth;* in some parts imperfectly for want of materials; but I hope at least, in such a manner that its progress may be easily traced, and the gradations observed, by which it advanced from its first rudeness to its present elegance.

A GRAMMAR

OF

THE ENGLISH TONGUE.

GRAMMAR, which is *the art of using words properly*, comprises four parts; Orthography, Etymology, Syntax, and Prosody.

In this division and order of the parts of grammar I follow the common grammarians, without inquiring whether a fitter distribution might not be found. Experience has long shown this method to be so distinct as to obviate confusion, and so comprehensive as to prevent any inconvenient omissions. I likewise use the terms already received, and already understood, though perhaps others more proper might sometimes be invented. Sylburgius, and other innovators, whose new terms have sunk their learning into neglect, have left sufficient warning against the trifling ambition of teaching arts in a new language.

ORTHOGRAPHY is *the art of combining letters into syllables, and syllables into words.* It therefore teaches previously the form and sound of letters.

The letters of the English language are,

To these may be added certain combinations of letters, universally used in printing; as ct, ſt, fi, fl, ſi, ſb, ſk, ff, ffi, fi, ffi, ffl, and &, or *and per se*, *and*. ct, ſt, ſt, ſt, ſb, ſk, ff, ffi, fi, ffi, ffl, & ct, ſt, fi, fl, ff, ffi, ffi, fi, ffi, ffl, &.

Our letters are commonly reckoned twenty-four, because anciently *i* and *j*, as well as *u* and *v*, were expressed by the same character; but as those letters, which had always different powers, have now different forms, our alphabet may be properly said to consist of twenty-six letters.

None of the small consonants have a double form, except *f*, *s*; of which *ſ* is used in the beginning and middle, and *s* at the end.

Vowels are five, *a*, *e*, *i*, *o*, *u*.

Such is the number generally received; but for *i* it is the practice to write *y* in the end of words, as *thy*, *holy;* before *i*, as from *die*, *dying;* from *beautify*, *beautifying;* in the words *says*, *days*, *eyes;* and in words derived from the Greek, and written originally with *υ*, as *system*, *σύστημα*; *sympathy*, *συμπάθεια*.

For *u* we often write *w* after a vowel, to make a diphthong; as *raw*, *grew*, *view*, *vow*, *flowing*, *lowness*.

The sounds of all the letters are various.

In treating on the letters, I shall not, like some other grammarians, inquire into the original of their form, as an antiquarian; nor into their formation and prolation by the organs of speech, as a mechanick, anatomist, or physiologist; nor into the properties and gradation of sounds, or the elegance or harshness of particular combinations, as a writer of universal and transcendental grammar. I consider the English alphabet only as it is English; and even in this narrow disquisition I follow the example of former grammarians, perhaps with more reverence than judgment, because by writing in English I suppose my reader already acquainted with the English language, and consequently able to pronounce the letters, of which I teach the pronunciation; and because of sounds in general it may be observed, that words are unable to describe them. An account therefore of the primitive and simple letters is useless almost alike to those who know their sound, and those who know it not.

Of VOWELS.

A.

A has three sounds, the slender, open, and broad.

A slender is found in most words, as *face*, *mane;* and in words ending in *ation*, as *creation*, *salvation*, *generation*.

The *a* slender is the proper English *a*, called very justly by Erpenius, in his Arabick Grammar, *a Anglicum cum e mistum*, as having a middle sound between the open *a* and the *e*. The French have a similar sound in the word *pais*, and in their *e* masculine.

A open is the *a* of the Italian, or nearly resembles it; as *father*, *rather*, *congratulate*, *fancy*, *glass*.

A broad resembles the *a* of the German; as *all*, *wall*, *call*.

Many words pronounced with *a* broad were anciently written with *au*, as *fault*, *mault;* and we still say *fault*, *vault*. This was probably the Saxon sound, for it is yet retained in the northern dialects, and in the rustic pronunciation; as *maun* for *man*, *haund* for *hand*.

The short *a* approaches to the *a* open, as *grass*.

The long *a*, if prolonged by *e* at the end of the word, is always slender, as *graze*, *fame*.

A forms a diphthong only with *i* or *y*, and *u* or *w*. *Ai* or *ay*, as in *plain*, *wain*, *gay*, *clay*, has only the sound of the long and slender *a*, and differs not in the pronunciation from *plane*, *wane*.

Au or *aw* has the sound of the German *a*, as *raw*, *naughty*.

Æ is sometimes found in Latin words not completely naturalized or assimilated, but is no English diphthong; and is more properly expressed by single *e*, as *Cesar*, *Eneas*.

E.

E is the letter which occurs most frequently in the English language.

E is long, as in *scēne;* or short, as in *cĕllar*, *separate*, *cĕlebrate*, *mĕn*, *thĕn*.

It is always short before a double consonant, or two consonants, as in *vĕx*, *pĕrplĕxity*, *rĕlent*, *mĕdlar*, *rĕptile*, *sĕrpĕnt*, *cĕllar*, *cĕssation*, *blĕssing*, *fell*, *fĕlling*, *dĕbt*.

E is always mute at the end of a word, except in monosyllables that have no other vowel, as *the;* or proper names, as *Penelope*, *Phebe*, *Derbe;* being used to modify the foregoing consonant, as *since*, *once*, *hedge*, *oblige;* or to lengthen the preceding vowel, as *ban*, *bāne;* *căn*, *cāne;* *pĭn*, *pīne;* *tŭn*, *tūne;* *rŏb*, *rōbe;* *hŏp*, *hōpe;* *fir*, *fīre;* *cŭr*, *cūre;* *tŭb*, *tūbe*.

Almost all words which now terminate in consonants ended anciently in *e*, as *yeare*, *yeare;* *wilderneſſe*, *wilderneſſe;* which *e* probably had the force of the French *e* feminine, and constituted a syllable with its associate consonant; for in old editions, words are sometimes divided thus, *clea-re*, *fel-le*, *knowled-ge*. This *e* was perhaps for a time vocal or silent in poetry, as conveniency required; but it has been long wholly mute. Camden in his *Remains* calls it the silent *e*.

It does not always lengthen the foregoing vowel, as *glŏve*, *lĭve*, *gĭve*.

It has sometimes in the end of words a sound obscure, and scarcely perceptible, as *open*, *shapen*, *shotten*, *thistle*, *participle*, *lucre*.

This faintness of sound is found when *e* separates a mute from a liquid, as in *rotten;* or follows a mute and liquid as in *cattle*.

E forms a diphthong with *a*, as *near;* with *i*, as *deign*, *receive;* and with *u* or *w*, as *new*, *flew*.

Ea sounds like *e* long, as *mean;* or like *ee*, as *dear*, *clear*, *near*.

Ei is sounded like *e* long, as *seize*, *perceiving*.

Eu sounds as *u* long and soft.

E, *a*, *u*, are combined in *beauty* and its derivatives, but have only the sound of *u*.

E may be said to form a diphthong by reduplication, as *agree*, *sleeping*.

Eo is found in *yeomen*, where it is sounded as *e* short; and in *people*, where it is pronounced like *ee*.

I.

I has a sound, long, as *fīne;* and short, as *fĭn*.

That is eminently observable in *i*, which may be likewise remarked in other letters, that the short sound is not the long sound contracted, but a sound wholly different.

The long sound in monosyllables is always marked by the *e* final, as *thīn*, *thīne*.

I is often sounded before *r* as a short *u;* as *flirt*, *first*, *shirt*.

It forms a diphthong only with *e*, as *field*, *shield*, which is sounded as the double *ee;* except *friend*, which is sounded as *frend*.

I is joined with *eu* in *lieu;* and *ew* in *view;* which triphthongs are sounded as the open *u*.

O

O is long, as *bōne*, *ōbedient*, *corrōding;* or short, as *blŏck*, *knŏck*, *ŏblique*, *lŏll*.

Women is pronounced *wimen*.

The short *o* has sometimes the sound of a close *u*, as *son*, *come*.

O coalesces into a diphthong with *a*, as *moan*, *groan*, *approach;* *oa* has the sound of *o* long.

O is united to *e* in some words derived from Greek, as *œconomy;* but *oe* being not an English diphthong, they are better written as they are sounded with only *e*, *economy*.

With *i*, as *oil*, *soil*, *moil*, *noisome*.

This coalition of letters seems to unite the sounds of the two letters as far as two sounds can be united without being destroyed, and therefore approaches more nearly than any combination in our tongue to the notion of a diphthong.

With *o*, as *boot*, *hoot*, *cooler;* *oo* has the sound of the Italian *u*.

With *u* or *w*, as *our*, *power*, *flower;* but in some words has only the sound of *o* long, as in *soul*, *bowl*, *sow*, *grow*. These different sounds are used to distinguish different significations; as *bow*, an instrument for shooting; *bow*, a depression of the head; *sow*, the she of a boar; *sow*, to scatter seed; *bowl*, an orbicular body; *bowl*, a wooden vessel.

Ou is sometimes pronounced like *o* soft, as *court;* sometimes like *o* short, as *cough;* sometimes like *u* close, as *could;* or *u* open, as *rough*, *tough;* which use only can teach.

Ou is frequently used in the last syllable of words which in Latin end in *or*, and are made in English, as *honour*, *labour*, *favour*, from *honor*, *labor*, *favor*.

Some late innovators have rejected the *u*, without considering that the last syllable gives the sound neither of *or*, nor *ur*, but a sound between them, if not compounded of both; besides that they are probably derived to us from the French nouns, in *eur*, as *honneur*, *faveur*.

U.

U is long in *ūse*, *confūsion;* or short, as *ŭs*, *concŭssion*.

It coalesces with *a*, *e*, *i*, *o;* but has rather in these combinations the force of the *w*, as *quaff*, *quest*, *quit*, *quite*, *languish;* sometimes in *ui* the *i* loses its sound, as in *juice*. It is sometimes mute before *a*, *e*, *i*, *y*, as *guard*, *guest*, *guise*, *buy*.

U is followed by *e* in *virtue*, but the *e* has no sound.

Ue is sometimes mute at the end of a word, in imitation of the French, as *prorogue*, *synagogue*, *plague*, *vague*, *harangue*.

Y.

Y is a vowel, which, as Quintilian observes of one of the Roman letters, we might want without inconvenience, but that we have it. It supplies the place of *i* in the end of words, as *thy;* before an *i*, as *dying;* and is commonly retained in derivative words where it was part of a diphthong in the primitive; as *destroy*, *destroyer;* *betray*, *betrayed*, *betrayer;* *pray*, *prayers;* *say*, *sayer;* *day*, *days*.

Y being the Saxon vowel *ẏ*, which was commonly used where *i* is now put, occurs very frequently in old books.

General Rules.

A vowel in the beginning or middle syllable, before two consonants, is commonly short, as *ŏppŏrtunity*.

In monosyllables a single vowel before a single consonant is short, as *stăg*, *frŏg*.

Many is pronounced as if it were wrote *manny*.

OF CONSONANTS.

B.

B has one unvaried sound, such as it obtains in other languages.

It is mute in *debt*, *debtor*, *subtle*, *doubt*, *lamb*, *limb*, *dumb*, *thumb*, *limb*, *comb*, *womb*.

It is used before *l* and *r*, as *black*, *brown*.

C.

C has before *e* and *i* the sound of *s;* as *sincerely*, *centrick*, *century*, *circular*, *cistern*, *city*, *siccity;* before *a*, *o* and *u*, it sounds like *k*, as *calm*, *concavity*, *copper*, *incorporate*, *curiosity*, *concupiscence*.

C might be omitted in the language without loss, since one of its sounds might be supplied by *s*, and the other by *k*, but that it preserves to the eye the etymology of words, as *face* from *facies*, *captive* from *captivus*.

Ch has a sound which is analyzed into *tsh*, as *church*, *chin*, *crutch*. It is the same sound which the Italians give to the *c* simple before *i* and *e*, as *citta*, *cerro*.

Ch is sounded like *k* in words derived from the Greek, as *chymist*, *scheme*, *choler*. *Arch* is commonly sounded *ark* before a vowel, as *archangel;* and with the English sound of *ch* before a consonant, as *archbishop*.

Ch, in some French words not yet assimilated, sounds like *sh* as *machine*, *chaise*.

C, having no determinate sound, according to English orthography, never ends

a word; therefore we write *stick*, *block*, which were originally *sticke*, *blocke*. In such words, *c* is now mute.

It is used before *l* and *r*, as *clock*, *cross*.

D.

Is uniform in its sound, as *death*, *diligent*.

It is used before *r*, as *draw*, *dross*; and *w*, as *dwell*.

F.

F, though having a name beginning with a vowel, is numbered by the grammarians among the semivowels; yet has this quality of a mute, that it is commodiously sounded before a liquid, as *flask*, *fly*, *freckle*. It has an unvariable sound, except that *of* is sometimes spoken nearly as *ov*.

G.

G has two sounds; one hard, as in *gay*, *go*, *gun*; the other soft, as in *gem*, *giant*.

At the end of a word it is always hard, *ring*, *snug*, *song*, *frog*.

Before *e* and *i* the sound is uncertain.

G before *e* is soft, as *gem*, *generation*, except in *gear*, *geld*, *geese*, *get*, *gewgaw*, and derivatives from words ending in *g* as *singing*, *stronger*, and generally before *er* at the end of words, as *finger*.

G is mute before *n*, as *gnash*, *sign*, *foreign*.

G before *i* is hard, as *give* except in *giant*, *gigantick*, *gibbet*, *gibe*, *gibblets*, *Giles*, *gill*, *gilliflower*, *gin*, *ginger*, *gingle*, to which may be added *Egypt* and *gypsey*.

Gh, in the beginning of a word, has a sound of the hard *g*, as *ghostly*; in the middle and sometimes at the end, it is quite silent, as *though*, *right*, *sought*, spoken *tho'*, *rite*, *soute*.

It has often at the end the sound of *f*, as *laugh*, whence *laughter* retains the same sound in the middle; *cough*, *trough*, *sough*, *tough*, *enough*, *slough*.

It is not to be doubted, but that in the original pronunciation *g* had the force of consonant deeply guttural, which is still continued among the Scotch.

G is used before *h*, *l*, and *r*.

H.

H is a note of aspiration, and shows that the following vowel must be pronounced with a strong emission of breath, as *hat*, *horse*.

It seldom begins any but the first syllable, in which it is always sounded with a full breath, except in *heir*, *herb*, *hostler*, *honour*, *humble*, *honest*, *humour*, and their derivatives.

It sometimes begins middle or final syllables in words compounded, as *blockhead*; or derived from the Latin, as *comprehended*.

J.

J consonant sounds uniformly like the soft *g*, and is therefore a letter useless, except in etymology, as *ejaculation*, *jester*, *jocund*, *juice*.

K.

K has the sound of hard *c*, and is used before *e* and *i*, where, according to English analogy, *c* would be soft, as *kept*, *king*, *skirt*, *skeptick*, for so it should be written, not *sceptick*, because *sc* is sounded like *s*, as in *scene*.

It is used before *n*, as *knell*, *knot*, but totally loses its sound in modern pronunciation.

K is never doubled; but *c* is used before it to shorten the vowel by a double consonant, as *cŏckle*, *pĭckle*.

L.

L has in English the same liquid sound as in other languages.

The custom is to double the *l* at the end of monosyllables, as *kill*, *will*, *full*. These words were originally written *kille*, *wille*, *fulle*; and when the *e* first grew silent and was afterward omitted, the *ll* was retained, to give force, according to the analogy of our language, to the foregoing vowel.

L is sometimes mute, as in *calf*, *half*, *halves*, *calves*, *could*, *would*, *should*, *psalm*, *talk*, *salmon*, *falcon*.

The Saxons, who delighted in guttural sounds, sometimes aspirated the *l* at the beginning of words, as hlaf, *a loaf*, or *bread*; hlaford, *a lord*; but this pronunciation is now disused.

Le at the end of words is pronounced like a weak *el*, in which the *e* is almost mute, as *table*, *shuttle*.

M.

M has always the same sound, as *murmur*, *monumental*.

N.

N has always the same sound, as *noble*, *manners*.

N is sometimes mute after *m*, as *damn*, *condemn*, *hymn*.

P.

P has always the same sound, which the Welsh and Germans confound with *b*.

P is sometimes mute, as in *psalm*, and between *m* and *t*, as *tempt*.

Ph is used for *f* in words derived from the Greek, as *philosopher*, *philanthropy*, *Philip*.

Q.

Q, as in other languages is always followed by *u*, and has a sound which our Saxon ancestors well expressed by cp, *cw*, as *quadrant*, *queen*, *equestrian*, *quilt*, *inquiry*, *quire*, *quotidian*. *Qu* is never followed by *u*.

Qu is sometimes sounded, in words derived from the French, like *k*, as *conquer*, *liquor*, *risque*, *chequer*.

R.

R has the same rough snarling sound as in other tongues.

The Saxons used often to put *h* before it, as before *l* at the beginning of words.

Rh is used in words derived from the Greek, as *myrrh*, *myrrhine*, *catarrhous*, *rheum*, *rheumatic*, *rhyme*.

Re at the end of some words derived from the Latin or French, is pronounced like a weak *er*, as *theatre*, *sepulchre*.

S.

S has a hissing sound, as *sibilation*, *sister*.

A single *s* seldom ends any word, except in the third person of verbs, as *loves*, *grows*; and the plurals of nouns, as *trees*, *bushes*, *distresses*; the pronouns *this*, *his*, *ours*, *yours*, *us*; the adverb *thus*; and words derived from Latin, as *rebus*, *surplus*; the close being always either in *se*, as *house*, *horse*, or *ss*, as *grass*, *dress*, *bliss*, *less*, anciently *grasse*, *dresse*.

S single, at the end of words, has a grosser sound, like that of *z*, as *trees*, *eyes*, except *this*, *thus*, *us*, *rebus*, *surplus*.

It sounds like *z* before *ion*, if a vowel goes before it, as *intrusion*; and like *s*, if it follows a consonant, as *conversion*.

It sounds like *z* before *e* mute, as *refuse*, and before *y* final, as *rosy*; and in those words *bosom*, *desire*, *wisdom*, *prison*, *prisoner*, *présent*, *present*, *damsel*, *casement*.

It is the peculiar quality of *s*, that it may be sounded before all consonants except *x* and *z*, in which *s* is comprised, *x* being only *ks* and *z* a hard or gross *s*. This *s* is therefore termed by grammarians *suæ potestatis litera*; the reason of which the learned Dr. Clarke erroneously supposed to be, that in some words it might be doubled at pleasure. Thus we find in several languages:
Σκεννυμι, *scatter*, *sdegno*, *sdrucciolo*, *sfavellare*, σφιγξ, *sgombrare*, *sgranare*, *shake*, *slumber*, *smell*, *snipe*, *space*, *splendour*, *spring*, *squeeze*, *shrew*, *step*, *strength*, *stramen*, *stripe*, *sventura*, *swell*.

S is mute in *isle*, *island*, *demesne*, *viscount*.

T.

T has its customary sound, as *take*, *temptation*.

Ti before a vowel has the sound of *si*, as *salvation*, except an *s* goes before, as question; excepting likewise derivatives from words ending in *ty*, as *mighty*, *mightier*.

Th has two sounds; the one soft, as *thus*, *whether*; the other hard, as *thing*, *think*. The sound is soft in these words, *then*, *thence*, and *there*, with their derivatives and compounds; and in *that*, *these*, *thou*, *thee*, *thy*, *thine*, *their*, *they*, *this*, *those*, *them*, *though*, *thus*, and in all words between two vowels, as *father*, *whether*; and between *r* and a vowel, as *burthen*.

In other words it is hard, as *thick*, *thunder*, *faith*, *faithful*. Where it is softened at the end of a word, an *e* silent must be added, as *breath*, *breathe*; *cloth*, *clothe*.

V.

V has a sound of near affinity to that of *f*, *vain*, *vanity*,

From *f*, in the Islandick alphabet, *v* is only distinguished by a diacritical point.

W.

Of *w*, which in diphthongs is often an undoubted vowel, some grammarians have doubted whether it ever be a consonant; and not rather, as it is called, a double *u*, or *ou*, as *water* may be resolved into *ouater*: but letters of the same sound are always reckoned consonants in other alphabets: and it may be observed, that *w* follows a vowel without any hiatus or difficulty of utterance, as *frosty winter*:

Wh has a sound accounted peculiar to the English, which the Saxons better expressed by hp *hw*, as *what*, *whence*, *whiting*; in *whore* only, and sometimes in *wholesome*, *wh* is sounded like a simple *h*.

X.

X begins no English word; it has the sound of *ks*, as *axle*, *extraneous*.

Y.

Y, when it follows a consonant, is a vowel: when it precedes either a vowel or a diphthong, is a consonant, *ye*, *young*. It is thought by some to be in all cases a vowel. But it may be observed of *y* as of *w*, that it follows a vowel without any hiatus, as *rosy youth*.

The chief argument by which *w* and *y* appear to be always vowels is, that the sounds which they are supposed to have, as consonants, cannot be uttered after a vowel, like that of all other consonants; thus we say, *tu*, *ut*; *do*, *odd*; but in *wed*, *dew*, the two sounds of *w* have no resemblance to each other.

Z.

Z begins no word originally English; it has the sound, as its name *izzard* or *s hard* expresses, of an *s* uttered with a closer compression of the palate by the tongue, as *freeze*, *froze*.

In orthography I have supposed *orthoepy*, or *just utterance of words*, to be included; orthography being only the art of expressing certain sounds by proper characters. I have therefore observed in what words any of the letters are mute.

Most of the writers of English grammar have given long tables of words pronounced otherwise than they are written, and seem not sufficiently to have considered, that of English, as of all living tongues, there is a double pronunciation, one cursory and colloquial, the other regular and solemn. The cursory pronunciation is always vague and uncertain, being made different in different mouths by negligence, unskilfulness, or affectation. The solemn pronunciation, though by no means immutable and permanent, is yet always less remote from the orthography, and less liable to capricious innovation. They have however generally formed their tables according to the cursory speech of those with whom they happened to converse; and concluding that the whole nation combines to vitiate language in one manner, have often established the jargon of the lowest of the people as the model of speech.

For pronunciation the best general rule is to consider those as the most elegant speakers who deviate least from the written words.

There have been many schemes offered for the emendation and settlement of our orthography, which, like that of other nations, being formed by chance, or according to the fancy of the earliest writers in rude ages, was at first very various and uncertain, and as yet sufficiently irregular. Of these reformers some have endeavoured to accommodate orthography better to the pronunciation, without considering that this is to measure by a shadow, to take that for a model or standard which is changing while they apply for it. Others, less absurdly indeed, but with equal unlikelihood of success, have endeavoured to proportion the number of letters to that of sounds, that every sound may have its own character, and every character a single sound. Such would be the orthography of a new language to be formed by a synod of grammarians upon principles of science. But who can hope to prevail on nations to change their practice, and make all their old books useless? or what advantage would a new orthography procure equivalent to the confusion and perplexity of such an alteration?

Some of these schemes I shall, however, exhibit, which may be used according to the diversities of genius, as a guide to reformers, or terrour to innovators.

One of the first who proposed a scheme of regular orthography, was Sir Thomas Smith, secretary of state to Queen Elizabeth, a man of real learning, and much practised in grammatical disquisitions. Had he written the following lines according to his scheme, they would have appeared thus:

At length Erasmus, that great injur'd name,
The glory of the priesthood and the shame,
Stemm'd the wild torrent of a barb'rous age,
And drove those holy Vandals off the stage.

At lengθ Erasmus, θat great inzurd nam,
Δe glori of θe priesthud, and θe z᷑m,
Stemmd θe wild torrent of a barb'rous aᵹ,
And drov θos holi Vandals off θe staᵹ.

After him another mode of writing was offered by Dr. Gill the celebrated master of St. Paul's school in London; which I cannot represent exactly for want of types, but will approach as nearly as I can by means of characters now in use, so as to make it understood, exhibiting two stanzas of Spenser in the reformed orthography.

Spenser, Book iii. Canto 5.

Unthankful wretch, said he, is this the meed,
With which her sovereign mercy thou dost quite?
Thy life she saved by her gracious deed;
But thou dost ween with villainous despight,
To blot her honour, and her heav'nly light.
Die, rather die, than so disloyally
Deem of her high desert, or seem so light.
Fair death it is to shun more shame; then die.
Die, rather die, than ever love disloyally.
But if to love disloyalty it be,
Shall I then hate her, that from deathes door
Me brought? ah! far be such reproach from me.
What can I less do, than her love therefore,
Sith I her due reward cannot restore?
Die, rather die, and dying do her serve,
Dying her serve, and living her adore.
Thy life she gave, thy life she doth deserve;
Die, rather die, than ever from her service swerve.

Dr. Gill was followed by Charles Butler, a man who did not want an understanding, which might have qualified him for better employment. He seems to have been more sanguine than his predecessors, for he printed his book according to his own scheme; which the following specimen will make easily understood.

But whensoever you have occasion to trouble their patience, or to come among them being troubled, it is better to stand upon your guard, than to trust to their gentleness. For the safeguard of your face, which they have most mind unto, provide a pursehood, made of course boultering, to be drawn and knit about your collar, which for more safety is to be lined against the eminent parts with woollen cloth. First cut a piece about an inch and a half broad, and a half a yard long, to reach round by the temples and forehead, from one ear to the other; which being sowed in his place, join unto it two short pieces of the same breadth under the eyes, for the balls of the cheeks, and then set another piece about the breadth of a shilling against the top of the nose. At other times, when they are not angered, a little piece half a quarter broad, to cover the eyes and parts about them, may serve, though it be in the heat of the day.

Bet pensoëver you hav' occasion to trubble θeir patienc', or to coom among θem beeing trubled, it is better to stand upon your gard, θan to trust to θeir gentlenes. Butler on the Nature and Properties of Bees, 1634.

In the time of Charles I. there was a very prevalent inclination to change the orthography; as appears among other books, in such editions of the works of Milton as were published by himself. Of these reformers every man had his own scheme; but they agreed in one general design of accommodating the letters to the pronunciation, by ejecting such as they thought superfluous. Some of them would have written these lines thus:

——————All the erth
Shall then be paradis, far happier place
Than this of Eden, and far happier dais.

Bishop Wilkins afterward, in his great work of the philosophical language, proposed, without expecting to be followed, a regular orthography; by which the Lord's prayer is to be written thus:

Yur Fádher hwitsh art in héven, halloed bi dhyi nám, dhyi cingdým cým, dhy will bi dyn in erth as it is in héven, &c.

We have since had no general reformers; but some ingenious men have endeavoured to deserve well of their country, by writing *honor* and *labor* for *honour* and *labour*, *red* for *read* in the preter tense, *sais* for *says*, *repete* for *repeat*, *explane* for *explain*, or *declame* for *declaim*. Of these it may be said, that as they have done no good, they have done little harm; both because they have innovated little, and because few have followed them.

The English language has properly no dialects; the style of writers has no professed diversity in the use of words, or of their flexions, and terminations, nor differs but by different degrees of skill or care. The oral diction is uniform in no spacious country, but has less variation in England than in most other nations of equal extent. The language of the northern counties retains many words now out of use, but which are commonly of the genuine Teutonick race, and is uttered with a pronunciation which now seems harsh and rough, but was probably used by our ancestors. The northern speech is therefore not barbarous but obsolete. The speech in the western provinces seems to differ from the general diction rather by a depraved pronunciation, than by any real difference which letters would express.

ETYMOLOGY.

ETYMOLOGY teaches the deduction of one word from another, and the various modifications by which the sense of the same word is diversified: as *horse, horses;* I *love*, I *loved.*

Of the Article.

The English have two articles, *an* or *a*, and *the*.

An, a.

A has an indefinite signification, and means *one*, with some reference to more; as *This is a good book*, that is, *one among the books that are good. He was killed by a sword*, that is, *some sword. This is a better book for a man than a boy*, that is, *for one of those that are men than one of those that are boys. An army might enter without resistance*, that is, *any army.*

In the senses in which we use *a* or *an* in the singular, we speak in the plural without an article: as, *these are good books.*

I have made *an* the original article, because it is only the Saxon *an*, or æn, *one*, applied to a new use, as the German *ein*, and the French *un;* the *n* being cut off before a consonant in the speed of utterance.

Grammarians of the last age direct, that *an* should be used before *h;* whence it appears that the English anciently aspirated less. *An* is still used before the silent *h*, as *an herb*, *an honest man:* but otherwise *a;* as,

A horse, *a* horse, my kingdom for *a* horse. *Shakspeare.*

An or *a* can only be joined with a singular, the correspondent plural is the noun without an article: as *I want a pen, I want pens:* or with the propominal adjective *some*, as *I want some pens.*

The.

The has a particular and definite signification.

I am as free as nature first made man,
Ere *the* base laws of servitude began,
When wild in woods *the* noble savage ran. *Dryden.*

Many words are used without articles; as,

1. Proper names, as *John*, *Alexander*, *Longinus*, *Aristarchus*, *Jerusalem*, *Athens*, *Rome*, *London.* God is used as a proper name.

2. Abstract names, as *blackness*, *witchcraft*, *virtue*, *vice*, *beauty*, *ugliness*, *love*, *hatred*, *anger*, *good-nature*, *kindness.*

3. Words in which nothing but the mere being of any thing is implied: This is not *beer*, but *water:* this is not *brass*, but *steel.*

Of Nouns Substantives.

The relations of English nouns to words going before or following, are not expressed by *cases*, or changes of termination, but as in most of the other European languages by prepositions, unless we may be said to have a genitive case.

Singular.

Nom.	Magister,	*a* Master, *the* Master
Gen.	Magistri,	*of a* Master, *of the* Master *or* Masters, *the* Masters,
Dat.	Magistro,	*to a* Master, *to the* Master.
Acc.	Magistrum,	*a* Master, *the* Master.
Voc.	Magister,	Master, *O* Master.
Abl.	Magistro,	*from a* Master, *from the* Master.

Plural.

Nom.	Magistri,	Masters, *the* Masters.
Gen.	Magistrorum,	*of* Masters, *of the* Masters.
Dat.	Magistris,	*to* Masters, *to the* Masters.
Acc.	Magistros,	Masters, *the* Masters.
Voc.	Magistri,	Masters, *O* Masters.
Abl.	Magistris,	*from* Masters, *from the* Masters.

Our nouns are therefore only declined thus:

Master,	*Gen.* Masters.	*Plur.* Masters.
Scholar,	*Gen.* Scholars.	*Plur.* Scholars.

These genitives are always written with a mark of elision, *master's*, *scholar's*, according to an opinion long received, that the 's is a contraction of *his*, as *the soldier's valour*, for *the soldier* his *valour:* but this cannot be the true original, because 's is put to female nouns, *Woman's beauty*, the *Virgin's delicacy; Haughty Juno's unrelenting hate;* and collective nouns, as *Women's passions*, *the rabble's insolence*, *the multitude's folly:* in all these cases it is apparent that *his* cannot be understood. We say likewise, *the foundation's strength*, *the diamond's lustre*, *the winter's severity;* but in these cases *his* may be understood, *he* and *his* having formerly been applied to neuters in the place now supplied by *it* and *its.*

The learned and sagacious Wallis, to whom every English grammarian owes a tribute of reverence, calls this modification of the noun an *adjective possessive;* I think with no more propriety than he might have applied the same to the genitive in *equitum decus*, *Trojæ oris*, or any other Latin genitive. Dr. Lowth, on the other part, supposes the possessive pronouns *mine* and *thine* to be genitive cases.

This termination of the noun seems to constitute a real genitive, indicating possession. It is derived to us from those who declined ꝛmiꝺ, *a smith;* Gen. ꝛmiꝺer, *of a smith;* Plur. ꝛmiꝺer, or ꝛmiꝺar, *smiths;* and so in two other of their seven declensions.

It is a further confirmation of this opinion, that in the old poets both the genitive and plural were longer by a syllable than the original word: *knitis* for *knight's*, in Chaucer; *leavis* for *leaves*, in Spenser.

When a word ends in *s*, the genitive may be the same with the nominative, as *Venus Temple.*

The Plural is formed by adding *s*, as *table*, *tables; fly*, *flies; sister*, *sisters; wood*, *woods;* or *es* where *s* could not otherwise be sounded, as after *ch*, *s*, *sh*, *x*, *z;* after *c* sounded like *s*, and *g* like *j;* the mute *e* is vocal before *s*, as *lance*, *lances; outrage*, *outrages.*

The formation of the plural and genitive singular is the same.

A few words yet make the plural in *n*, as *men*, *women*, *oxen*, *swine*, and more anciently *eyne*, and *shoon.* This formation is that which generally prevails in the Teutonick dialects.

Words that end in *f* commonly form the plural by *ves*, as *loaf*, *loaves; calf*, *calves.*

Except a few, *muff*, *muffs; chief*, *chiefs.* So *hoof*, *roof*, *proof*, *relief*, *mischief*, *puff*, *cuff*, *dwarf*, *handkerchief*, *grief.*

Irregular plurals are *teeth* from *tooth*, *lice* from *louse*, *mice* from *mouse*, *geese* from *goose*, *feet* from *foot*, *dice* from *die*, *pence* from *penny*, *brethren* from *brother*, *children* from *child*.

Plurals ending in *s* have for the most part no genitives; but we say Womens *excellencies*, and *Weigh the* mens *wits against the* ladies *hairs*. Pope.

Dr. Wallis thinks the *Lord's house* may be said for the *house of Lords;* but such phrases are not now in use, and surely an English ear rebels against them. They would commonly produce a troublesome ambiguity, as *the Lord's house* may be the *house of Lords*, or *the house of a Lord*. Besides that the mark of elision is improper, for in *the Lord's house* nothing is cut off.

Some English substantives, like those of many other languages, change their termination as they express different sexes, as *prince, princess; actor, actress; lion, lioness; hero, heroine*. To these mentioned by Dr. Lowth may be added *arbitress, poetess, chauntress, duchess, tigress, governess, tutress, peeress, authoress, traytress*, and perhaps others. Of these variable terminations we have only a sufficient number to make us feel our want; for when we say of a woman that she is a *philosopher*, an *astronomer*, a *builder*, a *weaver*, a *dancer*, we perceive an impropriety in the termination which we cannot avoid; but we can say that she is an *architect*, a *botanist*, a *student*, because these terminations have not annexed to them the notion of sex. In words which the necessities of life are often requiring, the sex is distinguished not by different terminations but by different names, as, a *bull*, a *cow;* a *horse*, a *mare; equus, equa;* a *cock*, a *hen;* and sometimes by pronouns prefixed, as *a* he-*goat*, *a* she-*goat*.

Of Adjectives.

Adjectives in the English language are wholly indeclinable; having neither case, gender, nor number, and being added to substantives in all relations without any change; as *a good woman, good women, of a good woman; a good man, good men, of good men.*

The Comparison of Adjectives.

The comparative degree of adjectives is formed by adding *er*, the superlative by adding *est*, to the positive; as *fair*, fair*er*, fair*est; lovely*, lovel*ier*, lovel*iest; sweet*, sweet*er*, sweet*est; low*, low*er*, low*est; high*, high*er*, high*est*.

Some words are irregularly compared; as *good, better, best; bad, worse, worst; little, less, least; near, nearer, next; much, more, most; many* (or *moe*), *more* (for *moer*), *most* (for *moest*); *late, later, latest* or *last*.

Some comparatives form a superlative, by adding *most*, as *nether, nethermost; outer, outmost; under, undermost; up, upper, uppermost; fore, former, foremost*.

Most is sometimes added to a substantive, as *topmost, southmost*.

Many adjectives do not admit of comparison by terminations, and are only compared by *more* and *most*, as *benevolent, more benevolent, most benevolent*.

All adjectives may be compared by *more* and *most*, even when they have comparatives and superlatives regularly formed; as *fair; fairer*, or *more fair; fairest*, or *most fair*.

In adjectives that admit a regular comparison, the comparative *more* is oftener used than the superlative *most*, as *more fair*, is oftener written for *fairer*, than *most fair* for *fairest*.

The comparison of adjectives is very uncertain; and being much regulated by commodiousness of utterance, or agreeableness of sound, is not easily reduced to rules.

Monosyllables are commonly compared.

Pollysyllables, or words of more than two syllables, are seldom compared otherwise than by *more* and *most*, as *deplorable, more deplorable, most deplorable*.

Dissyllables are seldom compared if they terminate in *some*, as *fulsome, toilsome;* in *ful*, as *careful, spleenful, dreadful;* in *ing*, as *trifling, charming;* in *ous*, as *porous;* in *less*, as *careless, harmless;* in *ed*, as *wretched;* in *id*, as *candid;* in *al*, as *mortal;* in *ent*, as *recent, fervent;* in *ain*, as *certain;* in *ive*, as *missive;* in *dy*, as *woody;* in *fy*, as *fluffy;* in *ky*, as *rocky*, except *lucky;* in *my*, as *roomy;* in *ny*, as *skinny;* in *py*, as *ropy*, except *happy;* in *ry*, as *hoary*.

Some comparatives and superlatives are yet found in good writers, formed without regard to the foregoing rules: but in a language subjected so little and so lately to grammar, such anomalies must frequently occur.

So *shady* is compared by *Milton*.

She in *shadiest* covert hid,
Tun'd her nocturnal note. *Paradise Lost.*

And *virtuous*.

What she wills to say or do,
Seems wisest, *virtuousest*, discreetest, best. *Paradise Lost.*

So *trifling* by *Ray*, who is indeed of no great authority.

It is not so decorous, in respect of God, that he should immediately do all the meanest and *triflingest* things himself, without making use of any inferior or subordinate minister. *Ray on the Creation.*

Famous, by *Milton*.

I shall be nam'd among the *famousest*
Of women, sung at solemn festivals. *Milton's Agonistes.*

Inventive, by *Ascham*.

Those have the *inventivest* heads for all purposes, and roundest tongues in all matters. *Ascham's Schoolmaster.*

Mortal, by *Bacon*.

The *mortalest* poisons practised by the West Indians, have some mixture of the blood, fat, or flesh of man. *Bacon.*

Natural, by *Wotton*.

I will now deliver a few of the properest and *naturallest* considerations that belong to this piece. *Wotton's Architecture.*

Wretched, by *Jonson*.

The *wretcheder* are the contemners of all helps; such as, presuming on their own naturals, deride diligence, and mock at terms when they understand not things. *Ben Jonson.*

Powerful, by *Milton*.

We have sustained one day, in doubtful fight,
What heav'n's great King hath *pow'rfullest* to send
Against us from about his throne. *Paradise Lost.*

The termination in *ish* may be accounted in some sort a degree of comparison by which the signification is diminished below the positive, as *black, blackish*, or tending to blackness; *salt, saltish*, or having a little taste of salt: they therefore admit of no comparison. This termination is seldom added but to words expressing sensible qualities; nor often to words of above one syllable, and is scarcely used in the solemn or sublime style.

Of Pronouns.

Pronouns in the English language, are, *I, thou, he*, with their plurals, *we, ye, they, it, who, which, what, whether, whosoever, whatsoever, my, mine, our, ours, thy, thine, your, yours, his, her, hers, their, theirs, this, that, other, another*, the *same, some*.

The pronouns personal are irregularly inflected.

	Singular.	Plural.
Nom.	I	We
Accus. and other oblique cases	Me	Us
Nom.	Thou	Ye
Oblique.	Thee	You

You is commonly used in modern writers for *ye*, particularly in the language of ceremony, where the second person plural is used for the second person singular, *You are my friend.*

	Singular.	Plural.	
Nom.	He	They	Applied to masculines.
Oblique	Him	Them	
Nom.	She	They	Applied to feminines.
Oblique.	Her	Them	
Nom.	It	They	Applied to neuters or things.
Oblique.	Its	Them	

For *it* the practice of ancient writers was to use *he*, and for *its, his*.

The possessive pronouns, like other adjectives, are without cases or change of termination.

The possessive of the first person is *my, mine, our, ours;* of the second, *thy, thine, your, yours;* of the third, from *he, his;* from *she, her*, and *hers;* and in the plural *their, theirs*, for both sexes.

Ours, yours, hers, theirs, are used when the substantive preceding is separated by a verb, as *These are* our *books. These books are* ours. Your *children excel* ours *in stature, but* ours *surpass* yours *in learning*.

Ours, yours, hers, theirs, notwithstanding their seeming plural termination, are applied equally to singular and plural substantives, as *This book is* ours. *These books are* ours.

Mine and *thine* were formerly used before a vowel, as *mine amiable lady*; which, though now disused in prose, might be still properly continued in poetry; they are used as *ours* and *yours*, and are referred to a substantive preceding, as *thy* house is larger than *mine*, but *my* garden is more spacious than *thine*.

Their and *theirs* are the possessives likewise of *they*, when *they* is the plural of *it*, and are therefore applied to things.

Pronouns relative are, *who*, *which*, *what*, *whether*, *whosoever*, *whatsoever*.

Sing. and Plur.		Sing. and Plur.	
Nom.	Who	*Nom.*	Which
Gen.	Whose	*Gen.*	Of which, *or* whose
Other oblique cases.	Whom	*Other oblique cases.*	Which

Who is now used in relation to persons, and *which* in relation to things; but they were anciently confounded. At least it was common to say, the man *which*, though I remember no example of the thing *who*.

Whose is rather the poetical than regular genitive of *which*.

> The fruit
> Of that forbidden tree, *whose* mortal taste
> Brought death into the world. *Milton.*

Whether is only used in the nominative and accusative cases; and has no plural, being applied only to *one* of a number, commonly to one or two, as Whether *of these is left I know not.* Whether *shall I choose?* It is now almost obsolete.

What, whether relative or interrogative, is without variation.

Whosoever, *whatsoever*, being compounded of *who* or *what*, and *soever*, follow the rule of their primitives.

	Singular.	Plural.
In all cases,	This	These
	That	Those
	Other	Others
	Whether	

The plural *others* is not used but when it is referred to a substantive preceding, as *I have sent* other *horses. I have not sent the same horses but* others.

Another being only *an other*, has no plural.

Here, *there*, and *where*, joined with certain particles, have a relative and pronominal use. *Hereof*, *herein*, *hereby*, *hereafter*, *herewith*, *thereof*, *therein*, *thereby*, *thereupon*, *therewith*, *whereof*, *wherein*, *whereby*, *whereupon*, *wherewith*, which signify, *of this*, *in this*, &c. *of that*, *in that*, &c. *of which*, *in which*, &c.

Therefore and *wherefore*, which are properly *there for* and *where for*, *for that*, *for which*, are now reckoned conjunctions, and continued in use. The rest seem to be passing by degrees into neglect, though proper, useful, and analagous. They are referred both to singular and plural antecedents.

There are two more words used only in conjunction with pronouns, *own* and *self*.

Own is added to possessives, both singular and plural, as *my* own *hand*, *our* own *house*. It is emphatical, and implies a silent contrariety or opposition; as *I live in my own house*, that is, *not in a hired house. This I did with my own hand*, that is, *without help*, or *not by proxy*.

Self is added to possessives, as *myself*, *yourselves;* and sometimes to personal pronouns, as *himself*, *itself*, *themselves*. It then, like *own*, expresses emphasis and opposition, as *I did this myself*, that is, *not another;* or it forms a reciprocal pronoun, as *We hurt ourselves by vain rage.*

Himself, *itself*, *themselves*, are supposed by Wallis to be put, by corruption, for *his self*, *it' self*, *their selves;* so that *self* is always a substantive. This seems justly observed, for we say, *He came himself*, *Himself shall do this;* where *himself* cannot be an accusative.

Of the Verb.

English verbs are active, as *I love;* or neuter, as *I languish.* The neuters are formed like the actives.

Most verbs signifying *action* may likewise signify *condition* or *habit*, and become *neuters*, as *I love*, I am in love; *I strike*, I am now striking.

Verbs have only two tenses inflected in their terminations, the present and simple preterit; the other tenses are compounded of the auxiliary verbs *have*, *shall*, *will*, *let*, *may*, *can*, and the infinitive of the active or neuter verb.

The passive voice is formed by joining the participle preterit to the substantive verb, as *I am loved.*

Preterit.

Sing. *I* did; *thou* didst; *he* did;
Plur. *We* did; *ye* did; *they* did.

Preterit, &c. *I* have done, &c. *I* had done, &c.
Future. *I* shall *or* will do, &c.

Imperative.

Sing. Do *thou;* let *him* do;
Plur. Let *us* do; do *ye;* let *them* do.

Conjunctive. *Present.*

Sing *I* do; *thou* do; *he* do;
Plur. *We* do; *ye* do; *they* do.

The rest are as in the Indicative.

Infinitive. To do; to have done.
Participle present. Doing. *Participle preterit.* Done.

Do is sometimes used superfluously, as *I* do *love,* *I* did *love;* simply for *I love,* or *I loved;* but this is considered as a vitious mode of speech.

It is sometimes used emphatically; as,

I do *love thee, and when I love thee not,*
Chaos is come again. Shakspeare.

It is frequently joined with a negative; as *I like her, but I* do *not love her; I wished him success, but* did *not help him.* This, by custom at least, appears more easy than the other form of expressing the same sense by a negative adverb after the verb, *I like her, but* love *her* not.

The imperative prohibitory is seldom applied in the second person, at least in prose, without the word *do;* as *Stop him, but* do *not hurt him; Praise beauty, but* do *not dote on it.*

Its chief use is in interrogative forms of speech, in which it is used through all the persons; as Do *I live?* Dost *thou strike me?* Do *they rebel?* Did *I complain?* Didst *thou love her?* Did *she die?* So likewise in negative interrogations; Do *I not yet grieve?* Did *she not die?*

Do and *did* are thus used only for the present and simple preterit.

There is another manner of conjugating neuter verbs, which, when it is used, may not improperly denominate them *neuter passives*, as they are inflected according to the passive form by the help of the verb substantive *to be.* They answer nearly to the reciprocal verbs in French; as

I am risen, surrexi, *Latin ;* Je me suis levé, *French.*
I was walked out, exieram; Je m'étois promené.

In like manner we commonly express the present tense; as I am going, *eo.* I am grieving, *doleo.* She is dying, *illa moritur.* The tempest is raging, *furit procella.* I am pursuing an enemy, *hostem insequor.* So the other tenses, as, *We were walking,* ἐτυγχανομεν περιπατουντες, *I have been walking, I had been walking, I shall* or *will be walking.*

There is another manner of using the active participle, which gives it a passive signification: as, The grammar is now printing, *grammatica jam nunc chartis imprimitur.* The brass is forging, *æra excuduntur.* This is, in my opinion, a vitious expression, probably corrupted from a phrase more pure, but now somewhat obsolete: *The book is* a *printing, The brass is* a *forging; a* being properly *at*, and *printing* and *forging* verbal nouns signifying action, according to the analogy of this language.

The indicative and conjunctive moods are by modern writers frequently confounded, or rather the conjunctive is wholly neglected, when some convenience of versification does not invite its revival. It is used among the purer writers of former times, after *if, though, ere, before, till,* or *until, whither, except, unless, whatsoever, whomsoever,* and words of wishing; as, *Doubtless thou art our father,* though *Abraham* be *ignorant of us, and Israel* acknowledge *us not.*

Of Irregular Verbs.

The English verbs were divided by Ben Jonson into four conjugations, without any reason arising from the nature of the language, which has properly but one conjugation, such as has been exemplified; from which all deviations are to be considered as anomalies, which are indeed in our monosyllable Saxon verbs, and the verbs derived from them, very frequent; but almost all the verbs which have been adopted from other languages follow the regular form.

Our verbs are observed by Dr. Wallis to be irregular only in the formation of the preterit, and its participle. Indeed, in the scantiness of our conjugations, there is scarcely any other place for irregularity.

The first irregularity is a slight deviation from the regular form, by rapid utterance or poetical contraction: the last syllable *ed* is often joined with the former by the suppression of *e;* as *lov'd* for *loved;* after *c, ch, sh, f, k, x,* and after the consonants *s, th,* when more strongly pronounced, and sometimes after *m, n, r,* if preceded by a short vowel, *t* is used in pronunciation, but very seldom in writing, rather than *d;* as *plac't snatch't, fish't, wak't, dwel't, smel't;* for *plac'd, snatch'd, fish'd, wak'd, dwel'd, smel'd;* or *placed, snatched, fished, waked, dwelled, smelled.*

Those words which terminate in *l* or *ll*, or *ft*, make their preterit in *t*, even in solemn language, as *crept, felt, dwelt;* sometimes after *x, ed* is changed into *t*, as *vext:* this is not constant.

A long vowel is often changed into a short one; thus *kept, slept, wept, crept, swept;* from the verbs to *keep*, to *sleep*, to *weep*, to *creep*, to *sweep.*

Where *d* or *t* go before, the additional letter *d* or *t*, in this contracted form, coalesce into one letter with the radical *d* or *t*: if *t* were the radical, they coalesce into *t;* but if *d* were the radical, then into *d* or *t*, as the one or the other letter may be more easily pronounced; as *read, lead, spread, shed, shred, bid, hid, chid, fed, bled, bred, sped, strid, slid, rid;* from the verbs to *read*, to *lead*, to *spread*, to *shed*, to *shread*, to *bid*, to *hide*, to *chide*, to *feed*, to *bleed*, to *breed*, to *speed*, to *stride*, to *slide*, to *ride.* And thus, *cast, hurt, cost, burst, eat, beat, sweat, sit, quit, smit, writ, bit, hit, met, shot;* from the verbs to *cast*, to *hurt*, to *cost*, to *burst*, to *eat*, to *beat*, to *sweat*, to *sit*, to *quit*, to *smite*, to *write*, to *bite*, to *hit*, to *meet*, to *shoot.* And in like manner, *lent, sent, rent, girt;* from the verbs to *lend*, to *send*, to *rend*, to *gird.*

The participle preterit or passive is often formed in *en*, instead of *ed;* as *been, taken, given, slain, known;* from the verbs to *be*, to *take*, to *give*, to *slay*, to *know.*

Many words have two or more participles, as not only *written, bitten, eaten, beaten, hidden, chidden, shotten, chosen, broken;* but likewise *writ, bit, eat, beat, hid, chid, shot, chose, broke*, are promiscuously used in the participle, from the verbs to *write*, to *bite*, to *eat*, to *beat*, to *hide*, to *chide*, to *shoot*, to *choose*, to *break*, and many such like.

In the same manner *sown, shewn, hewn, mown, loaden, laden*, as well as *sow'd, shew'd, hew'd, mow'd, loaded, laded*, from the verbs to *sow*, to *shew*, to *hew*, to *mow*, to *load*, or *lade.*

Concerning these double participles it is difficult to give any rule; but he shall seldom err who remembers, that when a verb has a participle distinct from its preterit, as *write, wrote, written*, that distinct participle is more proper and elegant, as *The book is* written, is better than *the book is* wrote. *Wrote*, however, may be used in poetry; at least if we allow any authority to poets, who, in the exultation of genius, think themselves perhaps entitled to trample on grammarians.

There are other anomalies in the preterit.

1. *Win, spin, begin, swim, strike, stick, sing, sting, fling, ring, wring, spring, swing, drink, sink, shrink, stink, come, run, find, bind, grind, wind*, both in the preterit imperfect and participle passive, give *won, spun, begun, swum, struck, stuck, sung, stung, flung, rung, wrung, sprung, swung, drunk, sunk, shrunk, stunk, come, run, found, bound, ground, wound.* And most of them are also formed in the preterit by *a*, as *began, rang, sang, sprang, drank, came, ran*, and some others; but most of these are now obsolete. Some in the participle passive likewise take *en*, as *stricken, strucken, drunken, bounden.*

2. *Fight, teach, reach, seek, beseech, catch, buy, bring, think, work*, make *fought, taught, wrought, sought, besought, caught, bought, brought, thought, wrought.*

But a great many of these retain likewise the regular form, as *teached, reached, beseeched, catched, worked.*

3. *Take, shake, forsake, wake, awake, stand, break, speak, bear, shear, swear, tear, wear, weave, cleave, strive, thrive, drive, shine, rise, arise, smite, write, bide, abide, ride, choose, chuse, tread, get, beget, forget, seethe*, make in both preterit and participle *took, shook, forsook, woke, awoke, stood, broke, spoke, bore, shore, swore, tore, wore, wove, clove, strove, throve, drove, shone, rose, arose, smote, wrote, bode, abode, rode, chose, trode, got, begot, forgot, sod.* But we say likewise, *thrive, rise, smit, writ, abid, rid.* In the preterit some are likewise formed by *a*, as *brake, spake, bare, share, sware, tare, ware, clave, gat, begat, forgat*, and perhaps some others, but more rarely. In the participle passive many of them are formed by *en*, as *taken, shaken, forsaken, broken, spoken, born, shorn, sworn, torn, worn, woven, cloven, thriven, driven, risen, smitten, ridden, chosen, trodden, gotten, begotten, forgotten, sodden.* And many do likewise retain the analogy in both, as *waked, awaked, sheared, weaved, leaved, abided, seethed.*

4. *Give, bid, sit*, make in the preterit *gave, bade, sate;* in the participle passive *given, bidden, sitten;* but in both *bid.*

5. *Draw, know, grow, throw, blow, crow,* like a cock, *fly, slay, see, lie,* make their preterit *drew, knew, grew, threw, blew, crew, flew, slew, saw, lay;* their participles passive by *n, drawn, known, grown, thrown, blown, flown, slain, seen, lien, lain.* Yet from *flee* is made *fled;* from *go, went,* from the old *wend,* the participle is *gone.*

Of Derivation.

That the English language may be more easily understood, it is necessary to inquire how its derivative words are deduced from their primitives, and how the primitives are borrowed from other languages. In this inquiry I shall sometimes copy Dr. Wallis, and sometimes endeavour to supply his defects, and rectify his errours.

Nouns are derived from verbs.

The thing implied in the verb, as done or produced, is commonly either the present of the verb; as to love, *love;* to fright, a *fright;* to fight, a *fight;* or the preterit of the verb, as to strike, I strick *or* strook, a *stroke.*

The action is the same with the participle present, as *loving, frighting, fighting, striking.*

The agent, or person acting, is denoted by the syllable *er* added to the verb, as *lover, frighter, striker.*

Substantives, adjectives, and sometimes other parts of speech, are changed into verbs: in which case the vowel is often lengthened, or the consonant softened; as a house, *to house;* brass, *to braze;* glass, *to glaze;* grass, *to graze;* price, *to prize;* breath, *to breathe;* a fish, *to fish;* oil, *to oil;* further, *to further;* forward, *to forward;* hinder, *to hinder.*

Sometimes the termination *en* is added, especially to adjectives; as haste, *to hasten;* length, *to lengthen;* strength, *to strengthen;* short, *to shorten;* fast, *to fasten;* white, *to whiten;* black, *to blacken;* hard, *to harden;* soft, *to soften.*

From substantives are formed adjectives of plenty, by adding the termination *y;* as a louse, *lousy;* wealth, *wealthy;* health, *healthy;* might, *mighty;* worth, *worthy;* wit, *witty;* lust, *lusty;* water, *watery;* earth, *earthy;* wood, a wood, *woody;* air, *airy;* a heart, *hearty;* a hand, *handy.*

From substantives are formed adjectives of plenty, by adding the termination *ful,* denoting abundance; as joy, *joyful;* fruit, *fruitful;* youth, *youthful;* care, *careful;* use, *useful;* delight, *delightful;* plenty, *plentiful;* help, *helpful.*

Sometimes, in almost the same sense, but with some kind of diminution thereof, the termination *some* is added, denoting *something,* or *in some degree;* as delight, *delightsome;* game, *gamesome;* irk, *irksome;* burden, *burdensome;* trouble, *troublesome;* light, *lightsome;* hand, *handsome;* alone, *lonesome;* toil, *toilsome.*

On the contrary, the termination *less* added to substantives, makes adjectives signifying want; as *worthless, witless, heartless, joyless, careless, helpless.* Thus comfort, *comfortless;* sap, *sapless.*

Privation or contrariety is very often denoted by the particle *un* prefixed to many adjectives, or *in* before words derived from the Latin; as pleasant, *unpleasant;* wise, *unwise;* profitable, *unprofitable;* patient, *impatient.* Thus *unworthy, unhealthy, unfruitful, unuseful,* and many more.

The original English primitive is *un;* but as we often borrow from the Latin, or its descendants, words already signifying privation, as *inefficacious, impious, indiscreet,* the inseparable particles *un* and *in* have fallen into confusion, from which it is not easy to disentangle them.

Un is prefixed to all words originally English; as *untrue, untruth, untaught, unhandsome.*

Un is prefixed to all participles made privative adjectives, as *unfeeling, unassisting, unaided, undelighted, unendeared.*

Un ought never to be prefixed to a participle present, to mark a forbearance of action, as *unsighing;* but a privation of habit, as *unpitying.*

Un is prefixed to most substantives which have an English termination, as *unfruitfulness, unperfectness,* which, if they have borrowed terminations, take *in* or *im,* as *infertility, imperfection, uncivil, incivility, unactive, inactivity.*

In borrowing adjectives, if we receive them already compounded, it is usual to retain the particle prefixed, as *indecent, inelegant, improper:* but if we borrow the adjective, and add the privative particle, we commonly prefix *un,* as *unpolite, ungallant.*

The prepositive particles *dis* and *mis,* derived from the *des* and *mes* of the French, signify almost the same as *un;* yet *dis* rather imports contrariety than privation, since it answers to the Latin preposition *de.* *Mis* insinuates some errour, and for the most part may be rendered by the Latin words *male,* or *perperam.* To like; *to dislike;* honour, *dishonour;* to honour, to grace, *to dishonour, to disgrace;* to deign, *to disdeign;* chance, hap, *mischance, mishap;* to take, *to mistake;* deed, *misdeed;* to use, *to misuse;* to employ, *to misemploy;* to apply, *to misapply.*

Words derived from Latin written with *de* or *dis* retain the same signification; as *distinguish,* distinguo; *detract,* detraho; *defame,* defamo; *detain,* detineo.

The termination *ly* added to substantives, and sometimes to adjectives, forms adjectives that import some kind of similitude or agreement, being formed by contraction of *lick* or *like.*

A giant, *giantly, giantlike;* earth, *earthly;* heaven, *heavenly;* world, *worldly;* God, *godly;* good, *goodly.*

The same termination *ly* added to adjectives forms adverbs of like signification; as beautiful, *beautifully;* sweet, *sweetly;* that is *in a beautiful manner; with some degree of sweetness.*

The termination *ish* added to adjectives, imports diminution: and added to substantives, imports similitude or tendency to a character; as green, *greenish;* white, *whitish;* soft, *softish;* a thief, *thievish;* a wolf, *wolvish;* a child, *childish.*

We have forms of diminutives in substantives, though not frequent; as a hill, *a hillock;* a cock, *a cockrel;* a pike, a *pickrel;* this is a French termination: a goose, *a gosling;* this is a German termination: a lamb, *a lambkin;* a chick, *a chicken;* a man, *a manikin;* a pipe, *a pipkin;* and thus *Halkin,* whence the patronimick, *Hawkins, Wilkin, Thomkin,* and others.

Yet still there is another form of diminution among the English by lessening the sound itself, especially of vowels; as there is a form of augmenting them by enlarging, or even lengthening it; and that sometimes not so much by change of the letters, as of their pronunciation; as *sup, sip, soop, sop, sippet,* where, beside the extenuation of the vowel, there is added the French termination *et; top, tip; spit, spout; babe, baby; booby, βυπαις; great* pronounced long, especially if with a stronger sound, *grea-t;* little pronounced long, *lee-tle; ting, tang, tong,* imports a succession of smaller and then greater sounds; and so in *jingle, jangle, tingle, tangle,* and many other made words.

Much however of this is arbitrary and fanciful, depending wholly on oral utterance, and therefore scarcely worthy the notice of Wallis.

Of concrete adjectives are made abstract substantives, by adding the termination *ness,* and a few in *hood* or *head,* noting character or qualities; as white, *whiteness;* hard, *hardness;* great, *greatness;* skilful, *skilfulness; unskilfulness; godhead; manhood, maidenhead, widowhood, knighthood, priesthood, likelihood, falsehood.*

There are other abstracts, partly derived from adjectives, and partly from verbs, which are formed by the addition of the termination *th,* a small change being sometimes made, as long, *length;* strong, *strength;* broad, *breadth;* wide, *width;* deep, *depth;* true, *truth;* warm, *warmth;* dear, *dearth;* slow, *sloth;* merry, *mirth;* heal, *health;* well, weal, *wealth;* dry, *droughth;* young, *youth;* and so moon, *month.*

Like these are some words derived from verbs; die, *death;* till, *tilth;* grow, *growth;* mow, later *mowth;* after *mow'th;* commonly spoken and written later *math,* after *math;* steal, *stealth;* bear, *birth;* rue, *ruth;* and probably *earth* from to *ear* or *plow;* fly, *flight;* weigh, *weight;* fray, *fright;* to draw, *draught.*

These should rather be written *flighth, frighth,* only that custom will not suffer *h* to be twice repeated.

The same form retain *faith, spight, wreathe, wrath, broth, froth, breath, sooth, worth, light, wight,* and the like, whose primitives are either entirely obsolete or seldom occur. Perhaps they are derived from *fey* or *foy, spry, wry, wreak, brew, mow, fry, bray, say, work.*

Some ending in *ship,* imply an office, employment, or condition; as *kingship, wardship, guardianship, partnership, stewardship, headship, lordship.*

Thus *worship,* that is, *worthship;* whence *worshipful,* and to *worship.*

Some few ending in *dom, rick, wick,* do especially denote dominion, at least state or condition; and *kingdom, dukedom, earl-*

dom, princedom, popedom, christendom, freedom, wisdom, whoredom, bishoprick, bailiwick.

Ment and *age* are plainly French terminations, and are of the same import with us as among them, scarcely ever occurring, except in words derived from the French, as *commandment, usage.*

There are in English often long trains of words allied by their meaning and derivation; as *to beat, a bat, batoon, a battle, a beetle, a battledoor, to batter, batter,* a kind of a glutinous composition for food, made by *beating* different bodies into one mass. All these are of similar signification, and perhaps derived from the Latin *batuo.* Thus *take, touch, tickle, tack, tackle,* all imply a local conjunction, from the Latin *tango, tetigi, tactum.*

From *two* are formed *twain, twice, twenty, twelve, twins, twine, twist, twirl, twig, twitch, twinge, between, betwixt, twilight, twibil.*

The following remarks, extracted from Wallis, are ingenious, but of more subtlety than solidity, and such as perhaps might in every language be enlarged without end.

Sn usually imply the *nose,* and what relates to it. From the Latin *nasus* are derived the French *nez* and the English *nose;* and *nesse,* a promontory, as projecting like a nose. But as if from the consonants *ns* taken from *nasus,* and transposed, that they may the better correspond, *sn* denote *nasus;* and thence are derived many words that relate to the nose, as *snout, sneeze, snore, snort, sneer, snicker, snot, snevil, snite, snuff, snuffle, snaffle, snarle, snudge.*

There is another *sn,* which may perhaps be derived from the Latin *sinuo,* as *snake, sneak, snail, snare;* so likewise *snap,* and *snatch, snib, snub.*

Bl imply a *blast;* as *blow, blast, to blast, to blight,* and, metaphorically, *to blast* one's reputation; *bleat, bleak,* a *bleak* place, to look *bleak,* or weatherbeaten, *bleak, blay, bleach, bluster, blurt, blister, blab, bladder, bleb, blister, blabber-lip't, blubber-cheek't, bloted, blote-herrings, blast, blaze, to blow,* that is *blossom, bloom;* and perhaps *blood* and *blush.*

In the native words of our tongue is to be found a great agreement between the letters and the things signified; and therefore the sounds of letters smaller, sharper, louder, closer, softer, stronger, clearer, more obscure, and more stridulous, do very often intimate the like effects in the things signified.

Thus words that begin with *str* intimate the force and effect of the thing signified, as if probably derived from σρουνυμι, or *strenuus,* as *strong, strength, strew, strike, streak, stroke, stripe, strive, strife, struggle, strout, strut, stretch, strait, strict, streight,* that is narrow, *distrain, stress, distress, string, strap, stream, streamer, strand, strip, stray, struggle, strange, stride, straddle.*

St in like manner imply strength, but in a less degree, so much only as is sufficient to preserve what has been already communicated, rather than acquire any new degree; as if it were derived from the Latin *sto:* for example, *stand, stay,* that is, to remain, or to prop; *staff, stay,* that is, to oppose; *stop, to stuff, stifle, to stay,* that is, to stop; *a stay,* that is, an obstacle; *stick, stut, stutter, stammer, stagger, stickle, stick, stake,* a sharp pale, and any thing deposited at play, *stock, stem, sting, to sting, stink, stitch, stud, stanchion, stub, stubble, to stub* up, *stump,* whence *stumble, stalk, to stalk, step, to stamp* with the feet, whence *to stamp,* that is, to make an impression and a stamp; *stow, to stow, to bestow, steward* or *stoward, stead, steady, steadfast, stable, a stable, a stall, to stall, stool, stall, still, stall, stallage, stall, stage, still* adj. and *still* adv. *stale, stout, sturdy, steed, stoat, stallion, stiff, stark-dead, to starve* with hunger or cold; *stone, steel, stern, stanch, to stanch* blood, *to stare, steep, steeple, stair, standard,* a stated measure, *stately.* In all these, and perhaps some others, *st* denote something firm and fixed.

Thr imply a more violent degree of motion, as *throw, thrust, throng, throb, through, threat, threaten, thrall, throws.*

Wr imply some sort of obliquity or distortion, as *wry, to wreath, wrest, wrestle, wring, wrong, wrinch, wrench, wrangle, wrinkle, wrath, wreak, wrack, wrench, wrist, wrap.*

Sw imply a silent agitation, or a softer kind of lateral motion; as *sway, swag, to sway, swagger, swerve, sweat, sweep, swill, swim, swing, swift, sweet, switch, swinge.*

Nor is there much difference of *sm* in *smooth, smug, smile, smirk, smite,* which signifies the same as to *strike,* but is a softer word; *small, smell, smack, smother, smart,* a *smart* blow properly signifies such a kind of stroke as with an originally silent motion, implied in *sm,* proceeds to a quick violence, denoted by *ar* suddenly ended, as is shewn by *t.*

Cl denote a kind of adhesion or tenacity, as in *cleave, clay, cling, climb, clamber, clammy, clasp, to clasp, to clip, to clinch, cloak, clog, close, to close, a clod, a clot,* as a *clot* of blood, *clouted* cream, *a clutter, a cluster.*

Sp imply a kind of dissipation or expansion, especially a quick one, particularly if there be an *r,* as if it were from *spargo,* or *separo:* for example, *spread, spring, sprig, sprout, sprinkle, split, splinter, spill, spit, sputter, spatter.*

Sl denote a kind of silent fall, or a less observable motion; as in *slime, slide, slip, slipper, sly, sleight, slit, slow, slack, slight, sling, slap.*

And so likewise *ash,* in *crash, rash, gash, flash, clash, lash, slash, plash, trash,* indicate something acting more nimbly and sharply. But *ush,* in *crush, rush, gush, flush, blush, brush, hush, push,* implies something as acting more obtusely and dully. Yet in both there is indicated a swift and sudden motion, not instantaneous, but gradual, by the continued sound, *sh.*

Thus in *fling, sling, ding, swing, cling, sing, wring, sting,* the tingling of the termination *ng,* and the sharpness of the vowel *i,* imply the continuation of a very slender motion or tremor, at length indeed vanishing, but not suddenly interrupted.

But in *tink, wink, sink, clink, chink, think,* that end in a mute consonant, there is also indicated a sudden ending.

If there be an *l,* as in *jingle, tinkle, tingle, mingle, sprinkle, twinkle,* there is implied a frequency, or iteration of small acts. And the same frequency of acts, but less subtile by reason of the clearer vowel *a,* is indicated in *jangle, tangle, spangle, mangle, wrangle, brangle, dangle;* as also in *mumble, grumble, jumble, tumble, stumble, rumble, crumble, fumble.* But at the same time the close *u* implies something obscure or obtunded; and a congeries of consonants *mbl* denotes a confused kind of rolling or tumbling, as in *ramble, scamble, scramble, wamble, amble;* but in these there is something acute.

In *nimble,* the acuteness of the vowel denotes celerity. In *sparkle, sp* denote dissipation, *ar* an acute crackling, *k* a sudden interruption, *l* a frequent iteration; and in like manner in *sprinkle,* unless *in* may imply the subtility of the dissipated guttules. *Thick* and *thin* differ, in that the former ends with an obtuse consonant, and the latter with an acute.

In like manner in *squeek, squeak, squeal, squall, braul, wraul, yaul, spaul, screek, shriek, shrill, sharp, shrivel, wrinkle, crack, crash, clash, gnash, plash, crush, hush, hisse, fisse, whist, soft, jarr, hurl, curl, whirl, buz, bustle, spindle, dwindle, twine, twist,* and in many more, we may observe the agreement of such sort of sounds with the thing signified: and this so frequently happens, that scarce any language which I know can be compared with ours. So that one monosyllable word, of which kind are almost all ours, emphatically expresses what in other languages can scarce be explained but by compounds, or decompounds, or sometimes a tedious circumlocution.

We have many words borrowed from the Latin; but the greatest part of them were communicated by the intervention of the French; as *grace, face, elegant, elegance, resemble.*

Some verbs which seemed borrowed from the Latin, are formed from the present tense, and some from the supines.

From the present are formed *spend, expend,* expendo; *conduce,* conduco; *despise,* despicio; *approve,* approbo; *conceive,* concipio.

From the supines, *supplicate,* supplico; *demonstrate,* demonstro; *dispose,* dispono; *expatiate,* expatior; *suppress,* supprimo; *exempt,* eximo.

Nothing is more apparent than that Wallis goes too far in quest of originals. Many of these which seem selected as immediate descendants from the Latin, are apparently French; as *conceive, approve, expose, exempt.*

Some words purely French, not derived from the Latin, we have transferred into our language: as *garden, garter, buckler, to advance, to cry, to plead,* from the French, *jardin, jartier, bouclier, avancer, crier, plaider;* though indeed, even of these, part is of Latin original.

As to many words which we have in common with the Germans, it is doubtful whether the old Teutons borrowed them from the Latins, or the Latins from the Teutons, or both had them from some common original; as *wine,* vinum; *wind,* ventus; *went,* veni; *way,* via; *wall,* vallum; *wallow,* volvo; *wool,* vellus; *will,* volo; *worm,* vermis; *worth,* virtus; *wasp,* vespa; *day,* dies; *draw,* traho; *tame,* domo; δομαω; *yoke,* jugum, ζευγος; *over, upper,* super, υπερ; *am,* sum, ειμι; *break,* frango; *fly,* volo; *blow,* flo. I make no doubt but the Teutonick is more ancient than the Latin; and it is no less certain, that the Latin, which borrowed a great number of words not only from the Greek, especially the Æolick, but from other neighbouring languages, as the Oscan and others, which have long become obsolete, received not a few from the Teutonick. It is certain, that the English, German, and other Teutonick languages, retained some derived from the Greek, which the Latin has not; as *ax, achs, mit, ford, pfurd, daughter, tochter, mickle, mingle, moon, sear, grave, graff, to grave, to scrape, whole,* from αξινη, μιτα, πορθμος, θυγατηρ, μεγαλος, μιγνυω, μηνη, ξηρος, γραφω, ολος. Since they received these immediately from the Greeks, without the intervention of the Latin language, why may not other words be derived immediately from the same fountain, though they be likewise found among the Latins?

Our ancestors were studious to form borrowed words, however long, into monosyllables, and not only cut off the formative terminations, but cropped the first syllable, especially in words beginning with a vowel; and rejected not only vowels in the middle, but likewise consonants of a weaker sound, retaining the stronger, which seem the bones of words, or changing them for others of the same organ, in order that the sound might become the softer; but especially transposing their order, that they might the more readily be pronounced without the intermediate vowels. For example in expendo, *spend;* exemplum, *sample;* excipio, *scape;* extraneus, *strange;* extractum, *stretch'd;* excrucio, *to screw;* exscorio, *to scour;* excorio, *to scourge;* excortico, *to scratch;* and others beginning with *ex:* as also, emendo, *to mend;* episcopus, *bishop;* in Danish, *biskop;* epistola, *epistle;* hospitale, *spittle;* Hispania, *Spain;* historia, *story.*

Many of these etymologies are doubtful, and some evidently mistaken.

The following are somewhat harder, *Alexander, Sander; Elisabetha, Betty:* apis, *bee;* aper, *bar: p* passing into *b*, as in *bishop;* and by cutting off *a* from the beginning, which is restored in the middle: but for the old *bar* or *bare*, we now say *boar*, as for *lang, long;* for *bain, bane;* for *stane, stone;* aprugna, *brawn, p* being changed into *b*, and *a* transposed, as in *aper*, and *g* changed into *w* as in pignus, *pawn*, lege, *law*, αλωπηξ, *fox;* cutting off the beginning, and changing *p* into *f*, as in pellis, *a fell;* pullus, *a foal;* pater, *father;* pavor, *fear;* polio, *file;* pleo, impleo, *fill, full;* piscis, *fish;* and transposing *o* into the middle, which was taken from the beginning; apex, *a piece;* peak, *pike;* zophorus, *freeze;* mustum, *stum;* defensio, *fence;* dispensator, *spencer;* asculto, escouter, Fr. *scout;* excalpo, *scrape;* restoring *l* instead of *r*, and hence *scrap, scrabble, scrawl;* exculpo, *scoop;* exterritus, *start;* extonitus, attonitus, *stoun'd;* stomachus, *maw;* offendo, *fined;* obstipo, *stop;* audere, *dare;* cavere, *ware;* whence *a-ware, be-ware, wary, warn, warning*, for the Latin *v* consonant formerly sounded like our *w*, and the modern sound of the *v* consonant was formerly that of the letter *f*, that is, the Æolick digamma, which had the sound of *φ*, and the modern sound of the letter *f* was that of the Greek *φ* or *ph;* ulcus, ulcere, *ulcer, sore*, and hence *sorry, sorrow, sorrowful;* ingenium, *engine, gin;* scalenus, *leaning*, unless you would rather derive it from κλινω, whence inclino; infundibulum, *funnel;* gagates, *jett;* projectum, *to jett forth, a jetty;* cucullus, *a cowl.*

There are syncopes somewhat harder; from tempore, *time;* from nomine, *name;* domina, *dame;* as the French *homme, femme, nom*, from homine, fœmina, nomine. Thus pagina, *page;* ποτηριον, *pot;* κυπελλα, cup; cantharus, *can;* tentorium, *tent;* precor, *pray;* præda, *prey;* specio, speculor, *spy;* plico, *ply;* implico, *imply;* replico, *reply;* complico, *comply;* sedes episcopalis, *see.*

A vowel is also cut off in the middle, that the number of the syllables may be lessened; as amita, *aunt;* spiritus, *spright;* debitum, *debt;* dubito, *doubt;* comes, comitis, *count;* clericus, *clerk;* quietus, *quit, quite;* acquieto, *to acquit;* separo, *to spare;* stabilis, *stable;* stabulum, *stable;* palatium, *palace, place;* rabula, *rail; rawl, wrawl, brawl, rable, brable;* quæsitio, *quest.*

As also a consonant, or at least one of a softer sound, or even a whole syllable; rotundus, *round;* fragilis, *frail;* securus, *sure;* regula, *rule;* tegula, *tile;* subtilis, *subtle;* nomen, *noun;* decanus, *dean;* computo, *count;* subitaneus, *suddain, soon;* superare, *to soar;* periculum, *peril;* mirabile, *marvel;* as magnus, *main;* dignor, *deign;* tingo, *stain;* tinctum, *taint;* pingo, *paint;* prædari, *reach.*

The contractions may seem harder, where many of them meet, as κυριακος, *kyrk, church;* presbyter, *priest;* sacristanus, *sexton;* frango, fregi, *break, breach;* fagus, φηγος, *beech; f* changed into *b*, and *g* into *ch*, which are letters near a-kin; frigesco, *freeze;* frigesco, *fresh;* sc into *sh*, as above in *bishop, fish*, so in scapha, *skiff, skip*, and refrigesco, *refresh;* but viresco, *fresh;* phlebotomus, *fleam;* bovina, *beef;* vitulina, *veal;* scutifer, *squire;* pœnitentia, *penance;* sanctuarium, *sanctuary, sentry;* quæsitio, *chase;* perquisitio, *purchase;* anguilla, *eel;* insula, *isle, ile, island, iland;* insuletta, *islet, ilet; eyght;* and more contractedly *ey*, whence *Ousney, Rutley, Ely;* examinare, *to scan*, namely, by rejecting from the beginning and end *e* and *o*, according to the usual manner, the remainder *zamin*, which the Saxons, who did not use *x*, writ *csamen* or *scamen*, is contracted into *scan;* as from dominus, *don;* nomine, *noun;* abomino, *ban:* and indeed, *apum examen* they turned into *sciame;* for which we say *swarme*, by inserting *r* to denote the murmuring; thesaurus, *store;* sedile, *stool;* υδλος, *wet;* sudo, *sweat;* gaudium, *gay;* jocus, *joy;* succus, *juice;* catena, *chain;* caliga, calga; chausse, chausse, Fr. *hose;* extinguo, *stanch, squench, quench, stint:* foras, *forth;* species, *spice;* recito, *read;* adjuvo, *aid;* αιων, ævum, *ay, age, ever;* floccus, *lock;* excerpo, *scrape, scrabble, scrawl;* extravagus, *stray, straggle;* collectum, *clot, clutch;* colligo, *coil;* recolligo, *recoil;* severo, *swear;* stridulus, *shrill;* procurator, *proxy;* pulso, *to push;* calamus, *a quill;* impetere, *to impeach;* augeo, auxi, *wax;* and vanesco, vanui, *wane;* syllabare, *to spell;* puteus, *pit;* granum, *corn;* comprimo, *cramp, crump, crumple, crimple.*

Some may seem harsher, yet may not be rejected, for it at least appears that some of them are derived from proper names, and there are others whose etymology is acknowledged by every body; as Alexander, *Elick, Scander, Sander, Sandy, Sanny;* Elizabetha, *Elizabeth, Elisabeth, Betty, Bess;* Margaretta, *Margaret, Margot, Meg, Peg;* Maria, *Mary, Mal, Pal, Malkin, Mawkin, Mawkes;* Matthæus, *Mattha, Matthew;* Martha, *Matt, Pat;* Gulielmus, *Wilhelmus, Girolamo, Guillaume, William, Will, Bill, Wilkin, Wicken, Wicks, Weeks.*

Thus cariophyllus, flos; gerofilo, Ital, giriflée, gilofer, Fr. *gilliflower*, which the vulgar call *julyflower*, as if derived from the month *July;* petroselinum, *parsley;* portulaca, *purslain;* cydonium, *quince;* cydoniatum, *quiddeny;* persicum, *peach;* eruca, *eruke;* which they corrupt to *ear-wig*, as if it took its name from the ear; annulus geminus, *a gimmal*, or *gimbal ring;* and thus the word *gimbal* and *jumbal* is transferred to other things thus interwoven; quelques choses, *kickshaws.* Since the origin of these, and many others, however forced, is evident, it ought to appear no wonder to any one if the ancients have thus disfigured many, especially as they so much affected monosyllables; and, to make them sound the softer, took this liberty of maiming, taking away, changing, transposing, and softening them.

But while we derive these from the Latin, I do not mean to say, that many of them did not immediately come to us from the Saxon, Danish, Dutch, and Teutonick languages, and other dialects, and some taken more lately from the French, Italians, or Spaniards.

The same word according to its different significations, often has a different origin; as *to bear a burden*, from *fero;* but to *bear*, whence *birth, born, bairn*, comes from *pario*, and a *bear*, at least if it be of Latin original, from *fera.* Thus *perch*, a fish, from *perca;* but *perch*, a measure, from *pertica*, and likewise *to perch. To spell* is from *syllaba;* but *spell*, an enchantment, by which it is believed that the boundaries are so fixed in lands, that none can pass them against the master's will, from *expello;* and *spell*, a messenger, from *epistola;* whence *gospel, goodspel*, or *god-spell.* Thus *freese*, or *freeze*, from *frigesco;* but *freeze*, an architectonic word, from *zophorus;* but *freese*, for cloth, from *Frisia*, or perhaps from *frigesco*, as being more fit than any other for keeping out the cold.

There are many words among us, even monosyllables, compounded of two or more words, at least serving instead of compounds, and comprising the signification of more words than one; as from *scrip* and *roll*, comes *scroll;* from *proud* and *dance, prance;* from *st* of the verb *stay*, or *stand* and *out*, is made *stout;* from *stout* and *hardy, sturdy;* from *sp* of *spit* or *spew*, and *out*, comes *spout;* from the same *sp*, with the termination *in*, is *spin;* and adding *out, spin out;* and from the same *sp*, with *it*, is *spit*, which only differs from *spout* in that it is smaller, and with less noise and force; but *sputter* is because of the obscure *u*, something between *spit* and *spout;* and by reason of adding *r*, it intimates a frequent iteration and noise, but obscurely confused: whereas *spatter*, on account of the sharper and clearer vowel *a*, intimates a more distinct noise, in which it chiefly differs from *sputter.* From the same *sp*, and the termination *ark*, comes *spark*, signifying a single emission of fire with a noise; namely, *sp* the emission, *ar* the more acute noise, and *k* the mute consonant, intimates its being suddenly terminated, but adding *l*, is made the frequentative *sparkle.* The same *sp*, by adding *r*, that is *spr*, implies a more lively impetus of diffusing or expanding itself; to which adding the termination *ing*, it becomes *spring;* its vigour *spr* imports, its sharpness the termination *ing;* and lastly *in* acute and tremulous, ending in the mute consonant *g* denotes the sudden ending of any motion that is meant in its primary signification, of a single, not a complicated exilition. Hence we call *spring* whatever has an elastick force; as also a fountain of water, and thence the origin of any thing; and to *spring*, to germinate; and *spring*, one of the four seasons. From the same *spr* and *out*, is formed *sprout*, and with the termination *ig*, *sprig;* of which the following, for the most part, is the difference; *sprout*, of a grosser sound, imports a fatter or grosser bud; *sprig*, of a slenderer sound, denotes a smaller shoot. In like manner, from *str* of the verb *strive*, and *out*, come *strout* and *strut.* From the same *str*, and the termination *uggle*, is made *struggle;* and this *gl* imports, but without any great noise, by reason of the obscure sound of the vowel *u.* In like manner from *throw* and *roll* is made *trull;* and almost in the same sense is *trundle*, from *throw* or *thrust*, and *rundle.* Thus *graff* or *grough* is compounded of *grave* and *rough;* and *trudge* from *tread* or *trot* and *drudge.*

In these observations it is easy to discover great sagacity and great extravagance, an ability to do much defeated by the desire of doing more than enough. It may be remarked,

1. That Wallis's derivations are often so made, that by the same licence any language may be deduced from any other.
2. That he makes no distinction between words immediately derived by us from the Latin, and those which being copied from other languages, can therefore afford no example of the genius of the English language, or its laws of derivation.
3. That he derives from the Latin, often with great harshness and violence, words apparently Teutonick; and therefore according to his own declaration, probably older than the tongue to which he refers them.
4. That some of his derivations are apparently erroneous.

SYNTAX.

The established practice of grammarians requires that I should here treat of the Syntax; but our language has so little inflection, or variety of terminations, that its construction neither requires nor admits many rules. Wallis therefore has totally neglected it; and Jonson, whose desire of following the writers upon the learned languages made him think a syntax indispensably necessary, has published such petty observations as were better omitted.

The verb, as in other languages, agrees with the nominative in number and person: as, *Thou fliest from good; He runs to death.*

Our adjectives and pronouns are invariable.

Of two substantives the noun possessive is the genitive: as, *His father's glory; The sun's heat.*

Verbs transitive require an oblique case: as, *He loves me; You fear him.*

All prepositions require an oblique case: as, *He gave this* to *me; He took this* from *me; He says this* of *me; He came* with *me.*

PROSODY.

It is common for those that deliver the grammar of modern languages to omit their Prosody. So that of the Italians is neglected by *Buomattei;* that of the French by *Desmarais;* and that of the English by *Wallis, Cooper*, and even by *Jonson*, though a poet. But as the laws of metre are included in the idea of a grammar, I have thought it proper to insert them.

Prosody comprises *orthoepy*, or the rules of pronunciation: and *orthometry*, or the laws of versification.

PRONUNCIATION is just when every letter has its proper sound, and when every syllable has its proper accent, or which in English versification is the same, its proper quantity.

The sounds of the letters have been already explained; and rules for the accent or quantity are not easily to be given, being subject to innumerable exceptions. Such however as I have read or formed, I shall here propose.

1. Of dissyllables formed by affixing a termination, the former syllable is commonly accented, as *childish*, *kingdom*, *actest*, *acted*, *toilsome*, *lover*, *scoffer*, *fairer*, *foremost*, *zealous*, *fulness*, *godly*, *meekly*, *artist*.

2. Dissyllables formed by prefixing a syllable to the radical word, have commonly the accent on the latter; as *to begét*, *to beséem*, *to bestów*.

3. Of dissyllables, which are at once nouns and verbs, the verb has commonly the accent on the latter, and the noun on the former syllable; as *to descánt*, *a déscant*; *to cemént*, *a cément*; *to contráct*, *a cóntract*.

This rule has many exceptions. Though verbs seldom have their accent on the former, yet nouns often have it on the latter syllable; as, *delight*, *perfúme*.

4. All dissyllables ending in *y*, as *cránny*; in *our*, as *labour*, *fávour*; in *ow*, as *willow*, *wállow*, except *allów*; in *le*, as *báttle*, *bible*; in *ish*, as *bánish*; in *ck*, as *cámbrick*, *cássock*; in *ter*, as *to bátter*; in *age*, as *coúrage*; in *en*, as *fásten*; in *et*, as *quiet*, accent the former syllable.

5. Dissyllable nouns in *er*, as *cánker*, *bútter*, have the accent on the former syllable.

6. Dissyllable verbs terminating in a consonant and *e* final, as *comprise*, *escápe*; or having a diphthong in the last syllable, as *appéase*, *revéal*; or ending in two consonants, as *attend*, have the accent on the latter syllable.

7. Dissyllable nouns having a diphthong in the latter syllable, have commonly their accent on the latter syllable, as *applaúse*; except words in *ain*, *certain*, *moúntain*.

8. Trissyllables formed by adding a termination, or prefixing a syllable, retain the accent of the radical word, as *lóveliness*, *ténderness*, *contémner*, *wágonner*, *phy'sical*, *bespátter*, *cómmenting*, *comménding*, *assúrance*.

9. Trissyllables ending in *ous*, as *grácious*, *árduous*; in *al*, as *cápital*; in *ion*, as *mention*, accent the first.

10. Trissyllables ending in *ce*, *ent*, and *ate*, accent the first syllable, as *coúntenance*, *cóntinence*, *ármament*, *imminent*, *élegant*, *própagate*, except they be derived from words having the accent on the last, as *connívance*, *acquáintance*; or the middle syllable hath a vowel before two consonants, as *promúlgate*.

11. Trissyllables ending in *y*, as *éntity*, *spécify*, *líberty*, *victory*, *súbsidy*, commonly accent the first syllable.

12. Trissyllables in *re* or *le* accent the first syllable, as *légible*, *théatre*; except *discíple*, and some words which have a position, as *exámple*, *epístle*.

13. Trissyllables in *ude* commonly accent the first syllable, as *plénitude*.

14. Trissyllables ending in *ator*, or *atour*, as *creátor*, or having in the middle syllable a diphthong, as *endeávour*; or a vowel before two consonants, as *doméstick*, accent the middle syllable.

15. Trissyllables that have their accent on the last syllable are commonly French, as *acquiésce*, *repartée*, *magazíne*; or words formed by prefixing one or two syllables to an acute syllable, as *immatúre*, *overchárge*.

16. Pollysyllables, or words of more than three syllables, follow the accent of the words from which they are derived, as *árrogating*, *cóntinency*, *incóntinently*, *commendable*, *communicableness*. We should therefore say *dispútable*, *indispútable*, rather than *disputable*, *indisputable*; and *advertísement* rather than *advértisement*.

17. Words in *ion* have the accent upon the antepenult, as *salvátion*, *perturbátion*, *concóction*; words in *atour* or *ator* on the penult, as *dedicátor*.

18. Words ending in *le* commonly have the accent on the first syllable, as *ámicable*, unless the second syllable have a vowel before two consonants, as *combústible*.

19. Words ending in *ous* have the accent on the antepenult, as *uxórious*, *volúptuous*.

20. Words ending in *ty* have their accent on the antepenult, as *pusillanímity*, *activity*.

These rules are not advanced as complete or infallible, but proposed as useful. Almost every rule of every language has its exceptions; and in English, as in other tongues, much must be learned by example and authority. Perhaps more and better rules may be given that have escaped my observation.

VERSIFICATION is the arrangement of a certain number of syllables according to certain laws.

The feet of our verses are either iambick, a *alóft*, *creáte*; or trochaick, as *hóly*, *lófty*.

Our iambick measure comprises verses
Of four syllables,

Most good, most fair,
Or things as rare,
To call you's lost;
For all the cost
Words can bestow,
So poorly show
Upon your praise,
That all the ways
Sense hath, come short. *Drayton.*

With ravish'd ears
The monarch hears. *Dryden.*

Of six,

This while we are abroad,
Shall we not touch our lyre?
Shall we not sing an ode?
Shall not that holy fire,
In us that strongly glow'd,
In this cold air expire?

Though in the utmost Peak
Awhile we do remain,
Amongst the mountains bleak,
Expos'd to sleet and rain,
No sport our hours shall break,
To exercise our vein.

What though bright Phœbus' beams
Refresh the southern ground,
And though the princely Thames
With beauteous nymphs abound,
And by old Camber's streams
Be many wonders found:

Yet many rivers clear
Here glide in silver swathes,
And what of all most dear,
Buxton's delicious baths,
Strong ale and noble chear,
T' assuage breem winter's scathes.

In places far or near,
Or famous or obscure,
Where wholsom is the air,
Or where the most impure,
All times and every where,
The muse is still in ure. *Drayton.*

Of eight; which is the usual measure for short poems,

And may at last my weary age
Find out the peaceful hermitage,
The hairy gown, and mossy cell,
Where I may sit and nightly spell

Of ev'ry star the sky doth shew,
And ev'ry herb that sips the dew. *Milton.*

Of ten, which is the common measure of heroick and tragick poetry,

Full in the midst of this created space,
Betwixt heav'n, earth, and skies, there stands a place
Confining on all three; with triple bound;
Whence all things, though remote, are view'd around,
And thither bring their undulating sound.
The palace of loud Fame, her seat of pow'r,
Plac'd on the summit of a lofty tow'r;
A thousand winding entries long and wide
Receive of fresh reports a flowing tide.
A thousand crannies in the walls are made;
Nor gate nor bars exclude the busy trade.
'Tis built of brass, the better to diffuse
The spreading sounds, and multiply the news;
Where echoes in repeated echoes play:
A mart for ever full; and open night and day.
Nor silence is within, nor voice express,
But a deaf noise of sounds that never cease;
Confus'd, and chiding, like the hollow roar
Of tides receding from th' insulted shore:
Or like the broken thunder, heard from far,
When Jove to distance drives the rolling war.
The courts are fill'd with a tumultuous din
Of crowds, or issuing forth, or ent'ring in:
A thorough-fare of news, where some devise
Things never heard, some mingle truth with lies:
The troubled air with empty sounds they beat,
Intent to hear, and eager to repeat. *Dryden.*

In all these measures the accents are to be placed on even syllables; and every line considered by itself is more harmonious as this rule is more strictly observed. The variations necessary to pleasure belong to the art of poetry, not the rules of grammar.

Our trochaick measures are

Of three syllables,

Here we may
Think and pray
Before death
Stops our breath:
Other joys
Are but toys. *Walton's Angler.*

Of five,

In the days of old,
Stories plainly told,
Lovers felt annoy. *Old Ballad.*

Of seven,

Fairest piece of well-form'd earth,
Urge not thus your haughty birth. *Waller.*

In these measures the accent is to be placed on the odd syllables.

These are the measures which are now in use, and above the rest those of seven, eight, and ten syllables. Our ancient poets wrote verses sometimes of twelve syllables, as Drayton's Polyolbion.

Of all the Cambrian shires their heads that bear so high,
And farth'st survey their soils with an ambitious eye,
Mervinia for her hills, as for her matchless crowds,
The nearest that are said to kiss the wand'ring clouds,
Especial audience craves, offended with the throng,
That she of all the rest neglected was so long;
Alleging for herself, when through the Saxon's pride,
The godlike race of Brute to Severn's setting side
Were cruelly enforced, her mountains did relieve
Those whom devouring war else every where did grieve.
And when all Wales beside (by fortune or by might)
Unto her ancient foe resigned her ancient right,
A constant maiden still she only did remain,
The last her genuine laws which stoutly did retain,
And as each one is praised for her peculiar things,
So only she is rich in mountains, meres, and springs;
And holds herself as great in her superfluous waste,
As others by their towns and fruitful tillage grac'd.

And of fourteen, as Chapman's Homer.

And as the mind of such a man, that hath a long way gone.
And either knoweth not his way, or else would let alone
His purpos'd journey, is distract.

The measures of twelve and fourteen syllables were often mingled by our old poets, sometimes in alternate lines, and sometimes in alternate couplets.

The verse of twelve syllables called an *Alexandrine*, is now only used to diversify heroick lines.

Waller was smooth, but Dryden taught to join
The varying verse, the full resounding line,
The long majestic march, and energy divine. *Pope.*

The pause in the Alexandrine must be at the sixth syllable.

The verse of fourteen syllables is now broken into a soft lyrick measure of verses consisting alternately of eight syllables and six.

She to receive thy radiant name,
Selects a whiter space. *Fenton.*

When all shall praise, and ev'ry lay
Devote a wreath to thee,
That day, for come it will, that day
Shall I lament to see. *Lewis to Pope.*

Beneath this tomb an infant lies
To earth whose body lent,
Hereafter shall more glorious rise,
But not more innocent.
When the archangel's trump shall blow,
And souls to bodies join,
What crowds shall wish their lives below
Had been as short as thine! *Wesley.*

We have another measure very quick and lively, and therefore much used in songs, which may be called the *anapestick*, in which the accent rests upon every third syllable.

May I góvern my pássion with ábsolute swáy,
And grow wíser and bétter as lífe wears awáy. Dr. *Pope.*

In this measure a syllable is often retrenched from the first foot, as

Diógenes súrly and proúd. Dr. *Pope.*

When présent we lóve, and when ábsent agrée,
I thínk not of I'ris nor I'ris of me. *Dryden.*

These measures are varied by many combinations, and sometimes by double endings, either with or without rhyme, as in the heroick measure.

'Tis the divinity that stirs *within us*,
'Tis Heaven itself that points out an *hereafter*,
And intimates eternity to man. *Addison.*

So in that of eight syllables.

They neither added nor confounded,
They neither wanted nor abounded. *Prior.*

In that of seven,

For resistance I could fear none,
But with twenty ships had done,
What thou, brave and happy Vernon,
Hast achieved with six alone. *Glover.*

In that of six,

'Twas when the seas were roaring,
With hollow blasts of wind,
A damsel lay deploring,
All on a rock reclin'd. *Gay.*

In the anapestick.

When terrible tempests assail us,
And mountainous billows affright,
Nor power nor wealth can avail us,
But skilful industry steers right. *Ballad.*

To these measures and their laws, may be reduced every species of English verse.

Our versification admits of few licences, except a *synalæpha*, or elision of *e* in *the* before a vowel, as *th' eternal;* and more rarely of *o* in *to*, as *t'accept;* and a *synæresis*, by which two short vowels coalesce into one syllable, as *question*, *special;* or a word is contracted by the expulsion of a short vowel before a liquid, as *av'rice*, *temp'rance.*

Thus have I collected rules and examples by which the English language may be learned, if the reader be already acquainted with grammatical terms, or taught by a master to those that are more ignorant. To have written a grammar for such as are not yet initiated in the schools, would have been tedious, and perhaps at last ineffectual.

PREFACE

TO

WALKER'S DICTIONARY.

FEW subjects have of late years more employed the pens of every class of critics, than the improvement of the English language. The greatest abilities in the nation have been exerted in cultivating and reforming it; nor have a thousand minor critics been wanting to add their mite of amendment to their native tongue. Johnson, whose large mind and just taste made him capable of enriching and adorning the language with original composition, has condescended to the drudgery of disentangling, explaining, and arranging it, and left a lasting monument of his ability, labour, and patience: and Dr. Lowth, the politest scholar of the age, has veiled his superiority in his short Introduction to English Grammar. The ponderous folio has gravely vindicated the rights of analogy; and the light ephemeral sheet of news has corrected errors in grammar, as well as in politicks, by slyly marking them in italicks.

Nor has the improvement stopped here. While Johnson and Lowth have been insensibly operating on the orthography and construction of our language, its pronunciation has not been neglected. The importance of a consistent and regular pronunciation was too obvious to be overlooked; and the want of this consistency and regularity induced several ingenious men to endeavour at a reformation; who, by exhibiting the anomalies of pronunciation, and pointing out its analogies, have reclaimed some words that were not irrecoverably fixed in a wrong sound, and prevented others from being perverted by ignorance or caprice.

Among those writers who deserve the first praise on this subject, is Mr. Elphinston; who, in his principles of the English language, has reduced the chaos to a system, and, by a deep investigation of the analogies of our tongue, laid the foundation of a just and regular pronunciation.

After him Dr. Kenrick contributed a portion of improvement by his Rhetorical Dictionary; in which the words are divided into syllables as they are pronounced, and figures placed over the vowels to indicate their different sounds. But this gentleman has rendered his dictionary extremely imperfect, by entirely omitting a great number of words of doubtful and difficult pronunciation—those very words for which a dictionary of this kind would naturally be consulted.

To him succeeded Mr. Sheridan; who not only divided the words into syllables, and placed figures over the vowels as Dr. Kenrick had done, but by spelling these syllables as they are pronounced, seemed to complete the idea of a pronouncing dictionary, and to leave but little expectation of future improvement. It must, indeed, be confessed, that Mr. Sheridan's dictionary is greatly superiour to every other that preceded it; and his method of conveying the sound of words, by spelling them as they are pronounced, is highly rational and useful—But here sincerity obliges me to stop. The numerous instances I have given of impropriety, inconsistency, and want of acquaintance with the analogies of the language, sufficiently show how imperfect* I think his dictionary is upon the whole, and what ample room is left for attempting another that might better answer the purpose of a guide to pronunciation.

The last writer on this subject is Mr. Nares; who, in his Elements of Orthöepy, has shown a clearness of method and an extent of observation which deserve the highest encomiums. His preface alone proves him an elegant writer, as well as a philosophical observer of language; and his alphabetical index, referring near five thousand words to the rules for pronouncing them, is a new and useful method of treating the subject; but he seems, on many occasions, to have mistaken the best usage, and to have paid too little attention to the first principles of pronunciation.

Thus I have ventured to give my opinion of my rivals and competitors, and I hope without envy or self-conceit. Perhaps it would have been policy in me to have been silent on this head, for fear of putting the public in mind that others have written on the subject as well as myself: but this is a narrow policy which, under the colour of tenderness to others, is calculated to raise ourselves at their expense. A writer, who is conscious he deserves the attention of the public, (and unless he is thus conscious he ought not to write,) must not only wish to be compared with those who have gone before him, but will promote the comparison by informing his readers what others have done, and on what he founds his pretensions to a preference; and if this be done with fairness and impartiality, it can be no more offensive to modesty, than it is to honesty and plain dealing.

The work I have to offer on the subject has, I hope, added something to the public stock. It not only exhibits the principles of pronunciation on a more extensive plan than others have done, divides the words into syllables, and marks the sounds of the vowels, like Dr. Kenrick, spells the words as they are pronounced like Mr. Sheridan, and directs the inspector to the rule by the word like Mr. Nares; but where words are subject to different pronunciations, it shows the reasons from analogy for each; produces authorities for one side and the other, and points out the pronunciation which is preferable. In short, I have endeavoured to unite the science of Mr. Elphinston, the method of Mr. Nares, and the general utility of Mr. Sheridan; and to add to these advantages, have given critical observa-

tions on such words as are subject to a diversity of pronunciation. How I have succeeded, must be left to the decision of the publick.

But to all works of this kind there lies a formidable objection; which is, that the pronunciation of a language is necessarily indefinite and fugitive, and that all endeavours to delineate or settle it are in vain. Dr. Johnson, in his grammar prefixed to his dictionary, says: "Most of the writers of English grammar have given long tables of words pronounced otherwise than they are written; and seem not sufficiently to have considered, that, of English, as of all living tongues, there is a double pronunciation; one, cursory and colloquial; the other, regular and solemn. The cursory pronunciation is always vague and uncertain, being made different, in different mouths, by negligence, unskilfulness, or affectation. The solemn pronunciation, though by no means immutable and permanent, is yet always less remote from the orthography, and less liable to capricious innovation. They have, however, generally formed their tables according to the cursory speech of those with whom they happened to converse; and concluding, that the whole nation combines to vitiate language in one manner, have often established the jargon of the lowest of the people as the model of speech. For pronunciation, the best general rule is, to consider those as the most elegant speakers who deviate least from the written words."

Without any derogation from the character of Dr. Johnson, it may be asserted, that in these observations we do not perceive that justness and accuracy of thinking for which he is so remarkable. It would be doing great injustice to him to suppose, that he meant to exclude all possibility of conveying the actual pronunciation of many words that depart manifestly from their orthography, or of those that are written alike, and pronounced differently, and inversely. He has marked these differences with great propriety himself in many places of his dictionary; and it is to be regretted that he did not extend these remarks farther. It is impossible, therefore, he could suppose, that, because the almost imperceptible glances of colloquial pronunciation were not to be caught and described by the pen, that the very perceptible difference between the initial accented syllables of *money* and *monitor*, or the final unaccented syllables of *finite* and *infinite*, could not be sufficiently marked upon paper. Cannot we show that *cellar*, a vault; and *seller*, one who sells, have exactly the same sound; or that the monosyllable *full*, and the first syllable of *fulminate*, are sounded differently, because there are some words in which solemnity will authorize a different shade of pronunciation from familiarity? Besides; that colloquial pronunciation which is perfect, is so much the language of solemn speaking, that, perhaps, there is no more difference than between the same picture painted to be viewed near and at a distance. The symmetry in both is exactly the same; and the distinction lies only in the colouring. The English language, in this respect, seems to have a great superiority over the French; which pronounces many letters in the poetick and solemn style that are wholly silent in the prosaick and familiar. But if a solemn and familiar pronunciation really exists in our language, is it not the business of a grammarian to mark both? And if he cannot point out the precise sound of *unaccented* syllables, (for these only are liable to obscurity,) he may, at least, give those sounds which approach the nearest; and by this means become a little more useful than those who so liberally leave every thing to the ear and taste of the speaker.

The truth is, Dr. Johnson seems to have had a confused idea of the distinctness and indistinctness with which, on solemn or familiar occasions, we sometimes pronounce the *unaccented* vowels; and with respect to these, it must be owned, that his remarks are not entirely without foundation. The English language, with respect to its pronunciation, is evidently divisible into accented and unaccented sounds. The accented syllables, by being pronounced with greater force than the unaccented, have their vowels as clearly and distinctly sounded as any given note in musick; while the unaccented vowels, for want of the stress, are apt to slide into an obscurity of sound, which though sufficiently distinguishable to the ear, cannot be so definitely marked out to the eye by other sounds as those vowels that are under the accent. Thus some of the vowels, when neither under the accent, nor closed by a consonant, have a longer or a shorter, an opener or a closer sound, according to the solemnity or familiarity, the deliberation or rapidity of our delivery. This will be perceived in the sound of the *e* in *emotion*,* of the *o* in *obedience*, and of the *u* in *singular*. In the hasty pronunciation of common speaking, the *e* in *emotion* is often shortened, as if spelt *im-mo-tion;* the *o* in *obedience* is shortened and obscured, as if written *ub-be-di-ence;* and the *u* in *monument* changed into *e*, as if written *mon-ne-ment;* while the deliberate and elegant sound of these vowels is the long open sound they have, when the accent is on them in *equal*, *over*, and *unit;* but *a*, when unaccented seems to have no such diversity; it has generally a short obscure sound, whether ending a syllable, or closed by a consonant. Thus the *a* in *able* has its definite and distinct sound; but the same letter in *tolerable*† goes into an obscure indefinite sound approaching to short *u;* nor can any solemnity or deliberation give it the long open sound it has in the first word. Thus, by distinguishing vowels into their accented and unaccented sounds, we are enabled to see clearly what Dr. Johnson saw but obscurely; and by this distinction entirely to obviate the objection.

Equally indefinite and uncertain is his general rule, that those are to be considered as the most elegant speakers who deviate least from the written words. It is certain, where custom is equal, this ought to take place; and if the whole body of respectable English speakers were equally divided in their pronunciation of the word *busy*, one half pronouncing it *bewze*,‡ and the other half *biz-ze*, that the former ought to be accounted the most elegant speakers; but till this is the case, the latter pronunciation, though a gross deviation from orthography, will still be esteemed the most elegant. Dr. Johnson's general rule, therefore, can only take place where custom has not plainly decided; but unfortunately for the English language, its orthography and pronunciation are so widely different, that Dr. Watts and Dr. Jones lay it down as a maxim in their treatises on spelling, that all words which can be sounded different ways, must be written according to that sound which is most distant from the true pronunciation; and consequently, in such a language a pronouncing dictionary must be of essential use.

But still it may be objected to such an undertaking, that the fluctuation of pronunciation is so great as to render all attempts to settle it useless. What will it avail us, it may be said, to know the pronunciation of the present day, if, in a few years, it will be altered? And how are we to know even what the present pronunciation is, when the same words are often differently pronounced by different speakers, and those, perhaps, of equal numbers and reputation? To which it may be answered, that the fluctuation of our language, with respect to its pronunciation, seems to have been greatly exaggerated.§ Except a very

§ The old and new Ἀτθις, with all the various dialects, must have occasioned infinite irregularity in the pronunciation of the Greek tongue; and if we may judge of the Latin pronunciation by the ancient inscriptions, it was little less various and irregular than the Greek. Aulus Gellius tells us, that Nigidius, a grammarian who lived a little more than a century before him, acuted the first syllable of *Valeri;* but, says he, "si quis nunc *Valerium* appellans in casu vocandi secundum id preceptum Nigidii acuerit primam, non aberit quin rideatur." Whoever now should place the accent on the first syllable of *Valerius;*

few single words, which are generally noticed in the following dictionary, and the words where *e* comes before *r*, followed by another consonant, as *merchant*, *service*, &c. The pronunciation of the language is probably in the same state it was in a century ago; and had the same attention been then paid to it as now, it is not likely even that change would have happened. The same may be observed of those words which are differently pronounced by different speakers: if the analogies of the language were better understood, it is scarcely conceivable that so many words in polite usage would have a diversity of pronunciation, which is at once so ridiculous and embarrassing; nay, perhaps it may be with confidence asserted, that if the analogies of the language were sufficiently known, and so near at hand as to be applicable on inspection to every word, that not only many words which are wavering between contrary usages would be settled in their true sound, but that many words, which are fixed by custom to an improper pronunciation, would by degrees grow regular and analogical; and those which are so already would be secured in their purity, by a knowledge of their regularity and analogy.

But the utility of a work of this kind is not confined to those parts of language where the impropriety is gross and palpable; besides those imperfections in pronunciation, which disgust every ear not accustomed to them, there are a thousand insensible deviations, in the more minute parts of language, as the unaccented syllables may be called, which do not strike the ear so forcibly as to mark any direct impropriety in particular words, but occasion only such a general imperfection as gives a bad impression upon the whole. Speakers with these imperfections pass very well in common conversation; but when they are required to pronounce with emphasis, and for that purpose to be more distinct and definite in their utterance, here their ear fails them; they have been accustomed only to loose cursory speaking, and for want of a firmness of pronunciation, are like those painters who draw the muscular exertions of the human body without any knowledge of anatomy. This is one reason, perhaps, why we find the elocution of so few people agreeable when they read or speak to an assembly, while so few offend us by their utterance in common conversation. A thousand faults lie concealed in a miniature, which a microscope brings to view; and it is only by pronouncing on a larger scale, as publick speaking may be called, that we prove the propriety of our elocution. As, therefore, there are certain deviations from analogy which are not at any rate tolerable, there are others which only, as it were, tarnish the pronunciation, and make it less brilliant and agreeable. There are few who have turned their thoughts on this subject without observing, that they sometimes pronounce the same word or syllable in a different manner; and as neither of these manners offend the ear, they are at a loss to which they shall give the preference; but as one must necessarily be more agreeable to the analogy of the language than the other, a display of these analogies, in a dictionary of this kind, will immediately remove this uncertainty; and in this view of the variety we shall discover a fitness in one mode of speaking, which will give a firmness and security to our pronunciation, from a confidence that it is founded on reason, and the general tendency of the language. See Principles, No. 530, 547, 551, &c.

But, alas! reasoning on language, however well founded, may be all overturned by a single quotation from Horace:

"————usus
" Quem penès arbitrium est, & jus & norma loquendi."

This it must be owned, is a succinct way of ending the controversy; and by virtue of this argument we may become criticks in language without the trouble of studying it. Not that I would be thought, in the most distant manner, to deny, that Custom is the sovereign arbiter of language. Far from it. I acknowledge its authority, and know there is no appeal from it. I wish only to dispute where this arbiter has not decided; for if once Custom speak out, however absurdly, I sincerely acquiesce in its sentence.

But what is this custom to which we must so implicitly submit? Is it the usage of the multitude of speakers, whether good or bad? This has never been asserted by the most sanguine abettors of its authority. Is it the majority of the studious in schools and colleges, with those of the learned professions, or of those who, from their elevated birth or station, give laws to the refinements, and elegancies of a court? To confine propriety the latter, which is too often the case, seems an injury to the former; who, from their very profession, appear to have a natural right to a share, at least, in the legislation of language, if not to an absolute sovereignty. The polished attendants on a throne are as apt to depart from simplicity in language as in dress and manners; and novelty, instead of custom, is too often the *jus & norma loquendi* of a court.

Perhaps an attentive observation will lead us to conclude, that the usage, which ought to direct us, is neither of these we have been enumerating, taken singly, but a sort of compound ratio of all three. Neither a finical pronunciation of the court, nor a pedantic Græcism of the schools, will be denominated respectable usage, till a certain number of the general mass of speakers have acknowledged them; nor will a multitude of common speakers authorise any pronunciation which is reprobated by the learned and polite.

As those sounds, therefore, which are the most generally received among the learned and polite, as well as the bulk of speakers, are the most legitimate, we may conclude that a majority of two of these states ought always to concur, in order to constitute what is called good usage.

But though custom, when general, is commonly well understood, there are several states and degrees of it which are exceedingly obscure and equivocal; and the only method of knowing the extent of custom in these cases, seems to be an

when a vocative case, would set every body a-laughing. Even that highly polished language the French, if we may believe a writer in the Encyclopédie, is little less irregular in this respect than our own.

Il est arrivé, says he, par les altérations qui se succedent rapidement dans la manière de prononcer, et les corrections qui s'introduisent lentement dans la manière d'écrire, que la prononciation et l'écriture ne marchent point ensemble, et que quoiqu'il y ait chez les peuples les plus policés de l'Europe, des sociétés d'hommes de lettres chargés des les modérer, des les accorder, et de les rapprocher de la même ligne, elles se trouvent enfin à une distance inconcevable; ensorte que de deux choses dont l'une n'a été imaginée dans son origine, que pour représenter fidellement l'autre, celle-ci ne differe guère moins de celle-là que le portrait de la même personne peinte dans deux ages très-eloignés. Enfin l'inconvénient s'est accru à un tel excès qu'on n'ose plus y remédier. On prononce une langue, on écrit une autre: et l'on s'accoutume tellement pendant le reste de la vie à cette bisarrerie qui a fait verser tant de larmes dans l'enfance, que si l'on renonçoit à sa mauvaise orthographe pour une plus voisine de la prononciation, on ne reconnoîtroit plus la langue parlée sous cette nouvelle combinaison de caractères. S'il y en a qui ne pourroient se succéder sans une grande fatigue pour l'organe, ou ils ne se rencontrent point, ou ils ne durent pas. Ils sont échappés de la langue par l'euphonie, cette loi puissante, qui agit continuellement et universellement sans égard pour l'étymologie et ses défenseurs, et qui tend sans intermission à amener des êtres qui ont les mêmes organes, le même idiôme, les mêmes mouvemens prescrits, à-peu-près à la même pronociation. Les causes dont l'action n'est point interrompue, deviennent toujours les plus fortes avec les tems, quelque foibles qu'elles soient en elles-mêmes, et il n'y a presque pas une seule voyelle, une seule dipthongue, une seule consonne dont la valeur soit tellement constante, que l'euphonie n'en puisse disposer, soit en altérant le son, soit en le supprimant

I shall not decide upon the justness of these complaints, but must observe, that a worse picture could scarcely be drawn of the English or the most barbarous language of Europe. Indeed a degree of versatility seems involved in the very nature of language, and is one of those evils left by Providence for man to correct: a love of order, and the utility of regularity, will always incline him to confine this versatility within as narrow bounds as possible.

inspection of those dictionaries which professedly treat of pronunciation. We have now so many works of this kind, that the general current of custom, which respect to the sound of words, may be collected from them with almost as much certainty as the general sense of words from Johnson. An exhibition of the opinions of orthoepists about the sound of words always appeared to me a very rational method of determining what is called custom. This method I have adopted in the following work; and if I have sometimes dissented from the majority, it has been, either from a persuasion of being better informed of what was the actual custom of speaking, or from a partiality to the evident analogies of the language.

And here I must intreat the candid reader to make every reasonable allowance for the freedom with which I have criticised other writers on this subject, and particularly Mr. Sheridan. As a man, a gentleman, and a scholar, I knew Mr. Sheridan, and respected him; and think every lover of elocution owes him a tribute of thanks for his unwearied addresses to the publick, to rouse them to the study of the delivery of their native tongue. But this tribute, however just, does not exempt him from examination. His credit with the world necessarily subjects him to animadversion, because the errors of such a writer are dangerous in proportion to his reputation: this has made me zealous to remark his inaccuracies, but not without giving my reasons: nor have I ever taken advantage of such faults as may be called inadvertencies*. On the same principles I have ventured to criticise Dr. Johnson, (*See Sceptic*, *Scirrhus*, *Codle*, *Further*, &c.) whose friendship and advice I was honoured with, whose memory I love, and whose intellectual powers impress me with something like religious veneration and awe. I do not pretend to be exempt from faults myself; in a work like the present, it would be a miracle to escape them; nor have I the least idea of deciding as a judge, in a case of so much delicacy and importance, as the pronunciation of a whole people: I have only assumed the part of an advocate to plead the cause of consistency and analogy, and where custom is either silent or dubious, to tempt the lovers of their language to incline to the side of propriety; so that my design is principally to give a kind of history of pronunciation, and a register of its present state; and where the authorities of dictionaries or speakers are found to differ, to give such a display of the analogies of the language as may enable every inspector to decide for himself.

With respect to the explanation of words, except in very few instances, I have scrupulously followed Dr. Johnson. His dictionary has been deemed lawful plunder by every subsequent lexicographer; and so servilely has it been copied, that such words as he must have omitted merely by mistake, as *Predilection*, *Respectable*, *Descriptive*, *Sulky*, *Inimical*, *Interference*, and many others, are neither in Mr. Sheridan's, Dr. Kenrick's, nor several other dictionaries.

Rules to be observed by the Natives of Ireland in order to obtain a just pronunciation of English.

As Mr. Sheridan was a native of Ireland, and had the best opportunities of understanding those peculiarities of pronunciation which obtain there, I shall extract his observations on that subject as the best general direction, and add a few of my own, by way of supplement, which I hope will render this article of instruction still more complete.

The reader will be pleased to take notice, that as I have made a different arrangement of the vowels, and have adopted a notation different from Mr. Sheridan, I am obliged to make use of different figures to mark the vowels, but still such as perfectly correspond to his.

* The inspector will be pleased to take notice, that my observations on Mr. Sheridan relate to the first edition, published in his lifetime, and the second, some time after his death. Whatever alterations may have been made by his subsequent editors, I am totally unacquainted with.

"The chief mistakes made by the Irish in pronouncing English, lie for the most part in the sounds of the two first vowels, "*a* and *e;* the former being generally sounded å by the Irish, as "in the word bår, in most words where it is pronounced à, as "in *day*, by the English. Thus the Irish say, påtron, mâtron, "the vowel å having the same sound as in the word fâther; "whilst the English pronounce them as if written *paytron*, *may-*"*tron*. The following rule, strictly attended to, will rectify this "mistake through the whole language.

"When the vowel *a* finishes a syllable, and has the accent on "it, it is invariably pronounced à [day] by the English. To "this rule there are but three exceptions in the whole language "to be found in the words fâther, papå, mamå. The Irish may "think also the word *rather* an exception, as well as *father;* "and so it would appear to be in their manner of pronouncing it "rå-ther, laying the accent on the vowel *a;* but in the English "pronunciation the consonant *th* is taken into the first syllable, "as thus, *rath'er*, which makes the difference.

"Whenever a consonant follows the vowel *a* in the same "syllable, and the accent is on the consonant, the vowel *a* has "always its fourth sound, as hât, mân; as also the same sound "lengthened when it precedes the letter *r*, as får, bår, though "the accent be on the vowel; as likewise when it precedes *lm*, "as bålm, psålm. The Irish, ignorant of this latter exception, pronounce all words of that structure as if they were written *hawm*, *psawm*, *quawm*, *cawm*, &c. In the third sound of *a* "marked by different combinations of vowels, or consonants, "such as *au*, in Paul; *aw*, in law; *all*, in call; *ald*, in bald; *alk*, in "talk, &c. the Irish make no mistake, except in that of *lm*, "as before mentioned.

"The second vowel, *e*, is for the most part sounded *ee* by the "English, when the accent is upon it; whilst the Irish in most "words give it the sound of slender à, as in *hate*. This sound of "è [ee] is marked by different combinations of vowels, such as "*ea*, *ei*, *e* final mute, *ee*, and *ie*. In the two last conbinations of *ee* "and *ie*, the Irish never mistake; such as in *meet*, *seem*, *field*, "*believe*, &c.; but in all the others, they almost universally "change the sound of è into à. Thus in the combination *ea*, they "pronounce the words *tea*, *sea*, *please*, as if they were spelt *tay*, "*say*, *plays;* instead of *tee*, *see*, *pleese*. The English constantly "give this sound to *ea* whenever the accent is on the vowel *e*, "except in the following words, *great*, a *pear*, a *bear*, to *bear*, "to *forbear*, to *swear*, to *tear*, to *wear*. In all which the *e* has the "sound of à in hâte. For want of knowing these exceptions, "the gentlemen of Ireland, after some time of residence in Lon-"don, are apt to fall into the general rule, and pronounce these "words as if spelt *greet*, *beer*, *swear*, &c.

"*Ei* is also sounded *ee* by the English, and as à by the Irish; "thus the word de*ceit*, re*ceive*, are pronounced by them as if "written de*sate*, re*save*. *Ei* is always sounded *ee*, except "when a *g* follows it, as in the words *reign*, *feign*, *deign*, &c.; "as also in the words *rein* (of a bridle), *rein*-deer, *vein*, *drein*, "*veil*, *heir*, which are pronounced like *rain*, *vain*, *drain*, *vail*, *air*.

"The final mute *e* makes the preceding *e* in the same syl-"lable, when accented, have the sound of *ee*, as in the words "suprême, sincère, replète. This rule is almost universally "broken through by the Irish, who pronounce all such words "as if written supråme, sincâre, replâte, &c. There are but two "exceptions to this rule in the English pronunciation, which "are the words *there*, *where*.

"In the way of marking this sound, by a double *e*, as thus *ee*, "as the Irish never make any mistakes, the best method for "all who want to acquire the right pronunciation of these sev-"eral combinations is, to suppose that *ea*, *ei*, and *e*, attended "by a final mute *e*, are all spelt with a double *e*, or *ee*.

"*Ey* is always sounded like à by the English, when the ac-"cent is upon it; as in the words *prey*, *convey*, pronounced "*pray*, *convay*. To this there are but two exc eptions, in "the words kèy and lèy, sounded *kee*, *lee*. The Irish, in at-

" tempting to pronounce like the English, often give the same " sound to *ey*, as usually belongs to *ei;* thus for *prey, convey,* " they say, *pree, convee.*

" A strict observation of these few rules, with a due atten- " tion to the very few exceptions enumerated above, will enable " the well-educated natives of Ireland to pronounce their words " exactly in the same way as the more polished part of the in- " habitants of England do, so far as the vowels are concerned. " The diphthongs they commit no fault in except in the sound of " i, which has been already taken notice of in the Grammar: * " where likewise, the only difference in pronouncing any of the " consonants has been pointed out; which is, the thickening " the sounds of *d* and *t*, in certain situations; and an easy " method proposed of correcting this habit.†

" In order to complete the whole, I shall now give a list of " such detached words, that do not come under any of the above " rules, as are pronounced differently in Ireland from what they " are in England:

* " Vide p. 11, (Walker's Grammar.) where the true manner of pro- " nouncing the diphthong *i* is pointed out; the Irish pronouncing it much " in the same manner as the French."

† " The letter *d* has always the same sound by those who pronounce English well; but the Provincials, particularly the Irish, Scotch, and Welch, in many words thicken the sound by a mixture of breath. Thus though they sound the *d* right in the positive *loud* and *broad* in the comparative degree they thicken it by an aspiration, and sound it as if it were written *loudher, broadher*. This vicious pronunciation is produced by pushing the tongue forward so as to touch the teeth in forming that sound; and the way to cure it is easy; for as they can pronounce the *d* properly in the word loud, let them rest a little upon that syllable keeping the tongue in the position of forming *d*, and then let them separate it from the upper gum without pushing it forward, and the sound *der* will be produced of course; for the organ being left in the position of sounding *d* at the end of the syllable *loud*, is necessarily in the position of forming the same *d* in uttering the last syllable, unless it makes a new movement, as in the case of protruding it so as to touch the teeth. This letter is sometimes, though not often quiescent, as in the words *handkerchief, handsome, handsel.*

" In pronouncing the letter *t* the Irish and other Provincials thicken the sound, as was before mentioned with regard to the *d;* for " These, after the closest attention, are all the words, not in- " cluded in the rules before laid down, that I have been able to " collect, in which the well-educated natives of Ireland differ " from those of England."

I shall make no observations on the accuracy of this list, but desire my reader to observe, that the strongest characteristics of the pronunciation of Ireland is the rough jarring pronunciation of the letter *R*, and the aspiration or rough breathing before all the accented vowels. For the true sound of *R*, see that letter in the Principles, No. 419. And for the rough breathing or aspiration of the vowels, the pupil should be told not to bring the voice suddenly from the breast, but to speak, as it were, from the mouth only.

It may be observed too, that the natives of Ireland pronounce *rm* at the end of a word so distinctly as to form two separate syllables. Thus *storm* and *farm* seem sounded by them as if written *staw-rum, fa-rum;* while the English sound the *r* so soft and so close to the *m*, that it seems pronounced nearly as if written *stawm, faam.*

Nearly the same observations are applicable to *lm*. When these letters end a word they are, in Ireland, pronounced at such a distance, that *helm* and *realm* sound as if written *hell-um* and *real-um;* but in England the *l* and *m* are pronounced as close as possible, and so as to form but one syllable. To remedy this, it will be necessary for the pupil to make a collection of words terminating with these consonants, and to practise them over till a true pronunciation is acquired.

Rules to be observed by the natives of Scotland for attaining a just pronunciation of English.

THAT pronunciation which distinguishes the inhabitants of Scotland is of a very different kind from that of Ireland, and may be divided into the quantity, quality, and accentuation, of the vowels. With respect to quantity, it may be observed, that the Scotch pronounce almost all their accented vowels long. Thus, if I am not mistaken, they would pronounce *habit, hay-bit; tepid, tee-pid; sinner, see-ner; conscious, cone-shus:* and *subject, soob-ject:*‡ it is not pretended, however, that every accented vowel is so pronounced, but that such a pronunciation is very general, and particularly of the *i*. This vowel is short in English pronunciation where the other vowels are long; thus *evasion, adhesion, emotion, confusion*, have the *a, e, o*, and *u*, long; and in these instances the Scotch would pronounce them like *better*, they say *betther;* for *utter, utther;* and so on in all words of that structure. This faulty manner arises from the same cause that was mentioned as affecting the sound of the *d;* I mean the protruding of the tongue so as to touch the teeth, and is curable only in the same way."

‡ That this is the general mode of pronouncing these words in Scotland, is indisputable; and it is highly probable that the Scotch have preserved the old English pronunciation, from which the English themselves have insensibly departed. Dr. Hicks observed long ago, that the Scotch *Saxonised* in their language much more than the English; and it is scarcely to be doubted that a situation nearer to the Continent, and a greater commercial intercourse with other nations, made the English admit of numberless changes which never extended to Scotland. About the reign of Queen Elizabeth, when the Greek and Latin languages were cultivated, and the pedantry of shewing an acquaintance with them became fashionable, it is not improbable that an alteration in the quantity of many words took place: for as in Latin almost every vowel before a single consonant is short, so in English almost every vowel in the same situation was supposed to be long, or our ancestors would not have doubled the consonant in the participles of verbs to prevent the preceding vowel from lengthening. But when once this affectation of Latinity was adopted, it is no wonder it should extend beyond its principles, and shorten several vowels in English, because they were short in the original Latin; and in this manner, perhaps, might the diversity between the quantity of the English and Scotch pronunciation arise, (542)(543). See Drama.

the English; but in *vision*, *decision*, &c. where the English pronounce the *i* short, the Scotch lengthen this letter by pronouncing it like *ee*, as if the words were written *vee-sion*, *decee-sion*, &c. and this peculiarity is universal. The best way, therefore, to correct this, will be to make a collection of the most usual words which have the vowel short, and to pronounce them daily till a habit is formed. See Principles, No. 507.

With respect to the quality of the vowels, it may be observed, that the inhabitants of Scotland are apt to pronounce the *a* like *aw*, where the English give it the slender sound: thus *Satan* is pronounced *Sawtan*, and *fatal*, *fawtal*. It may be remarked too, that the Scotch give this sound to the *a* preceded by *w*, according to the general rule, without attending to the exceptions, Principles, No. 88; and thus, instead of making *wax*, *waft*, and *twang*, rhyme with *tax*, *shaft*, and *hang*, they pronounce them so as to rhyme with *box*, *soft* and *song*. The short *e* in *bed*, *fed*, *red*, &c. borders too much upon the English sound of *a* in *bad*, *lad*, *mad*, &c. and the short *i* in *bid*, *lid*, *rid*, too much on the English sound of *e* in *bed*, *led*, *red*. To correct this error, it would be useful to collect the long and short sounds of these vowels, and to pronounce the long ones first, and to shorten them by degrees till they are perfectly short; at the same time preserving the radical sound of the vowel in both. Thus the correspondent long sounds to the *e* in *bed*, *fed*, *red*, are *bade*, *fade*, *rade*, and that of the short *i* in *bid*, *lid*, *rid*, are *bead*, *lead*, *reed*; and the former of these classes will naturally lead the ear to the true sound of the latter, the only difference lying in the quantity. The short *o* in *not*, *lodge*, *got*, &c. is apt to slide into the short *u*, as if the words were written *nut*, *ludge*, *gut*, &c. To rectify this, it should be remembered, that this *o* is the short sound of *aw*, and ought to have the radical sound of the deep *a* in *ball*. Thus the radical sound corresponding to the *o* in *not*, *cot*, *sot*, is found in *naught*, *caught*, *sought*, &c. and these long sounds, like the former, should be abbreviated into the short ones. But what will tend greatly to clear the difficulty will be, to remember that only those words which are collected in the Principles, No. 165, have the *o* sounded like short *u* when the accent is upon it: and with respect to *u*, in *bull*, *full*, *pull*, &c. it may be observed, that the pronunciation peculiar to the English is only found in the words enumerated, Principles, No. 174.

In addition to what has been said, it may be observed, that *oo* in *food*, *mood*, *moon*, *soon*, &c. which ought always to have a long sound, is generally shortened in Scotland to that middle sound of the *u* in *bull*; and it must be remembered, that *wool*, *wood*, *good*, *hood*, *stood*, *foot*, are the only words where this sound of *oo* ought to take place.

The accentuation, both in Scotland and Ireland, (if by accentuation we mean the stress, and not the kind of stress) is so much the same as that of England, that I cannot recollect many words in which they differ. Indeed, if it were not so, the versification of each country would be different: for as English verse is formed by accent or stress, if this accent or stress were upon different syllables in different countries, what is verse in England would not be verse in Scotland or Ireland; and this sufficiently shows how very indefinitely the word accent is generally used.

Mr. Elphinston, who must be allowed to be a competent judge in this case, tells us, that in Scotland they pronounce *silénce*, *biás*, *canvás*, *senténce*, *triúmph*, *comfórt*, *soláce*, *constrúe*, *rescúe*, *respíte*, *govérn*, *haráss*, *ransáck*, *cancél*, with the accent on the last syllable instead of the first. To this list may be added the word *menace*, which they pronounce as if written *menáss*; and though they place the accent on the last syllable of *canal*, like the English, they broaden the *a* in the last syllable, as if the word were spelt *canawl*. It may be farther observed, that they place an accent on the comparative adverb, *as*, in the phrases *as much*, *as little*, *as many*, *as great*, &c. while the English, except in some very particular emphatical cases, lay no stress on this word, but pronounce these phrases like words of two or three syllables without any accent on the first.

But besides the mispronunciation of single words, there is a tone of voice with which these words are accompanied, that distinguishes a native of Ireland or Scotland as much as an improper sound of the letters. This is vulgarly, and, if it does not mean stress only, but the kind of stress, I think, not improperly called the accent.* For though there is an asperity in the Irish dialect, and a drawl in the Scotch, independent of the slides or inflections they make use of, yet it may with confidence be affirmed, that much of the peculiarity which distinguishes these dialects may be reduced to a predominant use of one of these slides. Let any one who has sufficiently studied the speaking voice to distinguish the slides, observe the pronunciation of an Irishman and a Scotchman, who have much of the dialect of their country, and he will find that the former abounds with the falling, and the latter with the rising inflexion;† and if this is the case, a teacher, if he understands these slides, ought to direct his instruction so as to remedy the imperfection. But as avoiding the wrong, and seizing the right at the same instant, is, perhaps, too great a task for human powers, I would advise a native of Ireland, who has much of the accent, to pronounce almost all his words, and end all his sentences with the rising slide; and a Scotchman in the same manner, to use the falling inflexion; this will, in some measure, counteract the natural propensity, and bids fairer for bringing the pupil to that nearly equal mixture of both slides which distinguishes the English speaker, than endeavouring at first to catch the agreeable variety. For this purpose the teacher ought to pronounce all the single words in the lesson with the falling inflexion to a Scotchman, and with the rising to an Irishman; and should frequently give the pauses in a sentence the same inflexions to each of these pupils, where he would vary them to a native of England. But while the human voice remains unstudied, there is little expectation that this distinction of the slides should be applied to these useful purposes.

Besides a peculiarity of inflexion, which I take to be a falling circumflex, directly opposite to that of the Scotch, the Welch pronounce the sharp consonants and aspirations instead of the flat. (See Principles, No. 29, 41.) Thus for *big* they say *pick*; for *blood*, *ploot*; and for *good*, *coot*. Instead of *virtue* and *vice*, they say *firtue* and *fice*; instead of *zeal* and *praise*, they say *seal* and *prace*; instead of *these* and *those*, they say *th*ece and *th*oce; and instead of *azure* and *osier*, they say *aysher* and *osher*; and for *jail*, *chail*. Thus there are nine distinct consonant sounds which, to the Welch, are entirely useless. To speak with propriety, therefore, the Welch ought for some time to pronounce the flat consonants and aspirations only; that is, they ought not only to pronounce them where the letters require the flat sound, but even where they require the sharp sound; this will be the best way to acquire a habit; and when this is once done, a distinction will be easily made, and a just pronunciation more readily acquired.

There is scarcely any part of England remote from the capital where a different system of pronunciation does not prevail. As in Wales they pronounce the sharp consonants for the flat, so in Somersetshire they pronounce many of the flat instead of the sharp. Thus for *Somersetshire*, they say *Zomerzetshire*; for *father*, *vather*; for *th*ink, THink; and for *sure*, *zhure*.‡

There are dialects peculiar to Cornwall, Lancashire, Yorkshire, and every distant county in England; but as a consideration of these would lead to a detail too minute for the present

* See this more fully exemplified in Elements of Elocution, Vol. II. page 13.

† Or rather the rising circumflex. For an explanation of this inflexion, see Melody of Speaking Delineated, page 16.

‡ See the word CHANGE

occasion, I shall conclude these remarks with a few observations on the peculiarities of my countrymen, the Cockneys; who, as they are the models of pronunciation to the distant provinces, ought to be the more scrupulously correct.

First Fault of the Londoners.

Pronouncing s *indistinctly after* st.

The letter *s* after *st*, from the very difficulty of its pronunciation, is often sounded inarticulately. The inhabitants of London, of the lower order, cut the knot, and pronounce it in a distinct syllable, as if *e* were before it; but this is to be avoided as the greatest blemish in speaking: the three last letters in *posts*, *fists*, *mists*, &c. must all be distinctly heard in one syllable, and without permitting the letters to coalesce. For the acquiring of this sound, it will be proper to select nouns that end in *st* or *ste;* to form them into plurals, and pronounce them forcibly and distinctly every day. The same may be observed of the third person of verbs ending in *sts* or *stes*, as *persists*, *wastes*, *hastes*, &c.

Second Fault.

Pronouncing w *for* v, *and inversely.*

The pronunciation of *v* for *w*, and more frequently of *w* for *v*, among the inhabitants of London, and those not always of the lower order, is a blemish of the first magnitude. The difficulty of remedying this defect is the greater, as the cure of one of these mistakes has a tendency to promote the other.

Thus, if you are very careful to make a pupil pronounce *veal* and *vinegar*, not as if written *weal* and *winegar*, you will find him very apt to pronounce *wine* and *wind*, as if written *vine* and *vind*. The only method of rectifying this habit seems to be this: Let the pupil select from a dictionary, not only all the words that begin with *v*, but as many as he can of those that have this letter in any other part. Let him be told to bite his under lip while he is sounding the *v* in those words, and to practise this every day till he pronounces the *v* properly at first sight: then, and not till then, let him pursue the same method with the *w;* which he must be directed to pronounce by a pouting out of the lips without suffering them to touch the teeth. Thus by giving all the attention to only one of these letters at a time, and fixing by habit the true sound of that, we shall at last find both of them reduced to their proper pronunciation in a shorter time than by endeavouring to rectify them both at once.

Third Fault.

Not sounding h *after* w.

The aspirate *h* is often sunk, particularly in the capital, where we do not find the least distinction of sound between *while* and *wile*, *whet* and *wet*, *where* and *were*, &c. The best method to rectify this is, to collect all the words of this description from a dictionary, and write them down; and instead of the *wh* to begin them with *hoo* in a distinct syllable, and so to pronounce them. Thus let *while* be written and sounded *hoo-ile; whet*, *hoo-et; where*, *hoo-are; whip*, *hoo-ip*, &c. This is no more, as Dr. Lowth observes, than placing the aspirate in its true position before the *w*, as it is in the Saxon, which the words come from; where we may observe, that though we have altered the orthography of our ancestors, we have still preserved their pronunciation.

Fourth Fault.

Not sounding h *where it ought to be sounded, and inversely.*

A still worse habit than the last prevails, chiefly among the people of London, that of sinking the *h* at the beginning of words where it ought to be sounded, and of sounding it, either where it is not seen, or where it ought to be sunk. This we not unfrequently hear, especially among children *heart* pronounced *art*, and *arm*, *harm*. This is a vice perfectly similar to that of pronouncing the *v* for the *w*, and the *w* for the *v*, and requires a similar method to correct it.

As there are so very few words in the language where the initial *h* is sunk, we may select these from the rest, and, without setting the pupil right when he mispronounces these, or when he prefixes the *h* improperly to other words, we may make him pronounce all the words where *h* is sounded, till he has almost forgot there are any words pronounced otherwise. Then he may go over those words to which he improperly prefixes the *h*, and those were the *h* is seen but not sounded, without any danger of an interchange. As these latter words are but few, I shall subjoin a catalogue of them for the use of the learner. *Heir*, *heiress*, *herb*, *herbage*, *honest*, *honesty*, *honestly*, *honour*, *honourable*, *honourably*, *hospital*, *hostler*, *hour*, *hourly*, *humble*, *humbly*, *humbles*, *humour*, *humourist*, *humorous*, *humorously*, *humoursome*. Where we may observe, that *humour* and its compounds not only sink the *h* but sound the *u* like the pronoun *you*, or the noun *yew*, as if written *yewmour*, *yewmorous*, &c.

Thus I have endeavoured to correct some of the more glaring errors of my countrymen; who with all their faults, are still upon the whole the best pronouncers of the English language. For though the pronunciation of London is certainly erroneous in many words, yet, upon being compared with that of any other place, it is undoubtedly the best; that is, not only the best by courtesy, and because it happens to be the pronunciation of the capital, but best by a better title; that of being more generally received: or, in other words, though the people of London are erroneous in the pronunciation of many words, the inhabitants of every other place are erroneous in many more. Nay, harsh as the sentence may seem, those at a considerable distance from the capital do not only mispronounce many words taken separately, but they scarcely pronounce with purity a single word, syllable, or letter. Thus, if the short sound of the letter *u* in *trunk*, *sunk*, &c. differ from the sound of that letter in the northern parts of England, where they sound it like the *u* in *bull*, and nearly as if the words were written *troonk*, *soonk*, &c. it necessarily follows that every word where that letter occurs must by those provincials be mispronounced.

But though the inhabitants of London have this manifest advantage over all the other inhabitants of the island, they have the disadvantage of being more disgraced by their peculiarities than any other people. The grand difference between the metropolis and the provinces is, that people of education in London are generally free from the vices of the vulgar; but the best educated people in the provinces, if constantly resident there, are sure to be strongly tinctured with the dialect of the country in which they live. Hence it is, that the vulgar pronunciation of London, though not half so erroneous as that of Scotland, Ireland, or any of the provinces, is, to a person of correct taste, a thousand times more offensive and disgusting.

DIRECTIONS TO FOREIGNERS,

IN ORDER TO ATTAIN A KNOWLEDGE OF THE MARKS IN THIS DICTIONARY, AND TO ACQUIRE A RIGHT PRONUNCIATION OF EVERY WORD IN THE ENGLISH LANGUAGE.

AS the sounds of the vowels are different in different languages, it would be endless to bring parallel sounds from the various languages of Europe; but as the French is so generally understood upon the continent, if we can reduce the sounds of the English letters to those of the French, we shall render the pronunciation of our language very generally attainable: and this, it is presumed, will be pretty accurately accomplished by observing the following directions:

RULES TO BE OBSERVED BY FOREIGNERS.

A B C D E F G H I J K L M N O P Q R
ei bi ci di i ef dgi etch aï djé qué ell em en o pi kiou arr
S T U V W X Y Z
ess ti iou vi dobliou ex ouai zedd.

The French have all our vowel sounds, and will therefore find the pronunciation of them very easy. The only difficulty they will meet with seems to be *i*, which, though demonstrably composed of two successive sounds, has passed for a simple vowel with a very competent judge of English pronunciation*. The reason is, these two sounds are pronounced so closely together as to require some attention to discover their component parts: this attention Mr. Sheridan† never gave, or he would not have told us that this diphthong is a compound of our fullest and slenderest sounds à and ê; the first made by the largest, and the last by the smallest aperture of the mouth. Now nothing is more certain than the inaccuracy of this definition. The third sound of *a*, which is perfectly equivalent to the third sound of *o*, when combined with the first sound of *e*, must inevitably form the diphthong in *boy*, *joy*, &c. and not the diphthongal sound of the vowel *i* in *idle*, and the personal pronoun *I*; this double sound will, upon a close examination, be found to be composed of the Italian *a* in the last syllable of *papa*, and the first sound of *e*, pronounced as closely together as possible;‡ and for the exactness of this definition, I appeal to every just English ear in the kingdom.

The other diphthongal vowel *u* is composed of the French *i*, pronounced as closely as possible to their diphthong *ou*, or the English êê and ô, perfectly equivalent to the sound the French would give to the letters *you*, and which is exactly the sound the English give to the plural of the second personal pronoun.

The diphthong *oi* or *oy* is composed of the French *â* and *i*; thus *toy* and *boy* would be exactly expressed to a Frenchman by writing them *tâi* and *bâi*.

The diphthongs *ou* and *ow*, when sounded like *ou*, are composed of the French *â* and the diphthong *ou*; and the English sounds of *thou* and *now* may be expressed to a Frenchman by spelling them *thâou* and *nâou*.

W is no more than the French diphthong *ou*; thus *West* is equivalent to *Ouest*, and *wall* to *ouâll*.

Y is perfectly equivalent to the French letter of that name, and may be supplied by *i*; thus *yoke*, *you*, &c. is expressed by *ioke*, *iou*, &c.

J, or *I* consonant, must be pronounced by prefixing *d* to the French *j*; thus *jay*, *joy*, &c. sound to a Frenchman as if spelled *djé*, *djâi*, &c. If any difficulty be found in forming this combination of sounds, it will be removed by pronouncing the *d*, *ed*, and spelling these words *edjé*, *edjâi*, &c.

Ch, in English words not derived from the Greek, Latin, or French, is pronounced as if *t* were prefixed; thus the sound of *chair*, *cheese*, *chain*, &c. would be understood by a Frenchman if the words were written *tchére*, *tchize*, *tchéne*.

Sh in English is expressed by *ch* in French; thus *shame*, *share*, &c. would be spelled by a Frenchman *chéme*, *chére*, &c.

The ringing sound *ng* in *long*, *song*, &c. may be perfectly conceived by a pupil who can pronounce the French word *Encore*, as the first syllable of this word is exactly correspondent to the sound in those English words; and for the formation of it, see Principles, No. 57; also the word ENCORE.

* Elements of Orthoepy, page 2.

† See Section III. of his Prosodial Grammar prefixed to his dictionary.

‡ Holder, the most philosophical and accurate investigator of the formation and powers of the letters, says: "Our vulgar *i*, as in *stile*, "seems to be such a diphthong, (or rather syllable, or part of a syllable,) "composed of *a*, *i*, or *e*, *i*, and not a simple original vowel." Elements of Speech. page 95.

Dr. Wallis, speaking of the long English *i*, says it is sounded "eodem "ferè modo quo Gallorum *ai* in vocibus *main*, manus; *pain*, panis, &c. "Nempe sonum habet compositum ex Gallorum *è* fœminino & *i* vel *y*." Grammatica Linguæ Anglicanæ, pag. 48.

But the greatest difficulty every foreigner finds in pronouncing English, is the lisping consonant *th*. This, it may be observed, has, like the other consonants, a sharp and flat sound: sharp as in *thin*, *bath*; flat as in *that*, *with*. To acquire a true pronunciation of this difficult combination, it may be proper to begin with those words where it is initial: and first, let the pupil protrude his tongue a little way beyond the teeth, and press it between them as if going to bite the tip of it; while this is doing, if he wishes to pronounce *thin*, let him hiss as if to sound the letter *s*; and after the hiss, let him draw back his tongue within his teeth, and pronounce the preposition *in*, and thus will the word *thin* be perfectly pronounced. If he would pronounce *that*, let him place the tongue between the teeth as before; and while he is hissing as to sound the letter *z*, let him withdraw his tongue into his mouth, and immediately pronounce the preposition *at*. To pronounce this combination when final in *bath*, let him pronounce *ba*, and protrude the tongue beyond the teeth, pressing the tongue with them, and hissing as if to sound *s*; if he would pronounce *with*, let him first form *wi*, put the tongue in the same position as before, and hiss as if to sound *z*. It will be proper to make the pupil dwell some time with the tongue beyond the teeth in order to form a habit, and to pronounce daily some words out of a dictionary beginning and ending with these letters.

These directions, it is presumed, if properly attended to, will be sufficient to give such foreigners as understand French, and have not access to a master, a competent knowledge of English pronunciation; but to render the sounds of the vowels marked by figures in this dictionary still more easily to be comprehended—with those English words which exemplify the sounds of the vowels, I have associated such French words as have vowels exactly corresponding to them, and which immediately convey the true English pronunciation. These should be committed to memory, or written down and held in his hand while the pupil is inspecting the dictionary.

Perhaps the greatest advantage to foreigners and provincials will be derived from the classification of words of a similar sound, and drawing the line between the general rule and the exception. This has been an arduous task; but it is hoped the benefit arising from it will amply repay it. When the numerous varieties of sounds annexed to vowels, diphthongs, and consonants, lie scattered without bounds, a learner is bewildered and discouraged from attempting to distinguish them; but when they are all classed, arranged, and enumerated, the variety seems less, the number smaller, and the distinction easier. What an inextricable labyrinth do the diphthongs *ea* and *ou* form as they lie loose in the language! but classed and arranged as we find them, No. 226, &c. and 313, &c. the confusion vanishes, they become much less formidable, and a learner has it in his power, by repeating them daily, to become master of them all in a very little time.

The English accent is often an insurmountable obstacle to foreigners, as the rules for it are so various, and the exceptions so numerous; but let the inspector consult the article Accent in the Principles, particularly No. 492, 505, 506, &c. and he will soon perceive how much of our language is regularly accented, and how much that which is irregular is facilitated by an enumeration of the greater number of exceptions.

But scarcely any method will be so useful for gaining the English accent as the reading of verse. This will naturally lead the ear to the right accentuation; and though a different position of the accent is frequently to be met with in the beginning of a verse, there is a sufficient regularity to render the pronouncing of verse a powerful means of obtaining such a distinction of force and feebleness as is commonly called the accent. For it may be observed, that a foreigner is no less distinguishable by placing an accent upon certain words to which the English give no stress, than by placing the stress upon a wrong syllable. Thus if a foreigner, when he calls for bread at

table, by saying *give me some bread*, lays an equal stress upon every word, though every word should be pronounced with its exact sound, we immediately perceive he is not a native. An Englishman would pronounce these four words like two, with the accent on the first syllable of the first, and on the last syllable of the last, as if written *gíveme somebréad*; or rather *gívme sumbréd:* or more commonly, though vulgarly, *gimme somebréd.* Verse may sometimes induce a foreigner, as it does sometimes injudicious natives, to lay the accent on a syllable in long words which ought to have none, as in a couplet of Pope's Essay on Criticism:

"False eloquence, like the prismatic glass,
"Its gaudy colours spreads on every place."

Here a foreigner would be apt to place an accent on the last syllable of *eloquence* as well as the first, which would certainly be wrong; but this fault is so trifling, when compared with that of laying the accent on the second syllable, that it almost vanishes from observation; and this misaccentuation, verse will generally guard him from. The reading of verse, therefore, will, if I am not mistaken, be found a powerful regulator, both of accent and emphasis.

PRINCIPLES

OF

ENGLISH PRONUNCIATION.

1. THE first principles or elements of pronunciation are letters.

The letters of the English language are:

Roman.	Italic.	Name.
A a	*A a*	*a*
B b	*B b*	*bee*
C c	*C c*	*see*
D d	*D d*	*dee*
E e	*E e*	*e*
F f	*F f*	*eff*
G g	*G g*	*jee*
H h	*H h*	*aitch*
I i	*I i*	*i* or *eye*
J j	*J j*	*j* consonant, or *jay*
K k	*K k*	*kay*
L l	*L l*	*el*
M m	*M m*	*em*
N n	*N n*	*en*
O o	*O o*	*o*
P p	*P p*	*pee*
Q q	*Q q*	*cue*
R r	*R r*	*ar*
S ſ s	*S ſ s*	*ess*
T t	*T t*	*tee*
U u	*U u*	*u* or *you*
V v	*V v*	*v* consonant, or *vee*
W w	*W w*	double *u*
X x	*X x*	*eks*
Y y	*Y y*	*wy*
Z z	*Z z*	*zed* or *izzard.* (483).

2. To these may be added certain combinations of letters universally used in printing; as ct, ſt, fi, fl, ſb, ſk, ff, ffi, ffl, and &, or *and per se and*, or rather *et per se and*. *ct*, *ſt*, *fi*, *fl*, *ſt*, *ſb*, *ſk*, *ff*, *ffi*, *ffl*, *&*.

3. Our letters, says Dr. Johnson, are commonly reckoned twenty-four, because anciently *i* and *j*, as well as *u* and *v*, were expressed by the same character; but as these letters, which had always different powers, have now different forms, our alphabet may be properly said to consist of twenty-six letters.

4. In considering the sounds of these first principles of language, we find that some are so simple and unmixed, that there is nothing required but the opening of the mouth to make them understood, and to form different sounds. Whence they have the names of *vowels*, or *voices* or *vocal sounds*. On the contrary, we find that there are others, whose pronunciation depends on the particular application and use of every part of the mouth, as the teeth, the lips, the tongue, the palate, &c. which yet cannot make any one perfect sound but by their union with those vocal sounds; and these are called *consonants*, or letters sounding with other letters.

Definition of Vowels and Consonants.

5. Vowels are generally reckoned to be five in number; namely, *a*, *e*, *i*, *o*, *u*; *y* and *w* are called vowels when they end a syllable or word, and consonants when they begin one.

6. The definition of a vowel, as little liable to exception as any, seems to be the following: A vowel is a simple sound formed by a continued effusion of the breath, and a certain conformation of the mouth, without any alteration in the position, or any motion of the organs of speech, from the moment the vocal sound commences till it ends.

7. A consonant may be defined to be, an interruption of the effusion of vocal sound, arising from the application of the organs of speech to each other.

8. Agreeably to this definition, vowels may be divided into two kinds, the simple and compound. The simple *a*, *e*, *o*, are those which are formed by one conformation of the organs only; that is, the organs remain exactly in the same position at the end as at the beginning of the letter; whereas in the compound vowels *i* and *u*, the organs alter their position before the letter is completely sounded. Nay, these letters, when commencing a syllable, do not only require a different position of the organs in order to form them perfectly, but demand such an application of the tongue to the roof of the mouth, as is inconsistent with the nature of a pure vowel; for the first of these letters *i*, when sounded alone, or ending a syllable with the accent upon it, is a real diphthong, composed of the sound of *a* in *father*, and of *e* in *the*, exactly correspondent to the sound of the noun *eye;* and when this letter commences a syllable, as in *min-ion*, *pin-ion*, &c. the sound of *e* with which it terminates is squeezed into a consonant sound, like the double *e* heard in *queen*, different from the simple sound of that letter in *quean*, and this squeezed sound in the commencing *i* makes it exactly similar to *y* in the same situation; which, by all grammarians, is acknowledged to be a consonant.* The latter of these compound vowels,

* How so accurate a grammarian as Dr. Lowth could pronounce so definitively on the nature of *y*, and insist on its being always a vowel, can only be accounted for by considering the small attention which is generally paid to this part of grammar. His words are these:

"The same sound which we express by the initial *y* our Saxon ancestors in many instances expressed by the vowel *e;* as *eower*, *your;* and by the vowel *i;* as *iw*, *yew; iong*, *young*. In the word *yew* the initial *y* has precisely the same sound with *i* in the words *view*, *lieu*, *adieu;* the *i* is acknowledged to be a vowel in these latter, how then can the *y*, which has the very same sound, possibly be a consonant in the former? Its initial sound is generally like that of *i* in *shire*, or *ee* nearly; it is formed by the opening of the mouth without any motion or contact of the parts: in a word, it has every property of a vowel and not one of a consonant." Introd. to Eng. Gram. page 3.

Thus far the learned bishop, who has too fixed a fame to suffer any diminution by a mistake in so trifling part of literature as this: but it may be asked if *y* has every property of a vowel and not one of a consonant, why, when it begins a word, does it not admit of the euphonic article *an* before it?

u, when initial, and not shortened by a consonant, commences with this squeezed sound of *e* equivalent to the *y*, and ends with a sound given to *oo* in *woo* and *coo*, which makes its name in the alphabet exactly similar to the pronoun *you.** If, therefore, the common definition of a vowel be just, these two letters are so far from being simple vowels, that they may more properly be called semi-consonants.

9. That *y* and *w* are consonants when they begin a word, and vowels when they end one, is generally acknowledged by the best grammarians; and yet Dr. Lowth has told us, that *w* is equivalent to *oo;* but if this were the case, it would always admit the particle *an* before it: for though we have no word in the language which commences with these letters, we plainly perceive, that if we had such a word, it would readily admit of *an* before it, and consequently that these letters are not equivalent to *w*. Thus we find that the common opinion, with respect to the double capacity of these letters, is perfectly just.

10. Besides the vowels already mentioned, there is another simple vowel sound found under the *oo* in the words *woo* and *coo;* these letters have, in these two words, every property of a pure vowel, but when found in *food*, *mood*, &c. and in the word *too*, pronounced like the adjective *two:* here the *oo* has a squeezed sound, occasioned by contracting the mouth, so as to make the lips nearly touch each other; and this makes it, like the *i* and *u*, not so much a double vowel as a sound between a vowel and a consonant.

Classification of Vowels and Consonants.

11. Vowels and consonants being thus defined, it will be necessary in the next place to arrange them into such classes, as their similitudes and specific differences seem to require.

12. Letters, therefore, are naturally divisible into vowels and consonants.

13. The vowels are *a*, *e*, *i*, *o*, *u;* and *y* and *w* when ending a syllable.

14. The consonants are *b*, *c*, *d*, *f*, *g*, *h*, *j*, *k*, *l*, *m*, *n*, *p*, *q*, *r*, *s*, *t*, *v*, *x*, *z*, and *y* and *w* when beginning a syllable.

15. The vowels may be subdivided into such as are simple and pure, and into such as are compound and impure. The simple or pure vowels are such as require only one conformation of the organs to form them, and no motion in the organs while forming.

16. The compound or impure vowels are such as require more than one conformation of the organs to form them, and a motion in the organs while forming. These observations premised, we may call the following scheme:

An analogical Table of the Vowels.

a	pa-per	Simple or pure vowels
a	fa-ther	
a	wa-ter	
e	me-tre	
o	no-ble	
oo	coo	
i	ti-tle	compound or impure vowels
y	cy-der	
u	lu-cid	
w	pow-er	

* An ignorance of the real composition of *u* and a want of knowing that it partook of the nature of a consonant, has occasioned a great diversity and uncertainty in prefixing the indefinite article *an* before it. Our ancestors, judging of its nature from its name, never suspected that it was not a pure vowel, and constantly prefixed the article *an* before nouns beginning with this letter: an *union*, *an useful book*. They were confirmed in this opinion by finding the *an* always adapted to the short *u*, as *an umpire*, *an umbrella*, without ever dreaming that the short *u* is a pure vowel, and essentially different from the long one. But the moderns, not resting in the name of a letter, and consulting their ears rather than their eyes, have frequently placed the *a* instead of *an* before the long *u*, and we have seen *a union*, *a university*, *a useful book*, from some of the most respectable pens of the present age. Nor can we doubt a moment of the propriety of this orthography, when we reflect that these words actually begin to the ear with *y*, and might be spelled *younion*, *youniversity*, *youseful*, and can therefore no more admit of *an* before them than *year* and *youth*.

Diphthongs and Triphthongs enumerated.

17. Two vowels forming but one syllable are generally called a diphthong; and three a triphthong. These are the following:

ae Cæsar	*eo* people	*oe* œconomy	*aye* (for ever)
ai aim	*eu* feud	*oi* voice	*eau* beauty
ao gaol	*ew* jewel	*oo* moon	*eou* plenteous
au taught	*ey* they	*ou* found	*ieu* adieu
aw law	*ia* poniard	*ow* now	*iew* view
ea clean	*ie* friend	*y* boy	
ee reed	*io* passion	*ue* mansuetude	
ei ceiling	*oa* coat	*ui* languid	*oeu* manœuvre.

Consonants enumerated and distinguished into Classes.

18. The consonants are divisible into mutes, semivowels, and liquids.

19. The mutes are such as emit no sound without a vowel, as *b*, *p*, *t*, *d*, *k*, and *c* and *g* hard.

20. The semi-vowels are such as emit a sound without the concurrence of a vowel, as *f*, *v*, *s*, *z*, *x*, *g* soft or *j*.

21. The liquids are such as flow into, or unite easily with the mutes, as *l*, *m*, *n*, *r*.

22. But, besides these, there is another classification of the consonants, of great importance to a just idea of the nature of the letters, and that is, into such as are sharp or flat, and simple or aspirated.

23. The sharp consonants are *p*, *f*, *t*, *s*, *k*, *c* hard.

24. The flat consonants are, *b*, *v*, *d*, *z*, *g* hard.

25. The simple consonants are those which have always the sound of one letter unmixed with others, as *b*, *p*, *f*, *v*, *k*, *g* hard, and *g* soft, or *j*.

26. The mixed or aspirated consonants are those which have sometimes a hiss or aspiration joined with them, which mingles with the letter, and alters its sound, as *t* in *motion*, *d* in *soldier*, *s* in *mission*, and *z* in *azure*.

27. There is another distinction of consonants arising either from the seat of their formation, or from those organs which are chiefly employed in forming them. The best distinction of this kind seems to be that which divides them into labials, dentals, gutturals, and nasals.

28. The labials are *b*, *p*, *f*, *v*. The dentals are *t*, *d*, *s*, *z*, and soft *g* or *j*. The gutturals are *k*, *q*, *c*, hard, and *g* hard. The nasals are *m*, *n*, and *ng*.

29. These several properties of the consonants may be exhibited at one view in the following table, which may be called

An analogical Table of the Consonants.

Mute labials	Sharp *p*, *pomp*			labio-nasal
	Flat *b*, *bomb*			
Hissing labials	Sharp *f*, *if*			liquid *m*
	Flat *v*, *of*			
Mute dentals	Sharp *t*	*tat*	*etch*	dento-nasal
	Flat *d*	*dad*	*edge* or *j*	liquid *n*
Hissing dentals	Sharp *s*	*say*	*esh passion*	dental
	Flat *z*	*as*	*ezhe vision*	liquid *l*
Lisping dentals	Sharp *eth*, *death*			
	Flat *the*, *scythe*			
Gutturals	Sharp *k*, *kick*			guttural
	Flat *g* hard, *gag*			liquid *r*

Dento-guttural or nasal *ng*, *hang*.

30. Vowels and consonants being thus defined and arranged, we are the better enabled to enter upon an inquiry into their different powers, as they are differently combined with each other. But previous to this, that nothing may be wanting to form a just idea of the first principles of pronunciation, it may not be improper to show the organic formation of each other.

Organic Formation of the Letters.

31. Though I think every mechanical account of the organic formation of the letters rather curious than useful, yet, that nothing which can be presented to the eye may be wanting to inform the ear, I shall in this follow those who have been at the pains to trace every letter to its seat, and make us, as it were, touch the sounds we articulate.

Organic Formation of the vowels.

32. It will be necessary to observe, that there are three long sounds of the letter *a*, which are formed by a greater or less expansion of the internal parts of the mouth.

33. The German *a*, heard in *ball*, *wall*, &c. is formed by a strong and grave expression of the breath through the mouth, which is open nearly in a circular form, while the tongue, contracting itself to the root, as to make way for the sound, almost rests upon the under jaw.

34. The Italian *a*, heard in *father*, closes the mouth a little more than the German *a;* and by raising the lower jaw, widening the tongue, and advancing it a little nearer to the lips, renders its sound less hollow and deep.

35. The slender *a*, or that heard in *lane*, is formed in the mouth still higher than the last; and in pronouncing it the lips, as if to give it a slender sound, dilate their aperture horizontally; while the tongue, to assist this narrow emission of breath, widens itself to the cheeks, raises itself nearer the palate, and by these means a less hollow sound than either of the former is produced.

36. The *e* in *e-qual*, is formed by dilating the tongue a little more, and advancing it nearer to the palate and the lips, which produces the slenderest vowel in the language: for the tongue is, in the formation of this letter, as close to the palate as possible, without touching it; as the moment the tongue touches the palate, the squeezed sound of *ee* in *thee* and *meet* is formed, which, by its description, must partake of the sound of the consonant *y*.

37. The *i* in *i-dol*, is formed by uniting the sound of the Italia *a* in *father* and the *e* in *e-qual*, and pronouncing them as closely together as possible. See Directions to Foreigners.

38. The *o* in *o-pen*, is formed by nearly the same position of the organs as the *a* in *water;* but the tongue is advanced a little more into the middle of the mouth; the lips are protruded, and form a round aperture like the form of the letter, and the voice is not so deep in the mouth as when *a* is formed, but advances to the middle or hollow of the mouth.

39. The *u* in *u-nit* is formed by uniting the squeezed sound *ee* to a simple vowel sound, heard in *woo* and *coo;* the *oo* in these words is formed by protruding the lips a little more than in *o*, forming a smaller aperture with them, and instead of swelling the voice in the middle of the mouth, bringing it as forward as possible to the lips.

40. *Y* final in *try*, is formed like *i:* and *w* final in *now*, like the *oo*, which has just been described.

In this view of the organic formation of the vowels we find that *a*, *e*, and *o*, are the only simple or pure vowels: that *i* is a diphthong, and that *u* is a semi-consonant. If we were inclined to contrive a scale for measuring the breadth or narrowness, or as others term it, the openness or closeness of the vowels, we might begin with *e* open, as Mr. Elphinston calls it, and which he announces to be the closest of all the vocal powers. In the pronunciation of this letter we find the aperture of the mouth extended on each side; the lips almost closed, and the sound issuing horizontally. The slender *a* in *waste*, opens the mouth a little wider. The *a* in *father*, opens the mouth still more without contracting the corners. The German *a* heard in *wall*, not only opens the mouth wider than the former *a*, but contracts the corners of the mouth so as to make the aperture approach nearer to a circle, while the *o* opens the mouth still more, and contracts the corners so as to make it the *os rotundum*, a picture of the letter it sounds. If therefore the other vowels were, like *o*, to take their forms from the aperture of the mouth in pronouncing them, the German *a* ought necessarily to have a figure as nearly approaching the *o* in form as it does in sound; that is, it ought to have that elliptical form which approaches nearest to the circle; as the *a* of the Italians, and that of the English in *father*, ought to form ovals, in exact proportion to the breadth of their sounds; the English *a* in *waste* ought to have a narrower oval; the *e* in *the* ought to have the curve of a parabola, and the squeezed sound of *ee* in *seen* a right line; or to reduce these lines to solids, the *o* would be a perfect globe, the German *a* an oblate spheroid like the figure of the earth, the Italian like an egg, the English slender *a* a Dutch skittle, the *e* a rolling pin, and the double *e* a cylinder.

Organic Formation of the Consonants.

41. The best method of shewing the organic formation of the consonants will be to class them into such pairs as they naturally fall into, and then by describing one, we shall nearly describe its fellow; by which means the labour will be lessened, and the nature of the consonants better perceived. The consonants that fall into pairs are the following:

p	*f*	*t*	*s*	*sh*	*th*	*k*	*ch*	*chair*
b	*v*	*d*	*z*	*zh*	*dh*	*g*	*j*	*jail.*

42. Holder, who wrote the most elaborately and philosophically upon this subject, tells us, in his *Elements of Speech*, that when we only whisper we cannot distinguish the first rank of these letters from the second. It is certain the difference between them is very nice; the upper letters seeming to have only a smarter, brisker appulse of the organs than the latter; which may not improperly be distinguished by sharp and flat. The most marking distinction between them will be found to be a sort of guttural murmur, which precedes the latter letters when we wish to pronounce them forcibly, but not the former. Thus if we close the lips, and put the fingers on them to keep them shut, and strive to pronounce the *p*, no sound at all will be heard; but in striving to pronounce the *b* we shall find a murmuring sound from the throat, which seems the commencement of the letter; and if we do but stop the breath by the appulse of the organs, in order to pronounce with greater force, the same may be observed of the rest of the letters.

43. This difference in the formation of these consonants may be more distinctly perceived in the *s* and *z* than in any other of the letters; the former is sounded by the simple issue of the breath between the teeth, without any vibration of it in the throat, and may be called a hissing sound: while the latter cannot be formed without generating a sound in the throat, which may be called a vocal sound. The upper rank of letters, therefore, may be called breathing consonants; and the lower vocal ones.

44. These observations premised, we may proceed to describe the organic formation of each letter.

45. *P* and *B* are formed by closing the lips till the breath is collected, and then letting it issue by forming the vowel *e*.

46. *F* and *V* are formed by pressing the upper teeth upon the under lip, and sounding the vowel *e* before the former and after the latter of these letters.

47. *T* and *D* are formed by pressing the tip of the tongue to the gums of the upper teeth, and then separating them, by pronouncing the vowel *e*.

48. *S* and *Z* are formed by placing the tongue in the same position as in *T* and *D*, but not so close to the gums as to stop

the breath: a space is left between the tongue and the palate for the breath to issue, which forms the hissing and buzzing sound of these letters.

49. *SH* heard in *mission*, and *zh* in *evasion*, are formed in the same seat of sound as *s* and *z;* but in the former, the tongue is drawn a little inwards, and at a somewhat greater distance from the palate, which occasions a fuller effusion of breath from the hollow of the mouth, than in the latter; which are formed nearer to the teeth.

50. *TH* in *think*, and the same letters in *that*, are formed by protruding the tongue between the fore teeth, pressing it against the upper teeth, and at the same time endeavouring to sound the *s* or *z;* the former letter to sound *th* in *think*, and the latter to sound *th* in *that*.

51. *K* and *G* hard are formed by pressing the middle of the tongue to the roof of the mouth near the throat, and separating them a little smartly to form the first, and more gently to form the last of these letters.

52. *CH* in *chair*, and *J* in *jail*, are formed by pressing *t* to *sh* and *d* to *zh*.

53. *M* is formed by closing the lips, as in *P* and *B*, and letting the voice issue by the nose.

54. *N* is formed by resting the tongue in the same position as, in *T* or *D*, and breathing through the nose, with the mouth open.

55. *L* is formed by nearly the same position of the organs as *t* and *d*, but more with the tip of the tongue, which is brought a little forwarder to the teeth, while the breath issues from the mouth.

56. *R* is formed by placing the tongue nearly in the position of *t*, but at such a distance from the palate as suffers it to jarr against it, when the breath is propelled from the throat to the mouth.

57. *NG* in *ring*, *sing*, &c. is formed in the same seat of sound as hard *g;* but while the middle of the tongue presses the roof of the mouth, as in *G*, the voice passes principally through the nose, as in *N*.

58. *Y* consonant is formed by placing the organs in the position of *e*, and squeezing the tongue against the roof of the mouth which produces *ee*, which is equivalent to initial *y*. (36).

59. *W* consonant is formed by placing the organs in the position of *oo*, described under *u*, and closing the lips a little more, in order to propel the breath upon the succeeding vowel which it articulates.

60. In this sketch of the formation and distribution of the consonants, it is curious to observe on how few radical principles the almost infinite variety of combination in language depends. It is with some degree of wonder we perceive that the slightest aspiration, the almost insensible inflection of nearly similar sounds, often generate the most different and opposite meanings. In this view of nature, as in every other, we find uniformity and variety very conspicuous. The single *fiat*, at first impressed on the chaos, seems to operate on languages; which, from the simplicity and paucity of their principles, and the extent and power of their combinations, prove the goodness, wisdom, and omnipotence, of their origin.

61. This analogical association of sounds is not only curious, but useful: it gives us a comprehensive view of the powers of the letters, and from the small number that are radically different, enables us to see the rules on which their varieties depend. It discovers to us the genius and propensities of several languages and dialects, and, when authority is silent, enables us to decide agreeably to analogy.

62. The vowels, diphthongs, and consonants, thus enumerated and defined, before we proceed to ascertain their different powers as they are differently associated with each other, it may be necessary to give some account of those distinctions of sound in the same vowels which express their quantity as long or short, or their quality as open or close, or slender and broad. This will appear the more necessary as these distinctions so frequently occur in describing the sounds of the vowels, and as they are not unfrequently used with too little precision by most writers on the subject.

Of the Quantity and Quality of the Vowels.

63. The first distinction of sound that seems to obtrude itself upon us when we utter the vowels, is a long and a short sound according to the greater or less duration of time taken up in pronouncing them. This distinction is so obvious as to have been adopted in all languages, and is that to which we annex clearer ideas than to any other: and though the short sounds of some vowels have not in our language been classed with sufficient accuracy with their parent long ones: yet this had bred but little confusion, as vowels long and short are always sufficiently distinguishable; and the nice appropriation of short sounds to their specific long ones, is not necessary to our conveying what sound we mean, when the letter to which we apply these sounds is known, and its power agreed upon.

64. The next distinction of vowels into their specific sounds, which seems to be the most generally adopted, is that which arises from the different apertures of the mouth in forming them. It is certainly very natural, when we have so many more simple sounds than we have characters by which to express them, to distinguish them by that which seems their organic definition; and we accordingly find vowels denominated by the French, *ouvert and ferme*, *by the Italians*, *aperto* and *chiuso;* and by the English, *open* and *shut*.

65. But whatever propriety there may be in the use of these terms in other languages, it is certain they must be used with caution in English for fear of confounding them with long and short. Dr. Johnson and other grammarians call the *a* in *father* the open *a;* which may, indeed, distinguish it from the slender *a* in *paper;* but not from the broad *a* in *water*, which is still more open. Each of these letters has a short sound, which may be called a shut sound; but the long sounds cannot be so properly denominated open as more or less broad: that is, the *a* in *paper*, the slender sound; the *a* in *father*, the broadish or middle sound; and the *a* in *water*, the broad sound. The same may be observed of the *o*. This letter has three long sounds, heard in *move*, *note*, *nor;* which graduate from slender to broadish, and broad like the *a*. The *i* also in *mine* may be called the broad *i*, and that in *machine* the slender *i;* though each of them are equally long; and though these vowels that are long may be said to be more or less open according to the different apertures of the mouth in forming them; yet the short vowels cannot be said to be more or less shut. For as short always implies shut (except in verse), though long does not always imply open, we must be careful not to confound long and open, and close and shut when we speak of the quantity and quality of the vowels. The truth of it is; all vowels, either terminate a syllable, or are united with a consonant. In the first case, if the accent be on the syllable the vowel is long, though it may not be open: in the second case, where a syllable is terminated by a consonant, except that consonant be *r*, whether the accent be on the syllable or not, the vowel has its short sound, which, compared with its long one, may be called shut. But as no vowel can be said to be shut that is not joined to a consonant, all vowels that end syllables may be said to be open whether the accent be on them or not. (550) (551).

66 But though the terms long and short, as applied to vowels, are pretty generally understood, an accurate ear will easily perceive that these terms do not always mean the long and short sounds of the respective vowels to which they are applied; for if we choose to be directed by the ear in denominating vowels, long or short, we must certainly give these appellations to those sounds only which have exactly the same radical tone, and differ only in the long or short emission of that tone. Thus measuring the sounds of the vowels by this scale, we shall find that the long *I* and *y* have properly no short sounds but such as seem essentially distinct from their long ones; and that

the short sound of these vowels is no other than the short sound of *e*, which is the latter letter in the composition of these diphthongs.

67. The same want of correspondence in classing the long and short vowels we find in *a*, *e*, *o*, and *u*; for as the *e* in *theme* does not find its short sound in the same letter in *them*, but in the *i* in *him*; so the *e* in *them* must descend a step lower into the province of *a* for its long sound in *tame*. The *a* in *carry* is not the short sound of the *a* in *care*, but of that in *car*, *father*, &c. as the short broad sound of the *a* in *want* is the true abbreviation of that in *wall*. The sound of *o* in *don*, *gone*, &c. is exactly correspondent to the *a* in *swan*, and finds its long sound in the *a* in *wall*, or the diphthong *aw* in *dawn*, *lawn*, &c.; while the short sound of the *o* in *tone* is nearly that of the same letter in *ton*, (a weight,) and corresponding with what is generally called the short sound of *u* in *tun*, *gun*, &c. as the long sound of *u* in *pule* must find its short sound in the *u* in *pull*, *bull*, &c.; for this vowel, like the *i* and *y*, being a diphthong, its short sound is formed from the latter part of the letter equivalent to double *o*; as this word, if spelled according to the sound, might be written *peoole*.

68. Another observation preparatory to a consideration of the various sounds of the vowels and consonants seems to be the influence of the accent: as the accent or stress which is laid upon certain syllables has so obvious an effect upon the sounds of the letters, that unless we take accent into the account, it will be impossible to reason rightly upon the proper pronunciation of the Elements of Speech.

Of the Influence of Accent on the Sounds of the Letters.

69. It may be first observed, that the exertion of the organs of speech necessary to produce the accent or stress, has an obvious tendency to preserve the letters in their pure and uniform sound, while the relaxation or feebleness which succeeds the accent as naturally suffers the letters to slide into a somewhat different sound a little easier to the organs of pronunciation. Thus the first *a* in *cabbage* is pronounced distinctly with the true sound of that letter, while the second *a* goes into an obscure sound bordering on the *i* short; the slenderest of all sounds: so that *cabbage* and *village* have the *a* in the last syllable scarcely distinguishable from the *e* and *i* in the last syllables of *college* and *vestige*.

70. In the same manner the *a*, *e*, *i*, *o*, and *y*, coming before *r* in a final unaccented syllable, go into an obscure sound so nearly approaching to the short *u*, that if the accent were carefully kept upon the first syllables of *liar*, *lier*, *elixir*, *mayor*, *martyr*, &c. these words, without any perceptible change in the sound of their last syllables, might all be written and pronounced, *liur*, *liur*, *elixur*, *mayur*, *martur*, &c.

71. The consonants also are no less altered in their sound by the position of the accent than the vowels. The *k* and *s* in the composition of *x*, when the accent is on them, in *exercise*, *execute*, &c. preserve their strong pure sound; but when the accent is on the second syllable, in *exact*, *exonerate*, &c. these letters slide into the duller and weaker sounds of *g* and *z*, which are easier to the organs of pronunciation. Hence not only the soft *c* and the *s*, go into *sh*, but even the *t* before a diphthong slides into the same letters when the stress is on the preceding syllable. Thus in *society* and *satiety* the *c* and *t* preserve their pure sound, because the syllables *ci* and *ti* have the accent on them: but in *social* and *satiate* these syllables come after the stress, and from the feebleness of their situation naturally fall into the shorter and easier sound, as if written *soshial* and *sashiate*. See the word *satiety*.

A

72. A has three long sounds and two short ones.

73. The first sound of the first letter in our alphabet is that which among the English is its name. This is what is called by most grammarians its slender sound (35); we find it in the words *lade*, *spade*, *trade*, &c. In the diphthong *ai*, we have exactly the same sound of this letter, as in *pain*, *gain*, *stain*, &c. and sometimes in the diphthong *ea*, as *bear*, *swear*, *pear*, &c. nay, twice we find it, contrary to every rule of pronunciation, in the words *where* and *there*, and once in the anomalous diphthong *ao* in *gaol*. It exactly corresponds to the sound of the French *e* in the beginning of the words *être* and *tête*.

74. The long slender *a* is generally produced by a silent *e* at the end of the syllable; which *e* not only keeps one single intervening consonant from shortening the preceding vowel, but sometimes two: thus we find the mute *e* makes of *rag*, *rage*, and keeps the *a* open even in *range*, *change*, &c: *hat*, with the mute *e* becomes *hate*, and the *a* continues open, and, perhaps, somewhat longer in *haste*, *waste*, *paste*, &c. though it must be confessed this seems the privilege only of *a*; for the other vowels contract before the consonants *ng* in *revenge*, *cringe*, *plunge*; and the *ste* in our language is preceded by no other vowel but this. Every consonant but *n* shortens every vowel but *a* when soft *g* and *e* silent succeed; as *bilge*, *badge*, *hinge*, *sponge*, &c.

75. Hence we may establish this general rule: *A* has the long, open, slender sound, when followed by a single consonant, and *e* mute, as *lade*, *made*, *fade*, &c. The only exceptions seem to be, *have*, *are*, *gape*, and *bade*, the past time of to *bid*.

76. *A* has the same sound, when ending an accented syllable, as *pa-per*, *ta-per*, *spec-ta-tor*. The only exceptions are *fa-ther*, *ma-ster*, *wa-ter*.

77. As the short sound of the long slender *a* is not found under the same character, but in the short *e* (as may be perceived by comparing *mate* and *met*) we proceed to delineate the second sound of this vowel, which is that heard in *father*, and is called by some the open sound (34); but this can never distinguish it from the deeper sound of the *a* in *all*, *ball*, &c. which is still more open: by some it is styled the middle sound of *a*, as between the *a* in *pale*, and that in *wall*. It answers nearly to the Italian *a* in *Toscano*, *Romana*, &c. or to the final *a* in the naturalized Geek words *papa* and *mama*; and in *baa*; the word adopted in almost all languages to express the cry of sheep. We seldom find the long sound of this letter in our language, except in monosyllables ending with *r* as *far*, *tar*, *mar*, &c. and in the word *father*. There are certain words from the Latin, Italian, and Spanish languages, such as *lumbago*, *bravado*, *tornado*, &c. which are sometimes heard with this sound of *a*; but except in *bravo*, heard chiefly at the theatres, the English sound of *a* is preferable in all these words.

78. The long sound of the middle or Italian *a* is always found before *r* in monosyllables, as *car*, *far*, *mar*, &c. before the liquids *lm*; whether the latter only be pronounced as in *psalm*, or both, as in *psalmist*; sometimes before *lf*, and *lve*, as *calf*, *half*, *calve*, *halve*, *salve*, &c. and lastly before the sharp aspirated dental *th* in *bath*, *path*, *lath*, &c. and in the word *father*: this sound of the *a* was formerly more than at present found before the nasal liquid *n*, especially when succeeded by *t* or *c* as *grant*, *dance*, *glance*, *lance*, *France*, *chance*, *prance*, *slant*, *slander*, &c.

79. The hissing consonant *s* was likewise a sign of this sound of the *a*, whether double, as in *glass*, *grass*, &c. or accompanied by *t*, as in *last*, *fast*, &c. but this pronunciation of *a* seems to have been for some years advancing to the short sound of this letter, as heard in *hand*, *land*, *grand*, &c. and pronouncing the *a* in *after*, *answer*, *basket*, *plant*, *mast*, &c. as long as in *half*, *calf*, &c. borders very closely on vulgarity: it must be observed, however, that the *a* before *n* in monosyllables, and at the end of words, was anciently written with *u* after it, and so probably pronounced as broad as the German *a*. For Dr. Johnson observes, "many words pronounced with *a* broad, were "anciently written with *au*, as *fault*, *mault*; and we still write "*fault*, *vault*. This was probably the Saxon sound, for it is yet "retained in the northern dialects, and in the rustic pronuncia- "tion, as *maun* for *man*, *haund* for *hand*." But since the *u* has vanished, the *a* has been gradually pronounced slenderer and

shorter, till now almost every vestige of the ancient orthography seems lost; though the termination *mand* in *command*, *demand*, &c. formerly written *commaund*, *demaund*, still retains the long sound inviolably.*

80. As the mute *l* in *calm*, *psalm*, *calf*, *half*, &c. seems to lengthen the sound of this letter, so the abbreviation of some words by apostrophe seems to have the same effect. Thus when, by impatience, that grand corrupter of manners, as well as language, the *no* is cut out of the word *cannot*, and the two syllables reduced to one, we find the *a* lengthened to the Italian or middle *a*, as *cannot*, *can't; have not*, *han't; shall not*, *sha'n't*, &c. This is no more than what the Latin language is subject to; it being a known rule in that tongue, that when, by composition or otherwise, two short syllables become one, that syllable is almost always long, as *alius* has the penultimate long because it comes from *aliius*, and the two vowels in the last of *Orpheus* make one long syllable, as formed of *Orpheüs*, where they make two short ones.

81. The short sound of the middle or Italian *a*, which is generally confounded with the short sound of the slender *a*, is the sound of this vowel in *man*, *pan*, *tan*, *mat*, *hat*, &c. we generally find this sound before any two successive consonants but those excepted in the foregoing remarks, even when it comes before an *r*, if a vowel follow, or the *r* be double; for if this consonant be doubled, in order to produce another syllable, the long sound becomes short, as *mar*, *marry; tar*, *tarry; car*, *carry*, &c. where we find the monosyllables have the long, and the dissyllable the short sound; but if *a* come before *r*, followed by another consonant, it has its long sound, as in *part*, *partial*, &c.

82. The only exception to this rule is, in adjectives derived from substantives ending in *r:* for in this case the *a* continues long, as in the primitive. Thus the *a* in *starry*, or full of stars, is as long as in *star;* and the *a* in the adjective *tarry*, or besmeared with tar, is as long as in the substantive *tar*, though short in the word *tarry*, (to stay).

83. The third long sound of *a* is that which we more immediately derive from our maternal language the Saxon; but which at present we use less than any other: this is the *a* in *fall*, *ball*, *all* (33): we find a correspondent sound to this *a* in the diphthongs *au* and *aw;* as *laud*, *law*, *saw*, &c. though it must here be noted, that we have improved upon our German parent, by giving a broader sound to this letter in these words than the Germans themselves would do, were they to pronounce them.

84. The long sound of the deep broad German *a* is produced by *ll* after it, as in *all*, *wall*, *call;* or indeed by one *l*, and any other consonant except the mute labials *p*, *b*, *f*, and *v*, and the sharp and flat gutturals *c* or *k* and *g;* as *salt*, *bald*, *false*, &c. The exceptions to this rule are generally words from the Arabic and Latin languages; as *Alps*, *Albion*, *asphaltic*, *salve*, *calculate*, *amalgamate*, *Alcoran*, and *Alfred*, &c.; the two last of which may be considered as ancient proper names which have been frequently latinized, and by this means have acquired a slenderer sound of *a*. This rule, however, must be understood of such syllables only as have the accent on them; for when *al*, followed by a consonant, is in the first syllable of a word, having the accent on the second, it is then pronounced as in the first syllables of *al-ley*, *val-ley*, &c. as *alternate*, &c. Our modern orthography, which has done its utmost to perplex pronunciation, has made it necessary to observe, that every word compounded of a monosyllable with *ll*, as *albeit*, *also*, *almost*, *downfal*, &c. must be pronounced as if the two liquids were still remaining, notwithstanding our word-menders have wisely taken one away, to the destruction both of sound and etymology; for, as Mr. Elphinston shrewdly observes, " Every reader, young and " old, must now be so sagacious an analyst as to discern at once " not only what are compounds and what their simples, but that " *al* in composition is equal to *all* out of it; or in other words, that " it is both what it is, and what it is not. Prin. Eng. Language. Vol. 1. page 60. See No. 404.

85. The *w* has a peculiar quality of broadening this letter, even when prepositive: this is always the effect, except when the vowel is closed by the sharp or flat guttural *k* or *g*, *x*, *ng*, *nk*, or the sharp labial *f*, as *wax*, *waft*, *thwack*, *twang:* thus we pronounce the *a* broad, though short, in *wad*, *wan*, *want*, *was*, *what*, &c. and though other letters suffer the *a* to alter its sound before *ll*, when one of these letters goes to the formation of the latter syllable, as *tall*, *tal-low: hall*, *hal-low: call*, *cal-low*, &c. yet we see *w* preserve the sound of this vowel before a single consonant, as *wal-low*, *swal-low*, &c.

86. The *q* including the sound of the *w*, and being no more than this letter preceded by *k*, ought, according to analogy, to broaden every *a* it goes before like the *w:* thus *quantity* ought to be pronounced as if written *kwontity*, and *quality* should rhyme with *jollity:* instead of which we frequently hear the *w* robbed of its rights in its proxy; and *quality* so pronounced as to rhyme with *legality:* while to rhyme quantity, according to this affected mode of pronouncing it, we must coin such words as *plantity* and *consonantity*. The *a* in *Quaver* and *Equator* is an exception to this rule, from the preponderancy of another which requires *a*, ending a syllable under the accent, to have the slender sound of that letter; to which rule, *father*, *master*, and *water*, are the only exceptions.

87. The short sound of this broad *a* is heard when it is preceded by *w*, and succeeded by a single consonant in the same syllable, as *wal-low*, *swal-low*, &c. or by two consonants in the same syllable, as *want*, *wast*, *wasp*, &c.; but when *l* or *r* is one of the consonants, the *a* becomes long, as *walk*, *swarm*, &c.

Irregular and unaccented Sounds.

88. But besides the long and short sounds common to all the vowels, there is a certain transient indistinct pronunciation of some of them, when they are not accented, that cannot be so easily settled: when the accent is not upon it, no vowel is more apt to run into this imperfect sound than the *a:* thus the particle *a* before participles, in the phrases *a*-going, *a*-walking, *a*-shooting, &c. seems, says Dr. Lowth, to be the true and genuine preposition *on*, a little disguised by familiar use and quick pronunciation: the same indistinctness, from rapidity and coincidence of sound, has confounded the pronunciation of this mutilated preposition to the ear, in the different questions *what's o'clock*, when we would know the hour, and *what's a'clock* when we would have the description of that horary machine; and if the accent be kept strongly on the first syllable of the word *tolerable*, as it always ought to be, we find scarcely any distinguishable difference to the ear, if we substitute *u* or *o* instead of *a* in the penultimate syllable. Thus *tolerable*, *toleroble*, and *toleruble*, are exactly the same word to the ear, if pronounced without premeditation or transposing the accent for the real purpose of distinction; and *inwards*, *outwards*, &c. might, with respect to sound, be spelt *inwurds*, *outwurds*, &c. Thus the word

* Since the first publication of this Dictionary the Public have been favoured with some very elaborate and judicious observations on English pronunciation by Mr. Smith, in a Scheme of a French and English Dictionary. In this work he departs frequently from my judgment, and particularly in the pronunciation of the letter *a*, when succeeded by *fs*, *st*, or *n*, and another consonant; as *pafs*, *last*, *chance*, &c. to which he annexes the long sound of *a* in *father*. That this was the sound formerly, is highly probable from its being still the sound given it by the vulgar who are generally the last to alter the common pronunciation; but that the short *a* in these words is now the general pronunciation of the polite and learned world seems to be candidly acknowledged by Mr. Smith, himself: and as every correct ear would be disgusted at giving the *a* in these words the full long sound of the *a* in *father*, any middle sound ought to be discountenanced, as tending to render the pronunciation of a language obscure and indefinite. (163).

Ben Jonson in his Grammar classes *salt*, *malt*, *balm*, and *calm*, as having the same sound of *a;* and *aunt*, as having the same diphthongal sound as *audience*, *author*, *law*, *saw*, *draw*, &c.

tian, when not under the accent, might be written *mun*, in *nobleman*, *husbandman*, *woman*, &c. The same observation will hold good in almost every final syllable where *a* is not accented: as *medal*, *dial*, *giant*, *bias*, &c. *defiance*, *temperance*, &c. (92)

89. There is a corrupt, but a received, pronunciation of this letter in the words *any*, *many*, *Thames*, where the *a* sounds like short *e*, as if written *enny*, *menny*, *Tems*. *Catch*, among Londoners, seems to have degenerated into *Ketch*.

90. The *a* goes into a sound approaching the short *i*, in the numerous termination in *age*, when the accent is not on it, as *cabbage*, *village*, *courage*, &c. and are pronounced nearly as if written *cabbige*, *villige*, *courige*, &c.

91. The *a* in the numerous termination *ate*, when the accent is not on it, is pronounced somewhat differently in different words. If the word be a substantive, or an adjective, the *a* seems to be shorter than when it is a verb: thus a good ear will discover a difference in the quantity of this letter, in *delicate* and *dedicate*, in *climate*, *primate*, and *ultimate;* and *calculate*, *regulate*, and *speculate*, where we find the nouns and adjectives have the *a* considerably shorter than the verbs. *Innate*, however, preserves the *a* as long as if the accent were on it. But the unaccented terminations in *ace*, whether nouns or verbs, have the *a* so short and obscure as to be nearly similar to the *u* in *us*: thus *palace*, *solace*, *menace*, *pinnace*, *populace*, might, without any great departure from their common sound, be written *pallus*, *sollus*, &c. while *furnace* almost changes *a* into *i*, and might be written *furniss*.

92. When the *a* is preceded by the gutturals, hard *g* or *c*, it is, in polite pronunciation, softened by the intervention of a sound like *e*, so that *card*, *cart*, *guard*, *regard*, are pronounced like *ke-ard*, *ke-art*, *ghe-ard*, *re-ghe-ard*. When the *a* is pronounced short, as in the first syllable of *cabbage*, *gander*, &c. the interposition of the *e* is very perceptible and indeed unavoidable: for though we can pronounce *guard* and *cart* without interposing the *e*, it is impossible to pronounce *garrison* and *carriage* in the same manner. This sound of the *a* is taken notice of in Steel's Grammar, page 49, which proves it is not the offspring of the present day (160); and I have the satisfaction to find Mr. Smith, a very accurate inquirer into the subject, entirely of my opinion. But the sound of the *a*, which I have found the most difficult to appreciate, is that where it ends the syllable, either immediately before or after the accent. We cannot give it any of its three open sounds without hurting the ear. Thus in pronouncing the words *abound* and *diadem*, *ay-bound*, *ah-bound*, and *aw-bound*; *di-ay-dem*, *di-ah-dem*, and *di-aw-dem*, are all improper; but giving the *a* the second or Italian sound, as *ah-bound* and *di-ah-dem*, seems the least so. For which reason I have, like Mr. Sheridan, adopted the short sound of this letter to mark this unaccented *a*. But if the unaccented *a* be final, which is not the case in any word purely English, it then seems to approach still nearer to the Italian *a* in the last syllable of *papa*, and to the *a* in *father;* as may be heard in the deliberate pronunciation of the words *idea*, *Africa*, *Delta*, &c. (88).

E.

93. The first sound of *e* is that which it has when lengthened by the mute *e* final, as in *glebe*, *theme*, &c. or ending a syllable, as *se-cre-tion*, *ad-he sion*, &c. (36).

94. The exceptions to this rule are, the words *where* and *there:* in which the first *e* is pronounced like *a*, as if written *whare*, *thare*, and the auxiliary verb *were:* where the *e* has its short sound, as if written *werr*, rhyming with the last syllable of *prefer*. *Ere* (before) sounds like *air*.

95. The short sound of *e* is that heard in *bed*, *fed*, *red*, *wed*, &c.; this sound before *r* is apt to slide into short *u:* and we sometimes hear *mercy* sounded as if written *murcy:* but this, though very near, is not the exact sound.

Irregular and unaccented Sounds.

96. The *e* at the *end* of the monosyllables *be*, *he*, *me*, *we*, is pronounced *ee;* as if written *bee*, *hee*, &c. It is silent at the end of words purely English, but is pronounced distinctly at the end of some words from the learned languages, as *epitome*, *simile*, &c.

97. The first *e* in the poetic contractions; *e'er* and *ne'er*, is pronounced like *a*; as if written *air* and *nair*.

98. The *e* in *her* is pronounced nearly like short *u;* and as we hear it in the unaccented terminations of *writer*, *reader*, &c. pronounced as if written *writur*, *readur*, where we may observe that the *r* being only a jar, and not a definite distinct articulation like the other consonants, instead of stopping the vocal efflux of voice, lets it imperfectly pass, and so corrupts and alters the true sound of the vowel. The same may be observed of the final *e* after *r* in words ending in *cre*, *gre*, *tre*, where the *e* is sounded as if it were placed before the *r* as in *lucre*, *maugre*, *theatre*, &c. pronounced *lukur*, *maugur*, *theatur*, &c. See No. 418. It may be remarked, that though we ought cautiously to avoid pronouncing the *e* like *u* when under the accent, it would be *nimis Attice*, and border too much on affectation of accuracy to preserve this sound of *e* in unaccented syllables before *r;* and though *terrible* should never be pronounced as if written *turrible*, it is impossible without pedantry to make any difference in the sound of the last syllables of *splendour*, and *tender: sulphur* and *suffer:* or *martyr* and *garter*. But there is a small deviation from rule when this letter begins a word, and is followed by a double consonant with the accent on the second syllable: in this case we find the vowel lengthen as if the consonant were single. See Efface, Despatch, Embalm.

99. This vowel, in a final unaccented syllable, is apt to slide into the short *i:* thus *faces*, *ranges*, *praises*, are pronounced as if written *faciz*, *rangiz*, *praiziz: poet*, *covet*, *linen*, &c. as if written *poit*, *covit*, *linin*, &c. Where we may observe, that though the *e* goes into the short sound of *i*, it is exactly that sound which corresponds to the long sound of *e*. See Port Royal Grammaire Latin, page 142.

100. There is a remarkable exception to the common sound of this letter in the words *clerk*, *serjeant*, and a few others, where we find the *e* pronounced like the *a* in *dark* and *margin*. But this exception, I imagine, was, till within these few years, the general rule of sounding this letter before *r*, followed by another consonant. See Merchant. Thirty years ago every one pronounced the first syllable of *merchant* like the monosyllable *march*, and as it was anciently written *marchant*. *Service* and *servant* are still heard among the lower order of speakers, as if written *sarvice* and *sarvent:* and even among the better sort, we sometimes hear the salutation, *Sir, your sarvant;* though this pronunciation of the word singly would be looked upon as a mark of the lowest vulgarity. The proper names, *Draby* and *Berkeley*, still retain the old sound, as if written *Darby* and *Barkeley;* but even these, in polite usage, are getting into the common sound, nearly as if written *Durby* and *Burkeley*. As this modern pronunciation of the *e* has a tendency to simplify the language by lessening the number of exceptions, it ought certainly to be indulged.

101. This letter falls into an irregular sound, but still a sound which is its nearest relation, in the words, *England*, *yes*, and *pretty*, where the *e* is heard like short *i*. Vulgar speakers are guilty of the same irregularity in *engine*, as if written *ingine;* but this cannot be too carefully avoided.

102. The vowel *e* before *l* and *n* in the final unaccented syllable, by its being sometimes suppressed and sometimes not, forms one of the most puzzling difficulties in pronunciation. When any of the liquids preceded these letters, the *e* is heard distinctly as *woollen*, *flannel*, *women*, *syren;* but when any of the

other consonants come before these letters, the *e* is sometimes heard, as in *novel*, *sudden;* and sometimes not, as in *swivel*, *raven*, &c. As no other rule can be given for this variety of pronunciation, perhaps the best way will be to draw the line between those words where *e* is pronounced, and those where it is not; and this, by the help of the Rhyming Dictionary, I am luckily enabled to do. In the first place, then, it may be observed, the *e* before *l*, in a final unaccented syllable, must always be pronounced distinctly, except in the following words: *shekel*, *weasel*, *ousel*, *nousel*, (better written *nuzzle*), *navel*, *ravel*, *snivel*, *rivel*, *drivel*, *shrivel*, *shavel*, *grovel*, *hazel*, *drazel*, *nozel*. These words are pronounced as if that *e* were omitted by an apostrophe, as *shek'l*, *weas'l*, *ous'l*, &c. or rather as if written *sheckle*, *weazle*, *ouzle*, &c.; but as these are the only words of this termination that are so pronounced, great care must be taken that we do not pronounce *travel*, *gravel*, *rebel*, (the substantive), *parcel*, *chapel*, and *vessel*, in the same manner; a fault to which many are very prone.

103. *E* before *n* in a final unaccented syllable, and not preceded by a liquid, must always be suppressed, except in the following words: *sudden*, *mynchen*, *kitchen*, *hyphen*, *chicken*, *ticken*, (better written *ticking*), *jerken*, *aspen*, *platen*, *paten*, *marten*, *latten*, *patten*, *leaven*, or *leven*, *sloven*, *mittens*. In these words the *e* is heard distinctly, contrary to the general rule which suppresses the *e* in these syllables, when preceded by a mute, as *harden*, *heathen*, *heaven*, as if written *hard'n*, *heathe'n*, *heav'n*, &c. nay, even when preceded by a liquid in the words *fallen*, and *stolen*, where the *e* is suppressed, as if they were written *fall'n*, and *stoll'n: garden* and *burden*, therefore, are very analogically pronounced *gard'n*, and *burd'n;* and this pronunciation ought the rather to be indulged, as we always hear the *e* suppressed in *gardener* and *burdensome*, as if written *gard'ner* and *burd'nsome*.

104. This diversity in the pronunciation of these terminations ought the more carefully to be attended to, as nothing is so vulgar and childish as to hear *swivel* and *heaven* pronounced with the *e* distinctly, or *novel* and *chicken* with the *e* suppressed. But the most general suppression of this letter is in the participial termination *ed:* here, where the *e* is not preceded by *d* or *t*, the *e* is almost universally sunk (362), and the two final consonants are pronounced in one syllable: thus *loved*, *lived*, *barred*, *marred*, are pronounced as if written *lovd*, *livd*, *bard*, *mard*. The same may be observed of this letter when silent in the singulars of nouns, or the first persons of verbs, as *theme*, *make*, &c. which form *themes*, *makes*, &c. where the last *e* is silent, and the words are pronounced in one syllable. When the noun or first person of the verb ends in *y*, with the accent on it, the *e* is likewise suppressed, as *a reply*, *two replies*, *he replies*, &c. When words of this form have the accent on the preceding syllables, the *e* is suppressed, and the *y* pronounced like short *i*, as *cherries*, *marries*, *carries*, &c. pronounced *cherriz*, *marriz*, *carriz*, &c. In the same manner, *carried*, *married*, *imbodied*, &c. are pronounced as if written *carrid*, *marrid*, *imbodid*, &c. But it must be carefully noted, that there is a remarkable exception to many of these contractions when we are pronouncing the language of Scripture: here every participial *ed* ought to make a distinct syllable, where it is not preceded by a vowel. Thus, "Who hath *believed* our report, and to whom is the arm of the Lord *revealed?*" Here the participles are both pronounced in three syllables; but in the following passage, "Whom "he did predestinate, them he also *called;* and whom he called, "them he also *justified;* and whom he *justified*, them he also "*glorified*." *Called* preserves the *e*, and is pronounced in two syllables; and *justified* and *glorified* suppress the *e*, and are pronounced in three.

I.

105. This letter is a perfect diphthong, composed of the sound of *a* in *father*, and *e* in *he*, pronounced as closely together as possible (57). When these sounds are openly pronounced they produce the familiar assent *ay;* which, by the old English dramatic writers, was often expressed by *I*. This sound is heard when the letter is lengthened by final *e*, as *time*, *thine*, or ending a syllable with the accent upon it, as *ti-tle*, *di-al;* in monosyllables ending with *nd*, as *bind*, *find*, *mind*, &c.; in three words ending with *ld*, as *child*, *mild*, *wild;* and in one very irregularly ending with *nt*, as *pint*. (37).

106. There is one instance where this letter, though succeeded by final *e*, does not go into the broad English sound like the noun *eye*, but into the slender foreign sound like *e*. This is in the word *shire*, pronounced as if written *sheer*, both when single, as a *knight of the shire;* or in composition, as in *Nottinghamshire*, *Leicestershire*, &c. This is the sound Dr. Lowth gives it in his Grammar, page 4: and it is highly probable that the simple *shire* acquired this slender sound from its tendency to become slender in the compounds, where it is at a distance from the accent, and where all the vowels have a natural tendency to become short and obscure. See SHIRE.

107. The short sound of this letter is heard in *him*, *thin*, &c. and when ending an unaccented syllable, as *van-i-ty*, *qual-i-ty*, &c. where, though it cannot be properly said to be short, as it is not closed by a consonant, yet it has but half its diphthongal sound. This sound is the sound of *e*, the last letter of the diphthong that forms the long *I;* and it is not a little surprising that Dr. Johnson should say that the short *i* was a sound wholly different from the long one. (551).

108. When this letter is succeeded by *r*, and another consonant not in a final syllable, it has exactly the sound of *e* in *vermin*, *vernal*, &c. as *virtue*, *virgin*, &c. which approaches to the sound of short *u;* but when it comes before *r*, followed by another consonant in a final syllable, it acquires the sound of *u* exactly; as *bird*, *dirt*, *shirt*, *squirt*, &c. *Mirth*, *birth*, *gird*, *girt*, *girl*, *whirl*, and *firm*, are the only exceptions to this rule; where *i* is pronounced like *e*, and as if the word were written, *merth*, *berth*, and *ferm*.

109. The letter *r*, in this case, seems to have the same influence on this word, as it evidently has on *a* and *o*. When these vowels come before double *r*, or single *r*, followed by a vowel, as in *arable*, *carry*, *marry*, *orator*, *horrid*, *forage*, &c. they are considerably shorter than when the *r* is the final letter of the word, or when it is succeeded by another consonant, as in *arbour*, *car*, *mar*, *or*, *nor*, *for*. In the same manner, the *i*, coming before either double *r*, or single *r*, followed by a vowel, preserves its pure, short sound; as in *irritate*, *conspiracy*, &c. but when *r* is followed by another consonant, or is a final letter of a word with the accent upon it, the *i* goes into a deeper and broader sound, equivalent to short *e*, as heard in *virgin*, *virtue*, &c. So *fir*, a tree, is perfectly similar to the first syllable of *ferment*, though often corruptly pronounced like *fur*, a skin. *Sir* and *stir* are exactly pronounced as if written *Sur* and *stur*. It seems, says Mr. Nares, that our ancestors distinguished these sounds more correctly. Bishop Gardiner, in his first letter to Cheke, mentions a witticism of Nicholas Rowley, a fellow Cantab. with him to this effect: "Let handsome girls be called *virgins*, plain ones *vurgins*,"

> "Si pulchra est, *virgo*, sin turpis, *vurgo* vocetur."

Which says Mr. Elphinston, may be modernised by the aid of a far more celebrated line:

> "Sweet *virgin* can alone the fair express,
> "*Fine by degrees, and beautifully less:*
> "But let the hoyden, homely, rough-hewn *vurgin*,
> "Engross the homage of a *Major Sturgeon*."

110. The sound of *i*, in this situation, ought to be the more carefully attended to, as letting it fall into the sound of *u*, where it should have the sound of *e*, has a grossness in it approaching to vulgarity. Perhaps the only exception to this rule is when the succeeding vowel is *u;* for this letter being a semi conso-

nant, has some influence on the preceding *i*, though not so much as a perfect consonant would have. This makes Mr. Sheridan's pronunciation of the *i* in *virulent*, and its compounds, like that in *virgin*, less exceptionable than I at first thought it; but since we cannot give a semi-sound of short *i* to correspond to the semi-consonant sound of *u*, I have preferred the pure sound which I think the most agreeable to polite usage.

Irregular and unaccented Sounds.

111. There is an irregular pronunciation of this letter which has greatly multiplied within these few years, and that is, the slender sound heard in *ee*. This sound is chiefly found in words derived from the French and Italian languages; and we think we show our breeding by a knowledge of those tongues, and an ignorance of our own:

> "Report of fashions in proud Italy,
> "Whose manners still our tardy apish nation
> "Limps after, in base awkward imitation."
>
> *Shakspeare, Richard II.*

When Lord Chesterfield wrote his letters to his son, the word *oblige* was, by many polite speakers, pronounced as if written *obleege*, to give a hint of their knowledge of the French language; nay, Pope has rhymed it to this sound:

> "Dreading ev'n fools, by flatterers *besieg'd*,
> "And so *obliging*, that he ne'er *oblig'd*."

But it was so far from having generally obtained, that Lord Chesterfield strictly enjoins his son to avoid this pronunciation as affected. In a few years, however, it became so general, that none but the lowest vulgar ever pronounced it in the English manner; but upon the publication of this nobleman's letters, which was about twenty years after he wrote them, his authority has had so much influence with the polite world as to bid fair for restoring the *i*, in this word, to its original rights; and we not unfrequently hear it now pronounced with the broad English *i*, in those circles where, a few years ago it would have been an infallible mark of vulgarity.

Mr. Sheridan, W. Johnston, and Mr. Barclay, give both sounds, but place the sound of *oblige* first. Mr. Scott gives both, but places *obleege* first. Dr. Kenrick and Buchanan give only *oblige;* and Mr. Elphinston, Mr Perry, and Fenning, give only *obleege;* but though this sound has lost ground so much, yet Mr. Nares, who wrote about twelve years ago, says *oblige*, still I think retains the sound of long *e*, notwithstanding the proscription of that pronunciation by the late Lord Chesterfield.

112. The words that have preserved the foreign sound of *i*, like *ee*, are the following: *Ambergris, verdegris, antique, becafico, bombasin, brasil, caffivi, capuchin, colbertine, chioppine, caprice, chagrin, chevaux de frise, critique* (for criticism), *festucine, frize, gabardine, haberdine, sordine, rugine, trephine, quarantine, routine, fascine, fatigue, intrigue, glacis, invalid, machine, magazine, marine, palanquin, pique, police, profile, recitative, tabourine, tambourine, tontine, transmarine, ultramarine.* In all these words, if for the last *i* we substitute *ee*, we shall have the true pronunciation. In *signior* the first *i* is thus pronounced. Mr. Sheridan pronounces *vertigo* and *serpigo*, with the accent on the second syllable, and the *i* long, as in *tie* and *pie*. Dr. Kenrick gives these words the same accent, but sounds the *i*, as *e* in *te* and *pea*. The latter is, in my opinion, the preferable pronunciation. But if the English ear were unbiassed by the long *i* in Latin, which fixes the accent on the second syllable, and could free itself from the slavish imitation of the French and Italians, there is little doubt but these words would have the accent on the first syllable, and that the *i* would be pronounced regularly like the short *e;* as in *Indigo* and *Portico*. See VERTIGO.

113. There is a remarkable alteration in the sound of this vowel, in certain situations, where it changes to a sound equivalent to initial *y*. The situation that occasions this change is, when the *i* precedes another vowel in an unaccented syllable, and is not preceded by any of the dentals: thus we hear *iary* in *mil-iary, bil-iary*, &c. pronounced as if written *mil-yary, bil-yary*, &c. *Min-ion* and *pin-ion*, as if written *min-yon* and *pin-yon*. In these words the *i* is so totally altered to *y*, that pronouncing the *ia* and *io* in separate syllables would be an error the most palpable; but where the other liquids or mutes precede the *i* in this situation, the coalition is not so necessary: for though the two latter syllables of *convivial, participial*, &c. are extremely prone to unite into one, they may, however, be separated, provided the separation be not too distant. The same observations hold good of *e*, as *malleable*, pronounced *mal-ya-ble*.

114. But the sound of the *i*, the most difficult to reduce to rule, is, when it ends a syllable, immediately before the accent. When either the primary or secondary accent is on this letter, it is invariably pronounced either as the long *i* in *title*, the short *i* in *tittle*, or the French *i* in *magazine*; and when it ends a syllable after the accent, it is always sounded like *e*, as *sen-si-ble, ra-ti-fy*, &c. But when it ends a syllable, immediately before the accent, it is sometimes pronounced long, as in *vi-ta-li-ty*, where the first syllable is exactly like the first of *vi-al*; and sometimes short, as in *di-gest*, where the *i* is pronounced as if the word were written *de-gest*. The sound of the *i*, in this situation, is so little reducible to rule, that none of our writers on the subject have attempted it; and the only method to give some idea of it, seems to be the very laborious one of classing such words together as have the *i* pronounced in the same manner, and observing the different combinations of other letters that may possibly be the cause of the different sounds of this.

115. In the first place, where the *i* is the only letter in the first syllable, and the accent is on the second, beginning with a consonant, the vowel has its long diphthongal sound, as in *idea, identity, idolatry, idoneous, irascible, ironical, isosceles, itinerant, itinerary. Imagine* and its compounds seem the only exceptions. But to give the inspector some idea of general usage, I have subjoined examples of these words as they stand in our different Pronouncing Dictionaries:

īdea. Sheridan, Scott, Buchanan, W. Johnston, Kenrick.
ĭdea. Perry.
īdentity. Sheridan, Scott, Buchanan, W. Johnston, Kenrick.
ĭdentity. Perry.
īdolatry. Sheridan, Scott, Buchanan, W. Johnston, Kenrick.
ĭdolatry. Perry.
īdoneus. Sheridan, Kenrick.
īrascible. Sheridan, Scott, W. Johnston, Kenrick.
ĭrascible. Perry.
īsosceles. Sheridan, Scott, Perry.
ītinerary. Sheridan, Scott, W. Johnston, Kenrick.
ĭtinerary. Perry.
ītinerant. Sheridan, Scott, W. Johnston, Nares.
ĭtinerant. Buchanan, Perry.

116. When *i* ends the first syllable, and the accent is on the second, commencing with a vowel, it generally preserves its diphthongal sound. Thus in *di-ameter, di-urnal*, &c. the first syllable is equivalent to the verb to *die*. A corrupt, foreign manner of pronouncing these words may sometimes mince the *i* into *e*, as if the words were written *de-ameter, de-urnal*, &c.; but this is disgusting to every just English ear, and contrary to the whole current of analogy. Besides, the vowel that ends, and the vowel that begins a syllable, are, by pronouncing the *i* long, kept more distinct, and not suffered to coalesce, as they are apt to do if *i* has its slender sound. This proneness of the *e*, which is exactly the slender sound of *i* to coalesce with the succeeding vowel, has produced such monsters in pronunciation as *joggraphy* and *jommetry* for *geography* and *geometry;* and *jorgics* for *georgics*. The latter of these words is fixed in this absurd pronunciation without remedy; but the two former seem recovering their right to four syllables; though Mr. Sheridan has endeavoured to deprive them of it, by spelling them with three. Hence we may observe, that those who wish to

pronounce correctly, and according to analogy, ought to pronounce the first syllable of *bi-ography*, as the verb to *buy*, and not as if written *be-ography*.

117. When *i* ends an initial syllable without the accent, and the succeeding syllable begins with a consonant, the *i* is generally slender, as if written *e*. But the exceptions to this rule are so numerous, that nothing but a catalogue will give a tolerable idea of the state of pronunciation in this point.

118. When the prepositive *bi*, derived from *bis* (twice) ends a syllable immediately before the accent, the *i* is long and broad, in order to convey more precisely the specific meaning of the syllable. Thus *bi-capsular*, *bi-cipital*, *bi-cipitous*, *bi-cornous*, *bi-corporal*, *bi-dental*, *bi-farious*, *bi-furcated*, *bi-linguous*, *bi-nocular*, *bi-pennated*, *bi-petalous*, *bi-quadrate*, have the *i* long.

119. The same may be observed of words beginning with *tri*, having the accent on the second syllable. Thus *tri-bunal*, *tri-corporal*, *tri-chotomy*, *tri-gintals*, have the *i* ending the first syllable long, as in *tri-al*. To this class ought to be added, *di-petalous* and *di-lemma*, though the *i* in the first syllable of the last word is pronounced like *e*, and as if written *de-lemma*, by Mr. Scott and Mr. Perry, but long by Mr. Sheridan, Dr. Kenrick, and Buchanan; and both ways by W. Johnston, but placing the short first. And hence we may conclude, that the verb to *bi-sect*, and the noun *bi-section*, ought to have the *i* at the end of the first syllable, pronouncing like *buy*, as Mr. Scott and Dr. Kenrick have marked it, though otherwise marked by Mr. Sheridan, Mr. Perry, and Buchanan.

120. When the first syllable is *chi*, with the accent on the second, the *i* is generally long, as *chi-ragrical*, *chi-rurgic*, *chi-rurgeon*, *chi-rographist*, *chi-rographer*, *chi-rography*. *Chi-mera* and *chi-merical* have the *i* most frequently short, as pronounced by Buchanan and Perry; though otherwise marked by Sheridan, Scott, W. Johnston, and Kenrick; and, indeed, the short sound seems now established. *Chicane* and *chicanery*, from the French, have the *i* always short; or more properly slender.

121. *Ci* before the accent has the *i* generally short, as *ci-vilian*, *ci-vility*, and, I think, *ci-licious*, and *ci-nerulent*, though otherwise marked by Mr. Sheridan. *Ci-barious* and *ci-tation* have the *i* long.

122. *Cli* before the accent has the *i* long, as *cli-macter*.

123. *Cri* before the accent has the *i* generally long, as *cri-nigerous*, *cri-terion*; though we sometimes hear the latter as if written *cre-terion*, but I think improperly.

124. *Di* before the accented syllable, beginning with a consonant, has the *i* almost always short; as *digest*, *digestion*, *digress*, *digression*, *dilute*, *dilution*, *diluvian*, *dimension*, *dimensive*, *dimidiation*, *diminish*, *diminutive*, *diploma*, *direct*, *direction*, *diversify*, *diversification*, *diversion*, *diversity*, *divert*, *divertisement*, *divertive*, *divest*, *divesture*, *divide*, *dividable*, *dividant*, *divine*, *divinity*, *divisible*, *divisibility*, *divorce*, *divulge*. To these, I think, may be added, *dicacity*, *didactic*, *dilacerate*, *dilaceration*, *dilaniate*, *dilapidation*, *dilate*, *dilatable*, *dilatability*, *dilection*, *dilucid*, *dilucidate*, *dilucidation*, *dinetical*, *dinumeration*, *diverge*, *divergent*, *divan;* though Mr. Sheridan has marked the first *i* in all these words long; some of them may undoubtedly be pronounced either way; but why he should make the *i* in *diploma* long, and W. Johnston should give it both ways, is unaccountable; as Mr. Scott, Buchanan, Dr. Kenrick, Mr. Perry, and the general usage, is against them. *Diæresis* and *dioptrics* have the *i* long, according to the general rule (116), though the last is absurdly made short by Dr. Kenrick, and the diphthong is made long in the first by Mr. Sheridan, contrary to one of the most prevailing idioms in pronunciation; which is, the shortening power of the antepenultimate accent (503). Let it not be said that the diphthong must be always long, since *Cæsarea* and *Dædalus*, have the *æ* always short

125. The long *i*, in words of this form, seems confined to the following: *Digladiation*, *dijudication*, *dinumeration*, *divaricate*, *direption*, *diruption*. Both Johnson and Sheridan, in my opinion, place the accent of the word *didascalic* improperly upon the second syllable; it should seem more agreeable to analogy to class it with the numerous terminations in *ic*, and place the accent on the penultimate syllable (509); and, in this case, the *i* in the first will be shortened by the secondary accent, and the syllable pronounced like *did* (527). The first *i* in *dimissory*, marked long by Mr. Sheridan, and with the accent on the second syllable, contrary to Dr. Johnson, are equally erroneous. The accent ought to be on the first syllable, and the *i* short, as in the adjective *dim*. See POSSESSORY.

126. *Fi* before the accent ought always to be short: this is the sound we generally give to the *i* in the first syllable of *fidelity*; and why we should give the long sound to the *i* in *fiducial* and *fiduciary*, as marked by Mr. Sheridan, I know not: he is certainly erroneous, in marking the first *i* in *frigidity* long, and equally so in placing the accent upon the last syllable of *finite*. *Finance* has the *i* short universally.

127. *Gigantic* has the *i* in the first syllable always long.

128. *Li* has the *i* generally long, as *li-bation*, *li-brarian*, *li-bration*, *li-centious*, *li-pothymy*, *li-quescent*, *li-thography*, *li-thotomy*. *Litigious* has the *i* in the first syllable always short. The same may be observed of *libidinous*, though otherwise marked by Mr. Sheridan.

129. *Mi* has the *i* generally short, as in *minority*, *militia*, *mimographer*, *minacious*, *minacity*, *miraculous;* though the four last are marked with the long *i* by Mr. Sheridan; and what is still more strange, he marks the *i* which has the accent on it long in *minatory;* though the same word, in the compound *comminatory*, where the *i* is always short, might have shewn him his error. The word *mimetic*, which, though in very good use, is neither in Johnson nor Sheridan, ought to be pronounced with the first *i* short, as if written *mim-et-ic*. The *i* is generally long in *micrometer*, *micrography*, and *migration*.

130. *Ni* has the *i* long in *nigrescent*. The first *i* in *nigrification*, though marked long by Mr. Sheridan is shortened by the secondary accent (527), and ought to be pronounced as if divided into *nig-ri-fi-cation*.

131. *Phi* has the *i* generally short, as in *philanthropy*, *philippic*, *philosopher*, *philosophy*, *philosophize;* to which we may certainly add, *philologer*, *philologist*, *philology*, *philological*, notwithstanding Mr. Sheridan has marked the *i* in these last words long.

132. *Pi* and *pli* have the *i* generally short, as *pilaster*, *pituitous*, *pilosity*, *plication*. *Piaster* and *piazza*, being Italian words, have the *i* short before the vowel, contrary to the analogy of words of this form (166), where the *i* is long, as in *pi-acular*, *pri-ority*, &c. *Piratical* has the *i* marked long by Mr. Sheridan, and short by Dr. Kenrick. The former is, in my opinion more agreeable both to custom and analogy, as the sound of the *i* before the accent is often determined by the sound of that letter in the primitive word.

133. *Pri* has the *i* generally long, as in *primeval*, *primevous*, *primitial*, *primero*, *primordial*, *privado*, *privation*.

134. *Ri* has the *i* short, as in *ridiculous*. *Rigidity* is marked with the *i* long by Mr. Sheridan, and short by Dr. Kenrick: the latter is undoubtedly right. *Rivality* has the *i* long in the first syllable, in compliment to *rival*, as *piratical* has the *i* long, because derived from *pirate*. *Rhinoceros* has the *i* long in Sheridan, Scott, Kenrick, W. Johnston, and Buchanan; and short in Perry.

135. *Si* has the *i* generally short, as *similitude*, *siriasis*, and ought certainly to be short in *silicious*, (better written *cilicious*,) though marked long by Mr. Sheridan. *Simultaneous* having the secondary accent on the first syllable, does not come under this head, but retains the *i* long, notwithstanding the shortening power of the accent it is under. (527).

136. *Ti* has the *i* short, as in *timidity*.

137. *Tri* has the *i* long, for the same reason as *bi*, which see. (118).

138. *Vicinity* has the *i* so unsettled as to puzzle the correctest speakers. The *i* is generally long in *vicarious*, notwithstanding the short *i* in *vicar*. It is long in *vibration*, from its relation to *vibrate*. *Vitality* has the *i* long, like *vital*. In *vivifick*, *vivificate*, and *viviparous*, the first *i* is long to avoid too great a sameness with the second. *Vivaceous* and *vivacity* have the *i* almost as often long as short; Mr. Sheridan, Mr. Scott, and Dr. Kenrick, make the *i* in *vivacious* long, and Mr. Perry and Buchanan short; Mr. Sheridan, Mr. Scott, and W. Johnston, make the *i* in the first of *vivacity* long, and Perry and Buchanan short: but the short sound seems less formal and most agreeable to polite usage. *Vicinity*, *vicinal*, *vicissitude*, *vituperate*, *vimineous* and *virago*, seem to prefer the short *i*, though Mr. Sheridan has marked the three last words with the first vowel long. But the diversity will be best seen by giving the authorities for all these words:

Vīcinity. Dr. Kenrick.
Vĭcinity. Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and Perry.
Vĭcinal. Mr. Sheridan.
Vĭcissitude. Mr. Sheridan, Dr. Kenrick, W. Johnston, Buchanan, and Perry.
Vītuperate. Mr. Sheridan, Dr. Kenrick, W. Johnston.
Vĭtuperate. Mr. Perry.
Vīmineous. Mr. Sheridan.
Vīrago. Mr. Sheridan, and W. Johnston.
Vĭrago. Dr. Kenrick, Mr. Scott, Buchanan, and Perry.

I have classed *vicinal* here as a word with the accent on the second syllable as it stands in Sheridan's Dictionary, but think it ought to have the accent on the first. See MEDICINAL.

139. The same diversity and uncertainty in the sound of this letter seem to reign in those final unaccented syllables which are terminated with the mute *e*. Perhaps the best way to give some tolerable idea of the analogy of the language in this point will be, to show the general rule, and mark the exceptions; though these are sometimes so numerous as to make us doubt of the rule itself; in which case, the best way will be to give a catalogue of both.

140. There is, however, one rule of very great extent, in words of this termination, which have the accent on the penultimate syllable, and that is, that the *i* in the final syllable of these words is short. Thus *servile*, *hostile*, *respite*, *deposite*, *adamantine*, *amethystine*, &c. are pronounced as if written *servil*, *hostil*, *respit*, *deposit*, &c. The only exceptions in this numerous class of words seem to be the following: *Exile*, *senile*, *edile*, *empire*, *umpire*, *rampire*, *feline*, *ferine*, *archives*; the substantives, *cònfine*, and *sùpine*, while the adjectives *saline* and *contrite* have sometimes the accent on the first, and sometimes on the last syllable; but in either case the *i* is long. *Quagmire* and *fismire* have the *i* long also; *likewise* has the *i* long, but *otherwise* has it more frequently short. *Myrrhine*, *vulpine*, and *gentile*, though marked with the *i* long by Mr. Sheridan, ought, in my opinion, to conform to the general rule and be pronounced with the *i* short. *Vulpine*, with the *i* long, is adopted by Mr. Scott; and W. Johnston, Mr. Scott, and Buchanan, agree with Mr. Sheridan in the last syllable of *gentile*; and this seems agreeable to general usage, though not to analogy. See VULPINE.

141. But when the accent is on the last syllable but two in words of this termination, the length of the vowel is not so easily ascertained.

142. Those ending in *ice* have the *i* short, except *sacrifice* and *cockatrice*.

143. Those ending in *ide* have the *i* long, notwithstanding we sometimes hear *suicide* absurdly pronounced, as if written *suicid*.

144. Those ending in *ife* have the *i* long, except *housewife*, pronounced *huzzwiff*, according to the general rule, notwithstanding the *i* in *wife*, is always long. *Midwife* is sometimes shortened in the same manner by the vulgar; and *se'nnight*, for *sevennight*, is gone irrecoverably into the same analogy; though *fortnight*, for *fourteennight*, is more frequently pronounced with the *i* long than short.

145. Those ending in *ile* have the *i* short, except *reconcile*, *chamomile*, *estipile*. *Juvenile*, *mercantile* and *puerile*, have the *i* long in Sheridan's Dictionary, and short in Kenrick's. In my opinion the latter is the much more prevalent and polite pronunciation; but *infantile* though pronounceable both ways, seem inclinable to lengthen the *i* in the last syllable. See JUVENILE.

146. In the termination *ime*, *pantomime* has the *i* long, rhyming with *time*; and *maritime* has the *i* short, as if written *maritim*.

147. Words in *ine* that have the accent higher than the penultimate syllable, have the quantity of *i* so uncertain, that the only method to give an idea of it will be to exhibit a catalogue of words where it is pronounced differently.

148. But first it may not be improper to see the different sounds given to this letter in some of the same words by different orthöepists:

Columbīne. Sheridan, Nares, W. Johnston.
Columbĭne. Kenrick, Perry.
Saccharīne. Sheridan, Nares.
Saccharĭne. Kenrick, Perry.
Saturnīne. Sheridan, Nares, Buchanan.
Saturnine. Kenrick, Perry.
Metallīne. Kenrick.
Metallĭne. Sheridan, W. Johnston, Perry.
Crystallīne. Kenrick.
Crystallĭne. Sheridan, Perry.
Uterīne. Sheridan, Buchanan, W. Johnston.
Uterĭne. Kenrick, Scott, Perry.

149. In these words, I do not hesitate to pronounce, that the general rule inclines evidently to the long *i*, which, in doubtful cases, ought always to be followed; and for which reason I shall enumerate those words first where I judge the *i* ought to be pronounced long. *Canabine*, *carabine*, *columbine*, *bizantine*, *gelantine*, *legatine*, *oxyrrhodine*, *concubine*, *muscadine*, *incarnadine*, *celandine*, *almadine*, *secundine*, *amygdaline*, *crystalline*, *vituline*, *calamine*, *asinine*, *saturnine*, *saccharine*, *adulterine*, *viperine*, *uterine*, *lamentine*, *armentine*, *serpentine*, *turpentine*, *vespertine*, *belluine*, *porcupine*, *countermine*, *leonine*, *sapperine*, and, I think, *metalline*.

150. The words of this termination, where the *i* is short, are the following: *Jacobine*, *medicine*, *discipline*, *masculine*, *jessamine*, *feminine*, *heroine*, *nectarine*, *libertine genuine*, *hyaline*, *palatine*. To these, I think, ought to be added, *alkaline*, *aquiline*, *coralline*, *brigantine*, *eglantine:* and to this pronunciation of the *i*, the proper names, *Valentine* and *Constantine* seem strongly to incline, and *Cymbelline* has entirely adopted.

151. The only words ending in *ire*, with the accent on the antepenultimate syllable, is *acrospire:* and in this the *i* is long; the last syllable sounding like the *spire* of a church.

152. Words ending in *ise* have the *i* short, when the accent is on the last syllable but one, as *franchise*, except the compounds ending in *wise*, as *likewise*, *lengthwise*, &c. as marked by Mr. Scott, Mr. Perry, and Buchanan: but even among these words we sometimes hear *otherwise*, pronounced *otherwiz* as marked by Mr. Sheridan and W. Johnston; but, I think, improperly.

153. When the accent is on the last syllable but two in these words, they are invariably pronounced with the *i* long, as *criticise*, *equalise*.

154. In the termination *ite*, when the accent is on it, the *i* is always long, as *requite*. When the accent is on the last syllable but one, it is always short, as *respite* (140); pronounced as if written *respit*, except *contrite;* but when the accent is on the last syllable but two, the *i* is generally long: the exceptions,

however, are so many, that a catalogue of both will be the best rule.

155. The *i* is long in *expedite*, *recondite*, *incondite*, *hermaphrodite*, *carmelite*, *theodolite*, *cosmopolite*, *chrysolite*, *bedlamite*, *eremite*, *aconite*, *margarite*, *marcasite*, *parasite*, *appetite*, *bipartite*, *tripartite*, *quadripartite*, *convertite*, *anchorite*, *pituite*, *satellite*. As the word stands, in Kenrick's Dictionary *sa-téll-it*, having the *i* short, and the accent on the second syllable, it is doubly wrong. The *i* in the last syllable is shortened also by W. Johnston and Perry, but made long, as it ought to be, by Mr. Sheridan, Mr. Scott and Mr. Nares. See RECONDITE.

156. The *i* is short in *cucurbite*, *ingenite*, *definite*, *indefinite*, *infinite*, *hypocrite*, *favourite*, *requisite*, *pre-requisite*, *perquisite*, *exquisite*, *apposite*, and *opposite*. *Heteroclite* has the *i* long in Sheridan, but short in Kenrick. The former is, in my opinion, the best pronunciation, (see the word in the Dictionary); but *ite*, in what may be called a Gentile termination, has the *i* always long, as in *Hivite*, *Samnite*, *cosmopolite*, &c.

157. The termination *ive*, when the accent is on it, is always long, as in *hive*, except in the two verbs, *give*, *live*, and their compounds, *giving*, *living*, &c.; for the adjective *live*, as a *live animal* has the *i* long, and rhymes with *strive;* so has the adjective and adverb, *lively*, and *livelily:* the noun *livelihood*, follows the same analogy; but the adjective *live-long*, as the *live-long day* has the *i* short, as in the verb. When the accent is not on the *i* in this termination it is always short, as *sportive*, *plaintive*, &c. rhyming with *give*.

158. All the other adjectives and substantives of this termination, when the accent is not on it, have the *i* invariably short, as *offensive*, *defensive*, &c. The *i* in *salique*, is short, as if written *sallick*, but long in *oblique*, rhyming with *pike*, *strike*, &c.: while the *i* in *antique* has the *i* long and slender, and rhymes with *speak*. Dr. Kenrick, Mr. Elphinston, Mr. Perry, Buchanan, and Barclay, have *obleek*, for *oblique;* Mr. Scott has it both ways, but gives the slender sound first; and Mr. Sheridan, Mr. Nares, and W. Johnston, *oblike*. The latter is, in my opinion, more agreeable to polite usage, but the former more analogical: for as it comes from the French *oblique*, we cannot write it *oblike*, as Mr. Nares wishes, any more than *antique*, and *antike*, for fear of departing too far from the Latin *antiquus*, and *obliquus*. *Opaque*, Mr. Nares observes, has become *opake;* but then it must be remembered, that the Latin is *opacus*, and not *opaquus*.

159. All the terminatious in *ize* have the *i* long, except to *endenize;* which, having the accent on the second syllable, follow the general rule, and has the *i* short, pronounced as in the verb *is*, (140). To these observations we may add, that though *evil*, and *devil*, suppress the *i* as if written *ev'l* and *dev'l*, yet that *cavil* and *pencil* preserve its sound distinctly, and that *Latin* ought never to be pronounced as it is generally at schools, as if written *Latt'n*. *Cousin* and *cozen* both drop the last vowels, as if spelled *cozn*, and are only distinguishable to the eye.

Thus we see how little regularity there is in the sound of this letter, when it is not under the accent, and, when custom will permit, how careful we ought to be to preserve the least trace of analogy, that "confusion may not be worse confounded." The sketch that has been just given may, perhaps, afford something like a clew to direct us in this labyrinth, and it is hoped it will enable the judicious speaker to pronounce with more certainty and decision.

160. It was remarked under the vowel *A*, that when a hard *g* or *c* preceded that vowel, a sound like *e* interposed, the better to unite the letters, and soften the sound of the consonant. The same may be observed of the letter *I*. When this vowel is preceded by hard *g* or *k*, which is but another form for hard *c*, it is pronounced as if an *e* were inserted between the consonant and the vowel. Thus *sky*, *kind*, *guide*, *guise*, *disguise*, *guile*, *beguile*, *mankind*, are pronounced as if written *ske-y ke-ind*, *gue-ise*, *disgue-ise*, *gue-ile*, *begue-ile*, *manke-ind*. At first sight we are surprised that two such different letters as *a* and *i* should be affected in the same manner by the hard gutturals, *g*, *c*, and *k;* but when we reflect that *i* is really composed of *a* and *e*, our surprise ceases; and we are pleased to find the ear perfectly uniform in its procedure, and entirely unbiassed by the eye. From this view of the analogy we may see how greatly mistaken is a very solid and ingenious writer on this subject, who says that "*ky-ind* for *kind* is a monster of pronunciation, heard only on our stage." Nares' Orth. p. 28. See No. 92.

It may not perhaps seem unworthy of notice, that when this letter is unaccented in the numerous terminations *ity*, *ible*, &c. it is frequently pronounced like short *u*, as if the words *sensible*, *visible*, &c. were written *sensubble*, *visubble*, &c. and *charity*, *chastity*, &c. like *charutty*, *chastutty*, &c.; but it may be observed that the pure sound of *i* like *e* in these words is as much the mark of an elegant speaker as that of the *u* in *singular*, *educate*, &c. See No. 179.

O.

161. Grammarians have generally allowed this letter but three sounds. Mr. Sheridan instances them in *not*, *note*, *prove*. For a fourth, I have added the *o* in *love*, *dove*, &c. for the fifth, that in *or*, *nor*, *for;* and a sixth, that in *woman*, *wolf*, &c.

162. The first, and only peculiar sound of this letter, is that by which it is named in the alphabet. It requires the mouth to be formed, in some degree, like the letter, in order to pronounce it. This may be called its long open sound, as the *o* in *prove* may be called its long slender sound, (65). This sound we find in words ending with silent *e*, as *tone*, *bone*, *alone;* or when ending a syllable with the accent upon it, as *mo-tion*, *potent*, &c. likewise in the monosyllables, *go*, *so*, *no*. This sound is found under several combinations of other vowels with this letter, as in *moan*, *groan*, *bow*, (to shoot with,) *low* (not high.)

163. The second sound of this letter is called its short sound, and is found, in *not*, *got*, *lot*, &c. though this, as in the other short vowels, is by no means the short sound of the former long one, but corresponds exactly to that of *a* in *what*, with which the words *not*, *got*, *lot*, are perfect rhymes. The long sound, to which the *o* in *not* and *sot* are short ones, is found under the diphthong *au* in *naught*, and the *ou* in *sought;* corresponding exactly to the *a* in *hall*, *ball*, &c. The short sound of this letter, like the short sound of *a* in *father* (78) (79), is frequently, by inaccurate speakers, and chiefly those among the vulgar, lengthened to a middle sound approaching to its long sound, the *o* in *or*. This sound is generally heard, as in the case of *a*, when it is succeeded by two consonants. Thus Mr. Smith pronounces *broth*, *froth*, and *moth*, as if written *brawth*, *frawth*, and *mawth*. Of the propriety or impropriety of this, a well educated ear is the best judge; but as was observed under the article A, (79), if this be not the sound heard among the best speakers, no middle sound ought to be admitted, as good orators will ever incline to definite and absolute sounds rather than such as may be called *non-descripts* in language.

164. The third sound of this letter, as was marked in the first observation, may be called its long slender sound, corresponding to the double *o*. The words where this sound of *o* occurs are so few, that it will be easy to give a catalogue of them. *Prove*, *move*, *behove*, and their compounds, *lose*, *do*, *ado*, *Rome*, *poltron*, *ponton*, *sponton*, *who*, *whom*, *womb*, *tomb*. *Sponton* is not in Johnson; and this and the two preceding words ought rather to be written with *oo* in the last syllable. *Gold* is pronounced like *gold* in familiar conversation; but in verse and solemn language, especially that of the scripture, ought always to rhyme with *old*, *fold*, &c. See ENCORE, GOLD, and WIND.

165. The fourth sound of this vowel is that which is found in *love*, *dove*, &c. and the long sound, which seems the nearest relation to it, is the first sound of *o* in *note*, *tone*, *rove*, &c. This sound of *o* is generally heard when it is shortened by the succeeding liquids *n*, *m*, *r*, and the semivowels *v*, *z*, *th:* and as an ingenious writer has given a catalogue of those words, I shall avail myself of his labour. *Above*, *affront*, *allonge*, *among*,

amongst, attorney, bomb, bombard, (the noun), *borage, borough, brother, cochineal, colour, come, comely, comfit, comfort, company, compass, comrade, combat, conduit, coney, conjure, constable, covenant, cover, covert, covet, covey, cozen, discomfit, done, doth, dost, dove, dozen, dromedary, front, glove, govern, honey, love, Monday, money, mongrel, monk, monkey, month, mother, none, nothing, one, onion, other, oven, plover, pomegranate, pommel, pother, romage, shove, shovel, sloven, smother, some, Somerset, son, sovereign, sponge, stomach, thorough, ton, tongue, word, work, wander, world, worry, worse, worship, wort, worth;* to which may be added, *rhomb, once, comfrey,* and *coltander.*

166. In these words the accent is on the *o* in every word, except *pomegranate:* but with very few exceptions, this letter has the same sound in the unaccented terminations, *oc, ock, od, ol, om, on, op, or, ot,* and *some,* as *mammoc, cassoc, method, carol, kingdom, union, gallop, tutor, turbot, troublesome,* &c. all which are pronounced as if written *mammuc, cassuc, methud,* &c. The *o* in the adjunct *munger* as *cheesemonger,* &c. has always this sound. The exceptions to this rule are technical terms from the Greek or Latin, as *Achor,* a species of the herpes; and proper names, as *Calor,* a river in Italy.

167. The fifth sound of *o* is the long sound produced by *r* final, or followed by another consonant, as *for, former.* This sound is perfectly equivalent to the diphthong *au;* and *for* and *former* might, on account of sound only, be written *faur* and *faurmer.*

168. *O,* like *A,* is lengthened before *r,* when terminating a monosyllable, or followed by another consonant; and, like *a* too, is shortened by a duplication of the liquid; as we may hear by comparing the conjunction *or* with the same letters in *torrid, florid,* &c. for though the *r* is not double to the eye in *florid,* yet as the accent is on it, it is as effectually doubled to the ear, as if written *florrid;* so if a consonant of another kind succeed the *r* in this situation, we find the *o* as long as in a monosyllable. Thus the *o* in *orchard* is as long as in the conjunction *or,* and that in *formal* as in the word *for:* but the *o* in *orifice* and *forage:* where the *r* is followed by a vowel, the *o* is as short as if the *r* were double, and the words written *orrifice* and *forrage.*

169. There is a sixth sound of *o* exactly corresponding to the *u* in *bull, full, pull,* &c. which, from its existing only in the following words, may be called its irregular sound. These words are, *woman, bosom, worsted, wolf,* and the proper names, *Wolsey, Worcester,* and *Wolverhampton.*

Irregular and unaccented Sounds.

170. What was observed of the *a,* when followed by a liquid and a mute, may be observed of the *o* with equal justness. This letter, like *a,* has a tendency to lengthen, when followed by a liquid and another consonant, or by *s, ss* or *s* and a mute. But this length of *o,* in this situation, seems every day growing more and more vulgar: and, as it would be gross to a degree to sound the *a* in *castle, mask,* and *plant,* like the *a* in *palm, psalm,* &c. so it would be equally exceptionable to pronounce the *o* in *moss, dross,* and *frost,* as if written *mauwse, drawse,* and *frawst,* (78) (79). The *o* in the compounds of *solve,* as *dissolve, absolve, resolve,* seem the only words where a somewhat longer sound of the *o* is agreeable to polite pronunciation. On the contrary when the *o* ends a syllable, immediately before or after the accent, as in *polite, im-potent,* &c. there is an elegance in giving it the open sound nearly as long as in *po-lar,* and *po-tent,* &c. See Domestic, Collect, and Command. It may like wise be observed, that the *o* like the *e* (102) is supressed in a final unaccented syllable when preceded by *c* or *k* and followed by *n;* as *bacon, beacon, deacon, beckon, reckon,* pronounced *bak'n, beak'n, deak'n, beck'n, reck'n;* and when *c* is preceded by another consonant, as *falcon,* pronounced *fawk'n.* The *o* is likewise mute in the same situation, when preceded by *d* in *pardon;* pronounced *pard'n,* but not in *Guerdon.* It is mute when preceded by *p* in *weapon, capon,* &c. pronounced *weap'n, cap'n,* &c. and when preceded, by *s* in *reason, season, treason, oraison, benison, denison, unison, foison, poison, prison, damson, crimson, advowson,* pronounced *reaz'n, treaz'n,* &c.; and *mason, bason, garrison, lesson, caparison, comparison, disinherison, parson,* and *person,* pronounced *mas'n, bas'n,* &c. *Unison, diapason,* and *cargason,* seem particularly in solemn speaking, to preserve the sound of *o* like *u,* as if written *unisun, diapazun,* &c. The same letter is suppressed in a final unaccented syllable beginning with *t,* as *Seton, cotton, button, mutton, glutton;* pronounced as if written *Set'n, cott'n,* &c. When *x* precedes the *t,* the *o* is pronounced distinctly, as in *Sexton.* When *l* is the preceding letter, the *o* is generally suppressed as in the proper names *Stilton cheese, Wilton carpets,* and *Melton Mowbray,* &c. Accurate speakers sometimes struggle to preserve it in the name of our great epic poet *Milton;* but the former examples sufficiently shew the tendency of the language; and this tendency cannot be easily counteracted. This letter is likewise suppressed in the last syllable of *blazon,* pronounced *blaz'n;* but is always to be preserved in the same syllable of *horizon.* This suppression of the *o* must not be ranked among those careless abbreviations found only among the vulgar, but must be considered as one of those devious tendencies to brevity, which has worn itself a currency in the language, and has at last become a part of it. To pronounce the *o* in those cases where it is suppressed, would give a singularity to the speaker bordering nearly on the pedantic; and the attention given to this singularity by the hearer would necessarily diminish his attention, to the subject, and consequently deprive the speaker of something much more desirable.

U.

171. The first sound of *u,* heard in *tube,* or ending an unaccented syllable, as in *cu-bic,* is a diphthongal sound, as if *e* were prefixed, and these words were spelt *tewbe* and *kewbic.* The letter *u* is exactly the pronoun *you.*

172. The second sound of *u* is the short sound, which tallies exactly with the *o* in *done, son,* &c. which every ear preceives might as well for the sound's sake be spelt *dun, sun,* &c.

173. The third sound of this letter, and that in which the English more particularly, depart from analogy, is the *u* in *bull, full, pull,* &c. The first, or diphthongal *u* in *tube,* seems almost as pecular to the English as the long sound of the *i* in *thine, mine,* &c. but here, as if they chose to imitate the Latin, Italian, and French *u,* they leave out the *e* before the *u* which is heard in *tube, mule,* &c. and do not pronounce the latter part of *u* quite so long as the *oo* in *pool,* nor so short as the *u* in *dull,* but with a middle sound between both, which is the true short sound of the *oo* in *coo* and *woo,* as may be heard by comparing *woo* and *wool;* the latter of which is a perfect rhyme to *bull.*

174. This middle sound of *u,* so unlike the general sound of that letter, exists only in the following words: *bull, full, pull,* words compounded of *full,* as *wonderfull, dreadfull,* &c. *bullock, bully, bullet, bulwark, fuller, fullingmill, pulley, pullet, push, bush, bushel, pulpit, puss, bullion, butcher, cushion, cuckoo, pudding, sugar, hussar, huzza,* and *put* when a verb: but few as they are, except *full,* which is a very copious termination, they are sufficient to puzzle Englishmen who reside at any distance from the capital, and to make the inhabitants of Scotland and Ireland, (who, it is highly probable, received a much more regular pronunciation from our ancestors) not unfrequently the jest of fools.

175. But vague and desultory as this sound of the *u* may at first seem, on a closer view we find it chiefly confined to words which begin with the mute labials *b, p, f,* and end with the liquid labial *l,* or the dentals *s, t,* and *d,* as in *bull, full, pull, bush, push, pudding, puss, put,* &c. Whatever, therefore, was the cause of this whimsical deviation, we see its primatives are confined to a very

narrow compass: *put*, has this sound only when it is a verb; for *putty*, a paste for glass, has the common sound of *u*, and rhymes exactly with *nutty*, (having the qualities of a nut); so *put*, the game at cards, and the vulgar appellation of *country put*, follow the same analogy. All *Bull's* compounds regularly follow their primative. But though *fuller*, a whitener of cloth, and *Fulham*, a proper name, are not compounded of *full*, they are sounded as if they were; while *Putney*, follows the general rule, and has its first syllable pronounced like the noun *put*. *Pulpit* and *pullet* comply with the peculiarity on account of their resemblance to *pull*, though nothing related to it; and *butcher* and *puss* adopt this sound of *u* for no reason but the nearness of their form to the other words: and when to these we have added *cushion*, *sugar*, *cuckoo*, *hussar*, and the interjection *huzza*, we have every word in the whole language where the *u* is thus pronounced.

176. Some speakers, indeed, have attempted to give *bulk*, and *punish*, this obtuse sound of *u*, but luckily have not been followed. The words which have already adopted it are sufficiently numerous; and we cannot be too careful to check the growth of so unmeaning an irregularity.

177. It must be remarked, that this sound of *u* except in the word *fuller*, never extends to words from the learned languages; for *fulminant*, *fulmination*, *ebullition*, *repulsion*, *sepulchre*, &c. sound the *u* as in *dull*, *gull*, &c. and the *u* in *pus* and *pustule*, is exactly like the same letter in *thus*. So the pure English words *buss*, *bulge*, *bustle*, *bustard*, *buzzard*, preserve the *u* in its second sound, as in *us*, *hull* and *custard*. It may likewise not be unworthy of remark, that the letter *u* is never subject to the shortening power of either the primary or secondary accent; but when accented, is always long, unless shortened by a double consonant. See the words DRAMA and MUCULENT, and No. 503, 534.

Irregular and unaccented Sounds.

178. But the strangest deviation of this letter from its regular sound is in the words *busy*, *business*, and *bury*. We laugh at the Scotch for pronouncing these words, as if written *bewsy*, *bewsiness*, and *bewry*; but we ought rather to blush for ourselves in departing so wantonly from the general rule as to pronounce them *bizzy*, *bizness*, and *berry*.

179. There is an incorrect pronunciation of this letter when it ends a syllable, not under the accent which prevails, not only among the vulgar, but is sometimes found in better company; and that is givng the *u* an obscure sound which confounds it with vowels of a very different kind. Thus we not unfrequently hear *singular*, *regular*, and *particular* pronounced as if written *sing-e-lar*, *reg-e-lar*, and *par-tic-e-lar*; but nothing tends more to tarnish and vulgarize the pronunciation than this short and obscure sound of the unaccented *u*. It may indeed, be observed, that there is scarcely any thing more distinguishes a person of mean and good education than the pronunciation of the unaccented vowels, (547) (558). When vowels are under the accent, the prince and the lowest of the people, with very few exceptions, pronounce them in the same manner; but the unaccented vowels in the mouth of the former have a distinct, open, and specific sound, while the latter often totally sink them, or change them into some other sound. Those, therefore, who wish to pronounce elegantly must be particularly attentive to the unaccented vowels; as a neat pronunciation of these, forms one of the greatest beauties of speaking.

Y final.

180. *Y* final either in a word or syllable, is a pure vowel, and has exactly the same sound as *i* would have in the same situation. For this reason printers, who have been the great correctors of our orthography, have substituted the *i* in its stead, on account of the too great frequency of this letter in the English language. That *y* final is a vowel, is universally acknowledged; nor need we any other proof of it, than its long sound, when followed by *e* mute, as in *thyme*, *rhyme*, &c. or ending a syllable with the accent upon it, as *buy*, *cyder*, &c. this may be called its first vowel sound.

181. The second sound of the vowel *y* is its short sound, heard in *system*, *syntax*, &c.

Irregular and unaccented Sounds.

182. The unaccented sound of this letter at the end of a syllable, like that of *i* in the same situation, is always like the first sound of *e*. Thus *vanity*, *pleurisy*, &c. and if sound alone were consulted, might be written *vanitee*, *pleurisee*, &c.

183. The exception to this rule is, when *f* precedes the *y* in a final syllable, the *y* is then pronounced as long and open as if the accent were on it. Thus *justify*, *qualify*, &c. have the last syllable sounded like that in *defy*. This long sound continues when the *y* is changed into *i*, in *justifiable*, *qualifiable*, &c. The same may be observed of *multiply*, *multipliable*, &c. *occupy* and *occupiable*, &c. (512).

184. There is an irregular sound of this letter when the accent is on it in *panegyric*, when it is frequently pronounced like the second sound of *e*; but would, perhaps, be more correct if its true sound were preserved, and it were to rhyme with *Pyrrhic*; or as Swift does with *Satiric:*

"On me when dunces are satirick,
"I take it for a *panegyrick*."

185. But the most uncertain sound of this letter is, when it ends a syllable immediately preceding the accent. In this case it is subject to the same variety as the letter *i* in the same situation, and nothing but a catalogue will give us any idea of the analogy of the language in this point.

186. The *y* is long in *chylaceous*, but shortened by the secondary accent in *chylifaction* and *chylifactive*, (530); though without the least reason from analogy, Mr. Sheridan has marked them both long.

187. Words composed of *hydro*, from the Greek ὕδωρ, *water*, have the *y* before the accent generally long, as *hydrography*, *hydrographer*, *hydrometry*, *hydropic*; all which have the *y* long in Mr. Sheridan but *hydrography*, which must be a mistake of the press; and this long sound of *y* continues in *hydrostatic*, in spite of the shortening power of the secondary accent, (530). The same sound of *y* prevails in *hydraulics* and *hydatides*. *Hygrometer* and *hygrometry* seem to follow the same analogy, as well as *hyperbola* and *hyperbole*; which are generally heard with the *y* long; though Kenrick has marked the latter short. *Hypostasis* and *hypothenuse* ought to have the *y* long likewise. In *hypothesis* the *y* is more frequently short than long, and in *hypothetical* it is more frequenty long than short; but *hypocrisy* has the first *y* always short. *Myrabolan* and *myropolist* may have the *y* either long or short. *Mythology* has the first *y* generally short, and *mythological*, from the shortening power of the secondary accent, (530), almost always. *Phytivorous*, *phytography*, *phytology*, have the first *y* always long. In *phylactory* the first *y* is generally short, and in *physician* always. *Pylorus* has the *y* long in Mr. Sheridan, but, I think, improperly. In *pyramidal* he marks the *y* long, though, in my opinion, it is generally heard short, as in *pyramid*. In *pyrites*, with the accent on the second syllable, he marks the *y* short, much more correctly than Kenrick, who places the accent on the first syllable, and marks the *y* long, (see the word). *Synodic*, *synodical*, *synonima* and *synopsis*, have the *y* always short: *synechdoche* ought likewise to have the same letter short, as we find it in Perry's and Kenrick's Dictionaries; though in Sheridan's we find it long. *Typography* and *typographer* ought to have the first *y* long, as we find it in Sheridan, Scott, Buchanan, W. Johnston, Kenrick, and Perry, though frequently heard short; and though *tyrannical* has the *y* marked short by Mr. Perry, it ought rather to have the long sound, as we see it marked by Mr. Sheridan, Mr. Scott, Buchanan, W. Johnston, and Kenrick.

188. From the view that has been taken of the sound of the

i and *y* immediately before the accent, it may justly be called the most uncertain part of pronunciation. Scarcely any reason can be given why custom prefers one sound to the other in some words; and why, in others, we may use either one or the other indiscriminately. It is strongly to be presumed that the *i* and *y*, in this situation, particularly the last, was generally pronounced long by our ancestors, but that custom has gradually inclined to the shorter sound as more readily pronounced, and as more like the sound of these letters when they end a syllable after the accent; and, perhaps, we should contribute to the regularity of the language, if, when we are in doubt, we should rather incline to the short than the long sound of these letters.

W final.

189. That *w* final is a vowel, is not disputed (9); when it is in this situation, it is equivalent to *oo;* as may be perceived in the sound of *vow*, *tow-el*, &c.where it forms a real dipthong, composed of the *a* in *wa-ter*, and the *oo* in *woo* and *coo*.

It is often joined to *o* at the end of a syllable, without affecting the sound of that vowel; and in this situation it may be called servile, as in *bow*, to shoot with; *crow*, *low* (not high), &c.

DIPHTHONGS.

190. A diphthong is a double vowel, or the union or mixture of two vowels pronounced together, so as only to make one syllable: as the Latin *a e* or *æ*, *o e* or *œ*, the Greek *αι*, the English *ai*, *au*, &c.

191. This is the general definition of a diphthong; but if we examine it closely, we shall find in it a want of precision and accuracy.* If a diphthong be two vowel sounds in succession, they must necessarily form two syllables, and therefore, by its very definition, cannot be a diphthong; if it be such a mixture of two vowels as to form but one simple sound, it is very improperly called a diphthong; nor can any such simple mixture exist.

192. The only way to reconcile this seeming contradiction, is to suppose that two vocal sounds in succession were sometimes pronounced so closely together as to form only the time of one syllable in Greek and Latin verse. Some of these diphthongal syllables we have in our own language, which only pass for monosyllables in poetry. Thus *hire* (wages) is no more than one syllable in verse, though perfectly equivalent to *higher* (more high) which generally passes for a dissyllable: the same may be observed of *dire* or *dyer*, *hour* and *power*, &c. This is not uniting two vocal sounds into one simple sound, which is impossible, but pronouncing two vocal sounds in succession so rapidly and so closely as to go for only one syllable in poetry.

193. Thus the best definition I have found of a diphthong is that given us by Mr. Smith in his scheme for a French and English Dictionary. "A diphthong (says this gentleman) I "would define to be two simple vocal sounds uttered by one "and the same emission of breath, and joined in such a manner "that each loses a portion of its natural length; but from the "junction produceth a compound sound, equal in the time of "pronouncing to either of them taken separately, and so ma-"king still but one syllable."

194. "Now if we apply this definition (says Mr. Smith) to "the several combinations that may have been laid down and "denominated diphthongs by former orthoepists, I believe we "shall find only a small number of them meriting this "name." As a proof of the truth of this observation, we find, that most of those vocal assemblages that go under the name of diphthongs emit but a simple sound, and that not compounded of the two vowels, but one of them only sounded long: thus *pain*, and *pane*, *pail*, and *pale*, *hear* and *here*, are perfectly the same sounds.

195. These observations naturally lead us to a distinction of diphthongs in to proper and improper. The proper are such as have two distinct vocal sounds, and the improper such as have but one.

196. The proper diphthongs are,

ea ocean	*io* passion	*oy* boy
eu feud	*oi* voice	*ua* assuage
ew jewel	*ou* pound	*ue* mansuetude
ia poniard	*ow* now	*ui* languid.
ie spaniel		

In this assemblage it is impossible not to see a manifest distinction between those which begin with *e* or *i*, and the rest. In those beginning with either of these vowels we find a squeezed sound like the commencing or consonant *y* interpose, as it were, to articulate the latter vowel, and that the words where these diphthongs are found, might, agreeably to the sound, be spelt *oshe-yan*, *f-yude*, *j-yewel*, *pon-yard*, *span-yel*, *pash-yon*, &c. ; and as these diphthongs (which, from their commencing with the sound of *y* consonant, may not improperly be called *semi-consonant diphthongs*) begin in that part of the mouth where *s*, *c* soft, and *t* are formed, we find that coalescence ensue which forms the aspirated hiss in the numerous terminations *sion*, *tion*, *tial*, &c. and by direct consequence in those ending in *ure*, *une*, as *future*, *fortune*, &c. for the letter *u*, when long, is exactly one of these semi-consonant diphthongs (8); and when immediately after the accent it coalesces with the preceding *s*, *c*, or *t*, and draws them into the aspirated hiss of *sh* or *tsh*, (459). Those found in the termination *ious* may be called semi-consonant diphthongs also, as the *o* and *u* have but the sound of one vowel. It may be observed too, in passing, that the reason why in *mansuetude* the *s* does not go into *sh* is, because when *u* is followed by another vowel it drops its consonant sound at the beginning, and becomes merely double *o*.

197. The improper diphthongs are,

ea Cæsar	*ea* clean	*ie* friend
ai aim	*ee* reed	*oa* coat
ao gaol	*ei* ceiling	*oe* oeconomy
au taught	*eo* people	*oo* moon
aw law	*ey* they	*ow* crow.

198. The triphthongs having but two sounds are merely ocular, and must therefore be classed with the proper diphthongs:

aye (for ever)	*eou* plenteous	*iew* view
eau beauty	*ieu* adieu	*oeu* manoeuvre.

Of all these combinations of vowels we shall treat in their alphabetical order.

A E.

199. *Ae* or *æ* is a diphthong, says Dr. Johnson, of very frequent use in the Latin language, which seems not properly to have any place in the English; since the *æ* of the Saxons has been long out of use, being changed to *e* simple; to which, in words frequently occurring, the *æ* of the Romans is, in the same manner, altered, as in *equator*, *equinoctial*, and even in *Eneas*.

200. But though the diphthong *æ* is perfectly useless in our language, and the substitution of *e* in its stead, in *Cesar* and *Eneas*, is recommended by Dr. Johnson, we do not find his authority has totally annihilated it; especially in proper names and technical terms, derived from the learned languages. *Cæsar*, *Æneas*, *Æsop*, *pæan*, *æther*, *æthiops* mineral, *amphisbæna*, *anacephalæosis*, *aphæresis*, *ægilops*, *ozæna*, &c. seem to preserves the diphthong as well as certain words which are either plurals or genitives, in Latin words not naturalised as *cornucopiæ*, *exuviæ*, *aqua vitæ*, *minutiæ*, *striæ*, &c.

201. This diphthong, when not under the accent in *Michaelmas*, and when accented in *Dædalus*, is pronounced like short

* We see how many disputes the simple and ambiguous nature of vowels created among grammarians, and how it has begot the mistake concerning diphthongs: all that are properly so are syllables, and not diphthongs, as intended to be signified by that word. *Holder.*

e. It is, like *e*, subject to the short sound when under the secondary accent, as in *Ænobarbus*, where *æn*, in the first syllable, is pronounced exactly like the letter *n*, (530).

AI.

202. The sound of this diphthong is exactly like the long slender sound of *a*; thus *fail*, a vessel, and *pale*, a colour, are, perfectly the same sound. The exceptions are but few.

203. When *said* is the third person preterimperfect tense of the verb to *say*, *ai* has the sound of short *e*, and *said* rhymes with *bed:* but when this word is an adjective, as the *said* man, it is regular, and rhymes with *trade*.

204. *Plaid*, a striped garment, rhymes with *mad*.

205. *Raillery* is a perfect rhyme to *salary;* and *raisin*, a fruit, is pronounced exactly like *reason*, the distinctive faculty of man. See both these words in the Dictionary.

206. *Again* and *against* sound as if written *agen* and *agenst*.

207. The *aisle* of a church is pronounced exactly like *isle*, an island; and is some times written *ile*.

208. When this diphthong is in a final unaccented syllable, the *a* is sunk, and the *i* pronounced short. Thus *mountain*, *fountain*, *captain*, *curtain*, *villain*, are all pronounced as if written *mountin*, *fountin*, *captin*, *curtin*, *villin;* but when the last word takes an additional syllable, the *i* is dropped, and the *a* has its short sound; as *villanous*, *villany*. See the words in the Dictionary.

209. The *ai* in *Britain* has the short sound approaching to *u*, so common with all the vowels in final unaccented syllables, and is pronounced exactly like *Briton*.

210. *Plait*, a fold of cloth, is regular, and ought to be pronounced like *plate*, a dish; pronouncing it so as to rhyme with *meat* is a vulgarism, and ought to be avoided.

211. *Plaister* belongs no longer to this class of words, being now more properly written *plaster*, rhyming with *caster*.

AO.

212. This combination of vowels in a diphthong is only to be met with in the word *gaol*, now more properly written, as it is pronounced, *jail*.

AU.

213. The general sound of this diphthong is that of the noun *awe;* as *taught*, *caught*, &c. or of the *a* in *hall*, *ball*, &c.

214. When these letters are followed by *n* and by another consonant, they change to the second sound of *a*, heard in *far*, *farther*, &c. Thus *aunt*, *haunt*, *daunt*, *askaunce*, *askaunt*, *flaunt*, *haunt*, *gauntlet*, *jaunt*, *haunch*, *launch*, *craunch*, *jaundice*, *laundry*, have the Italian sound of the *a* in the last syllable of *papa* and *mamma*. To these I think ought to be added, *daunt*, *paunch*, *gaunt*, and *saunter*, as Dr. Kenrick has marked them with the Italian *a*, and not as if written *dawnt*, *pawnch*, &c. as Mr. Sheridan sounds them. *Maund*, a basket is always pronounced with the Italian *a*, and nearly as if written *marnd*; for which reason *Maundy* Thursday, which is derived from it, ought, with Mr. Nares, to be pronounced in the same manner, though generally heard with the sound of *aw*. To *maunder*, to grumble, though generally heard as if written *mawnder*, ought certainly to be pronounced as Mr. Nares has classed it, with the Italian *a*. The same may be observed of *taunt*, which ought to rhyme with *aunt*, though sounded *tawnt*, by Mr. Sheridan; and being left out of the above list, supposed to be so pronounced by Mr. Nares. But Mr. Elphinston has placed the analogy of these words in so strong and curious a light, that I cannot help presenting them to the reader in his own words though a different orthography: "*U* meritoriously distinguishes *aunt*, the parent's "sister, from *ant* the emmet, and gives *a* slender shut, the ser- "vile of *a* broad open, yet without pretence of so dangerous or "any coincidence; in defiance of both sisters, his *aunt* had pow- "er to retain the company of *jaunt*, *haunt*, *vaunt*, *taunt*, *daunt*, "*gaunt*, *gauntlet*; in all of which the *u* does precisely the same "duty it formely did in *chaunt*, *graunt*, *maund*, and *commaund;* "in *saunter*, and *saunder*, as well as in *braunch*, *haunch*, *paunch*, "*launch*, *staunch*; all now justly as genealogically, *chant*, *grant*, "*mand*, (the old basket), *command*, *santer*, *sander*, *branch*, "*hanch*, *panch*, *lanch*, *stanch*. *Jaundice* alone pleaded *u* radical; "and yet was found mere *jandice*. So with *aunt*, must return to "truth and etymology (who do not always join issue) *jant*, *hant*, "*vant*, *tant*, *dant*, *gant*, *gantlet;* and even the venerable *Mandy* "*Thursday*, with her *mand* or basket in her hand. She had, indeed "almost left the language, though Astrea had not left the land, "when analogy (or harmony) enacted: *a* broad (*au*) shall not in "English precede *n*, followed either by a dry dental, or by a si- "bilation; that is, *au* shall not be followed by *nt*, *nd*, *nce*, *nch*, or "*nge*. No such sounds being sufferable in the English system, as "*aunt*, *aund*, *aunch*, *aunce*, or *aunge;* there shall be no such "semblances. Alike are therefore indispensable *chant*, and "*jant; hand* and *mand*, *chance* and *lance*, *branch* and *lanch*, *ban-* "*ter* and *santer; Sande* and his full self *Alexander*. In all such, "*a*, far from broad or open, is slender and shut; yet hardly shor- "ter than if the silent aspiration interposed in *ahnt*, *sahnter*, "*lahnce*, *lahnch*, and the rest. Before *nge*, indeed, *a*, is also "slender, but open; not *ah*, but *a;* guarded therefore by its own "(*i*) servile (as we saw in its place) against every danger of "*change*. *Faun* and *fawn* remain doubtless in *fauns*, and *pawns*, "unaltered by the adscititious depressive sibilant." Propriety Ascertained in her Picture, vol. i. pag. 171.

215. *Laugh* and *draught*, which are very properly classed by Mr. Nares among these words which have the long Italian *a* in *father*, are marked by Mr. Sheridan with his first sound of *a* in *hat*, lengthened into the sound of *a* in *father*, by placing the accent on it. *Staunch* is spelled without the *u* by Johnson, and therefore improperly classed by Mr. Nares in the above list.

216. *Vaunt* and *avaunt* seem to be the only real exceptions to this sound of *a* in the whole list; and as these words are chiefly confined to tragedy, they may be allowed to "fret and strut their hour upon the stage" in the old traditionary sound of *awe*.

217. This diphthong is pronounced like long *o* in *hautboy*, as if written *ho-boy;* and like *o* short in *cauliflower*, *laurel*, and *laudanum;* as if written *colliflower*, *lorrel*, and *loddanum*. In *gauge*, *au* has the sound of slender *a*, and rhymes with *page*.

218. There is a corrupt pronunciation of this diphthong among the vulgar, which is giving the *au* in *daughter*, *sauce*, *saucer*, and *saucy*, the sound of the Italian *a*, and nearly as if written *darter*, *sarce*, *sarcer*, and *sarcy*; but this pronunciation cannot be too carefully avoided. *Au* in *sausage* also, is sounbed by the vulgar with short *a*, as if written *sassage*; but in this, as in the other words *au* ought to sound *awe*. See the words in the Dictionary.

AW.

219. Has the long broad sound of *a* in *ball*, with which the word *bawl* is perfectly identical. It is always regular.

AY.

220. This diphthong, like its near relation *ai*, has the sound of slender *a* in *pay*, *day*, &c. and is pronounced like long *e* in the word *quay*, which is now sometimes seen written *key;* for if we cannot bring the pronunciation to the spelling, it is looked upon as some improvement to bring the spelling to the pronunciation; a most pernicious practice in language. See Bowl.

221. To *flay*, to strip off the skin also, is corruptly pronounced *flea;* but the diphthong in this word seems to be recovering its rights.

222. There is a wanton departure from analogy in orthography, by changing the *y* in this diphthong to *i* in the words *paid*, *said*, *laid*, for *payed*, *sayed*, and *layed*. Why these words should be written with *i* and thus contracted, and *played*, *prayed*, and *delayed*, remain at large, let our wise correctors of ortho-

graphy determine. *Stayed* also, a participial adjective, signifying *steady*, is always written *staid*.

223. When *ay* comes immediately after the accent in a final syllable, like *ai*, it drops the former vowel, in the colloquial pronunciation of the days of the week. Thus as we pronounce *captain*, *curtin*, &c. as if written *captin*, *curtin*, &c. so we hear, *Sunday*, *Monday*, &c. as if written *Sundy*, *Mundy*, &c. A more distinct pronunciation of *day*, in these words, is a mark of the northern dialect, (208).

224 The familliar assent *ay* for *yes*, is a combination of the long Italian *a* in the last syllable of *papa*, and the first sound of *e*. If we give the *a* the sound of that letter in *ball*, the word degenerates into a coarse rustic pronunciation. Though in the House of Commons, where this word is made a noun, we frequently, but not correctly, hear it so pronounced, in the phrase *the ayes have it*.

AYE.

225. This triphthong is a combination of the slender sound of *a*, heard in *pa-per*, and the *e* in *me-tre*. The word which it composes, signifying *ever*, is almost obsolete.

EA.

226. The regular sound of this diphthong, is that of the first sound of *e* in *here;* but its irregular sound of short *e* is so frequent as to make a catalogue of both necessary; especially for those who are unsettled in the pronunciation of the capital, and wish to practise in order to form a habit.

227. The first sound of *ea* is like open *e*, and is heard in the following words: *Afeard*, *affear*, *anneal*, *appeal*, *appear*, *appease*, *arread*, *arrear*, *beacon*, *beadle*, *beadroll*, *beads*, *beadsman*, *beagle*, *beak*, *beaker*, *beam*, *bean*, *beard*, *bearded*, *beast*, *beat*, *beaten*, *beaver*, *beleaguer*, *beneath*, *bequeath*, *bereave*, *besmear*, *bespeak*, *bleach*, *bleak*, *blear*, *bleat*, *bohea*, *breach*, *bream*, to *breathe*, *cease*, *cheap*, *cheat*, *clean*, *cleanly* (adverb) *clear*, *clearance*, *cleave*, *cochineal*, *colleague*, *conceal*, *congeal*, *cream*, *creak*, *crease*, *creature*, *deacon*, *deal*, *dean*, *deanery*, *dear*, *decease*, *defeasance*, *defeasible*, *defeat*, *demean*, *demeanor*, *decrease*, *dream*, *drear*, *dreary*, *each*, *eager*, *eagle*, *eagre*, *ear*, *east*, *easter*, *easy*, to *eat*, *eaten*, *eaves*, *entreat*, *endear*, *escheat*, *fear*, *fearful*, *feasible*, *feasibility*, *feast*, *feat*, *feature*, *flea*, *fleam*, *freak*, *gear*, *gleam*, *glean*, to *grease*, *grease*, *greaves*, *heal*, *heap*, *hear*, *heat*, *heath*, *heathen*, *heave*, *impeach*, *increase*, *inseam*, *interleave*, *knead*, to *lead*, *leaf*, *league*, *leak*, *lean*, *lease*, *leash*, *leasing*, *least*, *leave*, *leaves*, *mead*, *meagre*, *meal*, *mean*, *meat*, *measles*, *meath*, *neap*, *near*, *neat*, *pea*, *peace*, *peak*, *peal*, *pease*, *peat*, *plea*, *plead*, *please*, *reach*, to *read*, *ream*, *reap*, *rear*, *rearward*, *reason*, *recheat*, *redstreak*, *release*, *repeal*, *repeat*, *retreat*, *reveal*, *screak*, *scream*, *seal*, *sea*, *seam*, *seamy*, *sean*, *sear*, *searcloth*, *season*, *seat*, *shear*, *shears*, *sheath*, *sheathe*, *sheaf*, *sleasy*, *sneak*, *sneaker*, *sneakup*, *speak*, *spear*, *steal*, *steam*, *streak*, *stream*, *streamer*, *streamy*, *surcease*, *tea*, *teach*, *tead*, *teague*, *teal*, *team*, *tear*, *tease*, *teat*, *treacle*, *treason*, *treat*, *treatise*, *treatment*, *treaty*, *tweag*, *tweak*, *tweague*, *veal*, *undeneath*, *uneasy*, *unreave*, *uprear*, *weak*, *weaken*, *weal*, *weald*, *wean*, *weanling*, *weariness*, *wearisome*, *weary*, *weasand*, *weasel*, *weave*, *wheal*, *wheat*, *wheaten*, *wreak*, *wreath*, *wreathe*, *wreathy*, *yea*, *year*, *yeanling*, *yearling*, *yearly*, *yest*, *zeal*.

228. In this catalogue we find *beard* and *bearded* sometimes pronounced as if written *berd* and *berded:* but this corruption of the diphthong, which Mr. Sheridan has adopted, seems confined to the Stage. See the word.

229. The preter imperfect tense of *eat*, is sometimes written *ate*, particularly by Lord Bolingbroke, and frequently, and, perhaps, more correctly, pronounced *et*, especially in Ireland, but *eaten* always preserves the *ea*, long.

230. *Ea* in *fearful* is long when it signifies *timorous*, and short when it signifies *terrible*, as if written *ferful*. See the word.

231. To *read* is long in the present tense, and short in the past, and participle; which are sometimes written *zed*.

232. *Teat*, a dug, is marked by Dr. Kendrick, Mr. Elphinston, and Mr. Nares, with short *e*, like *tit;* but more properly by Mr. Sheridan, Mr. Scott, W. Johnston, Mr. Perry, and Mr. Smith, with the long *e*, rhyming with *meat*.

233. *Beat*, the preterimperfect tense and participle of to *beat*, is frequently pronounced in Ireland like *bet* (a wager): and if utility were the only object of language, this would certainly be the preferable pronunciation, as nothing tends more to obscurity than verbs which have no different form for their present and past times; but fashion in this, as in many other cases, triumphs over use and propriety; and *bet*, for the past time and participle of *beat*, must be religiously avoided.

234. *Ea* is pronounced like the short *e* in the following words: *Abreast*, *ahead*, *already*, *bedstead*, *behead*, *bespread*, *bestead*, *bread*, *breath*, *breadth*, *breakfast*, *breast*, *breath*, *cleanse*, *cleanly* (adjective) *cleanlily*, *dead*, *deadly*, *deaf*, *deafen*, *dearth*, *death*, *earl*, *earldom*, *early*, *earn*, *earnest*, *earth*, *earthen*, *earthly*, *endeavour*, *feather*, *head*, *heady*, *health*, *heard*, *hearse*, *heaven*, *heavy*, *jealous*, *impearl*, *instead*, *lead*, *leaden*, *leant*, (the past time and participle of to *lean*), *learn*, *learning*, *leather*, *leaven*, *meadow*, *meant*, *measure*, *pearl*, *peasant*, *pheasant*, *pleasant*, *pleasantry*, *pleasure*, *read*, (past time and participle) *readily*, *readiness*, *ready*, *realm*, *rehearsal*, *rehearse*, *research*, *seamstress*, *searce*, *search*, *spread*, *stead*, *steadfast*, *steady*, *stealth*, *stealthy*, *sweat*, *sweaty*, *thread*, *threaden*, *threat*, *threaten*, *treachery*, *tread*, *treadle*, *treasure*, *uncleanly*, *wealth*, *wealthy*, *weapon*, *weather*, *yearn*, *zealot*, *zealous*, *zealously*.

235. I have given the last three words, compounded of *zeal*, as instances of the short sound of the diphthong, because it is certainly the more usual sound; but some attempts have lately been made in the House of Commons to pronounce them long, as in the noun. It is a commendable zeal to endeavour to reform the language as well as the constitution; but whether, if these words were altered, it would be real reformation, may admit of some dispute. See Enclitical Termination, No 515, and the word ZEALOT.

236. *Heard*, the past time and participle of *hear*, is sometimes corruptly pronounced with the diphthong long, so as to rhyme with *rear'd*; but this is supposing the verb to be regular; which, from the spelling, is evidently not the case.

237. It is, perhaps, worth observation, that when this diphthong comes before *r*, it is apt to slide into the short *u*, which is undoubtedly very near the true sound, but not exactly. Thus pronouncing *earl*, *earth*, *derth*, as if written *url*, *urth*, *durth*, is a slight deviation from the true sound which is exactly that of *i* before *r*, followed by another consonant, in *virtue*, *virgin;* and that is the true sound of short *e* in *vermin*, *vernal*, &c. (108).

238. *Leant*, the past time and participle of to *lean*, is grown vulgar: the regular form *leaned* is preferable.

239. The past time and participle of the verb to *leap* seems to prefer the irregular form; therefore, though we almost always hear to *leap*, rhyming with *reap*, we generally hear *leaped* written and pronounced *leapt*, rhyming with *wept*.

240. *Ea* is pronounced like long slender *a* in *bare*, in the following words: *Bear*, *bearer*, *break*, *forbear*, *forswear*, *great*, *pear*, *steak*, *swear*, to *tear*, *wear*.

241. The word *great* is sometimes pronounced as if written *greet*, generally by people of education, and almost universally in Ireland; but this is contrary to the fixed and settled practice in England. That this is an affected pronunciationl will be perceived in a moment by pronouncing this word in the phrase, *Alexander the Great;* for those who pronounce the word *greet*, in other cases, will generally in this rhyme it with *fate*. It is true the *ee* is the regular sound of this diphthoug; but this slender sound of *e* has, in all probability, given way to that of *a* as deeper and more expressive of the epithet *great*.

242. The same observations are applicable to the word *break;* which is much more expressive of the action when pronounced *brake* than *breek*, as it is sometimes affectedly pronounced.

243. *Ea* is pronounced like the long Italian *a* in *father*, in the following words: *Heart*, *hearty*, *hearten*, *hearth*, *hearken*.

244. *Ea*, unaccented, has an obscure sound approaching to short *u* in *vengeance*, *serjeant*, *pageant*, and *pageantry*.

EAU.

245. This is a French, rather than an English, triphthong, being found only in words derived from that language. Its sound is that of long open *o*, as *beau*, *bureau*, *flambeau*, *portmanteau*. In *beauty*, and its compounds it has the first sound of *u*, as if written *bewty*.

EE.

246. This diphthong, in all words, except those that end in *r*, has a squeezed sound of long open *e* formed by a closer application of the tongue to the roof of the mouth, than in that vowel singly, which is distinguishable to a nice ear, in the different sounds of the verbs to *flee* and to *meet*, and the nouns *flea* and *meat*. This has always been my opinion; but upon consulting some good speakers on the occasion, and in particular Mr. Garrick, who could find no difference in the sounds of these words, I am less confident in giving it to the public. At any rate the difference is but very trifling, and I shall therefore consider *ee* as equivocal to the long open *e*.

247. This diphthong is irregular only in the word *breeches*, pronounced as if written *britches*. *Cheesecake*, sometimes pronounced *chizcake*, and *breech*, *britch*, I look upon as vulgarisms. *Beelzebub*, indeed, in prose, has generally the short sound of *e*, as in *bell:* and when these two letters form but one syllable, in the poetical contraction of *e'er*, and *ne'er*, for *ever* and *never*, they are pronounced as if written *air* and *nair*.

EI.

248. The general sound of this diphthong seems to be the same as *ey*, when under the accent; which is like long slender *a;* but the other sounds are so numerous as to require a catalogue of them all.

249. *Ei* has the sound of long slender *a* in *deign*, *vein*, *rein*, *reign*, *feign*, *feint*, *veil*, *heinous*, *heir*, *heiress*, *inveigh*, *weigh*, *neigh*, *skein*, *reins*, *their*, *theirs*, *eight*, *freight*, *weight*, *neighbour*, and their compounds.

250. *Ei* has the sound of long open *e* in *here*, in the following words and their compounds: to *ceil*, *ceiling*, *conceit*, *deceit*, *reciept*, *conceive*, *perceive*, *deceive*, *receive*, *inveigle*, *seize*, *seisin*, *seignor*, *seignory*, *seine*, *plebeian*. *Obeisance*, ought to be in the preceding class. See the word.

251. *Leisure* is somtimes pronounced as rhyming with *pleasure;* but, in my opinion, very improperly; for if it be allowed that custom is equally divided, we ought, in this case to pronounce the diphthong long, as more expressive of the idea annexed to it. (241).

252. *Either* and *neither* are so often pronounced *eye-ther* and *nigh-ther*, that it is hard to say to which class they belong. Analogy, however, without hesitation, gives the diphthong the sound of long open *e*, rather than that of *i*, and rhymes them with *breather*, one who breathes. This is the pronunciation Mr. Garrick always gave to these words; but the true analogical sound of the diphthong in these words is that of the slender *a*, as if written *ay-ther* and *nay-ther*. This pronunciation is adopted in Ireland, but is not favoured by one of our orthöepists; for Mr. Sheridan, Mr. Scott, Mr. Elphinston, Mr. Perry, Mr. Smith, Steele's Grammar, and Dr. Jones, all pronounce these words with the diphthong like long *e*. W. Johnston alone adopts the sound of long *i*, exclusively; Dr. Kenrick gives both *ēther* and *ī̄ther* but prefers the first, but gives *neither* the sound of long *e* exclusively; Mr. Coote says these words are generally pronounced with the *ei* like the *i* in *mine*. Mr. Barclay gives no description of the sound of *ei* in *either*, but says *neither* is sometimes pronounced *nī̄ther*, and by others *nēther*; and Mr. Nares says, "*either* and *neither* are spoken by some with the "sound of long *i;* I have heard even that of long *a* given to "them; but as the regular way is also in use, I think it is pre-"ferable. These differences seem to have arisen from igno-"rance of the regular sound of *ei*."

If by the regular way and the regular sound of this diphthong Mr. Nares means the long sound of *e*, we need only inspect No. 249 and 250, to see that the sound of *a* is the general sound, and therefore ought to be called, the regular; but where there are so many instances of words where this diphthong has the long sound of *e*, and custom is so uniform in these words, there can be no doubt which is the true sound.

253. *Ei* has the sound of long open *i*, in *height* and *sleight*, rhyming with *white* and *right*. *Height* is, indeed, often heard rhyming with *eight* and *weight*, and that among very respectable speakers; but custom seems to decide in favour of the other pronunciation, that it may better tally with the adjective *high*, of which it is the abstract.

254. *Ei* has the sound of short *e*, in the two words *heifer* and *nonpareil*, pronounced *heffer* and *nonperell*.

255. This diphthong, when unaccented, like *ai* (208) drops the former vowel, and is pronounced like short *i*, in *foreign*, *foreigner*, *forfeit*, *forfeiture*, *kerchief*, *handkerchief*, *sovereign*, *sovereignty*, *surfeit*, *counterfeit*.

EO.

256. This diphthong is pronounced like *e* long in *people*, as if written *peeple;* and like *e* short in *leopard* and *jeopardy*, as if written *leppard* and *jeppardy;* and in the law terms *feoffee*, *feoffer*, and *feoffment*, as if written *feffee*, *feffer*, and *feffment*.

257. We frequently hear these vowels contracted into short *o* in *geography* and *geometry*, as if written *joggraphy* and *jommetry;* but this gross pronunciation seems daily wearing away, and giving place to that which separates the vowels into two distinct syllables, as it is always heard in *geographical*, *geometer*, *geometrical*, and *geometrician*. *Georgic* is always heard as if written *jorgic*, and must be given up as incorrigible (116).

258. *Eo* is heard like long *u* in *feod*, *feodal*, *feodatory*, which are sometimes written as they are pronounced, *feud*, *feudal*, *feudatory*.

259. *Eo*, when unaccented, has the sound of *u* short in *surgeon*, *sturgeon*, *dudgeon*, *gudgeon*, *bludgeon*, *curmudgeon*, *dungeon*, *luncheon*, *puncheon*, *truncheon*, *burgeon*, *habergeon;* but in *scutcheon*, *escutcheon*, *pigeon*, and *widgeon*, the *eo* sounds like short *i*.

260. *Eo* sounds like long *o* in *yeoman*, and *yeomanry;* the first syllable of which words rhyme with *go*, *no*, *so*. See the word.

261. *Eo* in *galleon*, a Spanish ship, sounds as if written *galloon*, rhyming with *moon*.

EOU.

262. This triphthong is often contracted into one syllable in prose, and poets never make it go for two. In *cutaneous* and *vitreous* two syllables are palpable; but in *gorgeous* and *outrageous* the soft *g* coalescing with *e* seems to drop a syllable.

263. The triphthong is never found but in an unaccented syllable, and generally a final one; and when it is immediately preceded by the dentals *d* or *t*, it melts them into the sounds of *j* and *tch*. Thus *hideous* and *piteous* are pronounced as if written *hijeous* and *pitcheous*. The same may be observed of *righteous*, *plenteous*, *bounteous*, *courteous*, *beauteous*, *courteous*, *beauteous*, and *duteous*, (293) (294).

EU.

264. This diphthong is always sounded like long *u* or *ew;* and is never irregular. Thus *feud*, *deuce*, &c. are pronounced as if written *fewd*, *dewce*, &c.

DIFFERENT SOUNDS OF *EW, EWE, EY, EYE, IA, IE, IEU, IEW, IO, IOU.*

EW.

265. This diphthong is pronounced like long *u*, and is almost always regular. There is a corrupt pronunciation of it like *oo* chiefly in London, where we sometimes hear *dew* and *new* pronounced as if written *doo* and *noo*.

266. *Shew* and *strew* have almost left this class, and by Johnson's recommendation are become *show* and *strow*, as they are pronounced. The proper name *Shrewsbury*, however, still retains the *e*, though always pronounced *Shrowsbury*. *Sew*, with a needle, always rhymes with *no;* and *sewer*, signifying a drain, is generally pronounced *shore*; but *sewer*, an officer, rhymes with *fewer*. See SEWER.

267. *Ew* is sometimes pronounced like *aw* in the verb to *chew*, but this is gross and vulgar. To *chew* ought always to rhyme with *new*, *view*, &c.

EWE.

268. This triphthong exists only in the word *ewe*, a female sheep; which is pronounced exactly like *yew*, a tree. There is a vulgar pronunciation of this word as if written *yoe*, rhyming with *doe*, which must be carefully avoided. See the word.

EY.

267. When the accent is on this diphthong it is always pronounced like *ay*, or like its kindred diphthong *ei*, in *vein*, *reign*, &c. Thus *bey*, *dey*, *grey*, *prey*, *they*, *trey*, *whey*, *obey*, *convey*, *purvey*, *survey*, *hey*, *eyre*, and *eyrey*, are always heard as if written *bay*, *day*, &c. *Key* and *ley* are the only exceptions which always rhyme with *sea*, (220).

270. *Ey*, when unaccented, is pronounced like *ee;* thus *galley*, *valley*, *alley*, *barley*, &c. are pronounced as if written *gallee*, *vallee*, &c. The noun *survey* therefore, if we place the accent on the first syllable, is anomalous. See the word.

EYE.

271. This triphthong is only found in the word *eye*, which is always pronounced like the letter *I*.

IA.

272. This diphthong, in the terminations *ian*, *ial*, *iard*, and *iate*, forms but one syllable, though the *i* in this situation having the squeezed sound of *ee* perfectly similar to *y*, gives the syllable a double sound, very distinguishable in its nature from a syllable formed without the *i*. Thus *Christian*, *filial*, *poniard*, *conciliate*, sound as if written, *Christ-yan*, *fil-yal*, *pon-yard*, *concil-yate*, and have in the last syllable an evident duplicity of sound. (113).

273. In *diamond*, these vowels are properly no diphthong; and in prose, the word ought to have three distinct syllables; but we frequently hear it so pronounced as to drop the *a* entirely, and as if written *dimond*. This however, is a corruption that ought to be avoided by all elegant speakers.

274. In *carriage*, *marriage*, *parliament*, and *miniature*, the *a* is dropped, and the *i* has its short sound as if written *carridge*, *marridge*, *parliment*, *mineture*. (90).

IE.

275. The regular sound of this diphthong is that of *ee*, as in *grieve*, *thieve*, *fiend*, *lief*, *liege*, *auctionier*, *grenadier*, &c. as if written *greeve*, *theeve*, *feend*, &c.

276. It has the sound of long *i* in *die*, *hie*, *lie*, *pie*, *tie*, *vie*, as if written *dy*, *hy*, &c.

277. The short sound of *e* is heard in *friend*, and the long sound of the same letter in *tier*, *frieze*.

278. In *variegate* the best pronunciation is to pronounce both vowels distinctly like *e* as if written *vary-e-gate*.

279. In the numeral terminations in *ieth*, as *twentieth*, *thirtieth*, &c. the vowels ought also to be kept distinct; the first like open *e*, as heard in the *y* in *twenty*, *thirty*, &c. and the second like short *e*, heard in *breath*, *death*, &c.

280. In *fiery*, too, the vowels are heard distinctly.

281. In *orient* and *spaniel*, where these letters come after a liquid, they are pronounced distinctly; and great care should be taken not to let the last word degenerate into *spannel*.

282. When these letters meet, in consequence of forming the plurals of nouns, they retain either the long or short sound they had in the singular, without increasing the number of syllables. Thus a *fly* makes *flies*, a *lie* makes *lies*, *company* makes *companies*, and *dignity*, *dignities*. The same may be observed of the third persons and past participles of verbs, as *I fly*, *he flies*, *I deny*, *he denies*, *he denied*, *I sully*, *he sullied*, &c. which may be pronounced as if written *denize*, *denide*, *sullid*, &c.

283. When *ie* is in a termination without the accent, it is pronounced, like *e* only, in the same situation. Thus *brazier*, *grazier*, and *glazier*, have the last syllable sounded, as if written *brazhur*, *grazhur*, and *glazhur;* or rather as *braze-yur*, *graze-yur*, &c.

IEU.

284. These vowels occur in *adieu*, *lieu*, *purlieu*, where they have the sound of long *u*, as if written *adeu*, *leu*, *purleu*.

285. In one word, *lieutenant*, these letters are pronounced like short *e*, as if written *lev-tenant*.

IEW.

286. These letters occur only in the word *view*, where they sound like *ee*, rhyming with *few*, *new*.

IO.

287. When the accent is upon the first of these vowels they form two distinct syllables, as *priory*, *violent*, *violet;* the last of which is sometimes corruptly pronounced *vi-let*.

288. In *marchioness* the *i* is entirely sunk, and the unaccented *o* pronounced, as it usually is in this situation, like short *u*, as if written *marshuness*. (352).

289. In *cushion* the *o* is sunk, and the word pronounced *cushin*. See the word.

290. In the very numerous termination *ion*, these vowels are pronounced in one syllable like short *u;* but when they are preceded by a liquid as in *million*, *minion*, *clarion*, &c. (113) the two vowels, though they make but one syllable are heard distinctly: the same may be observed when they are preceded by any of the other consonants, except *s* and *t;* as *champion*, *scorpion*, &c. where the vowels are heard separately: but the termination, *tion* and *sion*, are pronounced in one syllable, and exactly like the verb *shun*.

291. The only exception to this rule is, when the *t* is preceded by *s:* in this case the *t* goes into *tch*, and the *i* is in a small degree audible like short *e*. This may be heard in *question*, *mixtion*, *digestion*, *combustion*, and what is an instance of the same kind in *Christian*, as if written *quest-yun*, *mixt-yun*, &c. (464)

IOU.

292. This triphthong, when preceded by a liquid, or any mute but a dental, is heard distinctly in two syllables, as in *bilious*, *various*, *glorious*, *abstemious*, *ingenious*, *copious;* but when preceded by the dentals *t*, soft *c* and *s*, these vowels coalesce into one syllable, pronounced exactly like *shus:* thus *precious*, *factious*, *noxious*, *anxious*, are pronounced as if written *presh-us*, *fac-shus*, *nock-shus*, *ang-shus*.

293. The same tendency of these vowels to coalesce after a dental, and draw it to aspiration, makes us hear *tedious, odious*, and *insidious*, pronounced as if written *te-je-us, o-jee-us*, and *in-sid-je-us*; for as *d* is but flat *t*, it is no wonder it should be subject to the same aspiration, when the same vowels follow. Nay, it may be affirmed, that so agreeable is this sound of the *d* to the analogy of English pronunciation, that, unless we are upon our guard, the organs naturally slide into it. It is not, however, pretended that this is the politest pronunciation; for the sake of analogy it were to be wished it were: but an ignorance of the real powers of the letters, joined with a laudable desire of keeping as near as possible to the orthography, is apt to prevent the *d* from going into *j*, and to make us hear *o-de-us, te-de-ous*, &c. On the other hand, the vulgar, who in this case are right by instinct, not only indulge the aspiration of the *d*, which the language is so prone to, but are apt to contract the succeeding syllable too closely, and instead of *o-je-us* and *te-je-ous*, say *o-jus* and *te-jus*.

294. It is with some satisfaction I see Mr. Sheridan adopt this pronunciation of these terminations, though his manner of spelling them is too apt to incline us to a too close contraction of them. Nor can I conceive why he should spell *melodious, me-lo-dzhus*, and *commodious, com-mo-dy-us*, as there can be no possible difference in the sound of the terminations. If the *y* is distinctly pronounced, it sufficiently expresses the aspiration of the *d*, and is in my opinion, the preferable mode of delineating the sound, as it keeps the two last syllables from uniting too closely. Where analogy, therefore, is so clear, and custom so dubious, we ought not to hesitate a moment at pronouncing *odious, tedious, perfidious, fastidious, invidious, compendious, melodious, commodious, preludious*, and *studious*, as if written *o-je-ous, te-je-ous*, &c. or rather *o-dyus, te-dyus*, &c.; nor should we forget that *Indian* comes under the same analogy, and ought, though contrary to respectable usage, to be pronounced as if written *Indyan*, and nearly as *In-je-an.* (376).

OA.

295. This diphthong is regularly pronounced as the long open sound of *o*, as in *boat, coat, oat, coal, loaf*, &c. The only exceptions are, *broad, abroad, groat*, which sound as if written *brawd, abrawd, grawt*. *Oatmeal* is sometimes pronounced *otmeal*, but seems to be recovering the long sound of *o*, as in *oat*.

OE.

296. Whether it be proper to retain the *o* in this diphthong, or to banish it from our orthography, as Dr. Johnson advises, certain it is, that it is always pronounced like single *e*, and comes entirely under the same laws as that vowel. Thus, when it ends a syllable, with the accent upon it, it is long, as in *An-toe-ci, Peri-oe-ci*. When under the secondary accent, in *oec-umenical, oec-onomics*, it is like *e* short. It is long *e* in *foe-tus*, and short *e* in *foet-id* and *assafoet-ida*. In *doe, foe, sloe, toe, throe, hoe*, (to dig), and *bilboes*, it is sounded exactly like long open *o*. In *canoe* and *shoe*, like *oo*, as if written *canoo* and *shoo*; and in the verb *does*, like short *u*, as if written *duz*.

OEI.

297. There is but one word where this triphthong occurs, and that is in Shakspeare's King Lear, in the word *oeiliads* (glances). If it were necessary to pronounce it, in my opinion it ought to be sounded as if written *e-il-yads*.

OEU.

298. This diphthong is from the French, in the word *manoeuvre;* a word, within these few years, of very general use in our language. It is not in Johnson, and the *oeu* is generally pronounced by those who can pronounce French, in the French manner; but this is such a sound of the *u* as does not exist in English, and therefore it cannot be described. The nearest sound is *oo;* with which, if this word is pronounced by an English speaker, as if written *manoovre*, it may, except with very nice French ears, escape criticism.

OI.

299. The general, and almost universal sound of this diphthong, is that of *a* in *water*, and the first *e* in *me-tre*. This double sound is very distinguishable in *boil, toil, spoil, joint, point, anoint*, &c. which sound ought to be carefully preserved, as there is a very prevalent practice among the vulgar of dropping the *o*, and pronouncing these words as if written *bile, tile, spile*, &c.

300. The only instance which admits of a doubt in the sound of this diphthong, when under the accent, is in the word *choir;* but this word is now so much more frequently written *quire*, that uniformity strongly inclines us to pronounce the *oi* in *choir* like long *i*, and which, by the common orthography, seems fixed beyond recovery. But it may be observed, that either the spelling or the pronunciation of *Chorister*, commonly pronounced *Quirister*, ought to be altered. See the words.

301. When this diphthong is not under the accent, it is variously pronounced. Dr. Kenrick places the accent on the first syllable of *turcois*, and, for I know not what reason, pronounces it as if written *turkiz;* and *turkois* with the *oi* broad as in *boys*. Mr. Sheridan places the accent on the second syllable, and gives the diphthong the French sound, as if written *turkaze*. In my opinion the best orthography is *turquoise*, and the best pronunciation with the accent on the last syllable, and the *oi* sounded like long *e*, as if written *turkeeze:* as we pronounce *tortoise*, with the accent on the first syllable, and the *oi* like short *i*, as if written *tortiz*.

302. In *avoirdupois*, the first diphthong is pronounced like short *e*, as if written *averdupoise*.

303. In *connoisseur* the same sound of *e* is substituted, as if written *connesseur*.

304. In *shamois*, or *chamois*, a species of leather, the *oi* is pronounced like long *e*, as if written *shammee*.

305. *Adroit* and *devoir*, two scarcely naturalized French words, have the *oi* regular.

OO.

306. The sound of this diphthong is regular, except in a few words. It is pronounced long in *moon, soon, fool, rood, food, mood*, &c. This is its regular sound.

307. It has a shorter sound corresponding to the *u* in *bull*, in the words *wool, wood, good, hood, foot, stood, understood:* and these are the only words where this diphthong has this middle sound.

308. It has the sound of short *u* in the two words *blood* and *flood*, rhyming with *mud*.

309. *Soot* is vulgarly pronounced so as to rhyme with *but, hut*, &c. but ought to have its long, regular sound, rhyming with *boot;* as we always hear it in the compound *sooty*. See the word.

310 *Door* and *floor* are universally pronounced by the English as if written *dore* and *flore;* but in Ireland they preserve the regular sound of *oo*.

311. *Moor*, a black man, is regular in polite pronunciation, and like *more* in vulgar. *Moor*, a marsh, is sometimes heard rhyming with *store;* but more correct speakers pronounce it regularly, rhyming with *poor*.

OU.

312. This sound is the most irregular assemblage of words in our language. Its most common sound is that heard in

bound, found, ground, &c. and this may be called its proper sound; but its deviations are so many and so various, that the best idea of it will be conveyed by giving the simples of all its different sounds.

313. The first or proper sound of this diphthong is composed of the *a* in *ball*, and the *oo* in *woo*, or rather the *u* in *bull*, and is equivalent to the *ow* in *down, frown*, &c. This sound is heard in *abound, about, account, accoustics, aground, aloud, amount, around, arouse, astound, avouch, bough, bounce, bound, bounty, bounteous, bout, carouse, chouse, cloud, clough, clout, clouterly, compound, couch, couchant, crouch, deflour, devour, devout, doubt, doubtful, drought, doughty, douse, encounter, espouse, expound, flout, foul, flounder, found, foundling, fountain, frousy, glout, gout* (a disease), *ground, grout, hound, hour, house, impound, loud, lounge, louse, lout, mound, mountain, mountebank, mouse, mouth, noun, ounce, our, oust, out, outer, outermost, paramount, plough, pouch, pounce, pound, pout, profound, pronounce, propound, proud, rebound, recount, redoubt, redoubted, redound, rencounter, round, roundelay, rouse, rout, scoundrel, scour, scout, shout, shroud, slouch, spouse, spout, sprout, stout, surround, south, thou, thousand, touse, trounce, trousers, trout, wound*, (did wind), *slough* (a miry place), *vouch, vouchsafe, without*, and in *pronoun* and *scaramouch;* though, in these words, the accent is not on the diphthong.

314. The second sound is that of short *u* in *bud*, and is heard in the following words and their compounds: *Adjourn, journey, journal, bourgeon, country, cousin, couple, accouple, double, trouble, courteous, courtesy, courage, encourage, joust, gournet, housewife, flourish, mounch, nourish, enough, chough, rough, tough*, (a cast skin), *scourge, southerly, southern, southernwood, southward, touch, touchy, young, younker*, and *youngster*, but *southern, southerly*, and *southward*, are sometimes pronounced regularly like *south:* this, however, is far from the prevailing pronunciation. This is the sound this diphthong always has when the accent is not on it, unless in very few instances, where the compound retains the sound of the simple, as in *pronoun;* but in *sojourn*, and *sojourner*, with the accent on the first syllable, and in every unaccented termination, in *our*, and *ous*, this diphthong has exactly the sound of short *u*. Thus *favour, honour*, and *famous*, are pronounced as if written *favur, honur*, and *famus*.

315. The third sound given to these vowels is that of *oo* in *too* and *woo* (39): and is found in the following words: *Bouge, croup, group, aggroup, amour, paramour, bouse, bousy, boutefeu, capouch, cartouch, fourbe, gout* (taste), and *ragout* (pronounced *goo* and *ragoo*), *rendezvous, rouge, soup, sous* (pronounced *soo*), *surtout, through, thoroughly, toupee*, or *toupet, you, your, youth, tour, contour, tourney, tournay, tournament, pour*, and *route* (a road), *accoutre, billet doux, agouti, uncouth, wound* (a hurt), and *routine* (a beaten road), though the diphthong on the latter has not the accent. See Tourney.

316. The verb to *pour* is sometimes pronounced to *pore*, and sometimes to *poor;* in each case it interferes with a word of a different signification, and the best pronunciation, which is that similar to *power*, is as little liable to that exception as either of the others. See the word.

317. To *wound* is sometimes pronounced so as to rhyme with *found;* but it is directly contrary to the best usage; but *route* (a road, as to take a different *route*), is often pronounced so as to rhyme with *doubt* by respectable speakers.

318. The fourth sound of this diphthong is that of long open *o*, and is heard in the following words; *though, although, coulter, court, accourt, gourd, courtier, course, discourse source, recourse, resource, bourn, dough, doughy, four, mould, mouldy, moult, shoulder, smoulder, soul, poultice, poult, poulterer, poultry, troul* (to roll smoothly, marked by Mr. Sheridan as rhyming with *doll*, but more properly by Dr. Kenrick with *roll*), and *borough, thorough, forlough, fourteen, concourse*, and *intercourse*, preserve the diphthong in the sound of long *o*, though not under the accent.

319. The fifth sound of *ou* is like the noun *awe*, and is heard only in the following words: *ought, bought, sought, besought, fought, nought, thought, methought, wrought*.

320. The sixth sound is that of short *oo*, or the *u* in *bull*, and is heard only in the auxiliary verbs *would, could, should*, rhyming with *good, hood, stood*, &c.

321. The seventh sound is that of short *o*, and heard only in the words *cough* and *trough;* rhyming exactly with *off* and *scoff:* and in *lough* and *shough*, pronounced *lock* and *shock*.

OW.

322. The elementary sound of this diphthong is the same as the first sound of *ou*, and is heard in *how, now*, &c. but the sound of long *o* obtains in so many instances, that it will be necessary to give a catalogue of both.

323. The general sound, as the elementary sound may be called, is heard in *mow, how, bow* (a mark of respect), *mow* (a heap of barley, &c.) *cow, brow, brown, browse, plow, sow, vow, avow, allow, disallow, endow, down, clown, frown, town, crown, drown, gown, renown, dowager, dowdy, dower, dowre, dowry, dowery, dowlas, drowse, drowsy, flower, bower, lower*, (to look gloomy,) *power, powder prowess, prow, prowl, vowel, towel, bower, rowel, scowl, crowd, shower, tower, sowins, sowl, thowl, low* (to bellow as a cow). This word is generally pronounced as *low*, not *high;* but if custom, in this case, has not absolutely decided, it ought, in my opinion, to have the first sound of this diphthong, rhyming with *how*, as much more expressive of the noise it signifies; which, where sounds are the ideas to be expressed, ought to have great weight in pronunciation (241) 251).

324. The second sound of this diphthong is heard in *blow, slow, crow, grow, flow, glow, bow*, (to shoot with), *know, low*, (not high), *mow* (to cut grass,), *row, show, sow*, (to scatter grain) *strow, slow, snow, trow, below, bestow, own, owner, flown, froward, toward, grown, growth, know, known, sown, lower* (to bring low), *throw, thrown;* in all these words the *ow* sounds like long *o* in *go, no, so*, &c.

325. The noun *prow*, signifying the forepart of a ship, rhymes with *go* in Mr. Sheridan, and with *now* in Dr. Kenrick. The latter is, in my opinion, the preferable sound; while the verb to *prowl* (to seek for prey) rhymes with *owl* according to Mr. Sheridan, and with *soul* according to Dr. Kenrick: the latter has the old spelling *prole* to plead, but the former has, in my opinion, both analogy and the best usage on its side. Both these writers unite in giving the first sound of this diphthong to *prowess:* which is unquestionably the true pronunciation. See to Prowl.

326. The proper names *How, Howel, Howard*, and *Powel*, generally are heard with the first sound of this diphthong, as in *how, now*, &c. but *Howes* and *Stow* (the Historian) commonly rhyme with *knows* and *know*. *Howard*, among people of rank, is generally pronounced with the second sound, rhyming with *froward;* and *Grosvenor*, as if written *Gravenor*.

> "So much they hate the crowd, that if the throng
> "By chance go right, they purposely go wrong." *Pope.*

Snowdon is frequently pronounced with the first sound of *ow;* but the second sound seems preferable; as it is not improbable that these mountains had their name, like the Alps, from the snow on their tops.

327. When this diphthong is in a final unaccented syllable it has always the second sound, like long *o*, in *borrow, sorrow, fellow, willow*, &c. The vulgar shorten this sound, and pronounce the *o* obscurely, and sometimes as if followed by *r*, as *winder* and *feller* for *window* and *fellow;* but this is almost too despicable for notice. Good speakers preserve the diphthong in this situation as distinct as if the accent were on it, and give it the full sound of open *o*, rhyming with *no, so*, &c.

328. This diphthong, in the word *knowledge*, has of late

years undergone a considerable revolution. Some speakers, who had the regularity of their language at heart, were grieved to see the compound depart so far from the sound of the simple, and with heroic fortitude have opposed the multitude by pronouncing the first syllable of this word as it is heard in the verb to *know*. The pulpit and the bar have for some years given a sanction to this pronunciation; but the senate and the stage hold out inflexibly against it; and the nation at large seem insensible of the improvement. They still continue to pronounce, as in the old ludicrous rhymes——

"Among the mighty men of *knowledge*,
"That are professors at Gresham College."

But if ever this word should have the good fortune to be restored to its rights, it would be but charity to endeavour the restoration of a great number of words in a similar situation, such as *breakfast*, *vineyard*, *bewilder*, *meadow*, *hearken*, *pleasure*, *whitster*, *shepherd*, *windward*, and a long catalogue of fellow sufferers, (515). But before we endeavour this restoration we should consider, that contracting the sound of the simple, when it acquires an additional syllable, is an idiom of pronunciation to which our language is extremely prone; nor is it certain that crossing this tendency would produce any real advantage; at least, not sufficient to counterbalance the diversity of pronunciation which must for a long time prevail, and which must necessarily call off our attention from things to words. See Enclitical Termination.

OY.

329. This diphthong is but another form for *oi*, and is pronounced exactly like it. When *alloy* is written with this diphthong, it ought never to be pronounced *allay*. Custom seems to have appropriated the former word to the noun, and the latter to the verb; for the sake of consistency, it were to be wished it were always written *allay;* but it is not to be expected that poets will give up so good a rhyme to *joy*, *cloy*, and *destroy*.

330. The only word in which this diphthong is not under the accent, is the proper name *Savoy:* for *savoy*, a plant, has the accent on the second syllable; but the diphthong in both is pronounced in the same manner.

UA.

331. When the *a* in this diphthong is pronounced, the *u* has the power of *w*, which unites both into one syllable; thus *antiquate*, *antiquary*, *assuage*, *persuade*, *equal*, *language*, &c. are pronounced *antikwate*, *antikwary*, *asswage*, *perswade*, *ekwal*, *langwage*, &c.

332. The *u* in this diphthong is silent, in *guard*, *guardian*, *guarantee*, and *piquant;* pronounced *gard*; *gardian*, *garantee*, and *pikant* (92).

333. In *Mantua*, the town of Italy, both vowels are heard distinctly. The same may be observed of the habit so called; but in *mantuamaker* vulgarity has sunk the *a*, and made it *mantumaker*. The same vulgarity at first, but now sanctioned by universal custom, has sunk both letters in *victuals*, and its compounds *victualling* and *victualler*, pronounced *vittles*, *vittling*, and *vittler*. See Mantua.

UE.

334. This diphthong, like *ua*, when it forms only one syllable, and both letters are pronounced, has the *u* sounded like *w;* as *consuetude*, *dessuetude*, and *mansuetude*, which are pronounced *conswetude*, *desswetude*, and *manswetude*. Thus *conquest* is pronounced according to the general rule, as if written *conkwest;* but the verb to *conquer* has unaccountably deviated into *conker*, particularly upon the stage. This error, however, seems not to be so rooted in the general ear as to be above correction; and analogy undoubtedly demands *conkwer*.

335. This diphthong, when in a final syllable, sinks the *e* as *clue*, *cue*, *due*, *blue*, *glue*, *hue*, *flue*, *rue*, *sue*, *true*, *mue*, *accrue*, *ensue*, *endue*, *imbue*, *imbrue*, *pursue*, *subdue*, *perdue*, *argue*, *residue*, *avenue*, *revenue*, *continue*, *retinue*, *construe*, *statue*, *tissue*, *issue*, *virtue*, *value*, *ague;* in all these words, whether the accent be on the diphthong *ue* or not, it is pronounced like long open *u*. When the accent is not on this diphthong as in the latter portion of these words from *argue*, it is apt to be feebly and indistinctly pronounced, and therefore care ought to be taken to sound it as if these words were written *argew*, *residew*, &c. In *Tuesday*, *u* though not ending a syllable, the diphthong is pronounced in the same manner.

336. In some words the *u* is silent, and the *e* pronounced short, as in *guess*, *guest*, *guerkin*, *guerdon*, where the *u* acts as a servile to preserve the *g* hard.

337. In some words both the vowels are sunk, as in *antique*, *oblique*, *league*, *feague*, *teague*, *colleague*, *plague*, *vague*, *intrigue*, *fatigue*, *harangue*, *tongue*, *disembogue*, *collogue*, *rogue*, *prorogue*, *brogue*, *fugue;* in all which the *ue* is silent, and the *g* pronounced hard. The *q* in *antique* and *oblique*, is pronounced like *k;* as if the words were written *anteek* and *oblike*.

338. The terminations in *ogue* from the Greek, are pronounced in the same manner. Thus *pedagogue*, *demagogue*, *ptysmagogue*, *menagogue*, *emmenagogue*, *synagogue*, *mystagogue*, *decalogue*, *dialogue*, *trialogue*, *catalogue*, *theologue*, *eclogue*, *monologue*, *prologue*, and *epilogue*, are all pronounced as if written, *pedagog*, *demagog*, &c.

339. This diphthong after *r* becomes *oo*. Thus *true* is pronounced *troo*.

UI.

340. The *u* in this diphthong, as in *ua* and *ue*, when both vowels are pronounced without forming two syllables; is pronounced like *w;* thus *languid*, *anguish*, *languish*, *extinguish*, *distinguish*, *relinquish*, *vanquish*, *linguist*, *penguin*, *pursuivant*, *guiacum*, are pronounced as if written *langwid*, *angwish*, &c. and *cuiss* and *cuisses*, as if written *kwiss* and *kwisses*, and *cuirass*, *kwirass*.

341. The *u* is silent, and the *i* pronounced long, in *guide*, *disguise*, *guile*, *beguile;* but the *u* is silent and *i* short, in *guild*, *build*, *guilt*, *guinea*, *guitar*. *Guild*, in *Guildhall*, is, by the lower people of London, pronounced so as to rhyme with *child;* but this is directly opposite to the best usage, and contrary to its etymology; as it is a compound of *guild* (a corporation, always pronounced like the verb to *gild*), and *hall*. Dr. Jones, who wrote in Queen Anne's time, tells us it was then pronounced as if written *Gildhall*. In *circuit* and *biscuit* the *u* is merely servile; in both the *c* is hard, and the *i* short, as if written *surkit*, and *bisket*. *Conduit* is pronounced *condit*.

342. In *juice*, *sluice*, *suit*, and *pursuit*, the *i* is silent, and the *u* has its diphthongal sound, as if preceded by *e*, and the words were written *slewce*, *jewce*, *sewt*, *pursewt*.

343. When this diphthong is preceded by *r*, it is pronounced like *oo;* thus *bruise*, *cruise*, *fruit*, *bruit*, *recruit*, are pronounced as if written *broose*, *crooze*, *broot*, *froot*, *recroot*, (339.)

UO.

344. The *u* in this diphthong, as in the three last, is pronounced like *w* in *quote*, *quota*, *quotation*, *quotient*, *quotidian*, *quorum*, *quondam*, *siliquose;* *quoth*, as if written *kwote*, *kwota*, *kwotation*, &c. *Coif* and *coit*, commonly pronounced *kwoif* and *kwoit*, do not come under this class. See the words.

UY

345. This diphthong, with the accent on it, sinks the *u*, and pronounces the *y* like long *i;* thus *buy*, the only word where *uy* has the accent, rhymes with *dry*, *fly*, &c. When the ac-

eau is not on this diphthong it is sounded like long *e*, as *plateau*, *rogue*, *glue*, pronounced *pla-gue*, *ro-gue*, *glu-ee*. The same may be observed of *obloquy*, *ambloquy*, *fauciloquy*, *soliloquy*, *ventriloquy*, *alloquy*, *colloquy*, pronounced *oblo-quee*, *ambilo-quee*, &c.

UOY.

346. This diphthong is found only in the word *buoy*, pronounced as if written *bwoy*, but too often exactly like *boy*. This, however, is an impropriety which ought to be avoided by correct speakers.

OF THE CONSONANTS.

B.

347. When *b* folows *m* in the same syllable it is generally silent, as in *lamb*, *kemb*, *limb*, *comb*, *dumb*, &c. except *accumb* and *succumb*. It is silent also before *t* in the same syllable, as in *debt*, *doubt*, *redoubt*, *redoubted*, and their compounds. It is silent before *t*, when not in the same syllable, in the word *subtle* (cunning), often inaccurately used for *subtile* (fine), where the *b* is always pronounced. In the mathematical term *rhomb* the *b* is always heard, and the word pronounced as if written *rhumb*. *Ambs-ace* is pronounced *Aims-ace*.

C.

348. *C* is always hard like *k* before *a*, *o*, and *u*, as *card*, *cord*, *curd*; and soft, like *s* before *e*, *i*, and *y*, as *cement*, *city*, *cynic*.

349. When *c* ends a word, or syllable, it is always hard, as in *music*, *flaccid*, *sic-city* pronounced *musick*, *flack-sid*, *sick-sity*. See EXAGGERATE.

350. In the words *sceptic*, where the first *c*, according to analogy, ought to be pronounced like *s*, Dr. Johnson has not only given his approbation to the sound of *k*, but has, contrary to general practice, spelt the word *skeptic*. It may be observed, perhaps, in this, as on other occasions, of that truly great man, that he is but seldom wrong; but when he is so, that he is generally wrong to absurdity. What a monster does this word *skeptic* appear to an eye the least classical or correct! and if this alteration be right, why should we hesitate to write and pronounce *scene*, *scepter*, and *Lacedæmon*, *skene*, *skepter*, and *Lakedæmon*, as there is the same reason for *k* in all? It is not, however, my intention to cross the general current of polite and classical pronunciation, which I know is that of sounding the *c* and *k*; my objection is only to writing it with the *k*; and in this I think I am supported by the best authorities since the publication of Johnson's Dictionary.

351. *C* is mute in *Czar*, *Czarina*, *victuals*, *indict*, *arbuscle*, *corpuscle*, and *muscle*, it sounds like *tch* in the Italian words *vermicelli* and *violincello*; and like *z* in *suffice*, *sacrifice*, and *discern*.

352. This letter, when connected with *h*, has two sounds; the one like *tch*, in *child*, *chair*, *rich*, *which*, &c. pronounced as if written *tchild*, *tchair*, *ritch*, *whitch*, &c.; the other like *sh*, after *l* or *n*, as in *belch*, *bench*, *filch*, &c. pronounced *belsh*, *bensh*, *filsh*, &c. This latter sound is generally given to words from the French, as *chaise*, *chagrin*, *chamade*, *champagne*, *champignon*, *chandelier*, *chaperon*, *charlatan*, *chevalier*, *cheveron*, *chicane*, *capuchin*, *cartouch*, *machine*, *machinist*, *chancre*, *marchioness*.

353. *Ch*, in words from the learned languages, are generally pronounced like *k*, as *chalcography*, *chalybeate*, *chamæleon*, *chamomile*, *chaos*, *character*, *cart*, *chasm*, *chemist*, (if derived from the Arabic, and *chymist* if from the Greek.) *chersonese*, *chimera*, *chorography*, *chiromancy*, *cholorosis*, *cholor*, *chorus*, *chord*, *chorography*, *chyle*, and its compounds; *anchor*, *anchoret*, *cachexy*, *catechism*, *catechise*, *catechetical*, *catechumen*, *echo*, *echinus*, *epoch*, *epocha*, *ichor*, *machination*, *machinal*, *mechanic*, *mechanical*, *orchestra*, *orchestre*, *technical*, *anarch*, *anarchy*, *conch*, *cochleary*, *distich*, *hemistich*, *monostich*, *eunuch*, *monarch*, *monarchical*, *hierarch*, *heresiarch*, *pentateuch*, *stomach*, *stomachic*, *scheme*, *school*, *scholar*, *schesis*, *mastich*, and in all words where it is followed by *r*, as *Christ*, *Christian*, *chronology*, *chronicle*, &c. To these may be added the *Celtic* word *loch* (a lake). The exceptions to these are, *charity*, *charge*, *archer*, and *archery*.

354. When *arch*, signifying chief, begins a word from the Greek language, and is followed by a vowel, it is always pronounced *ark*, as in *archangel*, *archipelago*, *architect*, *archives*, *archetype*, *archaism*, *archiepiscopal*, *archidiaconal*, *architrave*, *archaiology*. But when we prefix *arch* to a word of our own, and this word begins with a consonant, we pronounce it so as to rhyme with *march*, as *archduke*, *archdeacon*, *archbishop*; and sometimes, when the following word begins with a vowel, if it is a composition of our own, and the word does not come to us compounded from the Greek or Latin, as *arch-enemy*.

355. The word *ache*, (a pain), pronounced *ake*, comes from the Greek, and was by Shakspeare extended to two syllables, *aches* with *ch*, as in *watches*: but this is obsolete. It is now almost universally written *ake* and *akes*, except where it is compounded with another word, as *head-ach*, *heart-ach*, &c. and by thus absurdly retaining the *ch* in the compound, we are puzzled how to form the plural, without pronouncing *aches* in two syllables: but if this remnant of Greek must be retained, the best way would be to spell the compound *head-ache*, as the simple *ache*, with a final *e*.

356. In *choir* and *chorister* the *ch* is almost universally pronounced like *qu* (300): in *ostrich*, like *dge*, as spelled *ostridge*. It is silent in *schedule*, *schism*, and *yacht*; pronounced *seddule*, *sizm*, and *yot*. It is sunk in *drachm*, but heard in *drachma*; pronounced *dram* and *drackma*.

357. When *c* comes after the accent, either primary or secondary, and is followed by *ea*, *ia*, *ie*, *io*, or *eous*, it takes the sound of *sh*; thus *ocean*, *social*, *Phocion*, *saponaceous*, are pronounced as if written *oshean*, *sosheal*, *Phoshean*, *saponasheous*, *fasciation*, *negociation*, &c. (196).

D.

358. In order to have a just idea of the alterations of sound this letter undergoes, it will be necessary to consider its near relation to *T* (41). These consonants, like *p*, and *b*, *f*, and *v*, *k*, and hard *g*, and *s*, and *z*, are letters of the same organ; they differ by the nicest shades of sound, and are easily convertible into each other; *t*, *p*, *f*, *k*, and *s*, may, for the sake of distinction, be called sharp, and *d*, *b*, *v*, *g*, and *z*, may be called flat. For this reason, when a singular ends in a sharp consonant, the *s*, which forms the plural, preserves its sharp sound, as in *cuffs*, *packs*, *lips*, *hats*, *deaths*; and when the singular ends with a flat consonant, the plural *s*, has the sound of *z*, as *drabs*, *bags*, *beads*, *lives*.

359. In the same manner, when a verb ends with a sharp consonant, the *d*, in the termination *ed*, assumed by the preterit and participle, becomes sharp, and is sounded like *t*; thus *stuffed*, *tripped*, *cracked*, *passed*, *vouched*, *faced*, (where the *e* is suppressed, as it always ought to be except when we are pronouncing the language of Scripture) (104) change the *d* into *t*, as if written *stufft*, *tript*, *crackt*, *past*, *voucht*, *faste*. So, when the verb ends in a flat consonant, the *d* preserves its true flat sound, as *drubbed*, *pegged*, *lived*, *buzzed*, where the *e* is suppressed, and the words pronounced in one syllable, as if written *drubb'd*, *pegg'd*, *liv'd*, *buzz'd*. It may be observed too, that when the verb ends in a liquid, or a liquid and mute *e*, the participial *d* always preserves its pure sound; as *blamed*, *joined*, *filled*, *barred*, pronounced *blam'd*, *join'd*, *fill'd*, *barr'd*. This contraction of the participial *ed*, and the verbal *en* (103), is so fixed an idiom of our pronunciation, that to alter it, would be to alter the sound of the whole language. It must, however,

be regretted, that it subjects our tongue to some of the most hissing, snapping, clashing, grinding, sounds that ever grated the ears of a Vandal. Thus *rasped*, *scratched*, *wrenched*, *bridled*, *jangled*, *birchen*, *hardened*, *strengthened*, *quickened*, &c. almost frighten us when written as they are actually pronounced, as *rasp't*, *scratcht*, *wrencht*, *bridl'd*, *jangl'd*, *birch'n*, *strength'n'd*, *quick'n'd*, &c. but to compensate for these Gothick sounds, which, however, are not without their use, our language is full of the smoothest and most sonorous terminations of the Greeks and Romans.

360. By the forgoing rule of contraction, arising from the very nature of the letters, we see the absurdity of substituting the *t* for *ed*, when the verb ends in a sharp consonant; for, when the pronunciation cannot be mistaken, it is folly to alter the orthography. Thus the *Distressed Mother*, the title of a tragedy, needs not to be written *Distrest Mother*, as we generally find it, because, though we write it in the former manner, it must necessarily be pronounced in the latter.

361. By this rule, too, we may see the impropriety of writing *blest* for *blessed*, when a participle.

"Blest in thy genius, in thy love too blest" *Pope.*

But when the word *blessed* is an adjective, it ought always to be pronounced, even in the most familiar conversation, in two syllables, as this is a *blessed* day, the *blessed* thistle, &c.

362. This word, with *learned*, *cursed*, and *winged* are the only participle adjectives which are constantly pronounced in two syllables, where the participles are pronounced in one: thus *a learned man*, *a cursed thing*, *a winged horse*, preserve the *ed* in a distinct syllable; while the same words, when verbs, as *he learned to write*, *he cursed the day*, *they winged their flight*, are heard in one syllable, as if written *learnd*, *curst*, and *wingd*; the *d* in *cursed* changing to *t*, from its following the sharp consonant *s*, (358).

363. Poetry, however, (which has been one great cause of improper orthography) assumes the privilege of using these words, when adjectives, either as monosyllable or dissyllables; but correct prose rigidly exacts the pronunciation of *ed* in these words, when adjectives, as a distinct syllable. The *ed* in *aged* and *winged*, always make a distinct syllable, as *an aged man*; the *winged courser;* but when this word is compounded with another, the *ed* does not form a syllable, as *a full-ag'd horse; a sheath-wing'd fowl.*

364. It is, perhaps, worthy of notice, that when adjectives are changed into adverbs by the addition of the termination *ly*, we often find the participial termination *ed* preserved long and distinct, even in those very words where it was contracted when used adjectively. Thus though we always hear *confess'd*, *profess'd*, *design'd*, &c. we as constantly hear *con-fess-ed-ly; pro-fess-ed-ly*, *de-sign-ed-ly*, &c. The same may be observed by the following list of words, which, by the assistance of the Rhyming Dictionary, I am enabled to give, as, perhaps, the only words in the language in which the *ed* is pronounced as a distinct syllable in the adverb, where it is contracted in the participial adjective: *Forcedly*, *enforcedly*, *unveiledly*, *deformedly*, *feignedly*, *unfeignedly*, *discernedly*, *resignedly*, *definedly*, *restrainedly*, *concernedly*, *unconcernedly*, *discernedly*, *undiscernedly*, *preparedly*, *assuredly*, *advisedly*, *dispersedly*, *diffusedly*, *confusedly*, *unperceivedly*, *resolvedly*, *deservedly*, *undeservedly*, *reservedly*, *unreservedly*, *avowedly*, *perplexedly*, *fixedly*, *amazedly.*

365. To this catalogue may be added several abstract substantives formed from participles in *ed;* which *ed* makes a distinct syllable in the former though not in the latter. Thus *bleariedness*, *preparedness*, *assuredness diseasedness*, *advised ness*, *reposedness*, *composedness*, *diffusedness*, *confusedness*, *distressedness*, *resolvedness*, *reservedness*, *perplexedness*, *fixedness*, *amazedness*, have *ed* pronounced distinctly.

366. The adjectives *naked*, *wicked*, *picked*, (pointed), *hooked*, *crooked*, *forked*, *tusked*, and *wretched*, are not derived from verbs, and are therefore pronounced in two syllables. The same may be observed of *scabbed*, *crabbed*, *chubbed*, *stubbed*, *shagged*, *snagged*, *ragged*, *crabbed*, *scrubbed*, *dogged*, *rugged*, *scragged*, *hawked*, *jagged;* to which we may add the solemn pronunciation of *stiffnecked;* and these, when formed into nouns by the addition of *ness*, preserve the *ed* in a distinct syllable, as *wickedness*, *scabbedness*, *raggedness*, &c.

367. *Passed*, in the sense of beyond, becomes a preposition, and may allowably be written *past*, as *past twelve o'clock;* but when an adjective, though it is pronounced in one syllable, it ought to be written with two, as *passed pleasures are present pain:* this I know is contrary to usage; but usage is, in this case, contrary to good sense, and the settled analogy of the language.

368. It need scarcely be observed, that when the verb ends in *t* or *d*, the *ed* in the past time and participle has the *d* pronounced with its own sound, and always forms an additional syllable as *landed*, *matted*, &c. otherwise the final *d* could not be pronounced at all.

369. And here, perhaps, it may not be useless to take notice of the very imperfect and confused idea that is given in our best grammar, of what are called contracted verbs, such as *snacht*, *checkt*, *snapt*, *mixt*, *dwelt* and *past*, for *snatched*, *checked*, *snapped*, *mixed*, *dwelled*, and *passed*. To these are added, those that end in *l*, *m*, and *n*, or *p*, after a diphthong, which either shorten the diphthong or change it into a single vowel; and instead of *ed*, take *t* only for the preterit, as *dealt*, *dreamt*, *meant*, *felt*, *slept*, *crept;* and these are said to be considered not as irregular, but contracted only. Now nothing can be clearer than that verbs of a very different kind are here huddled together as of the same. *Snatched*, *checked*, *snapped*, *mixed*, and *passed*, are not irregular at all; if they are ever written *snatcht*, *checkt*, *snapt*, *mixt*, and *past*, it is from pure ignorance of analogy, and not considering that if they were written with *ed*, unless we were to pronounce it as a distinct syllable, contrary to the most settled usage of the language, the pronunciation, from the very nature of the letters must be the same. It is very different with *dwelled;* here, as a liquid, and not a sharp mute, ends the verb, *d* might be pronounced without going into *t*, just as well as in *fell'd*, the participle of to *fell* (to cut down trees). Here then we find custom has determined an irregularity, which cannot be altered, without violence to the language; *dwell* may be truly called an irregular verb, and *dwelt* the preterit and participle.

370. The same may be observed of *deal*, *dream*, *mean*, *feel*, *weep*, *sleep*, and *creep*. It is certain we can pronounce *d* after the four first of these words, as well as in *sealed*, *screamed*, *cleaned*, and *reeled;* but custom has not only annexed *t* to the preterit of these verbs, but has changed the long diphthongal sound into a short one; they are therefore doubly irregular. *Weep*, *sleep*, and *creep*, would not have required *t* to form their preterits any more than *peeped* and *steeped*; but custom, which has shortened the diphthong in the former words, very naturally annexed *t* as the simplest method of conveying the sound.

371. The only two words which occasion some doubt about classing them are, to *learn* and to *spell*. The vulgar (who are no contemptible guides on this occasion) pronounce them in the preterit *learnt* and *spelt*; but as *n* and *l* will readily admit of *d* after them, it seems more correct to favour a tendency to regularity, both in writing and speaking, which the literary world has given into, by spelling them *learned*, and *spelled*, and pronouncing them *learn'd*, and *spell'd*. Thus *earned*, the preterit of to *earn*, has been recovered from the vulgar *earnt*, and made a perfect rhyme to *discerned*.

372. To these observations may be added, that, in such irregular verbs as have the present, the preterit and participle the same, as *cast*, *cost*, *cut*, &c. the second person singular of the

preterit of these verbs take *ed* before the *est*, as *I cast, or did cast; Thou castedst, or didst cast*, &c. for if this were not the case, the second person of the preterit might be mistaken for the second person of the present tense, which in these words would render "confusion worse confounded."

373. I have been led insensibly to these observations by their connexion with pronunciation; and if the reader should think them too remote from the subject, I must beg his pardon, and resume my remarks on the sound of the letter *d*.

374. The vulgar drop this letter in *ordinary*, and *extraordinary*, and make them *or'nary* and *extr'or'nary;* but this is a gross abbreviation; the best pronunciation is sufficiently short, which is *ord'nary* and *extrord'nary;* the first in three, and last in four syllables: but solemn speaking preserves the *i*, and makes the words consist of five syllables.

375. Our ancestors, feeling the necessity of showing the quantity of a vowel followed by *ge* when it was to be short, inserted *d*, as *wedge, ridge, badge*, &c. The same reason induced them to write *colledge* and *alledge*, with the *d;* but modern reformers, to the great injury of the language, have expelled the *d*, and left the vowel to shift for itself; because there is no *d* in the Latin words from which these are derived.

376. *D* like *t*, to which it is so nearly related, when it comes after the accent, and is followed by the diphthong *ie, io, ia* or *eou*, slides into *gzh*, or the consonant *j;* thus *soldier* is universally and justly pronounced as if written *sol-jer; grandeur, granjeur;* and *verdure* (where it must be remembered that *u* is a diphthong) *ver-jure;* and, for the same reason, *education* is elegantly pronounced *ed-jucation*. But *duke* and *reduce*, pronounced *juke* and *re-juce*, where the accent is after the *d*, cannot be too much reprobated.

F.

377. *F* has its pure sound in *often, off*, &c. but in the preposition *of*, slides into its near relation *v*, as if written *ov*. But, when this preposition is in composition at the end of a word, the *f* becomes pure; thus; though we sound *of* singly *ov*, we pronounce it as if the *f* were double in *whereof*.

378. There is a strong tendency to change the *f* into *v* in some words, which confounds the plural number and the genitive case. Thus we often hear of a *wive's jointure*, a *calve's head*, and *houze rent*, for *a wife's jointure, a calf's head*, and *house rent*.

G.

379. *G* like *C*, has two sounds, a hard and a soft one. It is hard before *a, o, u, l*, and *r*, as *game, gone, gull, glory, grandeur. Gaol* is the only exception; now more commonly written *jail*, (212).

380. *G* before *e* and *i* is sometimes hard and sometimes soft. It is generally soft before words of Greek, Latin or French original, and hard before words from the Saxon. These latter, forming by far the smaller number, may be considered as exceptions.

381. *G.* is hard before *e*, in *gear, geck, geese, geld, gelt, gelding, get, gew-gaw, shaggĕd, snagged, ragged, cragged, scragged, dogged, rugged, toged*, (dressed in a toga), *dagger, swagger, stagger, trigger, dogger, pettyfogger, tiger, auger, eager, meager, anger, finger, linger, conger, longer, stronger, younger, longest, strongest, youngest*. The last of these words are generally pronounced in Ireland, so as to let the *g* remain in its nasal sound, without articulating the succeeding vowel; thus *longer* (more long) is so pronounced as to sound exactly like the noun a *longer* (one who longs or wishes for a thing); the same may be observed of the rest. That the pronunciation of Ireland is analigocal, appears from the same pronunciation of *g* in *string-y, spring-y*, full of strings and springs; and *wronger* and *wrongest*, for more and most wrong. But though resting *g* in the nasal sound, without articulating the succeeding vowel, is absolutely necessary in verbal nouns, derived from verbs ending in *ing*, as *singer, bringer, slinger*, &c.; and though analogical, is provincial, in the words above mentioned; for *younger* ought to rhyme exactly with the termination *monger*, which has always the *g* hard, and articulating the vowel; and this pronunciation is approved by Mr. Nares. *Forget, target*, and *together*, fall into this class.

382. *G* is hard before *i*, in *gibbe, gibcat, gibber, gibberish, gibbous, giddy, gift, gig, giggle, giglet*, (properly *gigglet*), *gild, gill* (of a fish), *gimlet, gimp, gird, girdle, girl, girth, gizzard, begin, give, forgive, biggin, piggin, noggin:* also derivatives from nouns or verbs ending in hard *g*, as *druggist, waggish, riggish, hoggish, doggish, sluggish, rigging, digging*, &c.

383. *G* before *y* is generally soft as in *elegy, apology*, &c and almost in all words from the learned languages; but hard in words from the Saxon, which are formed from nouns or verbs ending in *g* hard, as *shaggy, jaggy, knaggy, snaggy, craggy, scraggy, guaggy, swaggy, dreggy, spriggy, twiggy, boggy, foggy, cloggy, buggy, muggy. Gyve*, from its Celtic original, ought to have the *g* hard, but has decidedly adopted the soft *g*.

GN in the same syllable at the beginning of a word.

384. The *g* in this situation is always silent, as *gnaw, gnash, gnat, gnarl, gnomon, gnomonics;* pronounced *naw, nash, nat, narl, nomon, nomonics*.

GN in the same syllable at the end of a word.

385. No combination of letters has more puzzled the critics than this. Two actresses of distinguished merit in *Portia*, in the *Merchant of Venice*, pronounced the word *impugn* differently, and each found her advocate in the newspapers. One critic affirmed, that Miss Young, by preserving the sound of *g*, pronounced the word properly; and the other contended, that Mrs. Yates was more judicious in leaving it out. The former was charged with harshness; the latter, with mutilating the word, and weakening its sound: but if analogy may decide, it is clearly in favour of the latter; for there is no axiom in our pronunciation more indisputable than that, which makes *g* silent before *n* in the same syllable. This is constantly the case in *sign* and all its compounds, as *resign, design, consign, assign;* and in *indign, condign, malign, benign;* all pronounced as if written *sine, resine*, &c. In which words we find the vowel *i* long and open, to compensate, as it were, for the suppression of *g;* as every other word ending in *gn*, when the accent is on the syllable, has a diphthong pronounced like a long open vowel, as *arraign, campaign, feign, reign, deign*, and consequently, unless the vowel *u* can produce some special privilege which the other vowels have not, we must, if we pronounce according to analogy, make the *u* in this situation long, and sound *impugn* as if written *impune*.

386. The same analogy will oblge us to pronounce *impregn, oppugn, expugn, propugn*, as if written *imprene, oppune, expune, propune*, not only when these verbs are in the infinitive mood, but in the preterits, participles, and verbal nouns, formed from them; as *impugned, impugning*, and *impugner*, must be pronounced, *impuned, impuning*, and *impuner*. The same may be observed of the rest. Perhaps it will gratify a curious observer of pronunciation to see the diversity and uncertainty of our orthöepists in their notation of the words before us:

impūne. Sheridan, Scott, Nares, Murray, (author of an English Grammar). Barclay says the *g* in this word and its derivatives is mute, but takes no notice of the quantity of the *u*.
impŭn. Buchanan, Kenrick, Perry.
impŭgn. W. Johnston.
oppūne. Sheridan, Scott, Nares, Murray.
oppŭn. Kenrick, Perry, Barclay.
oppŭgn. W. Johnston.

profūne. Sheridan, Scott, Perry, Nares.
profŭng. Barclay.
imprēne. Nares, Murray.
imprĕn. Sheridan, Kenrick, Perry. Barclay says the *g* is mute, but says nothing of the quantity of the *e.*
expūne. Sheridan, Scott, Nares.
expŭn. Perry, Barclay.
impūner. Sheridan.
impūned. Murray.
impŭnner. Perry, Barclay.
oppŭgner. Sheridan.
propŭgner. Sheridan.
propūner. Scott.
propŭnner. Perry.

Nothing is clearer than that all these words ought to follow the same fortune, and should be pronounced alike. How then shall be reconciled Mr. Sheridan's pronouncing *impugn, oppugn, expugn,* and *propugn,* with the *u* long, and *impregn* with the *e* short? Kenrick, who has not the word *propugn,* is consistent in pronouncing the rest with the vowel short. The same may be observed of Scott, who adopts the long sound, but has not the word *impregn.* Mr Perry gives the short sound to all but *propugn,* where he makes the *u* long; and W. Johnston, who has only *impugn* and *oppugn,* pronounces the vowel short, and spells them *impung* and *oppung.* Barclay, under the word *impugn,* says the *g* in this word and its derivatives is mute, without noticing the quantity of the vowels, but spells *oppugn, oppún;* and of *impregn,* only says the *g* is mute; but writes *propugn, propung,* in the manner that W. Johnston does *impugn* and *oppugn:* but Mr. Nares observes, that analogy seems to require a similar pronunciation in all these words, and that the vowel should be long.

The same inconsistency is observable in Mr. Sheridan's pronunciation of the verbal nouns; for he expunges the *g* in *impugner,* and writes it *impuner,* but preserves it in *oppugner* and *propugner.* Mr. Scott has only the word *propugner,* which he very properly, as well as consistently, spells *propuner.* Mr. Perry has *propunner* and *impunner,* and Barclay *impunner* only.

The inconsistency here remarked arises from not attending to the analogy of pronunciation, which requires every verbal noun to be pronounced exactly like the verb, with the mere addition of the termination. Thus *singer* is only adding *er* to the verb *sing,* without suffering the *g* to articulate the *e* as it does in *finger* and *linger,* &c. The same may be observed of a *signer,* one who *signs:* and as a corroboration of this doctrine, we may take notice that the additional *er* and *est,* in the comparatives and superlatives of adjectives, makes no alteration in the sound of the radical word; this is obvious in the words *benigner, benignest,* &c. except *younger, longer,* and *stronger.* See No. 381.

387. But in every other compound where these letters occur, the *n* articulates the latter syllable, and *g* is heard distinctly in the former, as *sig-nify, malig-nity, assig-nation,* &c. Some affected speakers, either ignorant of the rules for pronouncing English, or over-complaisant to the French, pronounce *physiognomy, cognizance,* and *recognizance,* without the *g;* but this is a gross violation of the first principles of spelling. The only words to keep these speakers in countenance are, *poignant* and *champignion,* not long ago imported from France, and pronounced *poiniant, champinion.* The first of these words will be probably hereafter written without the *g;* while the latter, confined to the kitchen, may be looked upon as technical, and allowed an exclusive privilege. See COGNIZANCE.

388. *Bagnio, seignior, seraglio, intaglio,* and *oglio,* pronounced *ban-yo, seen-yor, seral-yo, intal-yo,* and *ole-yo,* may be considered as foreign coxcombs, and treated with civility, by omitting the *g,* while they do not pervert the pronunciation of our native English words.

GM in the same syllable.

389. What has been said of *gn* is applicable to *gm.* We have but one word in the language where these letters end a word with the accent on it, and that in *phlegm;* in this the *g* is always mute, and the *e,* according to analogy, ought to be pronounced long, as if the word were written *fleme;* but a short pronunciation of the *e* has generally obtained, and we commonly hear it *flem.* It is highly probable Pope pronounced it properly, where he says,

"Our critics take a contrary extreme;
"They judge with fury, but they write with *phlegm.*"
Essay on Criticism.

Perhaps it would not be difficult to reduce this word to analogy, as some speakers still pronounce the *e* long: but in the compounds of this word, as in those where *gn* occur, the vowel is shortened, and the *g* pronounced, as in *phleg-mon, phleg-monous, phleg-matic,* and *phleg-magogues;* though Mr. Sheridan, for no reason I can conceive, sinks the *g* in the last word. When these letters end a syllable, not under the accent, the *g* is silent, but the preceding vowel is shortened. Thus *paradigm, paraphegm, diaphragm, apophthegm,* are pronounced *paradim, paraphem, diaphram, apothem.*

GH.

390. This combination, at the beginning of a word, drops the *h,* as in *ghost, ghastly, aghast, gherkin,* pronounced *gost,* rhyming with *most; gastly, agast, guerken.* But when these letters come at the end of a word they form some of the greatest anomalies in our language; *gh,* at the end of words, is generally silent, and consequently the preceding vowel or diphthong is long, as *high, nigh, thigh, neigh, weigh, inveigh, eugh* (the obsolete way of spelling *yew,* a tree), *bough, dough, though, although, clough* (a cliff), *plough, furlough, slough* (a miry place), *through, throughout, thorough, borough, usquebaugh, pugh!*

391. *Gh* is frequently pronounced like *f,* as *laugh, laughter, cough, chough, clough,* (an allowance in weight), *slough* (the cast skin of a snake or sore), *enough, rough, tough, trough.*

392. *Gh* is sometimes changed into *ck,* as *hough, shough, lough;* sometimes we hear only the *g* sounded, as in *burgh, burgher,* and *burghership.*

GHT.

393. *Gh* in this termination is always silent, as *fight, night, bought, fought,* &c. The only exception is *draught;* which, in poetry, is most frequently rhymed with *caught, taught,* &c. but, in prose, is so universally pronounced as if written *draft,* that the poetical sound of it grows uncouth, and is becoming obsolete. *Draughts,* the game, is also pronounced *drafts. Drought* (dryness) is vulgarly pronounced *drowth:* it is even written so by Milton; but in this he is not to be imitated, having mistaken the analogy of this word, as well as that of *height,* which he spells *heighth,* and which is frequently so pronounced by the vulgar. See the words HEIGHT and DROUGHT.

H.

394. This letter is no more than breathing forcibly before the succeeding vowel is pronounced. At the beginning of words, it is always sounded, except in *heir, heiress, honest, honesty, honour, honourable, herb, herbage, hospital, hostler, hour, humble, humour, humourous, humoursome.* Ben Johnson leaves out the *h* in *host,* and classes it in this respect with *honest.*

395. *H* is always silent after *r,* as *rhetorick, rhapsody, rheum, rheumatism, rhinoceros, rhomb, rhubarb, myrrh, catarrh,* and their compounds.

396. *H* final, preceded by a vowel, is always silent, as *ah! hah! oh! foh! sirrah, hallelujah, Messiah.*

397. This letter is often sunk after *w*, particularly in the capital, where we do not find the least distinction of sound between *while* and *wile*, *whet* and *wet*, *where* and *wear*. Trifling as this difference may appear at first sight, it tends greatly to weaken and empoverish the pronunciation, as well as sometimes to confound words of a very different meaning. The Saxons, as Dr. Lowth observes, placed the *h* before the *w*, as *hwat;* and this is certainly its true place: for in the pronunciation of all words, beginning with *wh*, we ought to breathe forcibly before we pronounce the *w*, as if the words were written *hoo-at*, *hoo-ile*, &c. and then we shall avoid that feeble, cockney pronunciation, which is so disagreeable to a correct ear.

J.

398. *J* is pronounced exactly like soft *g*, and is perfectly uniform in its sound, except in the word *hallelujah*, where it is pronounced like *y*.

K.

399. *K* has exactly the sound of hard *c*. It is always silent before *n* in the same syllable, as *knee*, *kneel*, *knack*, *knight*, *know*, *knuckle*, *knab*, *knag*, *knap*, *knare*, *knave*, *knit*, *knock*, *knot*, *knoll*.

400. It has been a custom within these twenty years to omit the *k* at the end of words, when preceded by *c*. This has introduced a novelty into the language which is that of ending a word with an unusual letter, and is not only a blemish in the face of it, but may possibly produce some irregularity in future formatives; for *mimicking* must be written with the *k*, though to *mimic* is without it. If we use *colic* as a verb, which is not uncommon, we must write *colicking* and *colicked;* and though *physicking* and *physicked* are not the most elegant words, they are not quite out of the line of formation. This omission of *k* is, however, too general to be counteracted, even by the authority of Johnson, but it is to be hoped it will be confined to words from the learned languages: and indeed, as there is not the same vanity of appearing learned in the Saxon as in the Latin and Greek, there is no great fear that *thick* and *stick* will lose their *k*, though they never had it in the original.

L.

401. Ben Jonson says *L* melteth in the sounding, and is therefore called a liquid. This, however, cannot be the reason that *r* is called a liquid; for no two letters can, in this respect, be more opposite. See No. 21.

L is mute in *almond*, *calf*, *half*, *calve*, *halve*, *chaldron*, *falcon*, *folk*, *yolk* (better written *yelk* with the *l* sounded) *fusil*, *halser*, *malmsey*, *salmon*, *salve*, *talbot* (a species of dog). See Salve.

402. *L* is mute also between *l* and *k* in the same syllable, as *balk*, *chalk*, *talk*, *stalk*, *walk*.

403. *L* is silent likewise between *a* and *m* in the same syllable, as *alms*, *balm*, *calm*, *palm*, *psalm*, *qualm*, *shalm*; but when the *m* is detached from the *l* by commencing another syllable, the *l* becomes audible. Thus, though the *l* is mute in *psalm*, it is always heard in *psal-mist*, *psal-mody*, and *pal-mistry;* but in *balmy* and *palmy*, where the *y* is an adjective termination of our own, no alteration is made in the sound of the substantive which sinks the *l* (386). *Calmer* and *calmest* ought to have the *l* mute, as they are only degrees of comparison; and *palmer* and *palmerworm* (except in the language of scripture, where the *l* in *palmerworm* ought to be heard) are only a sort of verbal nouns, which never alter the sound of the original word, and therefore ought to have the *l* mute. But though *l* is sometimes mute in the noun *salve*, and in the verb to *salve*, it is always heard in *salver* (a kind of plate). See the word Salve.

404. *L* ought always to be suppressed in the auxiliary verbs *would*, *could*, *should:* it is sometimes suppressed in *fault*; but this suppression is become vulgar, (see the word). In *soldier*, likewise, the *l* is sometimes suppressed, and the word pronounced *so-jer;* but this is far from being the most correct pronunciation: *l* ought always to be heard in this word, and its compounds *soldierly*, *soldiership*, &c.

405. *L*, preceded by a mute, and followed by *e*, in a final syllable, has an imperfect sound, which does not do much honour to our language. The *l*, in this situation, is neither sounded like *el* nor *le*, but the *e* final is suppressed, and the preceding mute articulates the *l*, without either a preceding or a succeeding vowel; so that this sound may be called a monster in Grammar—a syllable without a vowel. This will easily be perceived in the words *able*, *table*, *circle*, &c. which are pronounced as if written *abl*, *tabl*, *circl*, &c. and in those still more Gothick and uncouth abbreviated participial terminations, *peopled*, *bridled*, *saddled*, *trifles*, *gaffles*, &c. pronounced *peepl'd*, *bri-dl'd*, *sad-dl'd tri-flz*, *gaf-flz*, &c. (359.)

406. This letter has not only, like *f* and *s*, the privilege of doubling itself at the end of a word, but it has an exclusive privilege of being double where they remain single; though by what right cannot well be conceived. Thus, according to the general rule, when a verb ends in a single consonant, preceded by a single vowel, and the accent is on the last syllable, the consonant is doubled when a participial termination is added, as, *abet*, *abetting*, *beg*, *begging*, *begin*, *beginning*, &c. but when the accent is not on the last syllable of the verb, the consonant remains single, as *suffered*, *suffering*, *benefiting*, &c. but the *l* is doubled, whether the accent be on the last syllable or not, as *duelling*, *levelling*, *victualling*, *travelling*, *traveller*, &c. This gross irregularity, however, would not have been taken notice of in this place, if it had not suggested an absurdity in pronunciation, occasioned by the omission of *l*. Though the double *l* is useless in *traveller*, *victualler*, &c. it is not so in *controller:* for as *ll* is a mark of the deep broad sound of *a* in *ball*, *tall*, *all*, &c. (84); so the same letters are the sign of the long open sound of *o* in *boll* (a round stalk of a plant) to *joll*, *noll*, (the head), *knoll* (a little hill), *poll*, *clodpoll*, *roll*, *scroll*, *droll*, *troll*, *stroll*, *toll:* for which reason, leaving out one *l* in *bethral*, *catcal*, *miscal*, *overfal*, *forestal*, *reinstal*, *downfal*, *withal*, *control*, and *unrol*, as we find them in Johnson's Dictionary, is an omission of the uttermost importance to the sound of the words; for as the pronunciation sometimes alters the spelling, so the spelling sometimes alters the pronunciation. Accordingly we find some speakers, chiefly the natives of Ireland, inclined to give the *a* its middle sound, to words commencing with *al*, followed by another consonant, because they do not see the *ll* in the *all* with which these words are compounded. Thus we sometimes hear *Almighty*, *albeit*, so pronounced as to make their first syllable rhyme with the first of *al-ley*, *val-ly;* and *extol* is pronounced by the Scotch so as to rhyme with *coal;* and with just as much reason as we pronounce *control* in the same manner. For though compounds may, in some cases, be allowed to drop such letters of their simples, as either are not necessary to the sound as in *Christmas;* or might possibly lead to a wrong one, as in *Reconcileable* (which see); yet where, by omitting a letter, the sound may be altered, the omission is pernicious and absurd (84). The same observations might be extended to the numerous termination *full*, where, in compounds, one *l* is omitted, though nothing can be more certain, than that *ful*, with a single *l*, has not the same sound as when this letter is doubled: but this abbreviation is too inveterate and extensive to afford any hope, that the great arbiters of orthography, the printers, will ever submit to the additional trouble of putting another *l*.

M.

407. *M* preserves its sound in every word, except *comptroller; compt* and *accompt* are now universally written as they

are pronounced *count* and *account;* and though *m* and *p* are preserved to the eye in the officer called a *comptroller*, the word is pronounced exactly like the noun *controller*, one who controls.

N.

408. *N* has two sounds; the one simple and pure, as in *man*, *net*, &c. the other compounded and mixed, as in *hang*, *thank*, &c. The latter sound is heard when it is followed by the sharp or flat guttural mutes, *g* hard, or *k;* or its representatives, *c* hard, *qu* or *x;* but it may be observed, that so prone is our language to the flat mutes, that when *n* is followed by *k*, or its representatives the flat mute *g* seems interposed between them. Thus *thank*, *banquet*, *anxious*, are pronounced as if written, not *than-k*, *ban-quet*, *an-x-ious*, but, *thanck*, *bancquet*, *anckshus*. But this coalition of the sound of *n* and *g*, or hard *c*, is only when the accent is on them; for when the *g* or hard *c* articulates the accented syllable, the *n* becomes pure. Thus, though *congress* and *congregate* are pronounded as if written *cong-gress* and *cong-gregate*, yet the first syllable of *congratulate* and *congressive* ought to be pronounced without the ringing sound of *n*, and exactly like the same syllable in *contrary*. The same difference may be observed in the words *concourse* and *concur;* the first word, which has the accent on the first syllable, is pronounced as if written *cong-course;* and the last, which has the accent on the second syllable, with *n* pure. It must however be carefully observed, that the secondary accent has the same power of melting the *n* into the succeeding hard *g* or *c* as the primary (522). Thus *congregation* and *concremation* have the first syllable pronounced as if written *cong*.

409. It may, perhaps, be worthy of notice, that when *n* is followed by *k*, the *k* has a finished or complete sound, as in *link*, *think*, &c. but when *n* is followed by hard *g*, the *g* has an unfinished and imperfect sound, as in *hang*, *bang*, &c. where we may observe the tongue to rest upon the palate in the sound of *g;* but when this letter is carried off to articulate another syllable, its sound is completed, as in *anger* and *Bangor* (the name of a town), where the sound of *g* may be perceived to be very different from the noun *hanger* (a sword), and *banger* (one who beats or bangs). This perfect sound of *g* is heard in all simples, as *anger*, *angle*, *finger*, *linger*, *conger*, *anguish*, *languish*, *distinguish*, *extinguish*, *unguent:* but in words derived from verbs or adjectives, ending in *ng*, the *g* continues imperfect, as it was in the theme. Thus a *singer* (one who sings), does not finish the *g* like *finger*, but is merely *er* added to *sing:* the same may be observed of *sing-ing*, *bring-ing*, and *hang-ing*. So adjectives formed by the addition of *y* have the imperfect sound of *g*, as in the original word. Thus *springy*, *stringy*, and *wingy*, are only the sound of *e* added to *spring*, *string*, and *wing;* but the comparative and superlative adjectives, *longer*, *stronger*, and *younger; longest*, *strongest*, and *youngest;* have the *g* hard and perfectly sounded, as if written *long-ger*, *strong-ger*, and *young-ger*, &c. where the *g* is hard, as in *finger*, *linger*, &c. And it may be looked upon as a general rule, that nouns, adjectives, or verbs, do not alter their original sound upon taking an additional syllable. In these three words, therefore, the Irish pronounce more agreeably to analogy than the English; for, if I mistake not, they do not articulate the *g* (381).

410. Hitherto we have considered these letters as they are heard under the accent; but when they are unaccented in the participial termination *ing*, they are frequently a cause of embarrassment to speakers who desire to pronounce correctly. We are told, even by teachers of English, that *ing*, in the word *singing*, *bringing*, and *swinging*, must be pronounced with the ringing sound, which is heard when the accent is on these letters, in *king*, *sing*, and *wing*, and not as if written without the *g*, as *singin*, *bringin*, *swingin*. No one can be a greater advocate than I am for the strictest adherence to orthography, as long as the public pronunciation pays the least attention to it; but when I find letters given up by the public, with respect to sound, I then consider them as cyphers; and, if my observation does not greatly fail me, I can assert, that our best speakers do not invariably pronounce the participial *ing*, so as to rhyme with *sing*, *king*, and *ring*. Indeed, a very obvious exception seems to offer itself in those verbs that end in these letters, as a repetition of the ringing sound in successive syllables would produce a *Tautophony*, (see the word), and have a very bad effect on the ear; and therefore, instead of *singing*, *bringing*, and *flinging*, our best speakers are heard to pronounce *sing-in*, *bring-in*, and *fling-in;* and for the very same reason that we exclude the ringing sound in these words, we ought to admit it when the verb ends with *in;* for if, instead of *sinning*, *pinning*, and *beginning*, we should pronounce *sin-nin*, *pin-nin*, and *begin-nin*, we should fall into the same disgusting repetition as in the former case. The participial *ing*, therefore, ought always to have its ringing sound, except in those words formed from verbs in this termination; for *writing*, *reading*, and *speaking*, are certainly preferable to *writin*, *readin*, and *speakin*, wherever the pronunciation has the least degree of precision or solemnity.

411. *N* is mute when it ends a syllable, and is preceded by *l* or *m*, as *kiln*, *hymn*, *limn*, *solemn*, *column*, *autumn*, *condemn*, *contemn*. In *hym-ning*, and *lim-ning* the *n* is generally pronounced, and sometimes, in very solemn speaking, in *condem-ning* and *contem-ning;* but, in both cases, contrary to analogy, which forbids any sound in the participle that was not in the verb (381).

P.

412. This letter is mute before *s* and *t* at the beginning of words, as *psalm*, *psalmist*, *psalmody*, *psalmography*, *psalter*, *psaltery;* the prefix *pseudo*, signifying false, as *pseudography*, *pseudology*, and the interjection *pshaw!* To these we may add *ptisan*, *ptyalism*, *ptysmagogue*. It is mute in the middle of words between *m* and *t*, in *empty*, *sempstress*, *peremptory*, *sumptuous*, *presumptuous*, *redemption*, *exemption* and *raspberry*. In *cupboard*, it coalesces with, and falls into its flat sound *b*, as if written *cubboard*. It is mute in a final syllable between the same letters, as *tempt*, *attempt*, *contempt*, *exempt*, *prompt*, *accompt*. In *receipt* it is mute between *i* and *t*, and in the military *corps* (a body of troops), both *p* and *s* are mute, as custom has acquiesced in the French pronunciation of most military terms.

PH.

413. *Ph* is generally pronounced like *f*, as in *philosophy*, *phantom*, &c. In *nephew* and *Stephen* it has the sound of *v*. In *diphthong* the sound of *p* only is heard; in *apophthegm* both letters are entirely dropped. The same may be observed of *phthisis*, *phthisic*, and *phthisical*. In *sapphire* the first *p* slides into *ph*, by an accentual coalition of similar letters, very agreeable to analogy. See EXAGGERATE.

Q.

414. *Q* has always the sound of *k:* it is constantly followed by *u*, pronounced like *w;* and its general sound is heard in *quack*, *quill*, *queen*, &c. pronounced *kwack*, *kwill*, *kween*, &c. That the *u* subjoined to this letter has really the power of *w*, may be observed in the generality of words where *a* succeeds; for we find the vowel go into the broad sound in *quart*, *quarrel*, *quantity*, &c. as much as in *war*, *warrant*, *want*, &c. (85). But it must be carefully noted, that this broad sound is only heard under the accent; when the *a*, preceded by *qu*, is not accented, it has the sound of every other accented *a* in the language (92). Thus the *a* in *quarter*, *quarrel*, *quadrant*, &c. because it has the accent is broad; the same may be observed when the accent is secondary only (522) (527), as in *quadrage-imal*, *quadrisyllable*, &c.; but when the accent is on the succeeding syllable, as in *qua-dratick*, *qua-drangular*, &c. the *a* goes into the obscure sound approaching the Italian *a* (92).

415. As a great number of words derived from the French, have these letters in them, according to our usual complaisance for that language, we adopt the French pronunciation: thus in *coquet, doquet, etiquette, masquerade, harlequin, oblique, antique, opaque, pique, piquant, piquet, burlesque, grotesque, casque, mosque, quadrille, quater-cousin*, the *qu* is pronounced like *k*. *Quoif* and *quoit* ought to be written and pronounced *coif, coit*. *Paquet, laquey, chequer*, and *risque*, have been very properly spelled by Johnson as they are pronounced *packet, lackey, checker*, and *risk*. *Quoth* ought to be pronounced with the *u*, as if written *kwoth*, and therefore is not irregular. *Liquor* and *harlequin* always lose the *u;* and *conquer, conquerable*, and *conqueror*, sometimes, particularly on the stage. This deviation, however, seems not to have gone beyond recovery; and *conquest* is still regularly pronounced *conkwest*. *Quote* and *quotation* are perfectly regular, and ought never to be pronounced as some do, *cote*, and *cotation*. *Cirque*, contracted from *circus*, and *cinque, cinque-foil, cinque-ports, cinque-spotted*, are pronounced *sirk* and *sink;* and *critique*, when we mean a criticism, to distinguish it from *critick*, is pronounced *criteek*, rhyming with *speak*. See QUOIT and QUOTATION.

R.

416. This letter is never silent, but its sound is sometimes transposed. In a final unaccented syllable, terminating with *re*, the *r* is pronounced after the *e*, as *acre, lucre, sabre, fibre, ocre, eagre, maugre, sepulchre, theatre, spectre, metre, petre, mitre, nitre, antre, lustre, accoutre, massacre;* to which we may add, *centre* and *sceptre;* sometimes written *center* and *scepter;* but, in my opinion, very improperly, as this peculiarity is fixed, and easily understood; while reducing *meagre* to *meager* disturbs the rule, and adds another anomaly to our pronunciation, by making the *g* hard before *e* (98).

417. The same transposition of *r* is always perceived in the pronunciation of *apron* and *iron;* and often in that of *citron* and *saffron*, as if written *apurn, irun, citurn, saffurn:* nor do I think the two first can be pronounced otherwise without a disagreeable stiffness; but the two last may preserve the *r* before the vowel with great propriety. *Children* and *hundred* have slid into this analogy, when used colloquially, but preserve the *r* before the *e* in solemn speaking.

418. As this letter is but a jar of the tongue, sometimes against the roof of the mouth, and sometimes at the orifice of the throat, it is the most imperfect of all the consonants: and, as its formation is so indefinite, no wonder, when it is not under the accent, that the vowels which precede it should be so indefinite in their sounds; as we may perceive in the words *friar, lier, elixir, nadir, mayor, martyr*, which with respect to sound, might be written *friur, liur, elixur, nadur, mayur, martur* (98). These inaccuracies in pronunciation, says an ingenious writer, 'we seem to have derived from our Saxon 'ancestors. Dr. Hicks observes in the first chapter of his 'Saxon Grammar, that "Comparativa apud eos (Anglo-saxo-"nas) indifferenter exeunt in *ar, ær, er, ir, or, ur, yr;* et Su-"perlativa in *ast, æst, est, ist, ost, ust, yst;* participia præ-"sentis temporis in *and, ænd, end, ind, ond, und, ynd;* prætе-"riti vero in *ad, æd, id, od, ud, yd;* pro vario scilicet vel ævi "vel loci dialecto." 'Upon various other occasions also they 'used two or more vowels and diphthongs indifferently; and 'this not alway from difference of age or place, because 'these variations are frequently found in the same page. This 'will account for the difference between the spelling and pro-'nunciation of such anomalous words as *busy* and *bury*, now 'pronounced as if written *bisy* and *bery*, (the *i* and *e* having 'their common short sound), and formerly spelt indifferently 'with *e, u*, or *y*.' *Essay on the Harmony of Language.* Robs. 1774.

419. There is a distinction in the sound of this letter, scarcely ever noticed by any of our writers on the subject, which is in my opinion, of no small importance; and that is, the rough and smooth *r*. Ben Jonson in his Grammar says it is sounded firm in the beginning of words, and more liquid in the middle and ends, as in *rarer, riper;* and so in the Latin. The rough *r* is formed by jarring the tip of the tongue against the roof of the mouth near the fore teeth: the smooth *r* is a vibration of the lower part of the tongue, near the root, against the inward region of the palate, near the entrance of the throat. This latter *r* is that which marks the pronunciation of England, and the former that of Ireland. In England, and particularly in London, the *r* in *lard, bard, card, regard*, &c. is pronounced so much in the throat as to be little more than the middle or Italian *a*, lengthened into *baa, baad, caad, regaad;* while in Ireland the *r*, in these words, is pronounced with so strong a jar of the tongue against the forepart of the palate, and accompanied with such an aspiration or strong breathing at the beginning of the letter, as to produce that harshness we call the Irish accent. But if this letter is too forcibly pronounced in Ireland, it is often too feebly sounded in England, and particularly in London, where it is sometimes entirely sunk; and it may, perhaps, be worthy of observation, that, provided we avoid a too forcible pronunciation of the *r*, when it ends a word, or is followed by a consonant in the same syllable, we may give as much force as we please to this letter at the beginning of a word, without producing any harshness to the ear. Thus, *Rome, river, rage*, may have the *r* as forcible as in Ireland; but *bar, bard, card, hard*, &c. must have it nearly as soft as in London.

S.

420. As the former letter was a jar, this is a hiss; but a hiss, which forms a much more definite and complete consonant than the other. This consonant, like the other mutes, has a sharp and a flat sound; the sharp sound is heard in the name of the letter, and in the words *same, sin, this;* the flat sound is that of *z*, heard in *is, his, was;* and these two sounds, accompanied by the aspirate, or *h*, form all the varieties found under this letter (41).

421. *S* has always its sharp hissing sound at the beginning of words, as *soon, sin*, &c. and when it immediately follows any of the sharp mutes, *f, k, p, t*, as *scoffs, blocks, hips, pits*, or when it is added to the mute *e* after any of these letters, as *strifes, flakes, pipes, mites.*

422. *S* is sharp and hissing at the end of the monosyllables *yes, this, us, thus, gas:* and at the end of words of two or more syllables, if it be preceded by any of the vowels but *e*, and forms a distinct syllable. Thus *es* in *pipes* and *mites* do not form a distinct syllable; and as they are preceded by a sharp mute, the *s* is sharp likewise; but in *prices*, these letters form a syllable, and the *s* is pronounced like *z*, according to the general rule.

423. The only exception to this rule is, the words *as, whereas, has, his, was;* for *bias, dowlas, Atlas, metropolis, basis, chaos, tripos, pus, chorus, cyprus*, &c. have the final *s* pronounced sharp and hissing.

424. Agreeably to this rule, the numerous terminations in *ous*, as *pious, superfluous*, &c. have the *s* sharp, and are pronounced exactly like the pronoun *us;* and every double *s* in the language is pronounced in the same manner, except in the words *dissolve, possess*, and their compounds; *scissors, hussy*, and *hussar.*

425. *S* in the inseparable preposition *dis*, when either the primary or secondary accent is on it (522), is always pronounced sharp and hissing. The word *dismal*, which seems to be an exception, is not so in reality; for, in this word, *dis* is not a preposition: thus *dissolute, dissonant*, &c. with the primary accent on *dis;* and *disability, disagree*, &c. with the secondary accent on the same letters, have the *s* sharp and his-

sing; but when the accent is on the second syllable, the *s* is either sharp or flat, as it is followed either by a vowel, or a sharp or flat consonant: thus *disable*, *disaster*, *disease*, *disinterested*, *dishonest*, *disorder*, *disuse*, have all of them the *s* in *dis* flat like *z*, because the accent is not on it, and a vowel begins the next syllable; but *discredit*, *disfavour*, *diskindness*, *dispense*, *distaste*, have the *s* sharp and hissing, because a sharp consonant begins the succeeding accented syllable; and *disband*, *disdain*, *disgrace*, *disjoin*, *disvalue*, have the *s* flat like *z*, because they are succeeded by a flat consonant in the same situation (435).

426. *S* in the inseparable preposition *mis* is always sharp and hissing, whether the accent be on it or not; or whether it be followed either by a vowel, or a sharp or flat consonant, as *miscreant*, *misaim*, *misapply*, *misorder*, *misuse*, *misbegot*, *misdeem*, *misgovern*, &c. See Mis.

427. *S*, followed by *e* in the final syllable of adjectives, is always sharp and hissing, as *base*, *obese*, *precise*, *concise*, *globose*, *verbose*, *morbose*, *pulicose*, *tenebricose*, *corticose*, *jocose*, *oleose*, *rugose*, *desidiose*, *close*, *siliculose*, *calculose*, *tumulose*, *animose*, *venenose*, *arenose*, *siliginose*, *crinose*, *loose*, *operose*, *morose*, *edematose*, *comatose*, *acetose*, *aquose*, *siliquose*, *actuose*, *diffuse*, *profuse*, *occluse*, *recluse*, *abstruse*, *obtuse*, except *wise* and *otherguise*.

428. *S*, in the adjective termination *sive*, is always sharp and hissing, as *suasive*, *persuasive*, *assuasive*, *dissuasive*, *adhesive*, *cohesive*, *decisive*, *precisive*, *incisive*, *derisive*, *cicatrisive*, *visive*, *plausive*, *abusive*, *diffusive*, *infusive*, *inclusive*, *conclusive*, *exclusive*, *elusive*, *delusive*, *prelusive*, *allusive*, *illusive*, *collusive*, *amusive*, *obtrusive*, &c.

429. *S*, in the adjectives ending in *sory*, is always sharp and hissing, as *suasory*, *persuasory*, *dicisory*, *derisory*, *delusory*, &c.

430. The same may be observed of *s* in the adjectives ending in *some*, as *troublesome*, &c. and substantives in *osity*, as *generosity*, &c.

431. *Se*, preceded by the liquids *l*, *n*, or *r*, has the *s* sharp and hissing, as *pulse*, *appulse*, *dense*, *tense*, *intense*, *sense*, *verse*, *adverse*, &c. except *cleanse*.

S *pronounced like* z.

432. *S* has always its flat buzzing sound, as it may be called, in monosyllables, when it immediately follows any of the flat mutes *b*, *d*, *g* hard, or *v*, as *ribs*, *heads*, *rags*, *sieves* (24).

433. *S* is pronounced like *z*, when it forms an additional syllable with *e* before it, in the plurals of nouns, and the third person singular of verbs; even though the singulars and first persons end in sharp hissing sounds, as *asses*, *riches*, *cages*, *boxes*, &c. Thus *prices* and *prizes* have both the final *s* flat, though the preceding mute in the first word is sharp, (422).

434. As *s* is hissing, when preceded by a liquid, and followed by *e* mute, as *transe*, *tense*, &c.; so when it follows any of the liquids without the *e*, it is pronounced like *z*, as *morals*, *means*, *seems*, *hers*. In the same analogy, when *s* comes before any of the liquids, it has the sound of *z* as *Cosmo*, *cosmetic*, *dismal*, *pismire*, *chasm*, *prism*, *theism*, *schism*, and all polysyllables ending in *asm*, *ism*, *osm*, or *ysm*, as *enthusiasm*, *judaism*, *microcosm*, *paroxysm*, &c.

435. *S*, in the preposition *dis*, is either sharp or flat, as it is accented or unaccented, as explained above; but it ought always to be pronounced like *z*, when it is not under the accent, and is followed by a flat mute, a liquid, or a vowel, as *disable*, *disease*, *disorder*, *disuse*, *disband*, *disdain*, *disgrace*, *disvalue*, *disjoin*, *dislike*, *dislodge*, *dismay*, *dismember*, *dismount*, *dismiss*, *disnatured*, *disrank*, *disrelish*, *disrobe* (425). Mr. Sheridan and those orthoepists who have copied him, seem to have totally overlooked this tendency in the liquids to convert the *s* to *z* when this letter ends the first syllable without the accent, and the liquids begin the second syllable with it.

436. *S* is pronounced like *z*, in the monosyllables *is*, *his*, *was*, *these*, *those*; and in all plurals whose singulars end in a vowel, followed by *e* mute, as *commas*, *operas*, *shoes*, *aloes*, *dues*, and consequently when it follows the *w* or *y*, in the plurals of nouns, or the third person singular of verbs, as *ways*, *betrays*, *news*, *views*, &c.

437. Some verbs ending in *se* have the *s* like *z*, to distinguish them from nouns or adjectives of the same form. Examples:

Nouns	Verbs	Nouns	Verbs
grease	to *grease*	*excuse*	to *excuse*
close	to *close*	*refuse*	to *refuse*
house	to *house*	*diffuse*	to *diffuse*
mouse	to *mouse*	*use*	to *use*
louse	to *louse*	*rise*	to *rise*
abuse	to *abuse*	*premise*	to *premise*

438. *Sy* and *sey*, at the end of words, have the *s* pronounced like *z*, if it has a vowel before it, with the accent on it, as *easy*, *greasy*, *queasy*, *cheesy*, *daisy*, *misy*, *rosy*, *causey*, *noisy*; but if the accent is on the antepenultimate syllable, the *s* is sharp, as *heresy*, *poesy*, &c.; if a sharp mute precede, the *s* is sharp, as *tricksy*, *tipsy*; if a liquid precede, and the accent is on the penultimate syllable, the *s* is flat, as *palsy*, *flimsy*, *clumsy*, *pansy*, *tansy*, *phrensy*, *quinsy*, *tolsey*, *whimsey*, *malmsey*, *jersey*, *kersey*. *Pursey* has the *s* sharp and hissing from its relation to *purse*, and *minstrelsey* and *consroversy* have the antepenultimate and preantepenultimate accent. Thus we see why *busy*, *bousy*, *lousy*, and *drowsy*, have the *s* like *z*, and *jealousy* the sharp hissing *s*.

439. *S*, in the termination *sible*, when preceded by a vowel, is pronounced like *z*, as *persuasible*, *risible*, *visible*, *divisible*, *infusible*, *conclusible*; but if a liquid consonant precede the *s*, the *s* then becomes sharp and hissing, as *sensible*, *responsible*, *tensible*, *reversible*, &c.

440. *S*, in the terminations *sary* and *sory*, is sharp and hissing, as *dispensary*, *adversary*, *suasory*, *persuasory*, *decisory*, *incisory*, *derisory*, *depulsory*, *compulsory*, *incensory*, *compensory*, *suspensory*, *sensory*, *responsory*, *cursory*, *discursory*, *lusory*, *elusory*, *delusory*, *illusory*, *collusory*. *Rosary*, and *misery*, which have the *s* like *z*, are the only exceptions.

441. *S*, in the termination *ise*, is pronounced like *z*, except in the adjectives before mentioned, and a few substantives, such as *paradise*, *anise*, *rise*, *grise*, *verdigrise*, *mortise*, *travise*.

442. *S*, in the terminations *sal* and *sel*, when preceded by a vowel, is pronounced like *z*, as *nasal*, *ousel*, *housel*, *nousel*, *refusal*, *proposal*, *refusal*, and sharp and hissing when preceded by a consonant, as *mensal*, *universal*, &c.

443. *S*, in the terminations *son*, *sen*, and *sin*, is pronounced like *z*, as *reason*, *season*, *treason*, *cargason*, *diapason*, *orison*, *benison*, *venison*, *denison*, *unison*, *foison*, *poison*, *prison*, *damson*, *crimson*, *chosen*, *resin*, *rosin*, *raisin*, *cousin*. But the *s* in *mason*, *bason*, *garrison*, *caparison*, *comparison*, *parson*, and *person*, is sharp and hissing (170).

444. *S*, after the inseparable prepositions *pre* and *pro*, is sharp, as in *presage*, *preside*, *presidial*, *preseance*, *presension*, *prosecute*, *prosecution*, *prosody*, *prosopopeia*, but flat like *z*, in *presence*, *president*, *presidency*, *presume*, *presumptive*, *presumption*; but where the *pre* is prefixed to a word, which is significant when alone, the *s* is always sharp, as *presuppose*, *presurmise*, &c.

445. *S*, after the inseparable preposition *re*, is almost always pronounced like *z*, as *resemble*, *resent*, *resentment*, *reserve*, *reservation*, *reservoir*, *residue*, *resident*, *residentiary*, *reside*, *resign*, *resignment*, *resignation*, *resilience*, *resiliency*, *resilition*, *resin*, *resist*, *resistance*, *resolve*, *resolution*, *resolute*, *result*, *resume*, *resumption*, *resurrection*.

446. *S*, is sharp after *re* in *resuscitation*, *resupination*, &c. and when the word added to it is significant by itself, as *research*, *resiege*, *reseat*, *resurvey*. Thus to *resign*, with the *s* like *z*, signifies to yield up; but to *resign*, to sign again, has

the *s* sharp, as in *sign:* so to *resound*, to reverberate, has the *s* like *z;* but to *resound*, to sound again, has the *s* sharp and hissing.

447. Thus we see, after pursuing this letter through all its combinations, how difficult it often is to decide by analogy, when we are to pronounce it sharp and hissing, and when flat like *z*. In many cases it is of no great importance: in others, it is the distinctive mark of a vulgar or a polite pronunciation. Thus *design* is never heard with the *s* like *z*, but among the lowest order of the people; and yet there is not the least reason from analogy why we should not pronounce it in this manner, as well as in *resign:* the same may be observed of *fireside* and *desist*, which have the *s* sharp and hissing; and *reside* and *resist*, where the same letter is pronounced like *z*. It may, however, be remarked, that *re* has the *s* like *z* after it more regularly than any other of the prefixes.

448. It may, perhaps, be worthy of observation, that though *s* becomes sharp or flat, as it is followed by a sharp or flat consonant, or a liquid, as *cosmetic*, *dismal*, *disband*, *disturb*, &c. yet if it follows a liquid or a flat consonant, except in the same syllable, it is generally sharp. Thus the *s* in *tubs*, *suds*, &c. is like *z;* but in *subserve*, *subside*, *subsist*, it is sharp and hissing; and though it is flat in *absolve*, it is sharp in *absolute* and *absolution;* but if a sharp consonant precede, the *s* is always sharp and hissing, as *tipsy*, *tricksy*. Thus, in the pronunciation of the word *Glasgow*, as the *s* is always sharp and hissing, we find the *g* invariably slide into its sharp sound *k;* and this word is always heard as if written *Glaskow*. We see, therefore, that a preceding sharp consonant makes the succeeding *s* sharp, but not inversely.

449. *S* is always sharp and hissing when followed by *c*, except in the word *discern*.

S *aspirated, or sounding like* sh, *or* zh.

450. *S*, like its fellow dental *t*, becomes aspirated, and goes into the sharp sound *sh*, or the flat sound *zh*, when the accent is on the preceding vowel, and it is followed by a semi-consonant diphthong, as *nauseate*, or a diphthongal vowel, as *pleasure*, pronounced *nausheate* and *plezhure* (195).

451. *S*, in the termination *sion*, preceded by a vowel, goes into the flat aspiration *zh*, as *evasion*, *cohesion*, *decision*, *confusion*, pronounced *evazhion*, &c. but when it is preceded by a liquid, or another *s*, it has the sharp aspiration *sh*, as *expulsion*, *dimension*, *reversion*, pronounced *expulshun*, &c.

452. The same may be observed of *s* before *u;* when a vowel precedes the *s*, with the accent on it, the *s* goes into the flat aspiration, as *pleasure*, *measure*, *treasure*, *rasure*, pronounced *plezhure*, &c. but when preceded by a liquid, or another *s*, it is sounded *sh*, as *sensual*, *censure*, *tonsure*, *pressure*, pronounced *censhure*, &c.

453. From the clearness of this analogy, we may perceive the impropriety of pronouncing *Asia* with the sharp aspiration, as if written *Ashia;* when, by the foregoing rule, it ought undoubtedly to be pronounced *Azhia*, rhyming with *Arfasia*, *euthanasia*, &c. with the flat aspiration of *z*. This is the Scotch pronunciation of this word, and unquestionably the true one; but if I mistake not, *Persia* is pronounced in Scotland with the same aspiration of *s*, and as if written *Perzhia;* which is as contrary to analogy as the other is agreeable to it.

454. The tendency of the *s* to aspiration before a diphthongal sound has produced several anomalies in the language, which can only be detected by recurring to first principles; for which purpose it may be necessary to observe, that the accent or stress naturally preserves the letters in their true sound; and as feebleness naturally succeeds force, so the letters, immediately after the stress have a tendency to slide into different sounds, which require less exertion of the organs. Hence the omission of one of the vowels in the pronunciation of the last syllable of *fountain*, *mountain*, *captain*, &c. (208); hence the short sound of *i* in *respite*, *servile*, &c. hence the *s* pronounced like *z* in *disable*, where the accent is on the second syllable; and like *s* sharp and hissing in *disability*, where there is a secondary stress on the first syllable; and hence the difference between the *x* in *exercise*, and that in *exert;* the former having the accent on it, being pronounced *cks*, as if the word were written *ecksercise;* and the latter without the accent, pronounced *gz*, as if the word were written *egzert*. This analogy leads us immediately to discover the irregularity of *sure*, *sugar*, and their compounds, which are pronounced *shure* and *shugar*, though the accent is on the first syllable, and ought to preserve the *s* without aspiration; and a want of attending to this analogy has betrayed Mr. Sheridan into a series of mistakes in the sound of *s* in the words *suiside*, *presume*, *resume*, &c. as if written *shoo-icide*, *pre-zhoom*, *re-zhoom*, &c. but if this is the true pronunciation of these words, it may be asked, why is not *suit*, *suitable*, *pursue*, &c. to be pronounced *shoot*, *shoot-able*, *purshoo*, &c.? If it be answered, custom, I own this decides the question at once. Let us only be assured, that the best speakers pronounce *a* like *o*, and that is the true pronunciation: but those who see analogy so openly violated, ought to be assured of the certainty of the custom before they break through all the laws of language to conform to it (69) (71). See SUPERABLE.

455. We have seen, in a great variety of instances, the versatility of *s*, how frequently it slides into the sound of *z;* but my observation greatly fails me if it ever takes the aspiration, unless it immediately follows the accent, except in the words *sure*, *sugar*, and their compounds; and these irregularities are sufficient without adding to the numerous catalogue we have already seen under this letter.

456. The analogy we have just been observing directs us in the pronunciation of *usury*, *usurer*, and *usurious*. The two first have the accent on the first syllable, which permits the *s* to go into aspiration, as if the words were written *uzhury*, and *uzhurer;* but the accent being on the second *u* in the last word, the *s* is prevented from going into aspiration, and is pronounced *uzurious* (479) (480.)

457. Though the *ss* in *passion*, *mission*, &c. belong to separate syllables, as if spelt *pas-sion*, *mis-sion*, &c. yet the accent presses the first into the same aspiration as the last, and they are both pronounced with the sharp aspirated *hiss*, as if there were but one *s*. See EXAGGERATE.

458. *S* is silent in *isle*, *island*, *aisle*, *demesne*, *puisne*, *viscount*, and at the end of some words from the French, as *glacis*, *pas*, *sous*, *vis-à-vis;* and in *corps* the two last letters are silent, and the word pronounced *core* (412).

T.

459. *T* is the sharp sound of *D* (41); but though the latter is often changed into the former, the former never goes into the latter. The sound to which this letter is prone is that of *s*. This sound, the *t* was anciently accused of usurping in the Greek language, and this usurpation has been continued through most modern tongues. That *p* and *b*, *t* and *d*, *k* and *g* hard, *s* and *z*, should slide into each other, is not surprising, as they are distinguished only by a nice shade of sound; but that *t* should alter to *s* seems a most violent transition, till we consider the organic formation of these letters, and of those vowels which always occasion it. If we attend to the formation of *t*, we shall find that it is a stoppage of the breath by the application of the upper part of the tongue near the end, to the correspondent part of the palate; and that if we just detach the tongue from the palate, sufficiently to let the breath pass, a hiss is produced which forms the letter *s*. Now the vowel that occasions this transition of *t* to *s* is the squeezed sound of *e*, as heard in *y* consonant (8): which squeezed sound is a species of hiss; and this hiss, from the absence of accent, easily slides into the *s*, and *s* as easily into *sh*. Thus *mechanically* is generated that hissing termination *tion*, which forms but one syllable, as if written *shun* (195).

460. But it must be carefully remarked, that this hissing sound, contracted by the *t* before certain diphthongs, is never heard but immediately after the accent: when the accent falls on the vowel immediately after the *t*, this letter, like *s* or *c* in the same situation, preserves its simple sound. Thus the *c* in *social* goes into *sh*, because the accent is on the preceding vowel; but it preserves the simple sound of *s* in *society*, because the accent is on the succeeding vowel. The same analogy is obvious in *satiate* and *satiety;* and is perfectly agreeable to that difference made by accent in the sound of other letters (71). See SATIETY.

461. As the diphthongs *ia*, *ie*, *io*, or *iu*, when coming after the accent, have the power of drawing the *t* into *sh*, so the diphthongal vowel *u*, in the same situation, has a similar power. If we analyse the *u*, we shall find it commence with the squeezed sound of *e*, equivalent to the consonant *y*. This letter produces the small hiss before taken notice of, and which may be observed in the pronunciation of *nature*, and borders so closely on *natshur*, that it is no wonder Mr. Sheridan adopted this latter mode of spelling the word to express its sound. The only fault of Mr. Sheridan in depicting the sound of this word, seems to be that of making the *u* short, as in *bur*, *cur*, &c. as every correct ear must perceive an elegance in lengthening the sound of the *u*, and a vulgarity in shortening it. The true pronunciation seems to lie between both.

462. But Mr. Sheridan's greatest fault seems to lie in not attending to the nature and influence of the accent; and because *nature*, *creature*, *feature*, *fortune*, *misfortune*, &c. have the *t* ponounced like *ch*, or *tsh*, as if written *crea-chure*, *fea-tshure*, &c. he has extended this change of *t* into *tch*, or *tsh*, to the word *tune*, and its compounds, *tutor*, *tutoress*, *tutorage*, *tutelage*, *tutelar*, *tutelary*, &c. *tumult*, *tumour*, &c. which he spells *tshoon*, *tshoon-eble*, &c. *tshoo-tur*, *tshoo-triss*, *tshoo-tur-idzh*, *tshoo-tel-idzh*, *tshoo-tel-er*, *tshoo-tel-er-y*, &c. *tshoo-mult*, *tshoo-mur*, &c. Though it is evident, from the foregoing observations, that as the *u* is under the accent, the preceding *t* is preserved pure, and that the words ought to be pronounced as if written *tewtor*, *tewmult*, *tewmour*, &c. and neither *tshootur*, *tshoomult*, *tshoomour*, as Mr. Sheridan writes them, nor *tootor*, *toomult*, *toomour*, as they are often pronounced by vulgar speakers. See SUPERABLE.

463. Here, then, the line is drawn by analogy. Whenever *t* comes before these vowels, and the accent immediately follows it, the *t* preserves its simple sound, as in *Miltiades*, *elephantiasis*, *satiety*, &c; but when the accent precedes the *t*, it then goes into *sh*, *tch*, or *tsh*, as *na-tshure*, *na-shion*, *vir-tshue*, *patient*, &c. or *natchure*, *nashion*, *virtchue*, *pashent*, &c. (464). In similar circumstances, the same may be observed of *d*, as *arduous*, *hideous*, &c. (293) (294) (376).

464. This pronunciation of *t* extends to every word where the diphthong or diphthongal sound commences with *i* or *e*, except in the terminations of verbs and adjectives, which preserve the simple in the augment, without suffering the *t* to go into the hissing sound, as *I pity*, *thou pitiest*, *he pities*, or *pitied*, *mightier*, *worthier*, *twentieth*, *thirtieth*, &c. This is agreeable to the general rule, which forbids the adjectives or verbal terminations to alter the sound of the primitive verb or noun. See No. 381. But in the words *bestial*, *celestial*, *frontier*, *admixtion*, &c. where the *s* or *n* precedes the *t*, this letter is pronounced like *tch* instead of *sh*, (291), as *bes-tchial*, *celes-tchial*, *frontcheer*, *admix-tchion*, &c.; as also when the *t* is followed by *eou*, whatever letter precede, as *righteous*, *piteous*, *plenteous*, &c. pronounced *righ-tcheous*, *pit-cheous*, *plen-tcheous*, &c. The same may be observed of *t* when succeeded by *uou*, as *unctuous*, *presumptuous*, &c. pronounced *ung-tchuous*, *prezumptchuous*, &c. See the words.

TH.

465. This lisping sound, as it may be called, is almost peculiar to the English (41) (50) (469). The Greek Θ was certainly not the sound we give it: like its principal letter, it has a sharp and a flat sound; but these are so little subject to rule, that a catalogue will, perhaps, be the best guide.

466. *Th*, at the beginning of words, is sharp, as in *thank*, *think*, &c. except in the following words: *This*, *that*, *than*, *the*, *thee*, *their*, *them*, *then*, *thence*, *there*, *these*, *they*, *thine*, *thither*, *those*, *thou*, *though*, *thus*, *thy*, and their compounds.

467. *Th*, at the end of words, is sharp, as *death*, *breath*, &c. except in *beneath*, *booth*, *with:* and the verbs to *wreath*, to *loath*, to *uncloath*, to *seeth*, to *smooth*, to *sooth*, to *mouth:* all which ought to be written with the *e* final; not only to distinguish them from the nouns, but to show that *th* is soft; for though *th*, when final, is sometimes pronounced soft, as in to *loath*, to *mouth*, &c. yet *the* final is never pronounced hard. There is as obvious an analogy for this sound of the *th* in these verbs, as for the *z* sound of *s* in verbs ending in *se* (437), and why we should write some verbs with *e*, and others without it, is inconceivable. The best way to show the absurdity of our orthography in this particular, will be to draw out the nouns and verbs as they stand in Johnson's Dictionary.

Adjectives and Nouns.	Verbs.
breath,	to *breathe*,
wreath,	to *wreath*, to *inwreathe*.
loath,	to *loathe*.
cloth,	to *cloathe*, to *uncloath*.
bath,	to *bathe*.
smooth,	to *smooth*.
mouth,	to *mouth*.
swath,	to *swathe*.
sheath,	to *sheath*. / to *sheathe*.
sooth,	to *sooth*.

Surely nothing can be more evident than the analogy of the language in this case. Is it not absurd to hesitate a moment at writing all the verbs with the *e* final? This is a departure from our great lexicographer, which he himself would approve, as nothing but inadvertency could have led him into this unmeaning irregularity.

468. *Th*, is hard in the middle of words, either when it precedes, or follows a consonant, as *panther*, *nepenthe*, *orthodox*, *orthography*, *orthoëpy*, *thwart*, *athwart*, *ethnic*, *misanthrope*, *philanthropy*, &c. except *brethren*, *farthing*, *farther*, *northern*, *worthy*, *burthen*, *murther*, where the *th* is flat; but the two last words are better written *burden* and *murder*.

469. *Th* between two vowels is generally soft in words purely English, as *father*, *feather*, *heathen*, *hither*, *thither*, *whither*, *whether*, *either*, *neither*, *weather*, *wether*, *wither*, *gather*, *together*, *pother*, *mother*.

470. *Th* between two vowels, in words from the learned languages, is generally hard, as *apathy*, *sympathy*, *antipathy*, *Athens*, *atheist*, *authentic*, *author*, *authority*, *athirst*, *cathartic*, *cathedral*, *catholic*, *catheter*, *ether*, *ethics*, *lethargy*, *Lethe*, *leviathan*, *litharge*, *lithotomy*, *Lutheran*, *mathesis*, *mathematics*, *method*, *pathetic*, *plethora*, *polymathy*, *prothonotary*, *anathema*, *amethyst*, *theatre*, *amphitheatre*, *apothecary*, *apotheosis*.

471. *Th* is sometimes pronounced like simple *t*, as *Thomas*, *thyme*, *Thames*, *asthma*, *phthisis*, *phthisic*, *phthisical*, and is silent in *twelfthtide*, pronounced *twelftide*.

T silent.

472. *T* is silent when preceded by *s*, and followed by the abbreviated terminations *en* and *le*, as *hasten*, *chasten*, *fasten*, *listen*, *glisten*, *christen*, *moisten*, which are pronounced as if written *hace'n*, *chace'n*, &c.; in *bursten* the *t* is heard: so *castle*, *nestle*, *trestle*, *wrestle*, *thistle*, *whistle*, *epistle*, *bristle*, *gristle*, *jostle*, *apostle*, *throstle*, *bustle*, *justle*, *rustle*, are pronounced as if written *cassle*, *nessle*, &c. in *pestle* the *t* is pronounced; in *often*, *fasten*, and *soften*, the *t* is silent, and at the end of several words from the French, as *trait*, *gout* (taste), *eclat*. In the first

of these words the *t* begins to be pronounced; in the last, it has been sometimes heard, but in the second, never. *Toupet* is more frequently written *toupee*, and is therefore not irregular. In *billetdoux* the *t* is silent, as well as in *hautboy*. The same silence of *t* may be observed in the English words, *Christmas*, *chetsnut*, *mortgage*, *ostler*, *bankruptcy*, and in the second syllable of *mistletoe*. In *currant* and *currants* the *t* is always mute.

V.

473. *V* is flat *f*, and bears the same relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *z* to *s* (41). It is never irregular; and if ever silent, it is in the word *twelvemonth*, were both that letter and the *e* are, in colloquial pronunciation, generally dropped, as if written *twel'month*.

W initial.

474. That *w* at the beginning of a word is a consonant, has been proved already, (9) (59). It is always silent before *r*, as in *wrack*, *wrangle*, *wrap*, *wrath*, *wreak*, *wreath*, *wreck*, *wren*, *wrench*, *wrest*, *wrestle*, *wretch*, *wriggle*, *wright*, *wring*, *wrinkle*, *wrist*, *write*, *writhe*, *wrong*, *wrought*, *wry*, *awry*, *bewray;* and before *h* and the vowel *o*, when long, as *whole*, *who*, &c. pronounced *hole*, *hoo*, &c.

475. *W* before *h* is pronounced as if it were after the *h*, as *hoo-y*, *why*, *hoo-en*, *when*, &c. but in *whole*, *whoop*, &c. the single and double *o* coalescing with the same sound in *w*, this last letter is scarcely perceptible. In *swoon*, however, this letter is always heard; and pronouncing it *soon*, is vulgar. In *sword* and *answer*, it is always silent. In *two* it mingles with its kindred sound, and the number *two* is pronounced like the adverb *too*. The same may be observed of *toward* and *towards*, where the *w* is dropped, as if written *toard* and *toards*, rhyming with *hoard* and *hoards*, but in the adjectives and adverbs *toward* and *towardly*, *froward* and *frowardly*, the *w* is heard distinctly. It is sometimes dropped in the last syllable of *awkward*, as if written *awkard;* but this pronunciation is vulgar.

X.

476. *X* is a letter composed of those which have been already considered, and therefore will need but little discussion, (48) (51). It is flat or sharp like its component letters, and is subject to the same laws.

477. *X* has a sharp sound like *ks*, when it ends a syllable with the accent upon it, as *exercise*, *excellence*, &c. or when the accent is on the next syllable, if it begin with a consonant, as *excuse*, *expense*, &c. (71).

478. *X* has its flat sound like *gz*, when the accent is not on it, and the following syllable begins with a vowel, as *exert*, *example*, *exist*, &c. pronounced *egzert*, *egzample*, *egzist*, &c. The same sound may be observed if *h* follow, as in *exhibit*, *exhale*, &c. pronounced *egzhibit*, *egzhale:* but if the secondary accent be on the *x* in the polysyllables *exhibition*, *exhalation*, &c. this letter is then sharp, as in *exercise* (71).

479. *X*, like *s*, is aspirated only when the accent is before it: hence the difference between *luxury* and *luxurious*, *anxious* and *anxiety:* in the true pronunciation of which words, nothing will direct us but recurring to first principles. It was observed that *s* is never aspirated, or pronounced like *sh*, but when the accent is on the preceding syllable (450); and that when the accent is on the succeeding vowel, though the *s* frequently is pronounced like *z*, it is never sounded *zh;* from which premises we may conclude, that *luxury* and *luxurious* ought to be pronounced *luckshury*, and *lugzurious*, and not *lug-zho-ryus*, as Mr. Sheridan spells it. The same error runs through his pronunciation of all the compounds, *luxuriance*, *luxuriant*, *luxuriate*, &c. which unquestionably ought to be pronounced *lug-zu-ri-ance*, *lug-zu-ri-ant*, *lug-zu-ri-ate*, &c. in four syllables, and not in three only, as they are divided in his Dictionary.

480. The same principle will lead us to decide in the words *anxious* and *anxiety:* as the accent is before the *x* in the first word, it is naturally divisible into *ank-sious*, and as naturally pronounced *ank-shus;* but as the accent is after the *x* in the second word, and the hissing sound cannot be aspirated (456), it must necessarily be pronounced *ang-ziety*. But Mr. Sheridan, without any regard to the component letters of these words, or the different position of the accent, has not only spelled them without aspiration, but without letting the *s*, in the composition of the last word, go into *z;* for thus they stand in his Dictionary: *ank-syus*, *ank-si-e-ty* (456).

481. The letter *x*, at the beginning of words, goes into *z*, as *Xerxes*, *Xenophon*, &c. pronounced *Zerkses*, *Zenophon*, &c. it is silent at the end of the French word *billet-doux*, and pronounced like *s* in *beaux;* often and better written *beaus*.

Y initial.

482. *Y*, as a consonant, has always the same sound; and this has been sufficiently described in ascertaining its real character; when it is a vowel at the end of a word or syllable with the accent upon it, it is sounded exactly like the first sound of *i*, as *cyder*, *tyrant*, *reply*, &c.; but at the end of a word or syllable, without the accent, it is pronounced like the first sound of *e*, *liberty*, *fury*, *tenderly*, &c.

Z.

483. *Z* is the flat *s*, and bears the same relation to it as *b* does to *p*, *d* to *t*, hard *g* to *k*, and *v* to *f*. Its common name is *izzard*, which Dr. Johnson explains into *s* hard; if, however, this be the meaning, it is a gross misnomer; for the *z* is not the hard, but the soft *s;** but as it has a less sharp, and therefore not so audible a sound, it is not impossible but it may mean *s surd*. *Zed*, borrowed from the French, is the more fashionable name of this letter; but, in my opinion, not to be admitted, because the names of the letters ought to have no diversity.

484. *Z*, like *s*, goes into aspiration before a diphthong, or a diphthongal vowel after the accent, as is heard in *vizier*, *glazier*, *grazier*, &c. pronounced *vizh-i-er*, *glazh-i-er*, *grazh-i-er*, &c. The same may be observed of *azure*, *razure*, &c.

485. *Z* is silent in the French word *rendezvous;* and is pronounced in the Italian manner, as if *t* were before it, in *mezzotinto*, as if written *metzotinto*.

Thus have we endeavoured to exhibit a just idea of the principles of pronunciation, both with respect to single letters, and their various combinations into syllables and words. The attentive reader must have observed how much the sounds of the letters vary, as they are differently associated, and how much the pronunciation of these associations depends upon the position of the accent. This is a point of the utmost importance, and a want of attending to it has betrayed several ingenious men into the grossest absurdities. This will more fully appear in the observations on accent; which is the next point to be considered.

OF THE NATURE OF ACCENT.

486. The accent of the ancients is the opprobrium of modern criticism. Nothing can show more evidently the fallibility of the human faculties than the total ignorance we are in at pre-

* Professor Ward, speaking of the reason for doubling the *s* at the end of words, says, "*s* doubled retains its proper force, which, when "single at the end of words, is *softened* into *z*, as *his*, *hiss*." And Dr. Wallis tells us, that it is almost certain when a noun has *s* hard in the last syllable, and becomes a verb; that in the latter case the *s* becomes soft, as a *house* is pronounced with the hard *s;* and to *house* with the *s* soft.

sent of the nature of the Latin and Greek accent. This would be still more surprising if a phenomenon of a similar kind did not daily present itself to our view. The accent of the English language, which is constantly sounding in our ears, and every moment open to investigation, seems as much a mystery as that accent which is removed almost two thousand years from our view. Obscurity, perplexity, and confusion, run through every writer on the subject, and nothing could be so hopeless as an attempt to explain it, did not a circumstance present itself, which at once accounts for the confusion, and affords a clue to lead us out of it.

487. Not one writer on accent has given us such a definition of the voice, as acquaints us with its essential properties. They speak of high and low, loud and soft, quick and slow; but they never once mention that striking property which distinguishes singing from speaking sounds; and which, from its sliding from high to low, and from low to high, may not improperly be called the inflection of the voice. No wonder, when writers left this out of the account, that they should blunder about the nature of accent: it was impossible they should do otherwise; so partial an idea of the speaking voice must necessarily lead them into inextricable difficulties. But let us once divide the voice into its rising and falling inflection, the obscurity vanishes; and accent becomes as intelligible as any other part of language.

488. Keeping this distinction in view, let us compare the accented syllable with others, and we shall find this general conclusion may be drawn: "The accented syllable is always "louder than the rest; but when it has the rising inflection, it "is higher than the preceding, and lower than the succeeding "syllable; and when it has the falling inflection, it is pronounc- "ed higher as well as louder than the other syllables, either "preceding or succeeding." The only exception to this rule is, "when the accent is on the last syllable of a word which has "no emphasis; and which is the concluding word of a dis- "course." Those who wish to see this clearly demonstrated must consult Elements of Elocution, vol. ii. p. 5. On the present occasion it will be sufficient to observe, that the stress we call accent is as well understood as is necessary for the pronunciation of single words, which is the object of this treatise; and therefore, without disturbing the common opinion concerning accent, we shall proceed to make some remarks on its proper position in a word, and endeavour to detect some errors in the use and application of it.

The different Positions of the English Accent.

489. Accent, in its very nature, implies a comparison with other syllables less forcible; hence we may conclude, that monosyllables, properly speaking, have no accent: when they are combined with other monosyllables and form a phrase, the stress which is laid upon one, in preference to others, is called emphasis. As emphasis evidently points out the most significant word in a sentence, so, where other reasons do not forbid, the accent always dwells with greatest force on that part of the word which, from its importance, the hearer has always the greatest occasion to observe; and this is necessarily the root, or body of the word. But as harmony of termination frequently attracts the accent from the root to the branches of words, so the first and most natural law of accentuation seems to operate less in fixing the stress than any of the other. Our own Saxon terminations, indeed, with perfect uniformity, leave the principal part of the word in quiet possession of what seems its lawful property (501); but Latin and Greek terminations, of which our language is full, assume a right of preserving their original accent, and subject many of the words they bestow upon us, to their own classical laws. But it may be observed in passing, that when we adopt a Latin word into our language, and cut off a syllable at the end, we generally place the accent two syllables higher than in the original word (503). See ACADEMY.

490. Accent, therefore, seems to be regulated, in a great measure, by etymology. In words from the Saxon, the accent is generally on the root; in words from the learned languages, it is generally on the termination; and if to these we add the different accent we lay on some words, to distinguish them from others, we seem to have the three great principles of accentuation; namely, the radical, the terminational, and the distinctive.

Accent on Dissyllables.

491. Every word of two syllables has necessarily one of them accented, and but one. It is true, for the sake of emphasis, we sometimes lay an equal stress upon two successive syllables, as *di-rect*, *some-times;* but when these words are pronounced alone, they have never more than one accent. For want of attending to this distinction, some writers have roundly asserted, that many dissyllables have two accents, such as *convoy*, *concourse*, *discord*, *shipwreck:* in which, and similar instances, they confound the distinctness, with which the latter syllables are necessarily pronounced, with accentual force; though nothing can be more different. Let us pronounce the last syllable of the noun *torment* as distinctly as we please, it will still be very different with respect to force, from the same syllable in the verb to *torment*, where the accent is on it; and if we do but carefully watch our pronunciation, the same difference will appear in every word of two syllables throughout the language. The word *Amen* is the only word which is pronounced with two consecutive accents when alone.

492. There is a peculiarity of accentuation in certain words of two syllables, which are both nouns and verbs, that is not unworthy of notice; the former having the accent on the first syllable, and the latter on the last. This seems an instinctive effort in the language (if the expression will be allowed me) to compensate in some measure for the want of different terminations for these different parts of speech. The words which admit of this diversity of accent are the following:

493. To this analogy, some speakers are endeavouring to reduce the word *contents;* which, when it signifies the matter contained in a book, is often heard with the accent on the first syllable; but though this pronunciation serves to distinguish words which are different in signification, and to give, in some measure, a difference of form to the noun and verb, in which our tongue is remarkably deficient, still it is doubtful whether this distinction be of any real advantage to the language. See Bowl. This diversity of accentuation seems to have place in compound verbs. See Counterbalance.

494. Sometimes words have a different accent, as they are adjectives or substantives.

Substantives.	Adjectives.
A'ugust, the month	*augúst*, noble
cómpact	*compáct*
cóntext	*contéxt*
champáign, wine	*chámpaign*, open

invalíd	*inválid*
Levánt, a place	*lévant*, eastern
mínute of time	*minúte*, small
súpine, in grammar	*supíne*, indolent.

495. Sometimes the same parts of speech have the accent on different syllables, to mark a difference of signification.

to *cónjure*, to practise magic	to *conjúre*, to summon in a sacred name
désert, a wilderness	*desért*, merit
búffet, a blow	*buffét*, a cupboard
sínister, insidious	*sinister*, the left side.

496. In this analogy some speakers pronounce the word *Concordance* with the accent on the first syllable, when it signifies a dictionary of the Bible; and with the accent on the second, when it signifies agreement: but besides that there is not the same reason for distinguishing nouns from each other, as there is nouns from verbs; the accent on the first syllable of the word *Concordance* gives a harshness and poverty to its sound, which ought to be avoided.

495. But though the different accentuation of nouns and verbs of the same form does not extend so far as might be expected, it is certain, that in words of two syllables, where the noun and verb are of different forms, there is an evident tendency in the language to place the accent upon the first syllable of the noun, and on the last of the verb. Hence the nouns *outrage*, *upstart*, and *uproar*, have the accent on the first syllable; and the verbs to *uplift*, to *uphold*, and to *outstrip*, on the last.

498. This analogy will appear still more evident if we attend to the accent of those nouns and verbs which are compounded of two words. Every dissyllable compounded of words which, taken separately, have a meaning, may be deemed a qualified substantive; and that word, which qualifies or describes the other, is that which most distinguishes it, and consequently is that which ought to have the accent. Accordingly we find that *inkhorn*, *outrage*, *chairman*, *freehold*, *sand-box*, *book-case*, *pen-knife*, have the accent on the first syllable, which is the specifying part of the word; while *gainsay*, *foresee*, *overlook*, *undersell*, have the accent on the last syllable, which is the least distinguishing part of the word. This rule, however, is, either by the caprice of custom, or the love of harmony, frequently violated, but is sufficiently extensive to mark the general tendency of the language.

Akenside brings the verb to *comment* under this analogy:

> "——————— The sober zeal
> "Of age, *commenting* on prodigious things."
> *Pleasures of the Imagination.*

And Milton in the same manner the verb to *commence:*

> "And looks *commencing* with the skies,
> "Thy rapt soul sitting in thine eyes." *Il Penseroso.*

499. Something very analogous to this we find in the nouns we verbalize, by changing the *s* sharp of the noun into the *s* flat, or *z* of the verb (437), as a *use*, and to *use;* where we may remark, that when the word in both parts of speech is a monosyllable, and so not under the laws of accent, the verb, however, claims the privilege of lengthening the sound of the consonant when it can, as well as when it cannot, prolong the accentuation. Thus we not only find *grass* altered to *graze*, *brass* to *braze*, *glass* to *glaze*, *price* to *prize*, *breath* to *breathe*, &c. but the *c* or *s* sharp altered to the *s* flat in *advice* to *advise*, *excuse* to *excuse*, *device* to *devise*, &c. The noun adopting the sharp hissing sound, and the verb the soft buzzing one, without transferring the accent from one syllable to another. The vulgar extend this analogy to the noun *practice* and the verb to *practise*, pronouncing the first with the *i* short and the *c* like sharp *s*, as if written *practiss*, and the last with the *i* long and the *s* like *z*, as if written *practize;* but correct speakers pronounce the verb like the noun; that is, as if written *practiss*. The noun *prophecy*, and the verb to *prophesy* follow thisanalogy, only by writing the noun with the *c* and the verb with the *s*, and without any difference of sound, except pronouncing the *y* in the first like *e*, and in the last like *i* long; where we may still discover a trace of the tendency to the barytone pronunciation in the noun, and the oxytone in the verb (467). See Supplement.

500. This seems to be the favourite tendency of English verbs; and where we find it crossed, it is generally in those formed from nouns, rather than the contrary: agreeably to this, Dr. Johnson has observed, that though nouns have often the accent on the latter, yet verbs have it seldom on the former syllable; those nouns which, in the common order of language, must have preceded the verbs, often transmit this accent to the verbs they form, and inversely. Thus the noun *water* must have preceded the verb to *water*, as the verb to *correspond* must have preceded the noun *correspondent*; and to *pursue* must claim priority to *pursuit*. So that we may conclude, wherever verbs deviate from this rule, it is seldom by chance, and generally in those words only where a superior law of accent takes place.

Accent on Trisyllables.

501. As words increase in syllables, the more easily is their accent known. Nouns sometimes acquire a syllable by becoming plural: adjectives increase a syllable by being compared; and verbs, by altering their tense, or becoming participles: adjectives become adverbs, by adding *ly* to them; and prepositions precede nouns or verbs without altering the accent of the word to which they are prefixed: so that when once the accent of dissyllables is known, those polysyllables whose terminations are perfectly English, have likewise their accent invariably settled. Thus *lion* becomes *lioness; poet*, *poetess; polite* becomes *politer*, or *politely*, or even *politelier; mischief*, *mischievous; happy*, *happiness;* nay *lioness* becomes *lionesses; mischief*, *mischievousness;* and *service*, *serviceable*, *serviceableness*, *serviceably*, and *unserviceably*, without disturbing the accent, either on account of the prepositive *un*, or the subjunctives *able*, *ably*, and *ableness*.

502. Hence we may perceive the glaring absurdity which prevails even in the first circles; that of pronouncing the plural of *princess*, and even the singular, with the accent on the second syllable, like *success* and *successes;* for we might just as well say, *dutchéss* and *dutchésses*, as *princéss* and *princésses;* nor would a correct ear be less hurt with the latter than with the former.

503. So few verbs of three syllables follow the analogy observable in those of two, that of protracting the accent to the last syllable, that this œconomy seems peculiar to dissyllables: many verbs, indeed, of three syllables are compounded of a preposition of two syllables: and then, according to the primary law of accentuation, and not the secondary of distinction, we may esteem them radical, and not distinctive: such are *contradict*, *intercede*, *supersede*, *contraband*, *circumscribe*, *superscribe*, &c. while the generality of words, ending in the verbal terminations *ise* and *ize*, retain the accent of the simple as *criticise*, *tyrannise*, *modernise*, &c.: and the whole tribe of trisyllable verbs in *ate*, very few excepted, refuse the accent on the last syllable: but words of three syllables often take their accent from the learned languages from which they are derived: and this makes it necessary to inquire how far English accent is regulated by that of the Greek and Latin.

On the influence of the Greek and Latin Accent, on the Accent of English Polysyllables.

As our language borrows so largely from the learned languages, it is not wonderful that its pronunciation should be in some measure influenced by them. The rule for placing the Greek accent was, indeed, essentially different from that of the Latin; but words from the Greek, coming to us through the Latin, are often so much latinized, as to lose their original accent, and to fall into that of the Latin; and it is the Latin accent which we must chiefly regard, as that which influences our own.

The first general rule that may be laid down, is, that when words come to us whole from the Greek or Latin, the same accent ought to be preserved as in the original. Thus *horizon*, *sonorous*, *decorum*, *dictator*, *gladiator*, *mediator*, *delator*, *spectator*, *adulator*, &c. preserve the penultimate accent of the original; and yet the antepenultimate tendency of our language has placed the accent on the first syllable of *orator*, *senator*, *auditor*, *cicatrix*, *plethora*, &c. in opposition to the Latin pronunciation of these words, and would have infallibly done the same by *abdomen*, *bitumen*, and *acumen*, if the learned had not stepped in to rescue these classical words from the invasion of the Gothic accent, and to preserve the stress inviolably on the second syllable. Nor has even the interposition of two consonants been always able to keep the accent from mounting up to the antepenultimate syllable, as we may see in *minister*, *sinister*, *character*, &c. and this may be said to be the favourite accent of our language.

But notwithstanding this prevalence of the antepenultimate accent, the general rule still holds good; and more particularly in words a little removed from common usage, such as terms in the arts and sciences: these are generally of Greek original; but coming to us through the Latin, most commonly contract the Latin accent when adopted into our language. This will appear more distinctly by a list, which may serve as a rule for all the rest: and first, let us select some, where the Greek and Latin accent coincide:

plethōra,	πληθώρα,	*antiphrăsis*,	αντίφρασις,
metabăsis,	μετάβασις,	*protăsis*,	πρότασις,
emphăsis,	ἔμφασις,	*metathĕsis*,	μετάθεσις,
antisphăsis,	ἀντίσπασις,	*epenthĕsis*,	επένθεσις,
antithĕsis,	ἀντίθεσις,	*aphærĕsis*,	ἀφαιρεσις.

Another list will show us where the accent of these languages differ:

antanaclāsis,	ανταν́κλασις,	*hydrophōbia*,	υδροφοβία,
catachrēsis,	κατάχρησις,	*cyclopædia*,	κυκλοπαιδεία,
paracentēsis,	παρακέντησις,	*aporĭa*,	απορία,
aposiopēsis,	αποσιώπησις,	*prosopopœia*,	προσωποποία,
antiptōsis,	αντίπτωσις,	*epiphonēma*,	επιφώνημα,
anadiplōsis,	αναδίπλωσις,	*diaphorēsis*,	διαφόρησις,
auxēsis,	ἄυξησις,	*diplōma*,	δίπλωμα,
mathēsis,	μαθησις,	*paragōge*,	παραγωγή
exegēsis,	εξήγησις,	*apostrophe*,	αποστροφή.

In this list we perceive the peculiar tendency of the Latin language to accent the long penultimate vowel, and that of the Greek, to pay no regard to it if the last vowel is short, but to place the accent on the antepenultimate. It will, however, be easily perceived, that in this case we follow the Latin analogy.

The next rule we may venture to lay down as a pretty general one, is, that if the words derived from the learned languages, though anglicised by altering the termination, contain the same number of syllables as in the original languages, they are generally to be pronounced with the same accent: that is, with the same accent as the first person present of the indicative mood active voice, or as the present participle of the same verb.

The reality of this rule will best appear by a selection of such classes of words as have an equal number of syllables in both languages.

Words which have *a* in the penultimate syllable:

prevalent,	*prævălens*,	infamous,	*infāmis*,
equivalent,	*æquivălens*,	propagate,	*propāgo*,
adjacent,	*adjăcens*,	indagate,	*indāgo*,
ligament,	*ligāmen*,	suffragan,	*suffrāgans.*

In this small class of words we find all but the two first have a different accent in English from that of the Latin. The rule for placing the accent in that language being the simplest in the world: if the penultimate syllable is long, the accent is on it; if short, the accent is on the antepenultimate.

Words which have *e* in the penultimate syllable:

penetrate,	*pĕnĕtro*,	exuberant,	*exuběrans*,
discrepant,	*discrĕpans*,	eminent,	*emĭnens*,
precedent,	*præcēdens*,	excellent,	*excēllens*,
elegant,	*elĕgans*,	alienate,	*alīēno*,
exuperant,	*exupĕrans*,	delegate,	*delēgo.*

In this class we find the penultimate *e* accented in English as in Latin, except in the three last words. The word *alienate* departs from the Latin accentuation, by placing the stress on the first syllable, as if derived from the English noun *alien*. The *e* in *penetro* is either long or short in Latin, and in this case we generally prefer the short sound to the long one.

Words which have *i* in the penultimate syllable:

ultimate,	*ultĭmus*,	efficience,	*efficĭens*,
proximate,	*proxĭmus*,	sufficience,	*sufficĭens*,
acclivous,	*acclīvus*,	perspicience,	*perspicĭens*,
declivous,	*declīvus*,	conscience,	*conscĭens*,
proclivous,	*proclīvus*,	obedience,	*obedĭens*,
litigant,	*litĭgans*,	pestilence,	*pestĭlens*,
mitigant,	*mitĭgans*,	supplicate,	*supplĭcans*,
sibilant,	*sibĭlans*,	explicate,	*explĭcans*,
vigilant,	*vigĭlans*,	abdicate,	*abdĭcans*,
fulminant,	*fulmĭnans*,	providence,	*provĭdens*,
discriminate,	*discrimĭno*,	festinate,	*festīno*,
habitant,	*habĭtans*,	mendicant,	*mendīcans*,
beneficent,	*benefĭcus*,	resident,	*resĭdens*,
accident,	*accĭdens*,	diffidence,	*diffĭdens*,
evident,	*evĭdens*,	confidence,	*confĭdens*,
indigent,	*indĭgens*,	investigate,	*investīgo*,
diligent,	*dilĭgens*,	castigate,	*castīgo*,
negligent,	*neglĭgens*,	extricate,	*extrīco*,
exigence,	*exĭgens*,	irritate,	*irrīto*,
intelligence,	*intellĭgens*,	profligate,	*proflīgo*,
deficience,	*deficĭens*,	instigate,	*instīgo.*

In the foregoing list of words we find a very general coincidence of the English and Latin accent, except in the last eleven words, where we depart from the Latin accent on the penultimate, and place it on our own favourite syllable the antepenultimate. These last words must therefore be ranked as exceptions.

Words which have *o* in the penultimate syllable:

arrogant,	*arrògans,*	omnipotent,	*omnipŏtens,*
dissonant,	*dissonans,*	innocent,	*innŏcens,*
redolent,	*redòlens,*	desolate,	*desōlo,*
insolent,	*insòlens,*	decorate,	*decōro,*
benevolent,	*benevŏlus,*	elaborate,	*elabōro,*
condolence,	*condolens,*	laborant,	*labōrans.*
indolence,	*indòlens,*	ignorant,	*ignōrans,*
armipotent,	*armipŏtens,*	suffocate,	*suffōco.*

In this list the difference of the English and Latin accent is considerable. The six last words desert the Latin penultimate for the English antepenultimate accent, and *condolence* falls into an accentuation diametrically opposite.

Words which have *u* in the penultimate syllable:

fabulate,	*fabŭlor,*	populate,	*popŭlo,*
maculate,	*macŭlo,*	subjugate,	*subjŭgo,*
adjuvate,	*adjŭvo,*	abducent,	*abdūcens,*
corrugate,	*corrŭgo,*	relucent,	*relūcens,*
petulant,	*petŭlans,*	imprudent,	*imprūdens,*
disputant,	*dispŭtans,*	adjutant,	*adjūtans,*
impudent	*impŭdent,*	peculate,	*pecūlor,*
speculate,	*spĕcŭlor,*	indurate,	*indūro,*
pullulate,	*pullŭlo,*	obdurate,	*obdūro.*

Here we find the general rule obtain, with, perhaps, fewer exceptions than in any other class. *Adjuvate, peculate,* and *indurate,* are the only absolute deviations; for *obdurate* has the accent frequently on the second syllable. See the word.

To these lists, perhaps, might be added the English words ending in *tion, sion,* and *ity:* for though *tion* and *sion* are really pronounced in one syllable, they are by almost all our orthoepists generally divided into two; and consequently *nation, pronunciation, occasion, evasion,* &c. contain the same number of syllables as *natio, pronunciatio, occasio, evasio,* &c. and have the accent, in both English and Latin, on the antepenultimate syllable. The same may be observed of words ending in *ity,* as *diversity, variety,* &c. from *diversitas, varietas,* &c.

By this selection (which, though not an exact enumeration of every particular instance, is yet a sufficient specimen of the correspondence of Latin and English accent) we may perceive that there is a general rule running through both languages respecting the accent of polysyllables, which is, that when a single vowel in the penultimate is followed by a single consonant, the accent is on the antepenultimate. This is so agreeable to English analogy, that in words derived from the Latin, where the penultimate vowel, followed by a single consonant, is long, and consequently has the accent, we almost always neglect this exception, as it may be called, in the Latin language, and fall into our own general rule of accenting the antepenultimate. Nor is it, perhaps, unworthy of being remarked, that when we neglect the accent of the original, it is almost always to place it at least a syllable higher; as *adjacent* and *condolence* are the only words in the whole selection, where the accent of the English word is placed lower than in the Latin.

There is, indeed, a remarkable coincidence of accent between Latin verbs of three syllables, commencing with a preposition, and the English words of two syllables, derived from them by dropping a syllable,* as *excēllo, rebēllo, inquīro, confīno, confūto, consūmo, desīro, explōro, procēdo, poclāmo,* have the accent in Latin on the second syllable; and the English verbs *excel, rebel, inquire, confine, confute, consume, desire, explore, proceed, proclaim,* have the accent on the same syllable. This propensity of following the Latin accent, in these words, perhaps, in this, as well as in other cases, formed a general rule, which at last, neglected the Latin accent, in words of this kind; as we find *prefer, confer, defer, desert, compare, compleat, congeal, divide, dispute, prepare,* have the accent on the second syllable, though *præfero, defĕro, confĕro, desĕro, compăro, complĕo, congĕlo, divĭdo, dispŭto, prepăro,* have the accent on the first; and this propensity, perhaps, laid the foundation of that distinction of accent which is so remarkable between dissyllable nouns, and verbs of the same form. See No. 492.

But when English polysyllables are derived from the Latin by dropping a syllable, scarcely any analogy is more apparent than the coincidence of the principal accent of the English word, and the secondary accent (522), we give to the Latin word, in the English pronunciation of it. Thus *parsimony, ceremony, matrimony, melancholy,* &c. have the accent on the first syllable, because in pronouncing the Latin words *parsimonia, cæremonia, matrimonia, melancholia,* &c. we are permitted, and prone in our English pronunciation of these words, to place a secondary accent on that syllable. See ACADEMY, IRREPARABLE, &c.

With respect to the quantity of the antepenultimate syllable in polysyllables, it may be observed, that regardless of the quantity of the original, we almost, without exception, follow the analogy of our own language. This analogy uniformly shortens the vowel, unless it be *u,* followed by a single consonant, or any other vowel followed by a single consonant, succeeded by a semi-consonant diphthong. Thus the first *u* in *dūbious* is pronounced long, though short in the Latin word *dŭbĭus;* the same may be observed of the *e* and *o* in *mĕdium* and *emptŏrium;* and the first *i* in *delĭrium,* and the first *e* in *dēlicate,* are pronounced short in English according to our own analogy (507), though these letters are long in the Latin *delīdium* and *dēlicatus.* For the quantity of English dissyllables derived from the Greek and Latin, see No. 542, 543, 544, &c.

Terminational Accent.

504. We have seen that the Saxon terminations, regardless of harmony, always leave the accent where they found it, let the adventitious syllables be ever so numerous. The Saxons, attentive chiefly to sense, preserved the same simplicity in the accentuation, as in the composition of their words; and, if sense were the only object of language, it must be confessed, that our ancestors were, in this respect, superior to the Greeks and Romans. What method could so rigidly preserve, and so strongly convey, the sense of words, as that which always left the accent on the root, where the principal meaning of the word undoubtedly lies? But the necessities of human nature require that our thoughts should not only be conveyed with force, but with ease; to give language its due effect, it must be agreeable as well as forceful; and the ear must be addressed while we are informing the mind. Here, then, terminational accent, the music of language, interposes; corrects the discordant, and strengthens the feeble sounds; removes the difficulty of pronunciation which arises from placing the accent on initial syllables, and brings the force gently down to the latter part of the word, where a cadence is formed, on the principles of harmony and proportion.

505. To form an idea of the influence of termination upon accent, it will be sufficient to observe, that words which have *ei, ia, ie, io, eou,* in their termination, always have the accent on the preceding syllable: thus *atheist, alien, regalia, ambrosia,* &c. the numerous terminations in *ion, ian,* &c. as *gradation, promotion, confusion, logician, physician,* &c. those in *ious,* as *harmonious, abstemious,* &c. those in *eous,* as *outrageous, advantageous,* &c. These may not improperly be styled semi-consonant diphthongs (196).

506. The only exceptions to this rule are one word in *iac,* as *elegiac,* which has the accent on the *i,* and the following words in *iacal,* as *prosodiacal, cardiacal, heliacal, genethliacal, mania-*

* Ben Jonson seems to have had a faint idea of this coincidence, where he says, "all verbs coming from the Latin, either of the supine "or otherwise, hold the accent as it is found in the first person present "of those Latin verbs, as *ánimo, ánimate, célebro, célebrate;* except "words compounded of *facio,* as *liquefacio, liquefy;* and of *statuo,* as *con-* "*stituto, constitúte.*" English Grammar. Of the extent and justness of these observations, the critical reader will be the best judge.

cal, demoniacal, ammoniacal, theriacal, paradisiacal, aphrodisiacal, and *hypochondriacal;* all which have the accent on the antepenultimate *i*, and that long and open, as in *idle, title*, &c.

507. Nothing can be more uniform than the position of the accent in words of these terminations; and, with very few exceptions, the quantity of the accented vowel is as regular as the accent; for when these terminations are preceded by a single consonant, every accented vowel is long, except *i;* which in this situation, is as uniformly short. Thus *occasion, adhesion, erosion*, and *confusion*, have the *a, e, o*, and *u*, long; while *vision* and *decision* have the *i* short. The same may be observed of *probation, concretion, devotion, ablution*, and *exhibition*. The exceptions are, *impetuous, especial, perpetual, discretion* and *battalion*, which last ought to be spelt with double *l*, as in the French, from which it is derived, and then it would follow the general rule. *National*, and *rational*, form two more exceptions; and these are almost the only irregularities to which these numerous classes of words are subject.

508. Nearly the same uniformity, both of accent and quantity, we find in words ending in *ic*. The accent immediately precedes this termination, and every vowel under this accent but *u* is short. Thus *Satanic, pathetic, eliptic, harmonic*, &c. have the accent on the penultimate, and the vowel short; while *tunic, runic*, and *cubic*, have the accented vowel long.

509. The same may be observed of words ending in *ical*, as *fanatical, poetical, levitical, canonical*, &c. which have the accent on the antepenultimate syllable, and the vowels *a, e, i*, and *o*, short; but *cubical* and *musical*, with the accent on the same syllable, have the *u* long.

510. The only exceptions to this rule are, *Bucolic, arsenic, choleric, ephemeric, turmeric, emperic, rhetoric, bishopric*, (better written *bishoprick*, see No. 400.) *lunatic, arithmetic, splenetic, heretic, politic*, and, perhaps, *phlegmatic;* which, though more frequently heard with the accent on the antepenultimate syllable, ought, if possible, to be reduced to regularity. Words ending in *scence* have uniformly the accent on the penultimate syllable, as *quiescence, reminiscence*, &c.; *concupiscence*, which has the accent on the antepenultimate, is the only exception. This accentuation seems to arise as much from the correspondence to the Latin words of the same number of syllables, as to the concurrence of two consonants (503). See SUPPLEMENT.

511. In the same manner, if we take a view of the words ending in *ity*, we find the accent invariably placed on the preceding syllable as in *diversity, congruity*, &c. On a closer inspection we find every vowel in this antepenultimate syllable, when no consonant intervenes, pronounced long, as *deity, piety*, &c. A nearer inspection shows us, that, if a consonant precede this termination, the preceding accented vowel is short, except it be *u*, as *severity, curiosity, impunity*, &c. we find too, that even *u* contracts itself before two consonants, as in *curvity, taciturnity*, &c. and that *scarcity* and *rarity* (signifying uncommonness; for *rarity*, thinness, has the *a* short) are the only exceptions to this rule throughout the language. The same observations are applicable to words ending in *ify*, as *justify, clarify*, &c. The only words where the antepenultimate accent in words of this termination does not shorten the vowel are, *glorify* and *notify*. The *y* in these words is always long, like the first sound of *i;* and both accent and quantity are the same when these words take the additional syllable *able*, as *justifiable, rarefiable*, &c. (183.)

512. To these may be added the numerous class of words ending in *arous, erous*, and *orous*, as *barbarous, meteorous*, and *humourous;* all which have the accent on the antepenultimate syllable, except *canorous* and *sonorous;* which some unlucky sicholar happening to pronounce with the accent on the penultamate syllable, in order to show their derivation from the Latin adjectives, *canorus* and *sonorus*, they stand like strangers amidst a crowd of similar words, and are sure to betray a mere English scholar into a wrong pronunciation.

To polysyllables in these terminations might be added those in *ative, atory, ctive*, &c.; words ending in *ative* can never have the accent on the penultimate syllable, if there is a higher syllable to place it on, except in the word *creative;* and when this is the case, as it is seldom otherwise, the accent seems to rest on the root of the word, or on that syllable which has the accent on the noun, adjective or verb with which the word in *ative* corresponds. Thus *copulative, estimative, alterative*, &c. follow the verbs to *copulate*, to *estimate*, to *alter*, &c. When derivation does not operate to fix the accent, a double consonant will attract it to the antepenultimate syllable, as *appellative;* and two consonants have sometimes this power in opposition to derivation, as *adversative* and *argumentative. Indicative* and *interrogative* are likewise exceptions, as they do not follow the verbs to *indicate* and *interrogate;* but as they are grammatical terms, they seem to have taken their accent from the secondary accent, we sometimes give to the Latin words *indicativus* and *interrogativè* (see the word ACADEMY). Words ending in *ary, ery*, or *ory*, have generally the accent on the root of the word; which, if it consists of three syllables, must necessarily be accented on the first, as *contrary, treachery, factory*, &c.; if of four or five, the accent is generally on that syllable which has the accent in the related or kindred words; thus *expostulatory* has the accent on the same radical syllable as *expostulate;* and *congratulatory*, as *congratulate: interrogatory* and *derogatory* are exceptions here, as in the termination *ative;* and if* *pacificatory, sacrificatory, significatory*, &c. have not the accent on the first syllable, it seems to arise from the aversion we seem to have at placing even the secondary accent on the antepenultimate *a*, (which we should be very apt to do if the principal accent were on the first syllable,) and the difficulty there would be in pronouncing such long words with so many unaccented syllables at the end, if we were to lay the accent on the first. Words ending in *ctive* have the accent regularly on the penultimate syllable, except *adjective*, which, like *indicative*, being a grammatical word, seems to have taken its accent from the secondary stress of the Latin *adjectivus*, (see ACADEMY;) and every word ending in *tive*, preceded by a consonant, has the accent on the penultimate syllable likewise, except *substantive;* and, perhaps, for the reason just given. After all, it must be owned, that words ending in *ative* and *atory*, are the most irregular and desultory of any in the language; as they are generally accented very far from the end, they are the most difficult to pronounce; and therefore whenever usage will permit, we should incline the stress as much as possible to the latter syllables. Thus *refractory* ought never to have the accent on the first syllable; but *refectory*, with the accent on the first, is a school term, and, like *substantive, adjective, indicative*, and *interrogative*, must be left in quiet possession of their Latin secondary accent.

Enclitical Accent.

513. I have ventured to give the name of *enclitical* to the accent of certain words, whose terminations are formed of such words as seem to lose their own accent, and throw it back on the last syllable of the word with which they coalesce, such as *theology, orthography*, &c. The readiness with which these words take the antepenultimate accent, the agreeable flow of sound to the ear, and the unity it preserves in the sense, are sufficient proofs of the propriety of placing the accent on this syllable, if custom were ambiguous. I do not remember to

* These words ought certainly to be accented alike; and accordingly we find Dr. Johnson, Mr. Sheridan, Mr. Barclay, and Mr. Smith, place the accent on the second syllable; but though Fenning accents *significatory* in the same manner, he places the accent on the antepenultimate of *pacificatory;* and Kenrick likewise accents the second syllable of *significatory*, but the first of *pacificatory:* the other orthoepists who have not got these words have avoided these inconsistencies,

have heard the accent disputed in any word ending in *ology;* but *orthography* is not unfrequently pronounced with the accent on the first syllable, like *orthodoxy*. The temptation we are under to discover our knowledge of the component parts of words, is very apt to draw us into this pronunciation; but as those words which are derived from the Greek, and are compounded of λογος, have universally given into this enclitical accentuation, no good reason appears for preventing a similar pronunciation in those compounded of γραφω, as by placing the accent on the antepenultimate syllable the word is much more fluent and agreeable to the ear. It is certain, however, that at first sight the most plausible reasoning in the world seems to lie against this accentuation. When we place the accent on the first syllable, say our opponents, we give a kind of subordinate stress to the third syllable *graph:* by which means the word is divided into its primitives οξθος and γραφω, and those distinct ideas it contains, are preserved, which must necessarily be confounded by the contrary mode; and that pronunciation of compounds, say they, must certainly be the best which best preserves the import of the simples.

514. Nothing can be more specious than this reasoning, till we look a little higher than language, and consider its object; we shall then discover, that in uniting two words under one accent, so as to form one compound term, we do but imitate the superior operations of the mind, which in order to collect and convey knowledge, unite several simple ideas into one complex one. "The end of language," says Mr. Locke, "is by short "sounds to signify with ease and dispatch general conceptions, "wherein not only abundance of particulars are contained, but "also a great variety of independant ideas are collected into "one complex one, and that which holds these different parts "together in the unity of one complex idea, is the word weannex "to it. For the connexion between the loose parts of those "complex ideas being made by the mind, this union, which has "no particular foundation in nature, would cease again, were "there not something that did, as it were, hold it together, and "keep the parts from scattering; though, therefore, it be the "mind that makes the collection, 'tis the name which is, as it "were, the knot which ties them fast together." This reasoning, with respect to words and ideas, is so exactly applicable to accent and words, that we need but change the names to have an argument in form for that accentuation which unites the different parts of a word under one forcible pressure of the voice; for, as Mr. Locke continues, "Men, in framing ideas, seek "more the convenience of language and quick dispatch by "short and comprehensive signs, than the true and precise "nature of things; and, therefore, he who has made a complex "idea of a body with life, sense, and motion, with a faculty of rea-"son joined to it, need but use the short monosyllable, man, to "express all particulars that correspond to that complex idea." So it may be subjoined, that in framing words for the purpose of immediate communication, the end of this communication is best answered by such a pronunciation as unites simples into one compound, and at the same time renders the compound as much a simple as possible: but it is evident that this is done by no mode of accentuation, so well as that which places the accent on the antepenultimate syllable of the words *theólogy, orthógraphy;* and therefore that this accentuation, without insisting on its superior harmony, must best answer the great end of language (328).

515. This tendency in our language, to simplify compounds, is sufficiently evident in that numerous catalogue of words, where we find the long vowel of the simple changed into a short one in the compound, and by this means losing much of its original import to the ear; thus *breakfast, shepherd, vineyard, meadow, shadow, zealous, hearken, valley, cleanse, cleanly* neat) *forehead, wilderness, bewilder, kindred, knowledge, darling, fearful, pleasant, pleasure, whitster, whitleather, seamstress, stealth, wealth, health, wisdom, wizard, parentage, lineage, children, pasty, gosling, collier, holiday, Christmas, Michaelmas, windless, cripple, hinder, stripling, starling, housewife, husband, primer, peascod, fieldfare, birth* from *bear, dearth* from *dear, weary* from *wear,* and many others, entirely lose the sound of the simple in their compound or derivative.

516. The long *i* in *white,* when a simple, is almost universally changed into a short one in proper names, as *Whitchurch, Whitefield, Whitbread, Whitlock, Whitaker,* &c. for compendiousness and dispatch being next in importance to perspicuity, when there is no danger of mistake, it is no wonder that the organs should fall into the shortest and easiest sounds.

517. It must, however, be observed, that this tendency to unite simples into a compound, by placing an accent exactly where the two words coalesce, is still subservient to the laws of harmony. The Greek word δοκεω, which signifies opinion, and from which the last syllables of *orthodoxy* are derived, was never a general subjunctive word like λογος and γραφω; and even if it had been so, the assemblage of consonants in the letter *x* would have prevented the ear from admitting an accent on the syllable immediately preceding, as the *x* would, by this means, become difficult to pronounce. Placing the accent, therefore, on the first syllable of *orthodoxy,* gives the organs an opportunity of laying a secondary stress upon the third, which enables them to pronounce the whole with distinctness and fluency. Thus *Galaxy* and *Cachexy,* having the accent on the first syllable, are very difficult to pronounce; but this difficulty is removed by placing the accent a syllable higher in the words *apoplexy, ataraxy,* and *anorexy.* See the words.

518. But the numerous classes of words that so readily adopt this enclitical accent sufficiently prove it to be agreeable to the genius of our pronunciation. This will more evidently appear by adducing examples. Words in the following terminations, have always the accent on that syllable where the two parts unite, that is, on the antepenultimate syllable.

In *logy,* as *apology, ambilogy, genealogy,* &c.
In *graphy,* as *geography, orthography, historiography,* &c.
In *phagus,* as *sarophagus, ichthyophagus, androphagus,* &c.

In *strophe,* as *catastrophe, apostrophe, anastrophe,* &c.
In *meter,* as *geometer, barometer, thermometer,* &c.

In *fluent,* as *mellifluent, circumfluent, interfluent,* &c.
In *vomous,* as *ignivomous, flammivomous,* &c.
In *parous,* as *viviparous, oviparous, deiparous,* &c.

In *mathy,* as *opsimathy, polymathy,* &c. &c. &c.

519. Some of these Greek compounds seem to refuse the antepenultimate accent for the same reason as *orthodoxy;* such as *necromancy, chiromancy, hydromancy;* and those terminating in *archy,* as *hierarchy, oligarchy, patriarchy:* all of which have the accent on the first syllable, which gives the organs time to recover their force upon the third, and to pronounce the two consonants with much more ease, than if the accent immediately preceded them; but *periphrasis* and *antiphrasis,* besides their claim to the accent of their originals, readily admit of the accent on the second syllable, because the consonants in the two last syllables do not come together, and are therefore easily pronounced after the accent. *Orthöepy*

having no consonant in the antepenultimate syllable, naturally throws its accent on the first.

520. By this view of the enclitical terminations we may easily perceive how readily our language falls into the antepenultimate accent, in these compounded polysyllables; and that those terminations which seem to refuse this accent, do it rather from a regard to etymology than analogy. Thus words ending in *asis*, as *periphrasis*, *apophasis*, *hypostasis*, &c. have the antepenultimate accent of their originals. The same may be observed of those ending in *esis*, as *hypothesis*, *antithesis*, *parenthesis*, &c. but *exegesis*, *mathesis*, *auxesis*, *catachresis*, *paracentesis*, *aposiopesis*, have the accent on the penultimate syllable, because the vowel in this syllable is long in Greek and Latin. But all words ending in *osis* have the accent on the penultimate, except *metamorphosis* and *apotheosis*, which desert the accent of their Latin originals, while those in *ysis* are accented regularly on the antepenultimate in Greek, Latin, and English, as *analysis*, *paralysis*, &c. We may note too that every *s* in all these terminations is sharp and hissing.

521. Words of three syllables ending in *ator* have the accent on the penultimate, as *spectator*, *collator*, *delator*, &c. except *orator*, *senator*, *legator*, and *barrator*. But words in this termination of more than three syllables, though they have generally the accent on the penultimate, are subject to a diversity not easily reduced to rule: thus *navigator*, *propagator*, *dedicator*, &c. are sometimes pronounced with the accent on the first syllable, and sometimes on the third: but as these words may be pronounced with an accent on both these syllables, it is of less consequence on which syllable we place the accent, when we use only one. The general rule certainly inclines to the penultimate accent; but as all these words are verbal nouns, and, though generally derived from Latin words of the some terminations, have verbs corresponding to them in our own language, it is very natural to preserve the accent of the verb in these words, as it gives an emphasis to the most significant part of them: thus *equivocator*, *prevaricator*, *dedicator*, might be regularly formed from the verbs to *equivocate*, to *prevaricate*, and to *dedicate;* and agreeably to analogy, would have been written *equivocater*, *prevaricater*, and *dedicater;* but an affectation of preferring every analogy to our own, has given these words a Latin termination, which answers no purpose, but to involve our language in absurdities; but the ear, in this case, is not quite so servile as the eye: and though we are obliged to write these words with *or*, and not *er*, we generally hear them pronounced as if they were formed from our own verbs, and not from Latin nouns in *ator*. But when the word has no verb in our own language to correspond to it, the accent is then placed with great propriety upon the *a*, as in Latin; thus *violator*, *instigator*, *navigator*, &c. ought to have the accent on the first syllable; and *emendator*, *gladiator*, *adulator*, &c. on the last but one.

SECONDARY ACCENT.

522. Hitherto we have considered that accent only, which necessarily distinguishes one syllable in a word from the rest; and which, with very little diversity, is adopted by all who speak the English language.

523. The secondary accent is that stress we may occasionally place upon another syllable, besides that which has the principal accent, in order to pronounce every part of the word more distinctly, forcibly, and harmoniously. Thus this accent is on the first syllable of *conversation*, *commendation*, &c.

524. There are few authors who have not taken notice of two accents upon some of the longer polysyllables, but none have once hinted that one of these is not essential to the sound of the word: they seem to have supposed both accents equally necessary, and without any other difference, than that one was pronounced more forcibly than the other. This mistake arose from a want of studying the speaking voice. A knowledge of this would have told them, that one accent only was essential to every word of more than one syllable, and that the secondary stress might, or might not, be adopted, as distinctness, force, or harmony, should require: thus *complaisant*, *contraband*, *caravan;* and *violin*, *partisan*, *artisan*, *courtisan*, *metaphysic*, have frequently an accent on the first, as well as on the last syllable, though a somewhat less forcible one. The same may be observed of *repartee*, *referee*, *privateer*, *domineer*, &c. but it must still be observed, that though an accent be allowed on the first syllable of these words, it is by no means necessary; they may all be pronounced with one accent, and that on the last syllable, without the least deviation from propriety.

525. In order to give some idea of the nature of the secondary accent, let us suppose, that, in giving our opinion of an argument, we say,

"It is a diréct demonstrátion of the Copernican system."

In this sentence, as an accent is necessarily upon the last syllable of *direct*, we seldom lay a stress on the first syllable of *demonstration*, except we mean to be uncommonly emphatical. But in the following sentence,

"It is a démonstrátion of the Copernican system."

Here, as no accented word precedes *demonstration*, the voice finds a rest, and the ear a force, in placing an accent on the first, as well as on the third syllable of this word.

526. But though we may, or may not, use the secondary accent at pleasure, it is by no means a matter of indifference on what syllable we place it: this is fixed, with as much certainty as the place of the principal accent itself; and a wrong position of one, would as much derange the sound of the word as a wrong position of the other: and it must be carefully noted, that though we lay no stress upon the syllable which may have the secondary accent, the consonants and vowels have exactly the same sound as if the doubtful syllable (as it may be called) were accented. Thus though I lay no stress upon the second syllable of *negociation*, *pronunciation*, *ecclesiastic*, &c. the *c* and *s* go into the sound of *sh* and *zh*, as if the secondary accent were on the preceding syllable (357) (451) (459).

527. It may be observed, in the first place, that the secondary accent is always two syllables, at least, distant from the principal accent: thus in *demonstration*, *lamentation*, *provocation*, &c. the secondary accent is on the first syllable, and the principal on the third; and in *arteriotomy*, *meteorology*, and *hypochondriacal*, the secondary accent is on the first, and the principal on the fourth syllable; and in the word *indivisibility* we may place two secondary accents, one upon the first and the other upon the third syllable.

528. In the next place it may be observed, that though the syllable on which the principal accent is placed, is fixed and certain, yet we may, and do, frequently make the secondary principal, and the principal secondary: thus *caravan*, *complaisant*, *violin*, *repartee*, *referee*, *privateer*, *domineer*, may all have the greatest stress on the first, and the least on the last syllable, without any violent offence to the ear: nay, it may be asserted, that the principal accent on the first syllable of these words, and none at all on the last, though certainly improper, has nothing in it grating or discordant; but placing an accent on the second syllable of these words would entirely derange them, and produce an intolerable harshness and dissonance. The same observations may be applied to *demonstration*, *lamentation*, *provocation*, *navigator*, *propagator*, *alligator*, and every similar word in the language. But, as we have observed, the consonants *t*, *d*, *c*, and *s*, after the secondary accent, are exactly under the same predicament as after the primary; that is, if they

are followed by a diphthong or diphthongal vowel, these consonants are pronounced like *sh*, *tsh*, *zh*, or *j*, as *sententiosity*, *partiality*, &c. (526).

QUANTITY.

529. In treating this part of pronunciation, it will not be necessary to enter into the nature of that quantity which constitutes poetry; the quantity here considered will be that which relates to words taken singly; and this is nothing more than the length or shortness of the vowels, either as they stand alone, or as they are differently combined with vowels or consonants (63).

530. Quantity, in this point of view, has already been fully considered under every vowel and diphthong in the language. What remains to be said on this subject is, the quantity of vowels under the secondary accent. We have seen that vowels under the principal accent, before the diphthongs *ia*, *ie*, *eou*, *ion*, are all long, except *i*, (507). That all vowels are long before the terminations *ity* and *ety* (511); that if one consonant precede these terminations, every preceding accented vowel, except the *a* in *scarcity*, and *rarity* signifying uncommonness, is short but *u;* and that the same analogy of quantity is found before the terminations *ic* and *ical*, and the numerous enclitical terminations we have just been pointing out. Here we find custom conformable to analogy; and that the rules for the accent and quantity of these words admit of scarcely any exceptions. In other parts of the language where custom is more capricious, we can still discover general rules; and there are but very few words in which the quantity of the vowel under the principal accent is not ascertained. Those who have but a common share of education, and are conversant with the pronunciation of the capital, are seldom at a loss for the quantity of the vowel under that accent which may be called principal; but the secondary accent in the longer polysyllables does not seem to decide the quantity of the vowels, so invariably. Mr. Sheridan divides the words *deglutition*, *depravation*, *degradation*, *dereliction*, and *democratical*, into *de-glu-ti-tion*, *de-pra-va-tion*, *de-gra-da-tion*, *de-re-lic-tion*, and *de-mo-crat-i-cal;* while Dr. Kenrick, more accurately divides them into *deg-lu-ti-tion*, *dep-ra-va-tion*, *deg-ra-da-tion*, and *dem-o-crat-i-cal;* but makes not any distinction between the first *o* in *profanation* and *profane; prodigality* and *prodigious; prorogation* and *prorogue;* though he distinguishes this letter in the first syllable of *progress* and that in *progression*. And though Mr. Sheridan divides *retrograde* into *ret-ro-grade*, he divides *retrogradation*, *retrogression*, *retrospect*, *retrospection*, and *retrospective*, into *re-tro-gra-dation*, *re-tro-gres-sion*, *re-tro-spect*, *re-tro-spec-tion*, and *re-tro-spec-tive*. At the first sight of these words we are tempted to prefer the preposition in a distinct syllable, as supposing that mode to convey more distinctly each part of the word; but custom at large, the best interpreter of nature, soon lets us see that these prepositions coalesce with the word they are prefixed to, for reasons greatly superior to those which present themselves at first (514). If we observe the tendency of pronunciation, with respect to inseparable prepositions, we shall find, that those compound words which we adopt whole from other languages we consider as simples, and pronounce them without any respect to their component parts; but those compounds which we form ourselves retain the traces of their formation, in the distinction which is observable, between the prepositive and radical part of the word: thus *retrogade*, *retrogression*, *retrospect* and *retrospective*, coming compounded to us from the Latin, ought, when the accent is on the preposition, to shorten the vowel, and unite it to the root, as in *res-ur-rec-tion*, *rec-ollec-tion*, *prep-o-si-tion*, &c. while *re-commit*, *re-convey*, &c. being compounds of our own, must preserve it separate.

531. From what has been observed arises this general rule: where the compound retains the primary sense of the simples, and the parts of the word are the same in every respect, both in and out of composition, then the preposition is pronounced in a distinct syllable; but when the compound departs ever so little from the literal sense of the simples, the same departure is observable in the pronunciation; hence the different syllabication and pronunciation of *re-com-mence* and *rec-om-mend;* the former signifies a repetition of a commencement, but the latter does not imply a repetition of a commendation: thus *re-petition* would signify to petition again; while *rep-etition* signifies only an iteration of the same act, be it what it will. The same may be observed of the words *re-create* and *rec-reate*, *re-formation* and *ref-ormation*.

532. That this is perfectly agreeable to the nature of the language, appears from the short pronunciation of the vowel in the first syllable of *preface*, *prelate*, *prologue*, *prelude*, &c. as if divided into *pref-ace*, *prel-ate*, *prol-ogue*, *prel-ude*. &c.; and that it is agreeable to the nature of things, may be collected from observing, that the utility of language does not consist in keeping the simples in a word so distinct as that each of the component parts shall remain in a state of separation, but in uniting several parts into one undistinguished compound; which compound shall often have an idea annexed to it somewhat different from the simples that compose it (514).

533. It will be necessary, however, to observe, that in forming a judgment of the propriety of these observations, the nicest care must be taken not to confound those prepositions which are under the primary and secondary accent, with those which immediately precede the stress; for *preclude*, *pretend*, &c. are under a very different predicament from *prologue*, *preposition*, &c.; and the very same law that obliges us to pronounce the vowel short in the firstsyllable of *prov-i-dence*, *provo-cation*, and *prof-a-nation*, obliges us to pronounce the vowel open, and with some degree of length in *pro-vide*, *pro-voke*, and *pro-fane*. The same may be observed of the *e* in *re-pair* and *rep-a-ration; re-ply* and *rep-li-ca-tion; re-peat* and *rep-e-tition;* the accent making the whole difference between the quantity of the vowel in one word and the other.

534. The only exception to the shortening power of the secondary accent is the same as that which prevents the shortening power of the primary accent (503). namely, the vowel *u*, as in *lucubration*, or when any other of the vowels are succeeded by a semi-consonant diphthong, (196): thus *mediator* and *mediatorial* have the *e* in the first syllable as long as in *mediate: deviation* has the *e* in the first syllable as long as in *deviate*, notwithstanding the secondary accent is on it, and which, would infallibly have shortened it, if it had not been for the succeeding diphthong *ia;* and even this diphthong in *gladiator* has not the power of preserving the first syllable long; though Mr. Sheridan, by his marking it, seems to be of a different opinion.

535. From what has been seen of accent and quantity, it is easy to perceive how prone our language is to an antepenultimate accent, and how naturally this accent shortens the vowel it falls upon: nay, so great a propensity have vowels to shrink under this accent, that the diphthong itself in some words and analogy in others, are not sufficient to prevent it, as *valiant*, *retaliate*. Thus, by the subjoining only of *al* to *nation*, with the *a* long, it becomes *national*, with the *a* short, though contrary to its relation with *occasion* and *congregation;* which do not shorten the *a* upon being made *occasional* and *congregational:* in like manner the acquisition of the same termination to the word *nature*, makes it *nat-u-ral;* but this, it may be presumed, is derived from the Latin *naturalis;* and not from adding *al* to the English word as in the foregoing instances; and thus it comes under the shortening power of the antepenultimate accent, notwithstanding the semi-consonant diphthong, *u*.

536. The same shortening power in the antepenultimate accent may be observed in *rational* and *ratiocinate*, where the first *a* in the first word, and the *o* in the second are short. The first *a* in the second word is short also by the power of the secondary accent; though Mr. Sheridan has, in my opinion, very erroneously divided *ratiocination* into *ra-sho-sy-*

na-shun; that is, into a syllable less than it ought to have, and marked the *o* long instead of short.

537. The accent on the Latin antepenultimate seemed to have something of a similar tendency: for though the great difference in the nature of the Latin and English accent will allow us to argue from one to the other, but in very few circumstances (503), yet we may perceive in that accent, so different from ours in general, a great coincidence in this particular; namely, its tendency to shorten an antepenultimate syllable. Bishop Hare tells us, that "Quæ acuuntur in tertia ab extrema, "interdum acuta corripiunt, si positione sola longa sunt, ut *óp-* "*time*, *sérvitus*, *pérvelim*, *Pámphilus*, et pauca alia, quo Creti- "ci mutantur, in Anapestos. Idem factum est in *néutiquam*, "licet incipiat diphthongo." De Metr. Comic, p. 62.—Those words, which have the acute accent on the antepenultimate syllable, have sometimes that syllable shortened, if it was only long by position, as *óptime*, *sérvitus*, *pérvelim*, *Pámphilus*, and a few others, which by this means are changed from Cretic to Anapestic feet: nay, *néutiquam* undergoes the same fate, though it begin with a diphthong.

SYLLABICATION.

538. Dividing words into syllables is a very different operation, according to the different ends proposed by it. The object of syllabication may be, either to enable children to discover the sound of words they are unacquainted with, or to show the etymology of a word, or to exhibit the exact pronunciation of it.

539. When a child has made certain advances in reading, but is ignorant of the sound of many of the longer words, it may not be improper to lay down the common general rule to him, that a consonant between two vowels must go to the latter; and that two consonants coming together must be divided. Farther than this, it would be absurd to go with a child; for telling him that compounds must be divided into their simples, and that such consonants as may begin a word may begin a syllable, requires a previous knowledge of words, which children cannot be supposed to have; and which, if they have, makes the division of words into syllables unnecessary. Children, therefore, may be very usefully taught the general rule above mentioned, as, in many cases, it will lead them to the exact sound of the word, as in *pro-vi-ded;* and in others, it will enable them to give a good guess at it, as in *de-li-cate;* and this is all that can be expected. This procedure may be called synthetic, as it proceeds from parts to the whole; and when we are to form an unknown compound sound, out of several known simple sounds, (which is the case with children, when we wish them to find out the sound of a word by spelling it); this, I say, is the only method that can be taken.

540. But an etymological division of words is a different operation. This syllabication, which has etymology for its object, is an analytic division; that is, the division of a person acquainted with the whole word, and who wishes to convey, by this division, a knowledge of its constituent parts, as *orthography*, *theology*, &c.

541. In the same manner, a person, who is pre-acquainted with the whole compound sound of a word, and wants to convey the sound of each part to one unacquainted with it, must adopt the analytic method, by dividing it into such partial sounds as, when put together again, will exactly form the whole, as *orthog-ra-phy*, *the-ol-o-gy*, &c. This is the method adopted by those who would convey the whole sound, by giving distinctly every part; and, when this is the object of syllabication, Dr. Lowth's rule is certainly to be followed. "The best and easi- "est rule," says the learned bishop, "for dividing the syllables "in spelling, is, to divide them as they are naturally divided "in a right pronunciation, without regard to the derivation of "words, or the possible combination of consonants, at the be- "ginning of a syllable." *Introduction to Eng. Gram.* page 7.

542. In this view of syllabication we consider it only as the picture of actual pronunciation; but may we not consider it as directed likewise by some laws of its own? Laws, which arise out of the very nature of enunciation, and the specific qualities of the letters? These laws certainly direct us to separate double consonants, and such as are uncombinable from the incoalescence of their sounds: and if such a separation will not paint the true sound of the word, we may be certain that such sound is unnatural, and has arisen from caprice. Thus the words *Chamber*, *Cambridge*, and *Cambrick*, must be divided at the letter *m*, and as this letter, by terminating the syllable according to the settled rules of pronunciation, shortens the vowel —the general pronunciation given to these words must be absurd, and contrary to the first principles of the language. *Angel*,* *ancient*, and *manger*, are under the same predicament; but the paucity of words of this kind, so far from weakening the general rule, strengthen it. See CHANGE.

543. By an induction which demonstrates the shortening power of the antepenultimate accent, has been shown the propriety of uniting the consonant to the vowel in the first syllable of *demonstration*, *lamentation*, *propagation*, &c. and thus deciding upon the quantity of these vowels, which are so uncertain in our best dictionaries; and may we not hope, by a similar induction, and with the first principles of language in view, to decide the true, genuine, and analogical sound of some words of another kind which waver between different pronunciations? The antepenultimate accent has unquestionably a shortening power; and I have not the smallest doubt that the penultimate accent has a lengthening power: that is, if our own words, and words borrowed from other languages of two syllables, with but one consonant in the middle, had been left to the general ear, the accent on the first syllable would have infallibly lengthened the first vowel. A strong presumption of this arises from our pronunciation of all Latin dissyllables in this manner, without any regard to the quantity of the original, (see DRAMA,) and the ancient practice of doubling the consonant when preceded by a single vowel in the participial terminations: and I believe it may be confidently affirmed, that words of two syllables from the Latin, with but one consonant in the middle, would always have had the first vowel long, if a pedantic imitation of Latin quantity had not prevented it, (see DRAMA.) Let an Englishman, with only an English education, be put to pronounce *zephyr*, and he will, without hesitation, pronounce the *e* long as in *zenith:* if you tell him the *e* is pronounced short in the Latin *zephyrus*, which makes it short in English, and he should happen to ask you the Latin quantity of the first syllable of *comic*, *mimic*, *solace*, &c. your answer would be a contradiction to your rule.

544. But the small dependance of the English quantity on that of the Latin will be best seen by a selection of words of two syllables, with the accent on the first, and but one consonant in the middle, and comparing them with the Latin words from which they are derived.

English dissyllables which have but one consonant, or a mute and liquid in the middle, and have the first syllable pronounced long, with the Latin words from which they are derived, marked with their respective quantities.

545. In this view of the Latin and English quantity, we see how uncertain it is to argue from the former to the latter; for though the Latin *accent* is frequently a rule for placing the English accent, as in words derived whole from that language, as *abdomen*, *acumen*, &c. (503), or preserving the same number of syllables, as in *impudent*, *elegant*, from *impudens*, *elegans*, &c. (503), yet the *quantity* of the Latin seems to have no influence on that of the English. In words of two syllables, where one consonant comes between two vowels, as *focus*, *basis*, *local*, &c. though the vowel in the first syllable is short in Latin, it is long in English; and inversely, *florid*, *frigid*, *livid*, &c. have the vowels in the first syllable short, though these vowels are long in *floridus*, *frigidus*, *lividus*, &c.; so that if any thing like a rule can be formed, it is, that when a word of three syllables in Latin, with the two first short, is anglicised by dropping the last syllable; we shorten the first syllable of the English dissyllable, unless it ends with the vowel *u*, (535). Thus we see the shortening power of our English antepenultimate accent, which shortens every antepenultimate vowel but *u* in our pronunciation of Latin words, as in *mimicus*, *vividus*, &c. continues its shortening power in the penultimate accent of these words when anglicised into *mimick* and *vivid;* and hence it is that the short quantity of the first vowel in dissyllables is become so prevalent in our language, to the great detriment of its sound, and the disturbance of its simplicity.

It may be necessary in the next place to take a view of such words as are either of Saxon or French original, or not so immediately derived from the Latin, as to be influenced by its quantity.

will direct us to the degree of openness, with which we must pronounce the first unaccented *o* in *docility*, *domestic*, *potential*, *proceed*, *monastic*, *monotony*, &c. we may be assured that it is exactly under the same predicament, with respect to sound, in all these words: and as they can never be pronounced short and shut, as if written *dossility*, *dommestic*, &c. without hurting the dullest ear; so the *e* in *event*, *evangelist*, &c. and the *i* in the third syllable of *utility*, and in the second, fourth, and sixth of *indivisibility*, can never be sounded as if joined to the consonant without offending every delicate ear, and overturning the first principles of pronunciation.

553. The only considerable exception to this general rule of syllabication which determines the sound of the unaccented vowels, is when *e* succeeds the accent, and is followed by *r*, as in *literal*, *general*, *misery*, &c. which can never be pronounced *lit-e-ral*, *gen-e-ral*, *mis-e-ry*, &c. without the appearance of affectation. In this situation we find the *r* corrupt the sound of the *e*, as it does that of every other vowel when in a final unaccented syllable. For this consonant being nothing more than a jar, it unavoidably mixes with the *e* in this situation, and reduces it to the obscure sound of short *u* (418), a sound to which the other unaccented vowels before *r* have sometimes so evident a tendency.

554. An obscure idea of the principles of syllabication just laid down, and the contradiction to them perceived in this exception, has made most of our orthöepists extremely wavering and uncertain in their division of words into syllables, when the unaccented *e* has preceded *r*. Perhaps nothing will better show the justness of this observation than a view of the varieties which our best writers have adopted when these letters have occurred in this situation, where we not only find them differing from each other, but sometimes even from themselves:

thing but the actual pronunciation of the word will direct us whether we ought to unite the preceding vowel to the first consonant, or leave it open; but if the actual pronunciation of the word be already known, there can be no reason for dividing it into syllables, but conveying the sound of it to others; and this is a very different operation from endeavouring to discover the sound of it ourselves, (538) (542).

555. I have been the more copious in my collection of these varieties, that I might not appear to have taken the advantage of any oversight or mistake of the press. Nor is it any wonder when the principles of syllabication so strongly incline us to leave the vowel *e*, like the other vowels, open before a single consonant; and the ear so decidedly tells us, that this letter is not always open when preceded by the accent, and followed by *r*, it is no wonder, I say, that a writer should be perplexed, and that he should sometimes incline to one side, and sometimes to the other. I am conscious I have not always been free from this inconsistency myself. The examples therefore which I have selected, will, I hope, fully justify me in the syllabication I have adopted; which is, that of sometimes separating the *e* from the *r* in this situation, and sometimes not. When solemn and deliberate speaking has seemed to admit of lengthening the *e*, I have sometimes made it end the syllable; when this was not the case, I have sometimes joined it to the *r*. Thus as *e* in the penultimate syllable of *incarcerate*, *reverberate*, &c. seems, in solemn speaking, to admit of a small degree of length and distinctness, it ends a syllable; but as no solemnity of pronunciation seems to admit of the same length and openness of the *e* in *tolerate*, *deliberate*, &c. it is united with *r*, and sounded in the notation by short *u*. It ought, however, to be carefully observed, that though the *e* in this situation is sometimes separated from the *r*, there is no speaking, however deliberate and solemn, that will not admit of uniting it to *r*, and pronouncing it like short *u* without offending the nicest and most critical ear.

556. It must also be noted, that this alteration of the sound of *e* before *r* is only when it follows the accent, either primary or secondary (522) (530); for when it is in the first syllable of a word, though unaccented, it keeps its true sound. Thus, though the *e* is pronounced like *u* in *alter*, *alteration*, &c. yet in *perfection*, *terrific*, &c. this letter is as pure as when the accent is on it in *perfect*, *terrible*, &c.

557. Something like the corruption of the sound of unaccented *e* before *r* we may perceive in the colloquial pronunciation of the vowel *o* in the same situation; and accordingly we find our best orthöepists differ in their notation of this letter: thus *memory*, *memorable*, *immemorable*, *memorably*, *memorize*, have the *o* pronounced like short *u* by Mr. Sheridan and Mr. Scott, and *memorandum* with the *o*, as in *open;* while Dr. Kenrick gives the *o* in all these words the sound it has in the conjunction *or*. Mr. Sheridan marks the unaccented *o* in *corporal*, *corporate*, and *corporation*, like the *o* in *open;* but Mr. Scott pronounces this *o* in *corporal*, *corporate*, and *corporation*, like short *u*, and the same letter in *incorporate* and *incorporation* like Mr. Sheridan; and Dr. Kenrick like the *o* in the former instances. Mr. Sheridan and Mr. Scott are uniform in their pronunciation of the same vowel like short *u* in *armour*, *armorer*, *armory*, *pillory*, *suasory*, *persuasory*, *allegory*, *compulsory*, *cursory*, and *predatory;* while Dr. Kenrick pronounces the *o* in *armour* and *armory* like the *o* in *open*, and the same letter in *pillory*, *allegory*, and *cursory*, like the *o* in *or*, *nor*, &c. This diversity, among good judges, can arise from nothing but the same uncertainty of the sound of this letter that we have just observed of the *e;* but if we narrowly watch our pronunciation, we shall find that the unaccented *o* may be opened and lengthened, in deliberate speaking, without hurting the ear, which is not always the case with *e;* and this has induced me generally to separate the *o* from the succeeding *r* when immediately

following the accent; though I am sensible that the rapidity of colloquial speaking often reduces it to short *u* without offending the ear: but when the *o* is removed more than one syllable from the accent, the most deliberate speaking generally lets it slide into the other vowel; for which reason I have commonly marked it in this manner. See COMMAND.

558. It may, perhaps, appear to some of my readers, that too much time has been spent upon these nice distinctions of sound, in which judges themselves are found to disagree; but when we consider how many syllables in the language are unaccented, and that these syllables are those in which the peculiar delicacy of the pronunciation of natives consists; when we reflect on the necessity of having as distinct and permanent sounds as possible, to which we may refer these fleeting and evanescent ones, we shall not look upon an attempt to arrest and investigate them as a useless part of philology.

SUPPLEMENT OF CORRECTIONS AND ADDITIONS.

APOTHEOSIS. This word, like *Metamorphosis*, has deserted its Latin accentuation on the penultimate syllable, and returned to the original Greek accent on the antepenultimate. See Principles, No. 503. The other words in this termination, as *Anadiplosis*, *Antiptosis*, &c. retain the Latin accent, though all these words in Greek have the accent on the antepenultimate. This accentuation is so agreeable to the genius of our own tongue, that it is no wonder it is so prevalent. Johnson, Sheridan, Kenrick, Ash, Scott, Buchanan, Bailey, and Perry, have adopted it as I have done; and only Smith, Entick, and Barclay, accent the penultimate.

> " Allots the prince of his celestial line,
> " An *apotheosis*, and rites divine."———*Garth.*

AXILLARY. This word is accented improperly on the second syllable instead of the first: for the reasons, see MAXILLARY and MAMMILLARY.

BUCOLIC. Upon a more mature consideration of the analogies of the language, I think this word ought to have the accent on the second rather than the first syllable; for though few rules are more uniform than that which removes the accent a syllable higher, when a final syllable is dropped in the original, (see ACADEMY, and No. 503,) yet the termination in *ic* generally attracts the accent to the preceding syllable: and though there are several exceptions, as may be seen No. 510, yet they are such deviations as ought not to be indulged.

CAPABLE. After this word, see INCAPABLE.

CAPILLARY. This word ought to have been accented on the first syllable: for the reasons, see MAXILLARY and MAMMILLARY.

CHILIAEDRON ought to have the accented *e* long, as in PENTAEDROUS; not on account of the quantity in the Greek word, but because where no rule forbids, we ought to make the vowel accented on the penultimate long (542), when followed by a single consonant, or a mute and liquid.

CONCAVATION. As the secondary accent is on the first syllable of this word, and the *n* comes before hard *c*, it has the ringing sound as much as if the principal accent were upon it, and ought therefore to have been so marked in the notation. See Principles, 408, 409, 432.

DECOROUS. The last word of the observation under this word ought to have been short instead of long.

DENIGRATE. In the accentuation of this word I have followed the general voice of all our orthöepists, except Johnson; but did not recollect that the *i* in the Latin *denigro* might be pronounced either long or short: for when this is the case, we generally adopt the short sound in words derived from that language. See Principles, No. 503, and Principles, No. 545.

DESULTORY. After this word, see SUBSULTORY.

DIASTYLE. The reason why this word is pronounced in three syllables, and *Diastole* in four, is that the latter is perfect Greek διαστολὴ, and the former is a compound of our own, formed from δια and στυλος, a pillar. The same reason holds good for pronouncing *Apocope*, as divided into *A-poc-o-pe*, and *Osteoscope* into *Os-te-o-scope*.

DISSOLUBLE. After this word, see RESOLUBLE.

DOCIBLE. The first syllable of this word ought to have the *o* short, as in *Dross*. See INDOCIL.

EITHER and NEITHER. For the different pronunciations of these words, and the authorities for each, see Principles, No. 252.

GUERDON. Since I wrote the observations on this word, I have found that Ben Jonson classes the *gu* with the same letters in *anguish:* but as these letters are unaccented in the last word, the analogy is different; and the sound I have given remains still the most agreeable to rule.

IDYL. As there is sometimes an erroneous pronunciation of this word by making the *i* short, as in *idiot*, I have thought it necessary here to add the authorities for pronouncing it long, as in *idle:* namely Mr. Sheridan, Mr. Scott, Mr. Perry, Buchanan, and Entick. Dr. Ash, Barclay, and Fenning, do not distinguish it from the *i* in *idiot;* and Dr. Kenrick, as usual with him when any thing difficult occurs, does not divide it into syllables. But the authorities I have produced are sufficient to vindicate the long sound of *i*, without recurring to the diphthong in εἰδυλλίον; as the Greek and Latin quantity are very uncertain and fallacious guides in the quantity of English words. See Principles, No. 544, 545, &c.

INTERSTICE. To the list of words, which show the impropriety of pronouncing this word with the accent on the second syllable, might have been added the word *superfice*.

INSITION. This word, like *Transition*, and for the same reason, would certainly have gone into *insizhon*, had it not been for the interference of this pronunciation with *incision;* a word of very different signification.

MAMMILLARY. There is an error of the press in spelling this word with single *m*.

MEMOIR. This word appears to me to be sufficiently anglicised to admit of one pronunciation; which is, that which rhymes with *devoir*. Mr. Sheridan has given the two ways of pronouncing it; and by placing this first, seems to prefer it.

OPTATIVE. Upon a more mature recollection of the analogies of the language, I am still more convinced of the justness of the decision on the accentuation of this word. A critic, with whom I lately conversed upon it, contended, that the accent ought to be upon the *a*, because it was on that letter in

the preterperfect tense of the verb *opto*, *optavi*. I desired him to put his argument into form, and tell me whether all words of this termination were to have the same accent as in the preterperfect tense of the verb—here he could go no farther: I could have immediately confronted him with *tentative*, from *tento*, *tentavi;* with *negative*, from *nego*, *negavi;* with *vocative*, from *voco*, *vocavi;* and twenty other examples, which would have shown the weakness of his reason: and yet this gentleman is a real scholar, and a man of good sense and great acuteness. See Principles, No. 503, on the influence of the Greek and Latin accent on that of the English; No. 544, on the influence of the Greek and Latin quantity on that of the English; and No. 512, on the terminations *ative* and *atory*.

Oxytone. As I have frequently met with this word in writers on prosody, I have made use of it in the Principles, No. 499; but not having met with it in any Dictionary, I forgot to insert it, though *Barytone* has not escaped me. It will be necessary therefore to tell the inspector, that *Oxytone* comes from the Greek word ὀξύτονος, and signifies having an acute accent on the last syllable. For what the acute accent means, see Barytone.

Satire. See Principles, No. 507, 508, 509. To which we may add, that though poets often bend the rhyme to their verse, when they cannot bring their verse to the rhyme; yet, where custom is equivocal, they certainly are of some weight. In this view we may look upon Pope's couplet in his Essay on Criticism;

> "Leave dang'rous truths to unsuccessful *satires;*
> "And flattery to fulsome dedicators."

Sciomachy. Dr. Johnson's folio accents this word properly on the second syllable, (see Principles, No. 518,) but the quarto on the first.

A DICTIONARY

OF

THE ENGLISH LANGUAGE.

A, THE first letter of the European alphabets, has, in the English language, three different sounds; which may be termed the broad, open, and slender.

The broad sound, resembling that of the German *a*, is found in many of our monosyllables, as *all*, *wall*, *malt*, *salt;* in which *a* is pronounced as *au* in *cause*, or *aw* in *law*. Many of these words were anciently written with *au*, as *sault*, *waulk;* which happens to be still retained in *fault*. This was probably the ancient sound of the Saxons, since it is almost uniformly preserved in the rustick pronunciation, and the northern dialects, as *maun* for *man*, *haund* for *hand*.

A open, not unlike the *a* of the Italians, is found in *father*, *rather*, and more obscurely in *fancy*, *fast*, &c.

A, slender or close, is the peculiar *a* of the English language, resembling the sound of the French *e* masculine, or diphthong *ai* in *plaïs;* or perhaps a middle sound between them, or between the *a* and *e:* to this the Arabick *a* is said nearly to approach. Of this sound we have examples in the words, *place*, *face*, *waste;* and all those that terminate in *ation*, as, *relation*, *nation*, *generation*.

A is short, as *glass*, *grass;* or long, as *glaze*, *graze:* it is marked long, generally, by an *e* final, *plane*, or by an *i* added, as *plain*. The short *a* is open, the long *a* close.

1. A, an article set before nouns of the singular number; *a* man, *a* tree; denoting the number *one*, as, *a* man is coming; that is, *no more than one;* or an indefinite indication, as, *a man* may come this way; that is, *any* man. This article has no plural signification. Before a word beginning with a vowel, it is written *an*, as, *an* ox, *an* egg, of which *a* is the contraction.

2. A, taken materially, or for itself, is a noun; as, a great *A*, a little *a*.

3. A is placed before a participle, or participial noun; and is considered by Wallis as a contraction of *at*, when it is put before a word denoting some action not yet finished; as, I am *a* walking. It also seems to be anciently contracted from *at*, when placed before local surnames; as, Thomas *a* Becket. In other cases, it seems to signify *to*, like the French *à*.

A hunting Chloë went. *Prior.*

They go *a* begging to a bankrupt's door. *Dryden.*

May peace still slumber by these purling fountains!
Which we may every year
Find when we come *a* fishing here. *Wotton.*

Now the men fell *a* rubbing of armour, which a great while had lain oiled. *Wotton.*

He will knap the spears *a* pieces with his teeth. *Mores Antid. Athm.*

Another falls *a* ringing a Pescennius Niger, and judiciously distinguishes the sound of it to be modern. *Addison on Medals.*

4. A has a peculiar signification, denoting the proportion of one thing to another. Thus we say, The landlord hath a hundred *a* year; the ship's crew gained a thousand pounds *a* man.

The river Inn passes through a wide open country, during all its course through Bavaria; which is a voyage of two days, after the rate of twenty leagues *a* day. *Addison on Italy.*

5. A is used in burlesque poetry, to lengthen out a syllable, without adding to the sense.

For cloves and nutmegs to the line-*a*,
And even for oranges to China. *Dryden.*

6. A is sometimes, in familiar writings, put by a barbarous corruption for *he;* as, will *a* come, for will *he* come.

7. A, in composition, seems to have sometimes the power of the French *a* in these phrases, *a droit*, *a gauche*, &c. and sometimes to be contracted from *at*, as, *aside*, *aslope*, *afoot*, *asleep*, *athirst*, *aware*.

I gin to be *a weary* of the sun;
And wish the state of th' world were now undone. *Shakspeare's Macbeth.*

And now a breeze from shore began to blow,
The sailors ship their oars, and cease to row;
Then hoist their yards *a-trip*, and all their sails
Let fall, to court the wind, and catch the gales. *Dryden's Ceyx and Alcyone.*

A little house with trees *a* row,
And, like its master, very low. *Pope's Horace.*

8. A is sometimes redundant; as, *arise*, *arouse*, *awake;* the same with rise, rouse, wake.

9. A, in abbreviations, stands for *artium*, or arts; as, A. B. bachelor of arts, *artium baccalaureus;* A. M. master of arts, *artium magister;* or, *anno;* as, A. D. *anno domini*.

AB, åb. at the beginning of the names of places, generally shows that they have some relation to an abbey, as *Abingdon*. *Gibson.*

ABA'CKE, å-bâk'. *adv.* [from *back*.] Backwards. Obsolete.

But when they came where thou thy skill didst show,
They drew *abacke*, as half with shame confound. *Spenser's Pastorals.*

ABA'CTOR, åb-åk'tŏr. *n. s.* [Latin.] One who drives away or steals cattle in herds, or great numbers at once, in distinction from those that steal only a sheep or two. *Blount.*

A'BACUS, åb'å-kŭs. *n. s.* [Latin.]

1. A counting-table, anciently used in calculations.

2. [In architecture.] The uppermost member of a column, which serves as a sort of crowning both to the capital and column. *Dict.*

ABA'FT, å-bâft'.[845] *adv.* [of abaꝑtan, Sax. behind.] From the fore-part of the ship, towards the stern. *Dict.*

ABAI'SANCE, å-bā'sânse. *n. s.* [from the French *abaiser*, to depress, to bring down.] An act of reverence, a bow.

Obeysance is considered by *Skinner* as a corruption of *abaisance*, but is now universally used.

To ABA'LIENATE, âb-âle'yén-âte. *v. a.* [from *abalieno*, Lat.] To make that another's, which was our own before. A term of the civil law, not much used in common speech.

ABALIENA'TION, âb-âle'yén-â-shûn. *n. s.* [Lat. *abalienatio.*] The act of giving up one's right to another person; or a making over an estate, goods, or chattels by sale, or due course of law. *Dict.*

To ABA'ND, â-bând'. *v. a.* [A word contracted from *abandon*, but not now in use. See ABANDON.] To forsake.

They stronger are
Than they which sought at first their helping hand,
And Vortiger enforced the kingdom to *aband.*
Spenser's Fairy Queen, b. ii. *cant.* 10.

To ABA'NDON, â-bân'dûn. *v. a.* [Fr. *abandonner.* Derived, according to *Menage*, from the Italian *abandonare*, which signifies to forsake his colours; *bandum* [*vexillum*] *deserere. Pasquier* thinks it a coalition of *a ban donner*, to give up to a proscription; in which sense we, at this day, mention the ban of the empire. Ban, in our own old dialect, signifies a curse; and to *abandon*, if considered as compounded between French and Saxon, is exactly equivalent to *diris devovere.*]

1. To give up, resign, or quit; often followed by the particle *to.*

If she be so *abandon'd to* her sorrow,
As it is spoke, she never will admit me.
Shakspeare's Twelfth Night.

The passive gods behold the Greeks defile
Their temples, and *abandon to* the spoil
Their own abodes; we, feeble few, conspire
To save a sinking town, involv'd in fire.
Dryden's Æneid.

Who is he so *abandoned to* sottish credulity, as to think, that a clod of earth in a sack, may ever, by eternal shaking, receive the fabric of man's body?
Bentley's Sermons.

Must he, whose altars on the Phrygian shore,
With frequent rites, and pure, avow'd thy pow'r,
Be doom'd the worst of human ills to prove,
Unbless'd, *abandon'd to* the wrath of Jove?
Pope's Odyssey.

2. To desert; to forsake: in an ill sense.

The princes using the passions of fearing evil, and desiring to escape, only to serve the rule of virtue, not to *abandon* one's self, leapt to a rib of the ship. *Sidney.*

Seeing the hurt stag alone,
Left and *abandon'd* of his velvet friends;
'Tis right, quoth he; thus misery doth part
The flux of company. *Shaksp. As you like it.*

What fate a wretched fugitive attends,
Scorn'd by my foes, *abandon'd* by my friends.
Dryden.

But to the parting goddess thus she pray'd:
Propitious still be present to my aid,
Nor quite *abandon* your once favour'd maid.
Dryden's Fables.

3. To forsake; to leave.

He boldly spake, Sir knight, if knight thou be,
Abandon this forestalled place at erst,
For fear of further harm, I counsel thee.

To ABA'NDON O'VER, â-bân'dûn ô'-vûr *v. a.* [a form of writing not usual, perhaps not exact.] To give up to, to resign.

Look on me as a man *abandon'd o'er*
To an eternal lethargy of love;
To pull, and pinch, and wound me, cannot cure,
And but disturb the quiet of my death. *Dryden.*

ABA'NDONED, â-bân'dûnd,[362] *particip. adj.* Corrupted in the highest degree: as, *an* abandoned *wretch.* In this sense, it is a contraction of a longer form, abandoned [given up] to wickedness.

ABA'NDONING, â-bân'dûn-ing. [a verbal noun, from *abandon.*] Desertion, forsaking.

He hoped his past meritorious actions might outweigh his present *abandoning* the thought of future action. *Clarendon.*

For God, not man, *absolves* our frailties here.
Pope's Eloisa to Abelard.

4. To finish, to complete. This use is not common.

What cause
Mov'd the Creator, in his holy rest
Through all eternity, so late to build
In chaos; and the work begun, how soon
Absolv'd. *Milton's Paradise Lost, b.* vii. *l.* 94.

If that, which is so supposed infinitely distant, from what is now current, is distant from us by a finite interval, and not infinitely; then that one circulation, which preceded it, must necessarily be like ours; and consequently *absolved* in the space of twenty-four hours. *Hale's Origin of Mankind.*

A'BSOLUTE, âb'-sò-lûte.[448] *adj.* [*absolutus*, Lat.]

1. Complete; applied, as well to persons, as to things.

I see still the distinctions of sovereign and inferior, of *absolute* and relative worship, will bear any man out in the worship of any creature with respect to God; as well at least, as it doth in the worship of images. *Stillingfl. Def. of Disc. on Rom. Idol.*

An *absolute* mode is that, which belongs to its subject, without respect to any other beings whatsoever; but a relative mode is derived from the regard that one being has to others. *Watts's Logic.*

Dryd. Ind. Emp.

5. Positive; certain; without any hesitation. In this sense it rarely occurs.

Long is it, since I saw him:
But time hath nothing blurr'd those lines of favour,
Which then he wore; the snatches in his voice,
And burst of speaking, were as his: I'm *absolute*,
'Twas very Cloten. *Shakspeare's Cymbeline.*

A'BSOLUTELY, âb'-sò-lûte-lè. *adv.* [from *absolute.*]

No sensible quality (as light, and colour, and heat, and sound) can be subsistent in the bodies themselves, *absolutely* considered, without a relation to our eyes and ears and other organs of sense. These qualities are only the effects of our sensation; which arise from the different motions, upon our nerves, from objects without, according to their various modifications and positions. *Bentley's Sermons.*

3. Without limits or dependence.

The prince long time had courted fortune's love;
But, once possess'd, did *absolutely* reign:

ABSOLU'TION, âb-sò-lû'-shûn. *n. s.* [*absolutio*, Lat.]

1. Acquittal.

Absolution, in the civil law, imports a full *acquittal* of a person by some final sentence of law; also, a temporary discharge of his farther attendance upon a mesne process, through a failure or defect in pleading: as it does likewise in the canon law; where, and among divines, it likewise signifies a relaxation of him from the obligation of some sentence, pronounced either in a court of law, or else *in foro pœnitentiali*. Thus there is, in this kind of law, one kind of *absolution*, termed judicial; and another, styled a declaratory or extra-judicial *absolution*. *Ayliffe's Parergon Juris Canonici.*

2. The remission of sins, or penance, declared by ecclesiastical authority.

The *absolution* pronounced by a priest, whether papist or protestant, is not a certain infallible ground to give the person, so absolved, confidence towards God. *South's Sermons.*

ABSO'RPT, âb-sò'rpt. *part.* [from *absorb.*] Swallowed up; used as well in a figurative sense, of persons, as, in the primitive, of things.

What can you expect from a man, who has not talked these five days? who is withdrawing his thoughts, as far as he can, from all the present world, its customs and its manners, to be fully possessed and *absorpt* in the past. *Pope's Letters.*

ABSO'RPTION, âb-sòrp'-shûn. *n. s.* [from *absorb.*] The act of swallowing up.

Clytorean streams the love of wine expel;
Such is the virtue of th' *abstemious* well;
Whether the colder nymph that rules the flood,
Extinguishes, and balks the drunken god;
Or that Melampus (so have some assur'd)
When the mad Prætides with charms he cur'd,
And pow'rful herbs, both charms and simples cast
Into the sober spring, where still their virtues last.

Nor will we affirm, that iron receiveth, in the stomach of the ostrich, no alteration; but we suspect this effect, rather from corrosion than digestion; not any tendence to chilification by the natural heat, but rather some attrition from an acid and vitriolous humidity in the stomach, which may *absterse* and shave the scorious parts thereof.
Brown's Vulgar Errours, b. iii.

ABSTE'RSION, åb-stêr'-shûn. *n. s.* [*abstersio*, Lat.] The act of cleansing. See ABSTERGE.

1. Forbearance of any thing; with the particle *from*.

Because the *abstinence from* a present pleasure, that offers itself, is a pain; nay, oftentimes a very great one: it is no wonder that that operates after the same manner pain does; and lessens, in our thoughts, what is future; and so forces, us as it were, blindfold into its embraces. *Locke.*

2. Fasting, or forbearance of necessary food. It is generally distinguished from temperance, as the greater degree from the less: sometimes as single performances, from habits; as, a day of *abstinence*, and a life of temperance.

And *abstinence* engenders maladies.

Abstract terms signify the mode or quality of a being, without any regard to the subject in which it is; as, whiteness, roundness, length, breadth, wisdom, mortality, life, death. *Watts's Logick.*

2. With the particle *from*.

Another fruit from the considering things in themselves, *abstract from* our opinions, and other men's notions and discourses on them, will be, that each man will pursue his thoughts in that method, which will be most agreeable to the nature of the thing, and to his apprehension of what it suggests to him. *Locke.*

A'BSTRACT, åb'-strâkt.[492] *n. s.* [from the verb.]

Or on the writers, or the written book;
Whence, but from heav'n, could men unskill'd in arts,
In several ages born, in several parts,
Weave such agreeing truths? or how, or why
Should all conspire, to cheat us with a lie?
Unask'd their pains, ungrateful their advice,
Starving their gain, and martyrdom their price!
Dryden's Religio Laici.

ABSTRA'CTION, åb-strâk'-shûn. *n. s.* [*abstractio*, Lat.]

1. The act of abstracting.

It is not oftentimes so much, what the scripture says, as what some men persuade others it says, that makes it seem obscure; and that, as to some other passages that are so indeed (since it is the *abstruseness* of what is taught in them, that makes them almost inevitably so) it is little less saucy, upon such a score, to find fault with the style of the scripture, than to do so with the author for making us but men. *Boyle on the Scripture.*

But grant, that those can conquer, these can cheat;

Before the fact; as, when one commandeth or adviseth another to commit a felony, and is not present at the execution thereof; for his presence makes him also a principal: wherefore there cannot be an *accessory* before the fact, in manslaughter; because manslaughter is sudden and not prepensed. *Accessory* after the fact is, when one receiveth him, whom he knoweth to have committed felony. *Accessory* by statute is he, that abets, counsels, or hides any man committing, or having committed an offence, made felony by statute. *Cowell.*

8. In provision for; in expectation of.

This mode of speaking probably had its original from the idea of making provision *against*, or in opposition to, a time of misfortune; but by degrees acquired a neutral sense. It sometimes has the case elliptically suppressed; as, *against* he comes; that is, *against the time*, when he comes.

A'IRPUMP, åre'pûmp. *n. s.* [from *air* and *pump*.] A machine, by whose means the air is exhausted out of proper vessels. The principle, on which it is built, is the elasticity of the air; as that, on which the water-pump is founded, is on the gravity of the air. The invention of this curious instrument is ascribed to Otto de Guerick, consul of Magdebourg, in 1654: but his machine laboured under several defects; the force, necessary to work it; was very great; and the progress, very slow; it was to be kept under water, and allowed of no change of subjects for experiments. Mr. Boyle, with the assistance of Dr. Hooke, removed several inconveniencies; though still the working was laborious, by reason of the pressure of the atmosphere at every exsuction: this labour has been since removed, by Mr. Hawksbee; who (by adding a second barrel and piston, to rise as the other fell, and fall as it rose) made the pressure of the atmosphere on the descending one, of as much service, as it was of disservice in the ascending one. Vream made a further improvement, by reducing the alternate motion of the hand and winch to a circular one. *Chambers.*

The air, that, in exhausted receivers of *air-pumps*, is exhaled from minerals, and flesh, and fruits, and liquors, is as true and genuine, as to elasticity and density, or rarefaction, as that we respire in: and yet this factitious air is so far from being fit to be breathed in; that it kills animals in a moment, even sooner than the absence of air, or a vacuum itself. *Bentley.*

When the œsophagus muscle acts, it compresses the *almonds*, and they frequently are the occasion of a sore throat. *Quincy.*

By the wood *almugim*, or *algumim*, or simply *gummim*, taking *al* for a kind of article, may be understood oily and gummy sorts of wood; and particularly the trees which produce gum ammoniac, or gum arabick; and is (perhaps) the same with the Shittim wood mentioned by Moses. *Calmet.*

2. In poetry, it is sometimes an imaginary flower, supposed from its name never to fade.

Immortal *amaranth!* a flower which once
In paradise, fast by the tree of life,
Began to bloom; but soon, for man's offence,
To heav'n remov'd, where first it grew, there grows,
And flow'rs aloft, shading the fount of life;
And where the river of bliss, thro' midst of heav'n,
Rowls o'er Elysian flow'rs her amber stream:
With these, that never fade, the spirits elect
Bind their resplendent locks, inwreath'd with beams.
Milton's Paradise Lost.

AMARA'NTHINE, â-mâ-rân'*thîn*.[150] *adj.* [*amaranthinus*, Lat.] Relating to amaranths; consisting of amaranths.

By the streams that ever flow,
By the fragrant winds that blow
O'er the Elysian flow'rs;
By those happy souls that dwell
In yellow meads of asphodel,
Or *amaranthine* bow'rs. *Pope.*

AMA'RITUDE, â-mâr'rè-tûde.[81] *n. s.* [*amaritudo*, Lat.] Bitterness.

The rich man is not blamed, as having made use of any unlawful means to *amass* riches, as having thriven by fraud and injustice. *Atterbury's Serm.*

When we would think of infinite space, or duration, we, at first step, usually make some very large idea, as, perhaps, of millions of ages, or miles, which possibly we double and multiply several times. All that we thus *amass* together in our thoughts, is positive, and the assemblage of a great number of positive ideas of space or duration. *Locke.*

2. In a figurative sense, to add one thing to another, generally with some share of reproach, either of eagerness or indiscrimination.

Such as *amass* all relations, must err in some, and be unbelieved in many. *Brown's Vulg. Err.*

Do not content yourselves with mere words, lest your improvements only *amass* a heap of unintelligible phrases. *Watts's Impr. of the Mind.*

The life of Homer has been written, by *amassing* of all the traditions and hints the writers could meet with, in order to tell a story of him to the world. *Pope.*

This pillar is but a medley or *amass* of all the precedent ornaments, making a new kind by stealth. *Wotton.*

Courted of many a jolly paramour,
The which did them in modest wise *amate*,

AMAURO'SIS, âm-âu-rò'sis.[620] *n. s.* [ἀμαυρόω.] A dimness of sight, not from any visible defect in the eye, but from some distemperature of the inner parts, occasioning the representations of flies and dust floating before the eyes: which appearances are the parts of the retina hid and compressed by the blood-vessels being too much distended; so that, in many of its parts, all sense is lost, and therefore no images can be painted upon them; whereby the eyes, continually rolling round, many parts of objects falling successively upon them, are obscure. The cure of this depends upon a removal of the stagnations in the extremities of those arteries which run over the bottom of the eye. *Quincy.*

To AMAZE, â-mâze'. *v. a.* [from *a* and *maze*, perplexity.]

1. To confuse with terrour.

But look! *amazement* on thy mother sits;
O step between her and her fighting soul:
Conceit in weakest bodies strongest works. *Shaksp*

Distracted and surpriz'd with deep dismay
At these sad tidings. *Milton.*

Run, with *amazement* we should read your story;

Then I degraded you from being king. *Shaksp.*

AMBA'SSADOUR, âm-bâs'sâ-dûr.[418] *n. s.* [*ambassadeur*, Fr. *embaxador*, Span. It is written differently, as it is supposed to come from the French or Spanish language; and the original derivation being uncertain, it is not easy to settle its orthography. Some derive it from the Hebrew נשׂר *to tell*, and מבשׂר a *messenger;* others from *ambactus*, which, in the old Gaulish, signified a *servant;* whence *ambascia*, in low Latin, is found to signify *service*, and *ambasciator*, a *servant;* others deduce it from *ambacht*, in old Teutonick, signifying a *government;* and *Junius* mentions a possibility of its descent from *ανα&ζαίνω*; and others from *am* for *ad*, and *bassus*, *low*, as supposing the act of sending an ambassadour, to be in some sort an act of submission. All these derivations lead to write *ambassadour*, not *embassadour.*] A person sent in a publick manner from one sovereign power to another, and supposed to represent the power from which he is sent. The person of an ambassadour is inviolable.

Ambassadour is, in popular language, the general name of a messenger from a sovereign power, and sometimes, ludicrously, from common persons. In the juridical and formal language, it signifies particularly a minister of the highest rank residing in another country, and is distinguished from an *envoy*, who is of less dignity.

Give first admittance to th' *ambassadours*. *Shaksp.*
Rais'd by these hopes, I sent no news before,
Nor ask'd your leave, nor did your faith implore;
But come without a pledge my own *ambassadour*.
Dryden.

Maximilian entertained them with dilatory answers; so as the formal part of their *ambassage* might well warrant their further stay. *Bacon.*

A'MBER, âm'bûr.[98] *n. s.* [from *ambar*, Arab. whence the lower writers formed *ambarum.*]

A yellow transparent substance of a gummous or bituminous consistence, but a resinous taste, and a smell like oil of turpentine; chiefly found in the Baltick sea, along the coasts of Prussia. Some naturalists refer it to the vegetable, others to the mineral, and some even to the animal kingdom. Pliny describes it as a resinous juice, oozing from aged pines and firs, and discharged thence into the sea. He adds, that it was hence the ancients gave it the denomination of *succinum*, from *succus*, juice. Some have imagined it a concretion of the tears of birds; others, the urine of a beast; others, the scum of the lake Cephisis, near the Atlantick; others, a congelation formed in the Baltick, and in some fountains, where it is found swimming like pitch. Others suppose it a bitumen trickling into the sea from subterraneous sources; but this opinion also is discarded, as good *amber* having been found in digging at a considerable distance from the sea, as that gathered on the coast. Boerhaave ranks it with camphire, which is a concrete oil of aromatick plants, elaborated by heat into a crystalline form. Within some pieces of *amber* have been found leaves and insects included; which seems to indicate, either that the *amber* was originally in a fluid state, or that, having been exposed to the sun, it was softened, and rendered susceptible of the leaves and insects. *Amber*, when rubbed, draws or attracts bodies to it; and, by friction, is brought to yield light pretty copiously in the dark. Some distinguish *amber* into yellow, white, brown, and black: but the two latter are supposed to be of a different nature and denomination; the one called *jet*, the other *ambergris.* *Trevoux. Chambers.*

Liquid amber is a kind of native balsam or resin, like turpentine; clear, reddish, or yellowish; of a pleasant smell, almost like ambergris. It flows from an incision made in the bark of a fine large tree in New Spain, called by the natives *ococol.* *Chambers.*

If light penetrateth any clear body, that is coloured, as painted glass, *amber*, water, and the like, it gives the light the colour of its medium. *Peacham.*

No interwoven reeds a garland made,
To hide his brows within the vulgar shade;

And tears of *amber* trickled down his head. *Addison.*

All your clear *amber-drink* is flat. *Bacon.*

AM'BERGRIS, âm'bûr-grêse.[112] *n. s.* [from *amber* and *gris*, or *grey;* that is, *grey amber.*]

A fragrant drug, that melts almost like wax, commonly of a greyish or ash colour, used both as a perfume and a cordial. Some imagine it to be the excrement of a bird, which being melted by the heat of the sun, and washed off the shore by the waves, is swallowed by whales, who return it back in the condition we find it. Others conclude it to be the excrement of a cetaceous fish, because sometimes found in the intestines of such animals. But we have no instance of any excrement capable of melting like wax; and if it were the excrement of a whale, it should rather be found where these animals abound, as about Greenland. Others take it for a kind of wax or gum, which distils from trees, and drops into the sea, where it congeals. Many of the orientals imagine it springs out of the sea, as naphtha does out of some fountains. Others assert it to be a vegetable production, issuing out of the root of a tree, whose roots always shoot towards the sea, and discharge themselves into it. Others maintain, that *ambergris* is made from the honey-combs, which fall into the sea from the rocks, where the bees had formed their nests; several persons having seen pieces that were half *ambergris*, and half plain honey-comb; and others have found large pieces of *ambergris*, in which, when broke, honey-comb, and honey too, were found in the middle. Neumann absolutely denies it to be an animal substance, as not yielding in the analysis, any one animal principle. He concludes it to be a bitumen issuing out of the earth into the sea; at first of a viscous consistence, but hardening, by its mixture with some liquid naphtha, into the form in which we find it. *Trevoux. Chambers.*

Bermudas wall'd with rocks, who does not know
That happy island, where huge lemons grow,
Where shining pearl, coral, and many a pound,
On the rich shore, of *ambergris* is found? *Waller.*

And with full pow'r assert her *ambient* main. *Prior.*

A'MBIGU, âm'bė-gū. *n. s.* [French.] An entertainment, consisting not of regular courses, but of a medley of dishes set on together.

When straiten'd in your time, and servants few,
You'd richly then compose an *ambigu;*
Where first and second course, and your desert,
All in one single table have their part.
King's Art of Cookery.

AMBIGU'ITY, âm-bė-gū'ė-tė. *n. s.* [from *ambiguous.*] Doubtfulness of meaning; uncertainty of signification; double meaning.

With *ambiguities*, they often entangle themselves, not marking what doth agree to the word of God in itself, and what in regard of outward accidents. *Hooker.*

We can clear these *ambiguities*,
And know their spring, their head, their true descent. *Shaksp.*

The words are of single signification, without any *ambiguity;* and therefore I shall not trouble you, by straining for an interpretation, where there is no difficulty; or distinction, where there is no difference. *South.*

2. To move easily, without hard shocks, or shaking.

Whom *ambles* time withal?—A rich man that hath not the gout; for he lives merrily, because he feels no pain; knowing no burthen of heavy tedious penury: him time *ambles* withal. *Shaksp.*

3. In a ludicrous sense, to move with submission, and by direction; as a horse that *ambles* uses a gait not natural.

A laughing, toying, wheedling, whimpering she,
Shall make him *amble* on a gossip's message,
And take the distaff with a hand as patient,
As e'er did Hercules. *Rowe's Jane Shore.*

4. To walk daintily and affectedly.

I am rudely stampt, and want love's majesty,
To strut before a wanton *ambling* nymph. *Shaksp.*

A'MBLE, âm'bl.[405] *n. s.* [from *To amble.*] A pace or movement in which the horse removes both his legs on one side; as, on the far side, he removes his fore and hinder leg of the same side at one time, whilst the legs on the near side stand still; and, when the far legs are upon the ground, the near side removes the fore leg and a hinder leg, and the legs on the far side stand still. An *amble* is the first pace of young colts, but when they have strength to trot, they quit it. There is no *amble* in the manage; riding-masters allow only of walk, trot, and gallop. A horse may be put from a trot to a gallop without stopping; but he cannot be put from an *amble* to a gallop without a stop, which interrupts the justness of the manage. *Farrier's Dict.*

A'MBLER, âm'blŭr.[98] *n. s.* [from *To amble.*] A horse that has been taught to amble; a pacer.

The species are, 1. The marine or sea *ambrosia*. 2. Taller unsavoury sea *ambrosia*. 3. The tallest Canada *ambrosia*. *Miller.*

I had rather be in this choice, than throw *ambs ace* for my life. *Shaksp.*

This will be yet clearer, by considering his own instance of casting *ambs ace*, though it partake more of contingency than of freedom. Supposing the posture of the party's hand who did throw the dice, supposing the figure of the table, and of the dice themselves, supposing the measure of force applied, and supposing all other things which did concur to the production of that cast, to be the very same they were, there is no doubt but in this case the cast is necessary. *Bramhall against Hobbes.*

AMBULA'TION, ăm-bū-lā'shŭn. *n. s.* [*ambulatio*, Lat.] The act of walking.

From the occult and invisible motion of the muscles, in station, proceed more offensive lassitudes than from *ambulation*. *Brown's Vulgar Errours.*

1. That which has the power or faculty of walking.

The gradient, or *ambulatory*, are such as require some basis, or bottom, to uphold them in their motions: such were those self-moving statues, which, unless violently detained, would of themselves run away. *Wilkins's Math. Magick.*

2. That which happens during a passage or walk.

AM'EN, ā'mĕn'.[491] *adv.* [a word, of which the original has given rise to many conjectures. *Scaliger* writes, that it is Arabick; and the Rabbies made it the compound of the initials of three words, signifying *the Lord is a faithful king;* but the word seems merely Hebrew, נאמן, which, with a long train of derivatives signifies firmness, certainty, fidelity.] A term used in devotions, by which, at the end of a prayer, we mean, *so be it;* at the end of a creed, *so it is.*

To AME'ND, ā-mĕnd'. *v. a.* [*amender*, Fr. *emendo*, Lat.]

1. To correct; to change any that is wrong to something better.

3. To restore passages in writers, which the copiers are supposed to have depraved; to recover the true reading.

To AME'ND, ā-mĕnd'. *v. n.* To grow better. To *amend* differs from to *improve;* to *improve* supposes or not denies that the thing is well already, but to *amend*, implies something wrong.

At his touch
Such sanctity hath heaven given his hand,
They presently *amend*. *Shaksp. Macbeth.*

There are many natural defects in the understanding capable of *amendment*, which are overlooked and wholly neglected. *Locke.*

2. Reformation of life.

Our Lord and Saviour was of opinion, that they which would not be drawn to *amendment* of life, by the testimony which Moses and the prophets have given, concerning the miseries that follow sinners after death, were not likely to be persuaded by

other means, although God from the dead should have raised them up preachers. *Hooker.*

Behold! famine and plague, tribulation and anguish, are sent as scourges for *amendment*. *2 Esdras*, xvi. 19.

There I, a pris'ner chain'd, scarce freely draw
The air imprison'd also, close and damp,
Unwholesome draught; but here I feel *amends*,
The breath of heav'n fresh blowing, pure and sweet,
With day-spring born; here leave me to respire. *Milton.*

Some little hopes I have yet remaining, that I may make the world some part of *amends* for many ill plays, by an heroick poem. *Dryden.*

If our souls be immortal, this makes abundant *amends* and compensation for the frailties of life, and sufferings of this state. *Tillotson.*

It is a strong argument for retribution hereafter, that virtuous persons are very often unfortunate, and vicious persons prosperous; which is repugnant to the nature of a Being, who appears infinitely wise and good in all his works; unless we may suppose that such a promiscuous distribution, which was necessary for carrying on the designs of providence in this life, will be rectified and made *amends* for in another. *Spectator.*

AME'NITY, â-mên'nê-tê.[511] *n. s.* [*amenité*, Fr. *amænitas*, Lat.] Pleasantness; agreeableness of situation.

To AME'RCE, â-mêrse'. *v. a.* [*amercier*, Fr.] *οφθαλμων ἀμὴν μερσαι*, seems to give the original.

1. To punish with pecuniary penalty; to exact a fine; to inflict a forfeiture. It is a word originally juridical, but adopted by other writers, and is used by Spenser of punishments in general.

Where every one that misseth then her make,
Shall be by him *amerc'd* with penance due. *Spenser.*

But I'll *amerce* you with so strong a fine,
That you shall all repent the loss of mine. *Shaksp.*

Of heaven, and from eternal splendours flung
For his revolt. *Milton.*

To shun *ames ace*, that sweeps my stakes away;
And watch the box, for fear they should convey

A'METHYST, âm'ê-*th*ist. *n. s.* [*αμέθυς*, contrary to wine, or contrary to drunkenness; so called, either because it is not quite the of colour of wine, or because it was imagined to prevent inebriation.]

A precious stone of a violet colour, bordering on purple. The oriental *amethyst*, is the hardest, scarcest, and most valuable; it is generally of a dove colour, though some are purple, and others white like the diamond. The German is of a violet colour, and the Spanish are of three sorts; the best are the blackest or deepest violet: others are almost quite white, and some few tinctured with yellow. The *amethyst*, is not extremely hard, but easy to be engraved upon, and is next in value to the emerald. *Savary. Chambers.*

Some stones approached the granate complexion; and several nearly resembled the *amethyst*. *Woodward.*

A'METHYST, âm'ê-*th*ist. [in heraldry] signifies the same colour in a nobleman's coat, that *purpure* does in a gentleman's.

Should hold her loathed. *Shaksp. Othello.*

A'MICABLE, âm'mê-kâ-bl.[405] *adj.* [*amicabilis*, Lat.] Friendly; kind. It is commonly used of more than one; as, they live in an *amicable* manner; but we seldom say, an *amicable* action, or an *amicable* man, though it be so used in this passage.

O grace serene! oh virtue heav'nly fair,
Divine oblivion of low-thoughted care!
Fresh blooming hope, gay daughter of the sky!
And faith, our early immortality!
Enter each mild, each *amicable* guest;
Receive and wrap me in eternal rest. *Pope.*

To lessen their defects, by citing mine. *Prior.*

A'MICE, âm'mîs.[142] *n. s.* [*amictus*, Lat. *amict*, Fr. *Primum ex sex indumentis episcopo et presbyteriis communibus sunt*, amictus, *alba*, *cingulum*, *stola*, *manipulus*, *et planeta*. Du Cange. *Amictus quo collum stringitur, et pectus tegitur, castitatem interioris hominis designat: tegit enim cor, ne vanitates cogitet; stringit autem collum, ne inde ad linguam transeat mendacium.* Bruno.] The first or undermost part of a priest's habit, over which he wears the alb.

Of each tree in the garden we may eat;
But of the fruit of this fair tree *amidst*
The garden, God hath said, ye shall not eat. *Milt.*

of the great duke, *amidst* the four slaves, chained to his pedestal, are very noble sights. *Addison.*

Hurl'd to and fro with jaculation dire. *Milton.*

The boar *amidst* my chrystal streams I bring,
And southern winds to blast my flow'ry spring.
Dryden.

Amata's breast the fury thus invades,
And fires with rage *amid* the sylvan shades. *Dryden.*

3. Amongst; conjoined with.

What tho' no real voice nor sound
Amid their radiant orbs be found?
In reason's ear they all rejoice,
And utter forth a glorious voice,
For ever singing, as they shine,
"The hand that made us is divine." *Addison*

AMI'SS, â-mîss. *adv.* [from *a*, which, in this form of composition, often signifies *according to*, and *miss*, the English particle, which shows any thing, like the Greek παρά, to be wrong, as, to *miscount*, to count erroneously; to *misdo*, to commit a crime; *amiss* therefore signifies *not right*, or *out of order*.]

1. Faulty; criminal.

For that which thou hast sworn to do *amiss*,
Is yet *amiss*, when it is truly done. *Shaksp. K. John*

2. Faultily; criminally.

5. Wrong; not according to the perfection of the thing, whatever it be.

Your kindred is not much *amiss*, 'tis true;
Yet I am somewhat better born than you. *Dryden.*

I built a wall, and when the masons plaid the knaves, nothing delighted me so much as to stand by, while my servants threw down what was *amiss*. *Swift.*

6. Reproachful; irreverent.

Every people, nation, and language, which speak any thing *amiss* against the God of Shadrach, Meshach, and Abednego, shall be cut in pieces, and their houses shall be made a dunghill; because there is no other God that can deliver after this sort. *Daniel*, iii. 29.

7. Impaired in health; as, I was somewhat *amiss* yesterday; but am well to-day.

8. *Amiss* is marked as an adverb, though it cannot always be adverbially rendered; because it always follows the substantive to which it relates, contrary to the nature of adjectives in English; and though we say the action was *amiss*, we never say an *amiss* action.

9. *Amiss* is used by *Shakspeare* as a noun substantive.

To my sick soul, as sin's true nature is,
Each toy seems prologue to some great *amiss*.
Hamlet.

The prophet David did think, that the very meeting of men together, and their accompanying one another to the house of God, should make the bond of their love insoluble, and tie them in a league of inviolable *amity*. *Hooker.*

The monarchy of Great Britain was in league and *amity* with all the world. *Sir John Davies.*

You have a noble and true conceit
Of godlike *amity*; which appears most strongly
In bearing thus the absence of your Lord. *Shaksp.*

And ye, oh Tyrians, with immortal hate
Pursue this race, this service dedicate
To my deplored ashes; let there be
'Twixt us and them no league nor *amity*. *Denham.*

AMMONI'AC, âm-mò'nè-âk. [505] *n. s.* The name of a drug.

GUM AMMONIAC is brought from the East Indies, and is supposed to ooze from an umbelliferous plant. Dioscorides says, it is the juice of a kind of ferula growing in Barbary, and the plant is called *agasyllis*. Pliny calls the tree *metopion*, which, he says, grows near the Temple of Jupiter Ammon, whence the gum takes its name. It ought to be in dry drops, white within, yellowish without, easily fusible, resinous, somewhat bitter, and of a very sharp taste and smell, somewhat like garlick. This gum is said to have served the ancients for incense, in their sacrifices. *Savary. Trevoux.*

SAL AMMONIAC is a volatile salt of two kinds, ancient and modern. The ancient sort, described by Pliny and Dioscorides, was a native salt, generated in those large inns where the crowds of pilgrims, coming from the temple of Jupiter Ammon, used to lodge; who travelling upon camels, and those creatures in Cyrene, where that celebrated temple stood, urining in the stables, or in the parched sands, out of this urine, which is remarkably strong, arose a kind of salt, denominated sometimes from the temple, *Ammoniac*, and sometimes from the country, *Cyreniac*. No more of this salt is produced there; and, from this deficiency, some suspect there never was any such thing: but this suspicion is removed, by the large quantities of a salt, nearly of the same nature, thrown out by mount Ætna.

The modern *sal ammoniac* is made in Egypt; where long-necked glass bottles, filled with soot, a little sea salt, and the urine of cattle, and having their mouths luted with a piece of wet cotton, are placed over an oven or furnace, in a thick bed of ashes, nothing but the necks appearing, and kept there two days and a night, with a continual strong fire. The steam swells up the cotton, and forms a paste at the vent hole, hindering the salts from evaporating; which stick to the top of the bottle, and are taken out in those large cakes, which they send to England. Only soot exhaled from dung, is the proper ingredient in this preparation; and the dung of camels affords the strongest.

Our chymists imitate the Egyptian *sal ammoniac*, by adding one part of common salt to five of urine; with which some mix that quantity of soot, and putting the whole in a vessel, they raise from it, by sublimation, a white, friable, farinaceous substance, which they call *sal ammoniac*. *Chambers.*

AMMONI'ACAL, âm-mò-nì'â-kâl. [506] *adj.* [from *ammoniac*.] Having the properties of ammoniac salt.

Human blood calcined, yields no fixed salt; nor is it a sal ammoniac; for that remains immutable after repeated distillations; and distillation destroys the *ammoniacal* quality of animal salts, and turns them alkaline: so that it is a salt neither quite fixed, nor quite volatile, nor quite acid, nor quite alkaline, nor quite *ammoniacal*; but soft and benign, approaching nearest to the nature of sal ammoniac. *Arbuthnot.*

AMMUNI'TION, âm-mû-nîsh'ûn. *n. s.* [supposed by some to come from *amonitio*, which, in the barbarous ages, seems to have signified supply of provision; but it surely may be more reasonably derived from *munitio*, fortification; *choses à munitions*, things for the fortresses.] Military stores.

They must make themselves defensible against strangers; and must have the assistance of some able military man, and convenient arms and *ammunition* for their defence. *Bacon.*

The colonel staid to put in the *ammunition* he brought with him; which was only twelve barrels of powder, and twelve hundred weight of match. *Clarendon*

All the rich mines of learning ransackt are,
To furnish *ammunition* for this war. *Denham.*

But now his stores of *ammunition* spent,
His naked valour is his only guard:

Rare thunders are from his dumb cannon sent,
And solitary guns are scarcely heard. *Dryden.*

AMMUNI'TION BREAD, âm-mû-nîsh'ûn-brêd. *n. s.* Bread for the supply of the armies or garrisons.

A'MNESTY, âm'nês-tè. *n. s.* [αμνηστια.] An act of oblivion; an act by which crimes against the government, to a certain time, are so obliterated, that they can never be brought into charge.

I never read of a law enacted to take away the force of all laws, by which a man may safely commit upon the last of June, what he would infallibly be hanged for, if he committed it on the first of July; by which the greatest criminals may escape, provided they continue long enough in power to antiquate their crimes, and, by stifling them a while, deceive the legislature into an *amnesty*. *Swift.*

AMNI'COLIST, âm-nîk'kò-lîst. *n. s.* [*amnicola*, Lat.] Inhabiting near a river. *Dict.*

AMNI'GENOUS, âm-nêd'jè-nûs. [314] *n. s.* [*amnigenus*, Lat.] Born of a river. *Dict.*

A'MNION, âm'nè-ôn. [166] } *n. s.* [Lat. per-
A'MNIOS, âm'nè-ôs. [166] } haps fr. ἀμνος.]

The innermost membrane with which the fœtus in the womb is more immediately covered, and with which the rest of the secundines, the chorion, and alantois, are ejected after birth. It is whiter and thinner than the chorion. It also contains a nutritious humour, separated by glands for that purpose, with which the fœtus is preserved. It is outwardly cloathed with the urinary membrane and the chorion, which sometimes stick so close to one another, that they can scarce be separated. It has also its vessels from the same origin as the chorion. *Quincy.*

AMO'MUM, â-mò'mûm. *n. s.* [Lat.] A sort of fruit.

The commentators on Pliny and Dioscorides suppose it to be a fruit different from ours. The modern *amomum* appears to be the *sison* of the ancients, or *bastard stone-parsley*. It resembles the muscat grape. This fruit is brought from the East Indies, and makes part of treacle. It is of a hot spicy taste and smell. *Trevoux. Chambers.*

AMO'NG, â-mûng'. [168] } *prep.* [amanȝ,

Amongst strawberries sow here and there some borage-seed; and you shall find the strawberries under those leaves far more large than their fellows. *Bacon.*

Now walking in the garden, by soft winds
Brought to their ears, while day declin'd: they heard,
And from his presence hid themselves, *among*
The thickest trees, both man and wife. *Milton.*

2. Conjoined with others, so as to make part of the number.

I have then, as you see, observed the failings of many great wits *amongst* the moderns, who have attempted to write epic poems. *Dryden.*

There were *among* the old Roman statues, several of Venus in different postures and habits; as there are many particular figures of her made after the same design. *Addison.*

A'MORIST, âm'ò-rîst. *n. s.* [from *amour.*] An inamorato; a gallant; a man professing love.

Female beauties are as fickle in their faces as their minds; though casualties should spare them, age brings in a necessity of decay; leaving doters upon red and white perplexed by incertainty both of the continuance of their mistress's kindness, and her beauty, both which are necessary to the *amorist's* joy and quiet. *Boyle.*

AMORO'SO, âm-ò-rò'sò. *n. s.* [Ital.] A man enamoured. *Dict.*

AMPUTA'TION, ăm-pû-tâ'shŭn. *n. s.* [*amputatio*, Lat.]

The operation of cutting off a limb, or other part of the body. The usual method of performing it, in the instance of a leg, is as follows: The proper part for the operation being four or five inches below the knee, the skin and flesh are first to be drawn very tight upwards, and secured from returning by a ligature two or three fingers broad: above this ligature another loose one is passed, for the gripe; which being twisted by means of a stick, may be straitened to any degree at pleasure. Then the patient being conveniently situated, and the operator placed to the inside of the limb, which is to be held by one assistant above, and another below the part designed for the operation, and the gripe sufficiently twisted to prevent too large an hæmorrhage, the flesh is, with a stroke or two, to be separated from the bone with the dismembering knife. Then the periostium being also divided from the bone with the back of the knife, saw the bone asunder, with as few strokes as possible. When two parallel bones are concerned, the flesh that grows between them must likewise be separated before the use of the saw. This being done, the gripe may be slackened, to give an opportunity of searching for the large blood-vessels, and securing the hæmorrhage at their mouths. After making proper applications to the stump, loosen the first ligature, and pull both the skin and the flesh, as far as conveniently may be, over the stump to cover it; and secure them with the cross stitch made at the depth of half or three quarters of an inch in the skin. Then apply pledgets, astringents, plaisters, and other necessaries. *Chambers.*

There is no reason, that any one commonwealth should *annihilate* that, whereupon the whole world has agreed. *Hooker.*

A'NTIMONY, ân'tê-mûn-ê.[556] *n. s.* [The stibium of the ancients, by the Greeks called στίμμι. The experiment, however, succeeded so ill, that they all died of it; and the medicine was thenceforward called *antimoine*, *antimonk.*]

Antimony is a mineral substance, of a metalline nature, having all the seeming characters of a real metal, except malleability; and may be called a semimetal, being a fossile glebe of some undetermined metal, combined with a sulphurous and stony substance. Mines of all metals afford it; that in gold mines is reckoned best. It has also its own mines in Hungary, Germany, and France. Its texture is full of little shining veins or threads, like needles; brittle as glass. Sometimes veins of a red or golden colour are intermixed, which is called *male antimony;* that without them being denominated *female antimony.* It fuses in the fire, though with some difficulty; and dissolves more easily in water. It destroys and dissipates all metals fused with it, except gold; and is therefore useful in refining. It is a common ingredient in speculums, or burning concaves; serving to give them a finer polish. It makes a part in bell metal; and renders the sound more clear. It is mingled with tin, to make it more hard, white, and sound; and with lead, in the casting of printers' letters, to render them more smooth and firm. It is a general help in the melting of metals, and especially in casting of cannon balls. In pharmacy it is used under various forms, and with various intentions, chiefly as an emetick. *Chambers.*

Had cool'd and languish'd in the *arterial* road. *Blackmore.*

As this mixture of blood and chyle passeth through the *arterial* tube, it is pressed by two contrary forces; that of the heart, driving it forward against the sides of the tubes; and the elastick force of the air, pressing it on the opposite sides of those air-bladders, along the surface of which this *arterial* tube creeps. *Arbuthnot.*

The third and inmost coat is a fine transparent membrane, which keeps the blood within its canal; that otherwise, upon the dilatation of an *artery*, would easily separate the spiral fibres from one another. As the *arteries* grow smaller, these coats grow thinner, and the coats of the veins seem only to be continuations of the capillary *arteries.* *Quincy*

The *arteries* are elastic tubes, endued with a contractile force, by which they drive the blood still forward; it being hindered from going backward by the valves of the heart. *Arbuthnot.*
